TITLE 30—MINERAL RESOURCES

CHAPTER III—BITUMINOUS COAL DIVISION

[Docket No. A–268]

PART 321—MINIMUM PRICE SCHEDULE, DISTRICT NO. 1

FINDINGS OF FACT, CONCLUSIONS OF LAW, MEMORANDUM OPINION AND ORDER IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 1 FOR RECLASSIFICATION AND PRICE CHANGES FOR THE COALS OF CERTAIN MINES HERETOFORE CLASSIFIED AND PRICED

This proceeding was instituted upon an original petition filed, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, with the Bituminous Coal Division by District Board No. 1. The petition requests that temporary and permanent relief be granted by revising the price classifications and minimum prices heretofore established for the coals of certain code-member producers in District No. 1.

Pursuant to the request for temporary relief, and after notice to interested persons, an informal conference was held in accordance with § 301.106 of the Rules and Regulations Governing Practice and Procedure in proceedings instituted pursuant to section 4 II (d) of the Act, and temporary relief was granted as prayed for in the original petition.

In accordance with an Order of the Director and after notice to all interested persons, a hearing in this matter was held before Floyd McGown, a duly designated Examiner of the Bituminous Coal Division, at a hearing room of the Division in Washington, D. C., at which all interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. Only original petitioner appeared. At the conclusion of the hearing, the preparation and filing of a report by the Examiner was waived and the record thereupon was submitted to the undersigned, who has considered the record in this matter.

The petition of District Board 1 herein requests a revision in the price classifications and effective minimum prices established for the coals produced at some twenty different mines in District 1. The classifications and minimum prices requested for the coals of these mines are shown in the schedules hereto attached. With the exception of the coals produced at the Shaffer Mine (Mine Index No. 457) of I. Shaffer & Sons, all of the coals in question are shipped by truck only. The Shaffer Mine ships the coal produced at its mine both by truck and by rail.

The testimony of a representative of the District Board shows that when minimum prices were originally established for the coals in question, errors or mistakes were made either in designating the seams in which the coals were produced or in designating the subdistricts in which the mines were located; that as a result of these errors, minimum prices were established which are not in proper coordination with other coals produced in District 1.

An exhibit was introduced showing in detail the corrections which are required for each particular mine. It appears that the classifications and minimum prices as set forth in the schedules, based upon these corrections, will effect proper coordination between the coals to which said prices apply and competing coals.

Upon the basis of the uncontroverted evidence, I find that the classifications and minimum prices, as well as the seam and sub-district designations, shown in the schedules hereto attached for the coals specified therein, are proper and should be established; that said classifications and minimum prices conform in all respects to those heretofore established for comparable coals in District 1, and will preserve fair competitive opportunities for the producers of said coals.

I further find from the uncontroverted evidence that the McGarvey No. 2 Mine (Mine Index No. 2346) of McGarvey Brothers should be deleted from the District 1 price schedule for truck shipments, for the reason that this same mine is properly listed in said schedule as the Swope Mine (Mine Index No. 2493) of McGarvey Brothers.

I further find that a minimum price for truck shipments was erroneously established for coal in Size Group 5 produced at Askey's Mine (Mine Index No. 1026) of Askey Coal Company and that said price should be deleted from the price schedule.

Upon the basis of the foregoing Findings of Fact, I conclude:

1. That the Schedules of Effective Minimum Prices for District No. 1 for All Shipments Except Truck and for Truck Shipments should be amended in accordance with the schedules, marked Supplement R and Supplement T, annexed hereto and made a part hereof.

2. That McGarvey No. 2 Mine (Mine Index No. 2346) of McGarvey Brothers should be deleted from the Schedule of Effective Minimum Prices for District No. 1 for Truck Shipments.

3. That the minimum price for truck shipments for the coal in Size Group 5 produced at Askey's Mine (Mine Index No. 1026) of Askey Coal Company should be deleted from the schedule.

4. That such amendments of the price schedules for District No. 1 are required in order to effectuate the purposes of sections 4 II (a) and (b) of the Act and to comply with the standards thereof.

Now therefore it is ordered, That commencing forthwith § 321.7 (*Alphabetical list of code members*) is amended by adding thereto Supplement R, and § 321.24 (*General prices*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

It is further ordered, That the McGarvey Mine (Mine Index No. 2346) of McGarvey Brothers, be and it hereby is deleted from the Schedule of Effective Minimum Prices for District No. 1 for Truck Shipments.

It is further ordered, That the minimum price established for coal in Size Group 5 of Askey's Mine (Mine Index No. 1026) of Askey Coal Company be and it hereby is deleted from the Schedule of Effective Minimum Prices for District 1 for Truck Shipments.

Dated: September 6, 1941.

Director.

PART 323—MINIMUM PRICE SCHEDULE, DISTRICT NO. 3

FINDINGS OF FACT, CONCLUSIONS OF LAW, MEMORANDUM OPINION, AND ORDER IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 3 AND CERTAIN INDIVIDUAL CODE MEMBER PRODUCERS IN DISTRICT NO. 3 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF CERTAIN MINES IN DISTRICT NO. 3 NOT HERETOFORE CLASSIFIED AND PRICED

This proceeding was instituted upon petitions filed with the Bituminous Coal Division, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, by District Board 3 (Docket No. A–381); David Morgan, a code member producer; operating the Morgan Mine (Mine Index No. 1126) at Valley Point, West Virginia, (Docket No. A–386); and the Marlin Coal Company, a code member producer, operating the Byrne Mine (Mine Index No. 31 [1] at Jordan, West Virginia, (Docket No. A–387), respectively. The petitions propose the establishment of certain minimum prices for certain mines not heretofore classified, as set forth in more detail therein. District Board 3 amended its petition in certain respects at the hearing.

Pursuant to Order of the Director, the petitions herein were consolidated, temporary relief was granted to each petitioner in accordance with the requests contained in its petition, and a hearing in this matter was held before Charles O. Fowler, a duly designated Examiner of the Division, at a hearing-room thereof in Washington, D. C. All interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. The petitioners appeared. The preparation and filing of a report by the Examiner was waived by stipulation of the interested parties, and the record was thereupon submitted to the undersigned.

Daniel T. Buckley, chairman of District Board 3, testified that the prices which District Board 3 seeks to have established herein coincide with already established prices and classifications of coals of comparable quality. The witness Buckley further testified that district Board 3 is in accord with the requests made in the petitions of the Marlin Coal Company and David Morgan herein. In his opinion, if the prices herein requested are established, the fair competitive opportunities of producers in District 3 will be maintained.

Upon the basis of the uncontroverted evidence I find and conclude that the classifications and minimum prices shown in § 323.6 (*Alphabetical list of code members*) is amended by adding thereto Supplement R–I, § 323.8 (*Special prices*—(b) *Railroad fuel prices for all movements except via lakes*) is amended by adding thereto Supplement R–II, § 323.8 (*Special prices*—(c) *Railroad fuel prices for movement via all lakes—all ports*) is amended by adding thereto Supplement R–III, and § 323.23 (*General prices*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

Now, therefore, it is ordered, That commencing fifteen (15) days from the date hereof the Schedule of Effective Minimum Prices for District No. 3 for All Shipments Except Truck and the Schedule of Effective Minimum Prices for District No. 3 for Truck Shipments be and they hereby are amended in accordance with the schedules hereto attached, marked "Supplement R" and "Supplement T," respectively, and made a part hereof.

Dated: September 3, 1941.

PART 324—MINIMUM PRICE SCHEDULE, DISTRICT NO. 4

ORDER GRANTING TEMPORARY RELIEF AND CONDITIONALLY PROVIDING FOR FINAL RELIEF IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 4 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF CERTAIN MINES IN DISTRICT NO. 4

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, having been duly filed with this Division by the above-named party, requesting the establishment, both temporary and permanent, of price classifications and minimum prices for the coals of certain mines in District No. 4; and

The Director finding that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The Director deeming his action necessary in order to effectuate the purposes of the Act;

It is ordered, That, pending final disposition of the above-entitled matter, temporary relief is granted as follows: Commencing forthwith § 324.7 (*Alphabetical list of code members*) is amended by adding thereto Supplement R–I, § 324.8 (*Numerical list of mines*) is amended by adding thereto Supplement R–II, § 324.2 (*Seasonal discounts*) is amended by adding thereto Supplement R–III, § 324.9 (*Recapitulation of price classifications*) is amended by adding thereto Supplement R–IV, § 324.11 (*Special prices*—(a) *Railroad fuel prices for all movements exclusive of lake cargo railroad fuel*) is amended by adding thereto Supplement R–V, § 324.24 (*General prices in cents per net ton for shipment into all market areas*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

Price classifications and minimum prices have not been established herein for certain coals for which they were proposed in the original petition because such coals have heretofore been classified and priced.[1]

The petition proposed price classifications and minimum prices for the coals of the Muddy Duck Mine, Mine Index No. 755, of the Orbiston Coal Company. It appears from the official records of the Division that this mine was abandoned on December 31, 1939, and that the only mine now operated in District No. 4 by Orbiston Coal Company is Muddy Duck No. 2 Mine, Mine Index No. 2214. Accordingly, price classifications and minimum prices have been established for the coals of the Muddy Duck No. 2 Mine, Mine Index No. 2214 For All Shipments Except Truck.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this Order, pursuant to the Rules and Regulations Governing Practice and Procedure Before the Bituminous Coal Division in Proceedings Instituted Pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this Order, unless the Director shall otherwise order.

Dated: September 15, 1941.

[SEAL] H. A. GRAY,
Director.

PART 331—MINIMUM PRICE SCHEDULE, DISTRICT NO. 11

FINDINGS OF FACT, CONCLUSIONS OF LAW, MEMORANDUM OPINION AND ORDER IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 11 FOR TEMPORARY AND PERMANENT ORDERS PROVIDING FOR REVISIONS OF THE PRICES FOR RAIL LOCOMOTIVE FUEL PURCHASED BY CHICAGO GREAT WESTERN RAILWAY COMPANY FROM CODE MEMBER PRODUCERS IN DISTRICT NO. 11

This is a proceeding instituted upon an original petition filed on March 13, 1941, by District Board No. 11 with the Bituminous Coal Division, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937. The petition prays for both temporary and permanent orders granting code members in District No. 11 (1) a reduction of 12 cents per net ton on mine run coals, (2) an increase of 22 cents per net ton on screenings, and (3) the privilege of substituting coals included in Size Groups 8 to 29, inclusive, on sales of screenings, on shipments of railroad locomotive fuel to the Chicago Great Western Railway Company.

District Board No. 10 and the Sahara Coal Company, a code member of District No. 10, filed petitions of intervention.

Pursuant to Order of the Director and after due notice to all interested parties, a hearing was held on May 23 and May 27, 1941, before D. C. McCurtain, a duly designated Examiner of the Bituminous Coal Division, at a hearing room of the Division at Washington, D. C. All interested parties were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. Only original petitioner appeared at the hearing on May 23, 1941.[1]

A stipulation between District Boards 10 and 11 was filed with the Division on June 30, 1941, consenting to the granting of the relief prayed for by the petitioner, but stipulating further that certain prices be established for the coals of the Danville subdistrict of District No. 10 for sale to the Chicago Great Western Railway Company for delivery at Sycamore, Illinois.[2]

The preparation and filing of a report by the Examiner were waived and the matter thereupon was submitted to the Acting Director.

[1] The Sahara Coal Company, one of the interveners, entered its appearance, but expressly stated it would not participate in the hearing.

[2] Despite the execution of a stipulation, the additional relief requested for the Danville subdistrict cannot, of course, be granted in the absence of adequate supporting evidence demonstrating that such relief is necessary to effectuate the purposes of sections 4 II (a) and 4 II (b) of the Act.

The original petition alleges that delivered prices for District No. 11 mine run coals sold to the Chicago Great Western Railway Company on shipments consigned to Sycamore, Illinois, are 10 to 14 cents per ton higher than delivered prices for the Central Illinois subdistrict mine run coals of District No. 10 consigned to the same destination; that delivered prices on District No. 11 screenings to the same consignee at Sycamore, Illinois are from 20 to 23 cents per ton less than those for the Central Illinois subdistrict screenings; and that code members of District No. 11 do not have the privilege of substituting coals included in Size Goups 8 to 29, inclusive, on orders for screenings, while such privilege is accorded to code members of the Central Illinois subdistrict of District No. 10. The petition prays for an equalization of the above prices between code members of Districts Nos. 10 and 11, and requests that the substitution privilege referred to be extended to code members of District No. 11.

The only witness for the original petitioner is in charge of purchases for railroad fuel for the Chicago Great Western Railway Company. The witness described the divisions of rates applicable on locomotive fuel from Districts Nos. 10, 11, and 15. He testified that prior to October 1, 1940, the Chicago requirements of the railroad were purchased largely from Indiana fields and the Sycamore coaling station in Central Illinois; that since October 1, 1940, the railroad has purchased only a small emergency supply of fuel for locomotive purposes from District No. 11 because the prices fixed by the Division for District No. 11 made it prohibitive for the railroad to make purchases from District No. 11; and that fuel requirements formerly supplied by District No. 11 are now almost entirely supplied by the Central Illinois subdistrict. He admitted testifying in proceedings in General Docket No. 15 that coal of District No. 11 was worth slightly more than the Central Illinois coal, but stated that such appraisal was based on the fact that the coal purchased from the Central Illinois subdistrict had been entirely nut coal, while purchases from District No. 11 were largely egg coal. Certain testimony from General Docket No. 15, incorporated by reference into this record, indicates that the railroad purchased 2" x 1¼" nut coal from Central Illinois at that time while purchases in Indiana were 4" x 1¼" egg coal.

The witness further tesified that the railroad would be unwilling to pay more for Indiana screenings, with the substitution privilege, than for Central Illinois screenings with the same privilege; that one District does not afford a better locomotive fuel than the other; and that if the prayer of the petition is granted, it is the intention of this railroad to continue to purchase coal from the two Districts in about the same proportion that it had prior to October 1, 1940.

The petitioner has set out its requested minimum f. o. b. mine prices in Schedules 1 and 2, attached to its petition. In order to avoid double absorptions, however, on shipments of locomotive fuel to the Chicago Great Western Railway Company from District No. 11 mines, these Schedules must be revised as follows: (1) Footnotes (e) and (f) of Schedule (1) should be deleted; and (2) actual divisions instead of constructed divisions should be used in Schedule (2) to establish f. o. b. mine prices.

Upon the basis of the uncontroverted evidence, I find and conclude: (1) That the minimum prices shown in the Supplement annexed hereto and made a part hereof for the coals specified therein are proper and should be established in lieu of the presently effective minimum prices for such coals; and (2) that such revision of the rail price schedule for District No. 11 is required in order to effectuate the purposes of sections 4 II (a) and 4 II (b) of the Act and to comply with the standards thereof.

Now, therefore, it is ordered, That, effective ten days from the date hereof, § 331.10 (*Special prices: Railroad locomotive fuel*) in the Schedule of Effective Minimum Prices for District No. 11 for All Shipments Except Truck be and it is hereby amended by establishing the minimum prices set forth in the Supplement, annexed hereto and made a part hereof, in lieu of the presently effective minimum prices for the coals specified therein.

Dated: September 17, 1941.

[SEAL] H. A. GRAY,
Director.

PART 331—MINIMUM PRICE SCHEDULE, DISTRICT NO. 11

MEMORANDUM OPINION AND ORDER GRANTING TEMPORARY RELIEF AND CONDITIONALLY PROVIDING FOR FINAL RELIEF IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 11, FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE GLEN AYR #1 MINE, MINE INDEX NO. 743, TO THE STANDARD FUEL COMPANY, INCORPORATED, FOR SHIPMENT BY RAIL

This preceeding is instituted upon an original petition and an amendment thereto filed by District Board No. 11 pursuant to section 4 II (d) of the Bituminous Coal Act of 1937. The petition requests the establishment of price classifications in minimum prices for the coal to be produced at the Glen Ayr #1 Mine, Mine Index No. 743, of the Standard Fuel Company, Incorporated, for shipment by rail to all market areas.

An informal conference was, upon due notice to interested parties, held on July 18, 1941, at which time all interested parties were given the opportunity to express their views concerning the prayer for temporary relief. Only the original petitioner was represented.

The petitioner made the following representations at the informal conference: The Glen Ayr #1 Mine, Mine Index No. 743, located in the Standard Fourth Vein of the Brazil Clinton subdistrict of District No. 11, has been in operation for some years. Minimum prices and price classifications have been established for said mine for shipment by truck. It is now desired to ship coal produced at the said mine by rail and it is necessary that

minimum prices and price classifications therefor be established. Throughout District No. 11 constant relationships have been established as between f. o. b. mine prices for coal shipped by truck and for coal shipped from the same mine by

ested persons will not be unduly prejudiced pending the final disposition of this proceeding.

Now, therefore, it is ordered, That temporary relief in the above-entitled matter is granted as follows: Commenc-

minimum prices and price classifications therefor be established. Throughout District No. 11 constant relationships have been established as between f. o. b. mine prices for coal shipped by truck and for coal shipped from the same mine by rail and as between the various size groups, and these relationships should be preserved.

The petitioner further represented that the Glen Ayr #1 Mine, which is in Freight Origin Group No. 33, will enjoy a freight rate lower by 10 cents into Market Area No. 33 than that applying to certain other mines in the same freight origin group. It was requested, therefore, that the Glen Ayr #1 Mine not be granted the absorption of 10 cents of the freight rate to Market Area No. 33, which is granted to other mines in the same freight origin group having a higher freight rate. It was further urged by the petitioner that unless temporary relief be granted as prayed, Standard Fuel Company, Incorporated, will be deprived of an opportunity to ship its coal to markets by rail.

In view of the foregoing circumstances, it appears to the Director that a reasonable showing of necessity has been made for the granting of the temporary relief requested, pending final disposition of this proceeding; and that an adequate showing has been made that other interested persons will not be unduly prejudiced pending the final disposition of this proceeding.

Now, therefore, it is ordered, That temporary relief in the above-entitled matter is granted as follows: Commencing forthwith § 331.5 (*Alphabetical list of code members*) is amended by adding thereto Supplement R–I, § 331.8 (*General prices*) is amended by adding thereto Supplement R–II, and § 331.10 (*Special prices: Railroad locomotive fuel*) is amended by adding thereto Supplement R–III, which supplements are hereinafter set forth and hereby made a part hereof.

It is further ordered, That pleadings in opposition to the original petition as amended in the above-entitled matter and applications to stay, terminate, or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this Order, pursuant to the Rules and Regulations Governing Practice and Procedure Before the Bituminous Coal Division in Proceedings Instituted Pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this Order unless the Director shall otherwise order.

Dated: September 6, 1941.

Director.

TITLE 41—PUBLIC CONTRACTS

CHAPTER II—DIVISION OF PUBLIC CONTRACTS

PART 202—MINIMUM WAGE DETERMINATIONS

IN THE MATTER OF THE DETERMINATION OF THE PREVAILING MINIMUM WAGES FOR THE EVAPORATED MILK INDUSTRY

This matter is before me pursuant to section 1 (b) of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35), entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes", otherwise known as the Walsh-Healey Public Contracts Act.

At my direction the Public Contracts Board, created in accordance with the provisions of section 4 of said Act by Administrative Order dated October 6, 1936, held a public hearing in the matter of prevailing minimum wages in the manufacture of evaporated and condensed milk. Notice of the hearing was sent to all manufacturers of those commodities listed in recognized commercial registers, to interested labor organizers, trade associations, and all other known interested parties. Invitation to attend the hearing was also extended through the national press and by publication in the FEDERAL REGISTER (3 F.R. 2510).

On the basis of the evidence presented at the hearing, the Board made and submitted its findings and recommendations which were circularized on February 24, 1940, by the Assistant Administrator of the Division of Public Contracts, to afford parties an opportunity to register objection or approval before a decision was made by me.

The recommendations of the Board were that the prevailing minimum wages in the manufacture or supply of evaporated milk should be determined by me to be 50 cents an hour in the States of Washington, Oregon, and California; 40 cents an hour in the States of Idaho, Montana, Nevada, Utah, Arizona, New Mexico, Colorado, Wyoming, North and South Dakota, Nebraska, Minnesota, Iowa, Wisconsin, Michigan, and Ohio; and 32.5 cents an hour in the remaining States and the District of Columbia. The Board excluded condensed milk from the scope of its recommendation for the reason that the Government has not purchased condensed milk in the past twenty years and will probably not do so in the future, and dry milk for the reason that it was not included in the subject of the hearing.

Because of the possibility that the wage structure of the Evaporated Milk Industry had experienced a change since the hearing held before the Public Contracts Board and since its findings and recommendations were circularized, the Administrator of the Division of Public Contracts issued a notice of opportunity to show cause on August 16, 1941 why I should not adopt the findings and recommendations of the Board and determine the aforementioned wage rates to be the presently prevailing minimum wages in the Evaporated Milk Industry within the meaning of section 1 (b) of the Walsh-Healey Public Contracts Act.

The notice of opportunity to show cause was sent to known members of the industry, trade unions, trade publications and to trade associations. Notice was also given to interested parties through the national press and by publication in the FEDERAL REGISTER (6 F.R. 4170).

Two statements have been filed in response to the notice, one by the Organization of the Evaporated Milk Industry under the Agricultural Adjustment Administration, and the other by a leading member of the industry. The first reasserts the position taken throughout by the Organization that all dairy products without limitation are exempted from the operation of the Walsh-Healey Public Contracts Act by virtue of the provisions of section 9 relating to such products. Assuming for the purposes of its argument that the Act does apply, the Organization directs the second half of its statement to a summarization of the points and arguments which it had previously advanced in opposition to the Board's findings and recommendations respecting the minimum wage rates prevailing in the industry. A concise statement of its objections is found in the Organization's brief dated March 6, 1940.

The statement filed by the individual member of the industry urges a 5-cent differential for women workers in the two areas for which the Board has found and recommended the rates to be 50 cents and 40 cents; in other words, that the rates of 50 cents and 40 cents for the respective areas be limited to men workers, with rates of 45 and 35 cents for women workers; no differential or change was urged with respect to the recommended rate of 32.5 cents for the area embracing the remaining States and the District of Columbia.

The jurisdictional question of the applicability of the Walsh-Healey Public Contracts Act to contracts for evaporated milk otherwise subject to the Act has been considered by the Department of Labor, both prior to and during the progress of the proceedings in this matter, resulting in the issuance of the ruling that the pertinent provisions of section 9 exempted only products perishable in fact and that evaporated milk was not such a product. I see no reason to alter the position heretofore taken on the question.

The disagreement on the part of industry with the wage rates recommended by the Board is predicated generally upon the ground that the Board based its recommendations upon the survey of wages made and presented by the Women's Bureau of the Department of Labor and failed to consider the wage data furnished by the Evaporated Milk Association. I have, however, given careful thought to all of the enumerated objections in the terms in which they have been expressed in the brief of March 6, 1940 and in the statement in response to the notice of opportunity to show cause. My consideration of the wage data from both of the sources mentioned convinces me that no prejudicial error has resulted from such emphasis as the Board may have given to the wage survey of the Women's Bureau. Standing alone, the wage data furnished by the industry would be inadequate for the purposes of this determination. Weighed with the former, I do not find sufficient cause for modifying the rates recommended by the Board.

As to the requested differential for women workers, the determination of the prevailing minimum wages in a given industry pursuant to the provisions of section 1 (b) of the Act, does not permit of consideration of the distinction in sex of the workers engaged in the industry. The minimum wage levels must be considered irrespective of sex in arriving at the basic minimum prevailing in the industry for a given area.

In approving and adopting the findings and recommendations of the Board, I also concur in the exclusion of condensed milk and dry milk from further consideration for the reasons given by the Board.

In consideration of the foregoing and on the facts and circumstances,

I hereby determine:

§ 202.40 *Evaporated milk industry.* The prevailing minimum wages for persons employed in the performance of contracts with agencies of the United States, subject to the provisions of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35), for the manufacture and supply of evaporated milk, to be the amount indicated for each of the following groups of States, whether arrived at upon a time or piece work basis:

(a) 50 cents per hour or $20.00 per week of forty hours in the States of Washington, Oregon, and California;

(b) 40 cents per hour or $16.00 per week of forty hours in the States of Idaho, Montana, Nevada, Utah, Arizona, New Mexico, Colorado, Wyoming, North and South Dakota, Nebraska, Minnesota, Iowa, Wisconsin, Michigan, and Ohio;

(c) 32.5 cents per hour or $13.00 per week of forty hours in the remaining States of the United States and the District of Columbia.

This determination shall be effective and the minimum wages hereby estab-

lished shall apply to all contracts subject to the aforesaid Act of June 30, 1936, bids for which are solicited or negotiations otherwise commenced on and after November 3, 1941.

Nothing in this determination shall affect such obligations for the payment of minimum wages as an employer may have under the Fair Labor Standards Act of 1938 or any wage order thereunder, or under any other law, or agreement, more favorable to employees than the requirements of this determination.

Dated: October 3, 1941.

FRANCES PERKINS,
Secretary.

Pursuant to the authority vested in the Secretary of Agriculture under sections 7 to 17, inclusive, of the Soil Conservation and Domestic Allotment Act, as amended, and section 32 of the Act of August 24, 1935, as amended, SCP-2, Regulations Governing the 1941 Supplementary Cotton Program, issued January 29, 1941, is hereby further amended as follows:

Paragraph (a) of § 707.2 is further amended to read as follows:

§ 707.2 *Cotton order stamp payments.* (a) If the acreage planted to cotton on the farm in 1941 has been adjusted below the acreage allotment determined for the farm under the provisions of the 1941 Agricultural Conservation Program or the measured acreage of cotton on the farm in 1940, whichever is smaller, such adjustment in the acreage of cotton shall qualify the farm for cotton order stamp payments: *Provided*, That (1) prior to June 15, 1941, notice of the intention to make an adjustment was filed with the county agricultural conservation committee, on a prescribed form, by the operator of the farm, for and on behalf of himself and all other producers on the farm interested in the production of cotton thereon in 1941, and (2) the acreage so diverted was not planted to any crop (except peanuts) for which a special acreage allotment was, or could have been, determined for the farm under the provisions of the 1941 Agricultural Con-

servation Program. The acreage diverted from cotton shall be presumed not to have been used for the production of a crop for which a special acreage allotment was, or could have been, determined for the farm, if the county committee finds that the sum of the 1941 acreages of wheat, corn (in the commercial corn area), potatoes, commercial vegetables, rice, and tobacco for the farm does not exceed the sum of its allotments or permitted acreages for such crops under the 1941 Agricultural Conservation Program. If the sum of the acreages of the crops named above exceeds the sum of the respective allotments or permitted acreages, the acreage diverted from the production of cotton in 1941 shall be reduced by such excess and payment shall be made on the reduced diverted acreage, if any.

CHAPTER VIII—SUGAR DIVISION OF THE AGRICULTURAL ADJUSTMENT ADMINISTRATION

PART 802—SUGAR DETERMINATIONS

DETERMINATION OF PROPORTIONATE SHARES FOR FARMS IN THE DOMESTIC BEET SUGAR AREA FOR THE 1941 CROP, PURSUANT TO THE SUGAR ACT OF 1937, AS AMENDED

Whereas section 302 of the Sugar Act of 1937, as amended, provides, in part, as follows:

(a) The amount of sugar or liquid sugar with respect to which payment may be made shall be the amount of sugar or liquid sugar commercially recoverable, as determined by the Secretary, from the sugar beets or sugarcane grown on the farm and marketed (or processed by the producer) not in excess of the proportionate share for the farm, as determined by the Secretary, of the quantity of sugar beets or sugarcane for the extraction of sugar or liquid sugar required to be processed to enable the producing area in which the crop of sugar beets or sugarcane is grown to meet the quota (and provide a normal carry-over inventory) estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed.

(b) In determining the proportionate shares with respect to a farm, the Secretary may take into consideration the past production on the farm of sugar beets and sugarcane marketed (or processed) for the extraction of sugar or liquid sugar and the ability to produce such sugar beets or sugarcane, and the Secretary shall, insofar as practicable, protect the interests of new producers and small producers and the interests of producers who are cash tenants, share-tenants, adherent planters, or share-croppers;

and

Whereas subsection (c) of section 301 of the said act provides, as one of the conditions for payment to producers of sugar beets and sugarcane, as follows:

(c) That there shall not have been marketed (or processed) an amount (in terms of planted acreage, weight, or recoverable sugar content) of sugar beets or sugarcane grown on the farm and used for the production of sugar or liquid sugar to be marketed in, or so as to compete with or otherwise directly affect interstate or foreign commerce, in excess of the proportionate share for the farm, as determined by the Secretary pursuant to the provisions of section 302, of the total quantity of sugar beets or sugarcane required to be processed to enable the area in which such sugar beets or sugarcane are produced to meet the quota (and provide a normal carryover inventory) as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed;

Now, therefore, the following determination is hereby issued:

§ 802.17d *Proportionate shares of sugar beets for the 1941 crop*—(a) *Farm proportionate share and acreage for payment.* The proportionate share of sugar beets for the 1941 crop for each farm in the domestic beet sugar area shall be the number of acres of sugar beets planted thereon for the production of sugar beets to be marketed (or processed by the producer) for the extraction of sugar or liquid sugar: *Provided, however,* That payments shall be limited to the acreage heretofore established by apportioning the total acreage for the district (as hereinafter set forth) among farms situated therein on the basis of the acreage planted to sugar beets during the years 1938, 1939, and 1940, and the ability of the producer to produce sugar beets, as measured by availability and suitability of land, area of available fields, availability of irrigation water, adequate drainage, availability of production and marketing facilities, and production experience.

(b) *Total acreage for payment by districts.* The total of the acreages established under the proviso to (a) above for farms by districts shall not be in excess of the following:

PART 802—SUGAR DETERMINATIONS

DETERMINATION OF PROPORTIONATE SHARES FOR FARMS IN THE MAINLAND CANE SUGAR AREA FOR THE 1941 CROP (REVISED).

Whereas section 302 of the Sugar Act of 1937, as amended, provides in part as follows:

(a) The amount of sugar or liquid sugar with respect to which payment may be made shall be the amount of sugar or liquid sugar commercially recoverable, as determined by the Secretary, from the sugar beets or sugarcane grown on the farm and marketed (or processed by the producer) not in excess of the proportionate share for the farm, as determined by the Secretary, of the quantity of sugar beets or sugarcane for the extraction of sugar or liquid sugar required to be processed to enable the producing area in which the crop of sugar beets or sugarcane is grown to meet the quota (and provide a normal carry-over inventory) estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed.

(b) In determining the proportionate shares with respect to a farm, the Secretary may take into consideration the past production on the farm of sugar beets and sugarcane marketed (or processed) for the extraction of sugar or liquid sugar and the ability to produce such sugar beets or sugarcane, and the Secretary shall, insofar as practicable, protect the interests of new producers and small producers and the interests of producers who are cash tenants, share-tenants, adherent planters, or share-croppers;

and

Whereas subsection (c) of section 301 of the said act provides, as one of the conditions for payment to producers of sugar beets and sugarcane, as follows:

(c) That there shall not have been marketed (or processed) an amount (in terms of planted acreage, weight, or recoverable sugar content) of sugar beets or sugarcane grown on the farm and used for the production of sugar or liquid sugar to be marketed in, or so as to compete with or otherwise directly affect interstate or foreign commerce, in excess of the proportionate share for the farm, as determined by the Secretary pursuant to the provisions of section 302, of the total quantity of sugar beets or sugarcane required to be processed to enable the area in which such sugar beets or sugarcane are produced to meet the quota (and provide a normal carry-over inventory) as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar or liquid sugar from such crop normally would be marketed;

Now, therefore, the following determination is hereby issued:

§ 802.26c *Proportionate shares of sugarcane for the mainland cane sugar area for the 1941 crop.*—(a) *Farm proportionate share and acreage for payment.* The proportionate share of sugarcane for the 1941 crop for any farm in the mainland cane sugar area shall be the number of acres planted thereon for the production of sugarcane to be marketed (or processed by the producer) for the extraction of sugar or liquid sugar during the 1941 crop season: *Provided, however,* That payments shall be limited to the acreage established for the farm as follows:

(1) For any farm in the mainland cane sugar area, except as provided in subparagraphs (2), (3), and (4) hereof, an acreage equal to the greater of either:

(i) The 1940 proportionate share acreage for the farm, or

(ii) The planted proportionate share acreage measured for harvest on the farm under the 1938 mainland sugarcane program.

In no event, however, shall such acreage for any such farm be greater than 90.75 per centum of the maximum proportionate share obtainable for the farm under the 1938 mainland sugarcane program.

(2) For any farm having a proportionate share for the 1940 crop of ten acres or less or for any farm for which a proportionate share was not established in 1940 (new grower), an acreage equal to the greater of either:

(i) The planted proportionate share acreage measured for harvest on the farm under the 1940 mainland sugarcane program, or

(ii) The lesser of either, ten acres or one-third of the acreage on the farm suitable for the production of sugarcane.

(3) For any farm operated by a producer-owned and producer-controlled cooperative association which is eligible to obtain a loan under or pursuant to any existing Act of Congress, and which was organized prior to November 29, 1940, an acreage equal to not less than the lesser of either:

(i) Ten acres multiplied by the number of members of the association engaged in the production of sugarcane on the farm, or

(ii) One-third of the acreage on the farm suitable for the production of sugarcane.

(4) The minimum such acreage for any farm in the mainland cane sugar area shall be:

(i) For any farm on which the planted proportionate share acreage measured for harvest under the 1940 mainland sugarcane program was in excess of ten acres, not less than ten acres;

(ii) for any farm for which a 1939 proportionate share was established under the proviso in paragraph (a) of the determination of proportionate shares for the 1939 crop, not less than the planted proportionate share acreage measured for harvest under the 1939 mainland sugarcane program; or

(iii) in any event not less than five acres.

(b) *Tenant and sharecropper protection.* The provisions of this determination are subject to the following conditions:

(1) That no change shall have been made in the leasing or cropping agreements for the purpose of diverting to producers any payment to which tenants or sharecroppers would be entitled if their 1940 leasing or cropping agreements were in effect;

(2) That there shall have been no interference by any producer with any contracts heretofore entered into by tenants or sharecroppers for the sale of their sugarcane or their share of the sugarcane produced on the farm.

This determination supersedes the "Determination of Proportionate Shares for Farms in the Mainland Cane Sugar Area for the 1941 Crop", issued November 29, 1940. (Sec. 302, 50 Stat. 910; 7 U.S.C., 1132)

CHAPTER I—CIVIL AERONAUTICS BOARD

PART 61—SCHEDULED AIR CARRIER RULES

SPECIAL REGULATION

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 3rd day of October 1941.

It appearing that: The provisions of §§ 61.3220 and 61.3230 of the Civil Air Regulations forbidding the operation of multi-engine land aircraft over water beyond a gliding distance from shore without the aid of power unless equipped with certain equipment for over-water flying causes scheduled air carrier aircraft to fly between Oakland Municipal Airport, Oakland, California, and San Francisco Municipal Airport, San Francisco, California, at altitudes frequently requiring unnecessary instrument operation;

The Board finds that: Its action is in the public interest and in the interest of safety of air transportation;

Now, therefore, The Civil Aeronautics Board, acting pursuant to the authority vested in it by the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 601 and 604 of said Act, makes and promulgates the following regulation:

Notwithstanding the provisions of §§ 61.3220 and 61.3230, scheduled air carriers in air transportation may operate multi-engine land aircraft on a direct route between Oakland Municipal Airport, Oakland, California, and San Francisco Municipal Airport, San Francisco, California, over the San Francisco Bay at a distance beyond gliding distance from shore without the aid of power when such operation is authorized by the Administrator.

By the Civil Aeronautics Board.

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

§ 19.400–1 *Scope and application of Supplement T.* In lieu of the tax imposed under sections 11 and 12, an individual may elect to pay the tax imposed under section 400, if his gross income does not exceed $3,000 and if his gross income consists wholly of one or more of the following: Salary, wages, compensation for personal services, dividends, interest, rent, annuities, or royalties. For the purpose of the $3,000 limitation, the amount of an individual's gross income shall be determined without subtracting any amount on account of such individual's dependents. For example, A has a gross income, consisting of salary, of $3,200 for 1941. He has two dependents. For the purpose of the $3,000 limitation, his gross income is $3,200, not $2,400, and consequently he may not compute his tax under Supplement T. An individual deriving any other kind of income such as income from the conduct of a business or from a trust of which he is a beneficiary or gains from the sale or exchange of property, may not compute his tax under Supplement T. If any individual derives income from a partnership of which he is a member or from a trust of which he is a beneficiary, and the partnership or trust previously derived the income distributed to him from rent, he will be considered to have received income from a partnership or trust, rather than from rent, and consequently will not be entitled to compute his tax under Supplement T. A husband and wife living together on the last day of the taxable year may file separate returns on Form 1040A, if the gross income of each is from the prescribed sources and does not exceed $3,000, or they may file a single joint return, if their combined gross income is from the prescribed sources and does not exceed $3,000. If they file separate returns, the tax liability of each under section 400 is the tax imposed upon a single person. If such husband and wife file separate returns and only one elects to make a return on Form 1040A, the tax liability of the one so electing is the tax imposed upon a single person. If they file a single joint return or if only one spouse makes a return because the other spouse has no gross income, the tax liability is the tax imposed upon a married person.

In order to determine the amount of his tax an individual merely ascertains the amount of his gross income, subtracts $400 for each dependent for whom a credit is allowable (see Example (3) in § 19.401–1), and refers to the schedule set forth in section 400 to find the amount of his tax. If the taxpayer is a single person who is not the head of a family, his tax is set forth in the third column of the schedule. If he is a married person or the head of a family, his tax is set forth in the fourth column. Under the schedule no tax is imposed upon a single person whose gross income less credit for dependents does not exceed $750, or upon a married person or the head of a family whose gross income less credit for dependents does not exceed $1,500.

SEC. 102. OPTIONAL TAX ON INDIVIDUALS WITH CERTAIN GROSS INCOME OF $3,000 OR LESS. (Revenue Act of 1941, Title I.)

(a) *Optional tax.* The Internal Revenue Code is amended by inserting after section 396 the following new Supplement:

* * * * *

SEC. 401. RULES FOR APPLICATION OF SECTION 400.

For the purposes of this Supplement—

(a) Definitions. (1) "Married person" means a married person living with husband or wife.

(2) "Dependent" means a person (other than husband or wife) dependent upon and receiving his chief support from the taxpayer if such dependent person is under eighteen years of age or is incapable of self-support because mentally or physically defective, excluding as a dependent, in the case of a head of a family, one who would be excluded under section 25 (b) (2) (B).

(b) *Determination of status.* The determination of whether a person is living with husband or wife, is a head of a family, or is a dependent, shall be made as of the last day of the taxpayer's taxable year.

(c) *Separate return of husband and wife.* If a husband and wife living together file separate returns each shall be treated as a single person.

(d) *Married persons not living with husband or wife.* A married person not a head of a family and not living with husband or wife shall be treated as a single person.

* * * * *

§ 19.401–1 *Rules for application of schedule in section 400.* The determination of whether a taxpayer is a married person or the head of a family, or whether he has a dependent, is to be made as of the last day of such taxpayer's taxable year. The fact that the taxpayer's status changes during such taxable year is not material.

Example (1). A has a gross income of $1,640, derived wholly from wages. He was married on July 1, 1941, and he and his wife were living together on the last day of the taxable year. He has no dependents. His wife has no gross income. In order to ascertain the tax imposed upon him for the calendar year 1941 under section 400, A refers to column 4 of the schedule (applicable to a married person), and finds that the tax levied upon a taxpayer whose gross income falls within the bracket running from $1,625 to $1,650 is $7. Since $1,640 is within this bracket, A's tax is $7.

Example (2). B, an unmarried person, has a gross income of $2,636 derived wholly from rent and dividends. During the first seven months of 1941, B's status is that of head of a family, but on the last day of the taxable year his status is that of a single person not the head of a family. To determine his tax, B refers to the third column of the schedule (applicable to a single person who is not the head of a family) and finds that the tax levied upon an individual whose gross income falls within the bracket running from $2,625 to $2,650 is $160. Since $2,636 is within this bracket, B's tax is $160.

Example (3). C has a gross income of $2,680 for the calendar year 1941, derived wholly from wages. His wife dies on October 1, and on the last day of the taxable year he is supporting and maintaining a home for two dependent children both of whom are under the age of eighteen. Since C would not occupy the status of head of a family except for the fact that he maintains a home for such children no amount may be subtracted from gross income on account of one of such children. Accordingly, to ascertain his tax, C subtracts only $400 from $2,680, refers to the fourth column of the schedule (applicable to the head of a family), and finds that the tax in the case of a taxpayer whose gross income falls in the bracket running from $2,275 to $2,300 is $63. Since $2,280 falls within this bracket, C's tax is $63.

SEC. 102. OPTIONAL TAX ON INDIVIDUALS WITH CERTAIN GROSS INCOME OF $3,000 OR LESS. (Revenue Act of 1941, Title I.)

(a) *Optional tax.* The Internal Revenue Code is amended by inserting after section 396 the following new Supplement:

* * * * *

SEC. 402. MANNER OF ELECTION.

"The election referred to in section 400 shall be considered to have been made if the taxpayer files the return prescribed for this Supplement and such election shall be irrevocable. If the taxpayer for any taxable year has filed a return computing his tax without regard to this Supplement, he may not thereafter elect for such year to compute his tax under this Supplement.

* * * * *

§ 19.402–1 *Manner of election to compute tax under Supplement T.* A taxpayer elects to compute his income tax under Supplement T by filing a return of his gross income on Form 1040A, the form prescribed for this Supplement. If a husband and wife both make such an election, they may file a joint return reporting their aggregate gross income or they may file separate returns reporting their respective gross incomes. If they file separate returns, the tax of each shall be computed by reference to the third column of the schedule set forth in section 400.

An election under Supplement T once made for the taxable year may not be revoked by an amended return or otherwise, but a new election is allowed for each subsequent taxable year. If for any taxable year the taxpayer makes a return without regard to Supplement T, he may not thereafter elect to have his tax computed under such Supplement for that taxable year.

SEC. 102. OPTIONAL TAX ON INDIVIDUALS WITH CERTAIN GROSS INCOME OF $3,000 OR LESS. (Revenue Act of 1941, Title I.)

(a) *Optional tax.* The Internal Revenue Code is amended by inserting after section 396 the following new Supplement:

* * * * *

SEC. 403. CREDITS AGAINST TAX NOT ALLOWED.

Section 31 (relating to foreign tax credit) and section 32 (relating to credit for taxes withheld at source) shall not apply with respect to the tax imposed by this Supplement.

SEC. 404. CERTAIN TAXPAYERS NOT ELIGIBLE.

This Supplement shall not apply to a nonresident alien individual, or an estate or trust.

PART 182—INDUSTRIAL ALCOHOL

Pursuant to the authority in sections 3105, 3124 (a) (6), and 3176 of the Internal Revenue Code, Regulations No. 3 is amended by adding thereto the following new articles:

TRANSFER OF TAX-PAID ALCOHOL BY PIPE LINE TO RECTIFYING PLANTS

ART. 171. The Commissioner may, in his discretion, authorize the installation of a pipe line for the transfer of alcohol produced in accordance with these regulations from the weighing tank in an industrial alcohol bonded warehouse, after tax-payment, to storage tanks in a rectifying plant for use in rectification and bottling, when such rectifying plant is contiguous to, or is in the immediate vicinity of the bonded warehouse. The Commissioner will determine from all the circumstances in each case whether the rectifying plant is in the immediate vicinity of the bonded warehouse.

ART. 172. The proprietor of a bonded warehouse who desires to install a pipe line for the transfer of tax-paid alcohol to a contiguous rectifying plant, or rectifying plant in the immediate vicinity of the bonded warehouse, must file application in triplicate with the district supervisor showing the relative position of the bonded warehouse and the rectifying plant, the proprietorship thereof, and a full description of the proposed pipe line.

ART. 173. Upon receipt of the application, the district supervisor will make such inquiry as he may deem necessary to determine the propriety of granting the permission sought and will then forward all copies of the application to the Commissioner with his recommendation thereon. The Commissioner will indicate his approval or disapproval on all copies of the application and return two copies to the district supervisor who will forward one copy to the applicant. Where the application is approved, the proprietor of the warehouse will, upon installation of the pipe line, file amended application, Form 1431, and plans and plat covering such changes in equipment in accordance with these regulations.

ART. 174. The pipe line shall be constructed and the outlet of the weighing tank secured in the manner provided by § 183.54 of Regulations 4, respecting pipe lines from the cistern room to storage tanks in an internal revenue bonded warehouse on the distillery premises.

ART. 175. Where a pipe line has been installed for the transfer of alcohol direct from the weighing tank in the bonded warehouse to a contiguous rectifying plant or rectifying plant in the immediate vicinity, as provided herein, and the proprietor of the warehouse desires to transfer such alcohol, he shall execute application for the tax-payment of such alcohol on Form 1594, "Application for Collector's Certificate of Tax-Payment of Distilled Spirits for Shipment in Tank Cars," in duplicate, appropriately modified to cover the transfer by pipe line. The proprietor and the store-

keeper-gauger shall then proceed in accordance with the provisions of these regulations, as amended, respecting the gauging and withdrawal of spirits for tax-payment in railroad tank cars. The proprietor will forward all copies of Form 1440, prepared in accordance with Article 63, with Form 1594, in duplicate, accompanied by proper remittance for the tax, to the collector of internal revenue.

ART. 176. The collector will note on all copies of Form 1440, the tax-payment (including the serial number of the certificate, Form 1595), in the column provided for entering the serial numbers of tax-paid stamps, execute the certificate of tax-payment on Form 1440, and issue Form 1595, "Collector's Certificate of Tax-Payment of Distilled Spirits for Shipment in Tank Cars," which certificate shall be appropriately modified to cover the transfer of alcohol by pipe line. The collector will fill in all the required data in the blank spaces on the certificate, except those provided in the lower left corner for the verification of the storekeeper-gauger, and shall date and sign the certificate in the manner required by § 183.299 of Regulations 4. The certificate is not negotiable and shall not be used for any spirits other than those described therein. The collector will enter on the original and copy of Form 1594, in the space provided, the serial number, date, and amount of the certificate issued. The collector will retain one copy of Form 1440 and the original copy of Form 1594. He will mail or deliver the certificate, Form 1595, and the original and remaining copies of Form 1440 to the proprietor of the warehouse or his designated agent, in accordance with the proprietor's request in Form 1594. The collector will send one copy of the application, Form 1594, to the district supervisor.

ART. 177. The proprietor shall deliver the certificate of tax-payment, Form 1595, and all copies of Form 1440 to the storekeeper-gauger at the bonded warehouse. The storekeeper-gauger will verify the contents of the weighing tank and date and sign the certificate, Form 1595, in the space provided therefor. The certificate must be attached to a board on the weighing tank by means of a tack in each corner, after which it will be cancelled in the same manner as a tax-paid stamp attached to a package and covered with a coating of transparent varnish, shellac or lacquer to prevent any alteration thereof.

ART. 178. When the certificate of tax-payment has been affixed to the weighing tank and cancelled, the storekeeper-gauger will unlock the outlet valve and permit the proprietor to transfer the alcohol by pipe line to the rectifying plant named in the certificate. The alcohol shall be transferred only under the immediate supervision of the storekeeper-gauger. After the alcohol has been transferred, the storekeeper-gauger will forward one copy of Form 1440 and the cancelled Form 1595 to the district supervisor, and deliver two copies of Form 1440 to the proprietor, who will deliver one copy of such form to the rectifier.

ART. 179. The report of gauge, Form 1440, delivered to the rectifier by the proprietor, shall be attached to the storage tank in the rectifying plant. The rectifier shall enter the date and quantity of removals from the tank in the blank spaces of such Form 1440. The report of gauge shall be kept on the tank until such time as the quantity covered thereby has been withdrawn from the tank. The report shall then be filed by the rectifier available for inspection by government officers. The alcohol transferred by pipe line may not be used by the rectifier prior to attachment of Form 1440 to the storage tank.

ART. 180. The district supervisor will compare the cancelled certificate with the copy of the application and the report of gauge as to the number of gallons of alcohol, the amount of tax, etc., and investigate any discrepancy. He will then send a copy of the application to the Commissioner and where there is a discrepancy, a report of his findings relative thereto.

Commissioner of Internal Revenue.

Pursuant to the provisions of sections 2883 and 3176 of the Internal Revenue Code, Regulations 4 are hereby amended by adding the following new article and sections:

ARTICLE XLI. *Transfer of Tax-Paid Distilled Spirits by Pipe Line to Rectifying Plants*

§ 183.437 *Commissioner may authorize.* The Commissioner may, in his discretion, authorize the installation of a pipe line for the transfer of distilled spirits produced under section 2883, Internal Revenue Code, at a proof in excess of 159 degrees and reduced in the receiving cistern to not more than 159 and not less than 100 degrees proof, from the weighing tank in the cistern room of a registered distillery, after tax-payment, to storage tanks in a rectifying plant for use in rectification and bottling, when such rectifying plant is contiguous to, or is in the immediate vicinity of the distillery. The Commissioner will determine from all the circumstances in each case whether the rectifying plant is in the immediate vicinity of the distillery. (Secs. 2883, 3176, I.R.C.)

§ 183.438 *Application.* A distiller who desires to install a pipe line for the transfer of such spirits to a contiguous rectifying plant or rectifying plant in the immediate vicinity of the distillery, must file application in triplicate with the district supervisor showing the relative positions of the plants and the proprietorship thereof, and giving a full description of the proposed pipe line. (Secs. 2883, 3176, I.R.C.)

The Commissioner will indicate his approval or disapproval on all copies of the application and will return two copies to the district supervisor who will forward one copy to the applicant. Where the application is approved, the distiller will, upon installation of the pipe line, file amended distiller's notice, Form 27-A, and plans, as provided in § 183.149 in the case of major changes in equipment, and an amended plat. (Secs. 2883, 3176, I.R.C.)

§ 183.440 *Pipe line construction.* The pipe line shall be constructed and the outlet of the weighing tank secured, in the manner provided by § 183.54, respecting pipe lines from the cistern room to storage tanks in an internal revenue bonded warehouse on the distillery premises. (Secs. 2883, 3176, I.R.C.)

§ 183.441 *Application, Form 179.* Where a pipe line has been installed for the transfer of distilled spirits direct from the weighing tank in the distillery to a contiguous rectifying plant or rectifying plant in the immediate vicinity under the provisions of this article, and the distiller desires to transfer such spirits, he shall execute application for the tax-payment of such spirits on Form 179, in quadruplicate. The distiller and the storekeeper-gauger shall then proceed in accordance with the provisions of §§ 183.281, 183.282, and 183.297 respecting the gauging and withdrawal of spirits for tax-payment in railroad tank cars, insofar as the provisions thereof are applicable. (Secs. 2883, 3176, I.R.C.)

§ 183.442 *Application for certificate of tax-payment, Form 1594.* The distiller will forward all copies of Form 179 and Form 1520, prepared in accordance with § 183.297, with Form 1594, "Application for Collector's Certificate of Tax-Payment of Distilled Spirits for Shipment in Tank Cars," in duplicate, appropriately modified to cover the transfer by pipe line, accompanied by proper remittance for the tax to the collector of internal revenue. (Secs. 2883, 3176, I.R.C.)

§ 183.443 *Certificate of tax-payment, Form 1595.* The collector will note the tax-payment (including the serial number of the certificate, Form 1595) in the column on all copies of Form 179 and Form 1520, provided for entering the serial numbers of tax-paid stamps, execute a certificate of tax-payment on Form 179 and issue Form 1595, "Collector's Certificate of Tax-Payment of Distilled Spirits for Shipment in Tank Cars," which certificate shall be appropriately modified to cover the transfer of spirits by pipe line. The collector shall fill in all the required data in the blank spaces on the certificate, except those provided in the lower left corner for the verification of the storekeeper-gauger, and shall date and sign the certificate in the manner required by § 183.299. The certificate is not negotiable and shall not be used for any spirits other than those described therein. The collector will enter on the original and the copy or copies of Form 1594 in the space provided, the serial number, date and amount of the certificate issued. The collector will retain one copy each of Form 179 and Form 1520, and the original copy of Form 1594. He will mail or deliver the certificate, Form 1595, and the original and remaining copies of Form 179 and Form 1520 to the distiller or his designated agent, in accordance with the distiller's request in Form 1594. The collector will send one copy of the application, Form 1594, to the district supervisor. (Secs. 2883, 3176, I.R.C.).

§ 183.444 *Storekeeper-gauger's verification.* The distiller shall deliver the certificate of tax-payment, Form 1595, and all copies of Form 179 and Form 1520 to the storekeeper-gauger at the distillery. The storekeeper-gauger will verify the contents of the weighing tank and date and sign the certificate, Form 1595, in the space provided therefor. The certificate must be attached to a board on the weighing tank by means of a tack in each corner, after which it will be cancelled in the same manner as a tax-paid stamp attached to a package, and covered with a coating of transparent varnish, shellac or lacquer to prevent any alteration thereof. (Secs. 2883, 3176, I.R.C.)

§ 183.445 *Release of spirits for transfer.* When the certificate of tax-payment has been affixed to the weighing tank and cancelled, the storekeeper-gauger will unlock the outlet valve and permit the distiller to transfer the spirits by pipe line to the rectifying plant named in the certificate. The spirits shall be transferred only under the immediate supervision of the storekeeper-gauger. After the spirits have been transferred, the storekeeper-gauger will forward one copy of Form 179 and Form 1520 and the cancelled Form 1595 to the district supervisor, retain one copy of Form 179 and Form 1520, and deliver one copy of Form 179 and two copies of Form 1520 to the distiller, who will immediately deliver one copy of Form 1520 to the rectifier. (Secs. 2883, 3176, I.R.C.)

§ 183.446 *Rectifier's use of Form 1520.* The report of gauge, Form 1520, delivered to the rectifier by the distiller, shall be attached to the storage tank in the rectifying plant. The rectifier shall enter the date and quantity of removals from the tank in the blank space on such Form 1520. The report of gauge shall be kept on the tank until such time as the quantity covered by such report has been withdrawn from the tank. The report shall then be filed by the rectifier, available for inspection by government officers. The spirits transferred by pipe line may not be used by the rectifier prior to attachment of Form 1520 to the storage tank. (Sec. 3176, I.R.C.)

§ 183.447 *Comparison of cancelled certificate with application.* The district supervisor will compare the cancelled certificate with the copy of the application and the report of gauge as to the number of gallons of distilled spirits, the amount of tax, etc., and investigate any discrepancy. He will then send the copy of the application to the Commissioner and where there is a discrepancy, a report of his findings relative thereto. (Sec. 3176, I.R.C.)

PART 190—RECTIFICATION OF SPIRITS AND WINES

1. Pursuant to the provisions of sections 2801 (e) (1) and 3176 of the Internal Revenue Code, Regulations 15[1] are amended as hereinafter set forth.

2. Section 190.45 is amended by adding a new paragraph thereto, as follows:

§ 190.45 *Pipelines.*

* * * * *

(f) *Pipe line from contiguous distillery or distillery in immediate vicinity.* The pipe line used for the conveyance of tax-paid spirits from the cistern room of a contiguous distillery or distillery in the immediate vicinity of the rectifying plant, as provided in Regulations 4, as amended, and the pipe line used for the conveyance of tax-paid alcohol from a contiguous bonded warehouse or bonded warehouse in the immediate vicinity of the rectifying plant, as provided in Regulations 3, as amended, shall be of a fixed and permanent character, constructed of metal and so arranged as to be exposed to view throughout its entire length, and all connections, valves, flanges, unions, etc., shall be brazed, welded, or otherwize secured. The pipe line shall be connected directly to the storage tank in the receiving room of the rectifying plant, and must be equipped with a valve, at or near the point of entrance to the storage tank, capable of being locked with a Government lock. When the storage tank is mounted on scales the pipe line may be connected therewith by means of short, detachable hose connections if the end of the pipe line is equipped with a valve which may be locked with a Government lock. Where spirits are to be conveyed to two or more storage tanks in the rectifying plant, the pipe line may be connected with the storage tanks by manifold connections so arranged as to control the flow of spirits into each tank. There shall be painted on each pipe line extending from the manifold to the storage tanks a number corresponding with the serial number of the storage tank with which the pipe pine is connected, unless the arrangement of the pipe line is such that the identity of the tank with which it is connected is apparent. (Secs. 2801 (e) (1), 2839, 3176, I.R.C.)

[1] 5 F.R. 2016, 3180.

3. Sections 190.33, 190.170, 190.173 and 190.174 are amended to read as follows:

§ 190.33 *Storage tanks.* If spirits are received in tank cars, or by pipe line from the cistern room of a contiguous distillery or distillery in the immediate vicinity of the rectifying plant, or by pipe line from a contiguous bonded warehouse or bonded warehouse in the immediate vicinity of the rectifying plant, suitable storage tanks must be provided in the receiving room within which to store such spirits, except that such storage tanks will not be required in the case of spirits received in tank cars which are transferred directly to processing and bottling tanks in accordance with § 190.170 (a). Each storage tank shall be constructed of metal and be of uniform dimensions from top to bottom. Each such tank shall be equipped with a suitable measuring device, or mounted on scales, whereby the actual contents will be correctly indicated. There shall be painted on each tank the words, "Storage Tank," followed by its serial number and capacity in wine gallons. A suitable board shall be provided on each storage tank for the attachment of Forms 1520 and 1440, as hereinafter provided. Manheads, inlets, and outlets of the tanks must be provided with facilities for locking with Government locks. Stopcocks must be provided and so arranged as to control completely the flow of spirits, both into and out of the tank. The construction of the valves must be such that they can be secured with Government locks. The pipe connections containing such stopcocks or valves must be brazed, welded, or otherwise secured, to the tanks in such a manner that they cannot be detached or altered without showing evidence of tampering. Storage tanks must not be permanently connection with pipe lines used for the conveyance of air, distilled water, or other substances than spirits. (Secs. 2801 (e) (1), 2829, 3176, I.R.C.)

§ 190.170 *Receipt at rectifying premises—(a) Receipt in tank cars.* Where distilled spirits are received in tank cars

(a) *Receipt in tank cars.* Where distilled spirits are received in tank cars or wines are received in tank cars, tanks, or tank trucks, they may be transferred directly from such containers into processing or bottling tanks if permission is first obtained from the district super-

visor and the spirits or wines are first inspected by a Government officer. When liquors are so transferred the rectifier must submit Form 122 or Form 230 to the Government officer assigned to the plant, or to the district supervisor or designated officer for approval as provided in §§ 190.177–190.201, 190.340–190.361 [Articles XXVI and XXXIV], immediately the tank cars, tanks, or tank trucks are emptied. Distilled spirits may be received in tank cars only if the premises of the rectifier are equipped with suitable railroad siding facilities. Before permitting spirits to be transferred from a tank car into a storage tank or a processing or bottling tank, the Government officer will see that the railroad car seals are intact on the tank car and that the car bears the collector's certificate of tax-payment, Form 1595. When spirits are transferred into or out of storage tanks the Government officer shall open and close the Government locks, but it shall be the duty of the proprietor to manipulate the stopcocks or valves controlling the flow of the spirits. The officer will keep a memorandum record of the quantities of spirits entered into and withdrawn from each storage tank by dates, in order that he may determine that only lawful, tax-paid spirits are withdrawn from such tanks for rectification.

(b) *Receipt by pipe line.* Where spirits are received by pipe line from the cistern room of a contiguous distillery or distillery in the immediate vicinity of the rectifying plant, as provided by Regulations 4, as amended, or alcohol is received by pipe line from a contiguous bonded warehouse or bonded warehouse in the immediate vicinity of the rectifying plant, as provided in Regulations 3, as amended, they shall be conveyed directly into the storage tank or tanks in the receiving room. When spirits are transferred into or out of such tanks, the Government officer shall follow the procedure specified in the foregoing paragraph, insofar as it is applicable. (Secs. 2801 (e) (1), 3176, I.R.C.)

§ 190.173 *Disposition of gauge report*—(a) *Receipt in tank cars.* When distilled spirits received in a tank car are run into a storage tank, the report of gauge, Form 1520 in the case of spirits other than alcohol, and Form 1440 in the case of alcohol, sent to the rectifier by the vendor, shall be attached to such storage tank. The rectifier shall enter the date and quantity of removals from the storage tank in a blank space on the report of gauge. The report of gauge shall be kept on the tank until such time as the quantity covered by such report has been withdrawn from the tank. The report shall then be filed by the rectifier available for inspection by Government officers. If the spirits are transferred directly from the tank car into a processing or bottling tank, the rectifier shall make a notation to that effect on the report of gauge and file it. The requirements of this section shall not preclude use of the spirits prior to receipt of Form 1520 or 1440.

(b) *Receipt by pipe line.* When spirits received by pipe line are run into the storage tank, the report of gauge, Form 1520 or Form 1440, delivered to the rectifier by the vendor shall be attached to the storage tank. The rectifier shall enter the date and quantity of removals from the tank in the blank space on such Form 1520 or Form 1440. The report of gauge shall be kept on the tank until such time as the quantity covered by such report has been withdrawn from the tank. The report shall then be filed by the rectifier, available for inspection by Government officers. The spirits transferred by pipe line may not be used by the rectifier prior to attachment of Form 1520 or Form 1440 to the storage tank. (Secs. 2801 (e), (1), 3176, I.R.C.)

§ 190.174 *Mixing of different spirits prohibited.* Spirits received in tank cars or by pipe line which were produced from different materials, or by two or more distillers or from different combinations of the same materials at less than 190 degrees of proof, or which differ in kind according to the standards of identity established under the Federal Alcohol Administration Act, or which differ more than 10 degrees in proof, or which are otherwise heterogeneous, may not be mingled in a storage tank, nor may spirits received in tank cars be mingled in a storage tank with spirits received by pipe line. (Secs. 2801 (e) (1), 3176, 3254 (g), I.R.C.)

PART 984—LEAD

General Preference Order M–38 to Conserve the Supply and Direct the Distribution of Lead

Whereas the national defense requirements have created a shortage of lead (as hereinafter defined) domestically produced, and there exists an uncertainty as to future shipments from abroad, for defense, for private account, and for export and it is necessary, in the public interest and to promote the defense of the United States, to conserve the supply and direct the distribution thereof;

Now, therefore, it is hereby ordered, That:

§ 984.1 *General preference order M–38*—(a) *Definitions.* For the purposes of this Order:

(1) "Lead" means and includes lead metal produced from domestic ores and from imported ores, which has been refined by any recognized method, in all forms and shapes current in the trade; antimonial lead, and lead metal produced from scrap, excluding, however, metal in the hands of any manufacturer, produced by him either in his own plant or on toll from any lead-bearing material and mill residue originating in his own plant or returned to him by his customers in the usual course of business from material purchased from the manufacturer.

(2) "Refiner" means any person who produces lead as hereinbefore defined, from ores or scrap by any process in grades suitable for fabrication; and also

includes any person who has such lead produced for him under toll agreement.

(3) "Dealer" means any person who procures lead either by importing or from domestic sources for resale without change in form, whether or not such person receives title to or physical delivery of the material, and includes selling agents, warehousemen, and brokers.

(b) *Regulations incorporated.* Except as modified by the terms of this order and as otherwise specifically provided herein, all of the provisions and definitions of Priorities Regulation No. 1, issued by the Director of Priorities on August 27, 1941 (Part 944), as amended from time to time, are hereby included as a part of this order with the same effect as if specifically set forth herein.

(c) *Directions as to deliveries by refiners and dealers*—(1) *Delivery schedules.* Hereafter, each refiner and dealer shall file with the Division of Priorities, Office of Production Management, not later than the 20th day of the month next preceding the month during which any delivery of lead is to be made, and in such form or forms as may be from time to time prescribed by said Division, a schedule of his proposed shipments of lead for the ensuing month, including thereon such information as may be required by the instructions accompanying such form.

(2) *Withheld deliveries: Allocations.* Beginning October 1, 1941, each refiner shall set aside from his production of lead during each calendar month (including therein lead produced for him by others under toll agreement and excluding lead produced by him for others under toll agreement) a quantity to be determined and specified from time to time by the Director of Priorities and to be delivered only upon express direction of the Director of Priorities. Any amount so set aside shall be excluded from the refiner's schedule of proposed shipments filed under the provisions of paragraph (c) (1) above. The Director of Priorities will from time to time allocate deliveries of lead to be made by refiners from the quantities withheld under the provisions of this paragraph. In shipping the balance of his production, each refiner must give preference to Defense Orders as required by the provisions of Priorities Regulation No. 1, and must be governed by preference ratings assigned to particular contracts or purchase orders: *Provided,* That a refiner may satisfy in full his commitments to any one customer during any calendar month up to, but not exceeding, one minimum carload lot.

(3) *Allocation of lead from Metals Reserve Company's supply.* Hereinafter all lead released by the Metals Reserve Company will be allocated by the Director of Priorities.

(4) *Basis of allocations and directions.* Any allocations or directions by the Director of Priorities pursuant to the provisions of paragraphs (c) (2) and (3) above will be made primarily to insure satisfaction of all defense requirements of the United States, both direct and indirect, and they may be made in the discretion of the Director of Priorities without regard to any preference ratings assigned to particular contracts or purchase orders. The Director of Priorities may also take into consideration the possible dislocation of labor, and the necessity of keeping a plant in operation so that it may be able to fulfill Defense Orders and essential civilian requirements.

(5) *Allotment of purchase orders.* The Director of Priorities may in his discretion require any person seeking to place a purchase order for lead to be delivered by a refiner or dealer to place the same with one or more particular refiners or dealers.

(d) *Assignment of preference rating.* Deliveries of lead, alloys of which lead is an essential component, and manufactured products made of lead or of such alloys under all Defense Orders, to which a preference rating of A–10 or higher has not been assigned are hereby assigned a preference rating of A–10.

(e) *Directions as to deliveries of lead alloys and lead products.* Until further order by the Director of Priorities, deliveries by any person of alloys containing lead as an essential component and of manufactured products made of lead or such alloys may be made subject only to the provisions of Regulation No. 1 of the Division of Priorities and to the provisions of any other order or direction issued by the Director of Priorities affecting any other material used with lead in the manufacture or processing of such alloys or products.

(f) *Violations.* Any person affected by this order, who violates any of its provisions, or a provision of any other order, direction or regulation issued by the Director of Priorities, may be prohibited by the Director from making or receiving further deliveries of lead, or of any other material subject to allocation, or he may be subjected to any other or further action as the Director may deem appropriate.

(g) *Effective dates.* This order shall take effect immediately upon its issuance, and unless sooner terminated by direction of the Director of Priorities, shall expire on the 31st day of March 1942. (P.D. Reg. 1, Aug. 27, 1941, 6 F.R. 4489; O.P.M. Reg. 3, March 8, 1941, 6 F.R. 1596, as amended September 2, 1941, 6 F.R. 4865; E.O. 8629, Jan. 7, 1941, 6 F.R. 191; E.O. 8875, Aug. 28, 1941, 6 F.R. 4483; sec. 2 (a), Public No. 671, 76th Congress, Third Session, as amended by Public No. 89, 77th Congress, First Session; sec. 9, Public No. 783, 76th Congress, Third Session).

Issued this 4th day of October 1941.

Director of Priorities.

CHAPTER XI—OFFICE OF PRICE ADMINISTRATION

PART 1307—RAW MATERIALS FOR COTTON TEXTILES

PRICE SCHEDULE NO. 33—CARDED COTTON YARNS

From August 1940 to May 1941 the prices of cotton yarns and cotton textiles were marked by an inflationary rise. To check this advance, the Office of Price Administration issued a schedule of maximum prices for combed yarns in May 1941, and a schedule for six leading types of cotton grey goods in June 1941. It was the aim of the Office of Price Administration in taking these measures to bring about an appropriate adjustment of prices for related products in the cotton textile field to those set forth in the schedules for combed yarn and cotton grey goods. Carded yarns, however, which normally sell for several cents less per pound than combed yarns are now commanding prices as high, and in some instances higher, than the ceiling prices established for combed yarns. This dislocation in the price structure of the textile industry is injurious to national defense and to the civilian economy.

Accordingly, under the authority vested in me by Executive Order No. 8734, it is hereby directed that:

§ 1307.51 *Maximum prices for carded cotton yarn.* (a) On and after the applicable ceiling date (as set forth in Appendix A, incorporated herein as § 1307.60), except as provided in § 1307.51 (b) hereof, no person shall sell, offer to sell, deliver, or transfer carded cotton yarn for commercial use, and no person shall buy, offer to buy, or accept delivery of carded cotton yarn for commercial use, at prices higher than the maximum prices set forth in Appendix A.

(b) The maximum prices established by this Schedule are not applicable to sales, offers to sell, deliveries, or transfers of carded cotton yarn which is to be exported outside the territory of the United States, its territories or possessions, regardless of whether such export is to be effected through a middleman; *Provided, however,* That carded cotton yarn sold or delivered for such export shall not subsequently be sold or delivered for use within the United States, its territories or possessions, at a price higher than the applicable maximum established by this Schedule.*

* §§ 1307.51 to 1307.60 issued pursuant to the authority contained in Executive Order No. 8734, 6 F. R. 1917.

§ 1307.52 *Less than maximum prices.* Lower prices than those set forth in Appendix A may be charged, demanded, paid, or offered.*

§ 1307.53 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery, or transfer of carded cotton yarn, alone or in conjunction with any other material, or by way of any commission, service, transportation, or

other charge, or discount, premium, or other privilege, or by tying-agreement or other trade understanding or otherwise.*

§ 1307.54 *Records and reports.* Every person making purchases or sales of carded cotton yarn for commercial use after October 5, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year, complete and accurate records of (a) each such purchase or sale, showing the date thereof, the name and address of the buyer or the seller, the price paid or received, the quantity in pounds, and the specifications of the carded cotton yarn sold or purchased, and (b) the quantity of carded cotton yarn (1) on hand, and (2) on order, as of the close of each calendar month.

Persons affected by this Schedule shall submit such reports to the Office of Price Administration as it may, from time to time, require.*

§ 1307.55 *Affirmations of compliance.* On or before November 10, 1941, and on or before the 10th day of each month thereafter, every person who during the preceding calendar month has purchased or sold, whether for immediate or future delivery, or delivered or accepted delivery of carded cotton yarn for commercial use, shall submit to the Office of Price Administration an affirmation of compliance on Form 133:1, containing a sworn statement that during such month all such purchases, sales, or deliveries were made at prices in compliance with this Schedule or with any exception thereto or modification thereof. Copies of Form 133:1 can be procured from the Office of Price Administration, or, provided that no change is made in the style and content of the Form and that it is reproduced on 8" x 10½" paper, they may be prepared by persons required to submit affirmations of compliance hereunder.*

§ 1307.56 *Enforcement.* In the event of refusal or failure to abide by the price limitations, record requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, and (b) that the powers of the Government are fully exerted in order to protect the public interest and the interests of those persons who comply with this Schedule. Persons who have evidence of the offer, receipt, demand, or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation, or manipulation of prices of carded cotton yarn, or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

§ 1307.57 *Modification of the schedule.* Persons complaining of hardship or inequity in the operation of this Schedule may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom.*

§ 1307.58 *Definitions.* When used in this Schedule, the term:

(a) "Person" means an individual, partnership, association, corporation, or other business entity;

(b) "Carded cotton yarn" means carded cotton yarn of the specifications for which maximum prices are established in Appendix A;

(c) "For commercial use" means for any use or purpose except use by an individual buyer at retail for home or private consumption;

(d) "Ceiling date" means the date, as specified in Appendix A, on which this Schedule becomes effective with respect to any given yarn.*

§ 1307.59 *Effective date of the schedule.* This Schedule shall become effective October 6, 1941.*

§ 1307.60 *Appendix A, maximum prices for carded cotton yarn*—(a) *Terms of sale.* The maximum prices set forth in this Appendix are prices for carded cotton yarn with freight prepaid to the purchaser's place of business, except that an extra charge may be made to the extent that the cost of transportation exceeds one cent per pound. The prices are gross prices before discounts of any nature are deducted and they include all commissions.

(b) *Determination of maximum price.* The maximum price for any offer to buy or sell, sale or contract of sale, delivery or transfer of carded cotton yarn shall be determined from paragraph (c) in the following manner.

(1) *Offer to buy or sell.* By the cotton spot price [1] of the business day immediately preceding that on which the offer was made except that, if the offering price is not otherwise specified, an offer to buy or sell at the maximum price applicable on the day the contract of sale is to be made shall not be a violation of the Schedule.

(2) *Sale or contract of sale.* By the cotton spot price of the business day immediately preceding the day on which the sale or contract of sale is made, regardless of the maximum price applicable to the offer pursuant to which such sale or contract is made.

(3) *Delivery or transfer.* By the cotton spot price of the business day immediately preceding that on which the sale or contract of sale is made, regardless of any change in the cotton spot price subsequent thereto.[2]

(c) *Table of maximum prices—Group A.* The following maximum prices are for white carded yarns of all twists from knitting to warp twist, put up on regular-sized cones or tubes or in skeins. Carded yarns of twists outside the above range; yarns in put-ups other than the above; yarns with tensile specifications which cannot be met with cotton used for ordinary commercial quality combed yarns of the same counts; yarns with special constructions; yarns which have regularly sold at a premium because they are specially inspected; and yarns of grades lower than ordinary commercial quality white yarn should not sell for more than these maximum prices, appropriately increased or decreased by the normal trade differentials. This Schedule is to be supplemented by a list of fixed differentials for yarns in these classes, to which all subsequent deliveries of such yarns will be subject, regardless of the terms of any contract of sale in existence at the date of issuance of such supplement.

[1] The term "cotton spot price," when used herein, means the average, published daily by the United States Department of Agriculture, Agricultural Marketing Service, of the price quotations for middling 15/16-inch cotton on ten designated spot markets.

[2] This method of determining the maximum price shall be used in connection with deliveries and transfers pursuant to sales or contracts of sale made before, as well as on or after, the applicable ceiling date.

1335.259 Appendix A, maximum prices for wood alcohol.

Methyl alcohol is an essential chemical which is used as an antifreeze and in the manufacture of formaldehyde, denatured alcohol, paints, varnishes, enamels, and many other products. Most methyl alcohol is produced synthetically. The remainder, herein referred to as "wood alcohol," is produced by the distillation of wood.

As a result of conditions engendered by the national defense program, the demand for methyl alcohol has increased sharply, causing a shortage of supply. A steep rise in the prices of the various grades of wood alcohol has occurred. The price of the denaturing grade, representing approximately one-half of the wood alcohol production, increased from 45 cents per gallon for tank-car quantities in the second quarter of 1941 to 60 cents per gallon in the third quarter. Substantial transactions have taken place at even higher prices. Such a price movement threatens to create an unsound market in wood alcohol and also to dislocate the market for synthetic methyl alcohol. Producers of the latter product have refrained from increasing its price. The largest producer, in fact, has announced a price reduction in recent weeks. It is therefore unnecessary at this time to establish maximum prices for synthetic methyl alcohol.

After investigation and conferences with representatives of the methyl alcohol industry, the Office of Price Administration has found that, under existing conditions, there is no justifiable reason for prices of wood alcohol in excess of 60 cents per gallon for tank-car quantities. Further increases in price would, therefore, be inflationary.

Accordingly, under the authority vested in me by Executive Order 8734, it is hereby directed that:

§ 1335.251 *Maximum prices for wood alcohol.* On and after October 10, 1941, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer wood alcohol in containers of 50 gallons or more, and no person shall buy, offer to buy, or accept delivery of wood alcohol in containers of 50 gallons or more, at prices higher than the maximum prices set forth in Appendix A, incorporated herein as § 1335.259.*

*§§ 1335.251 to 1335.259, inclusive, issued pursuant to authority contained in Executive Order No. 8734, 6 F.R. 1917.

§ 1335.252 *Less than maximum prices.* Lower prices than those set forth in Appendix A may be charged, demanded, paid or offered.*

§ 1335.253 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery, or transfer of wood alcohol, alone or in conjunction with any other material, or by way of any commission, service, transportation, or other charge, or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or by alteration of formula or grades of wood alcohol, or otherwise.*

§ 1335.254 *Records and reports.* Every person making purchases or sales of wood alcohol in containers of 50 gallons or more after October 10, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year, complete and accurate records of each such purchase or sale, showing the date thereof, the name and address of the buyer or the seller, the price paid or received, and the specifications and quantity, including the size of the containers, of the wood alcohol purchased or sold.

Persons affected by this Schedule shall submit such reports to the Office of Price Administration as it may, from time to time, require.*

§ 1335.255 *Affirmations of compliance.* On or before November 10, 1941, and on or before the 10th day of each month thereafter, every person who, during the preceding calendar month, has sold wood alcohol in containers of 50 gallons or more, whether for immediate or future delivery, shall submit to the Office of Price Administration an affirmation of compliance on Form 134:1, containing a sworn statement that during such month all such sales were made at prices in compliance with this Schedule or with any exception or modification thereof. Copies of Form 134.1 can be procured from the Office of Price Administration, or, provided that no change is made in the style and content of the Form and that it is reproduced on an 8 x 10½" paper, they may be prepared by persons required to submit affirmations of compliance hereunder.*

§ 1335.256 *Enforcement.* In the event of refusal or failure to abide by the price limitations, report requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of the Government are fully exerted in order to protect the public interests and the interests of those persons who comply with this Schedule, and (c) that the procurement services of the Government are requested to refrain from purchasing wood alcohol from those persons who fail to comply with this Schedule. Persons who have evidence of the offer, receipt, demand or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation, or manipulation of prices of wood alcohol, or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

§ 1335.257 *Modification of the schedule.* Persons complaining of hardship or inequity in the operation of this Schedule may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom.*

§ 1335.258 *Definitions.* When used in this Schedule, the term:

(a) "Person" means an individual, partnership, association, corporation, or other business entity;

(b) "Wood alcohol" means the various grades of methyl alcohol of wood origin listed in Appendix A hereof.*

(2) *West of the Mississippi River.* Maximum prices for tank car quantities in territory west of the Mississippi River are determined by adding 3 cents per gallon to the maximum prices established above for tank cars in territory east of the Mississippi River.

(b) *Drums and other containers; carload quantities.* Maximum prices for drums and other containers, in carload quantities, in territory east or west of the Mississippi River, are determined by adding 6 cents per gallon to the maximum prices established for tank cars in the respective territory by paragraph (a) of this Appendix.

(c) *Drums and other containers; less than carload quantities.* Maximum prices for drums and other containers, in less than carload quantities, in territory east or west of the Mississippi River, are determined by adding 16 cents per gallon to the maximum price established for tank cars in the respective territory by paragraph (a) of this Appendix.

PART 261—TRESPASS

KAIBAB NATIONAL FOREST—PARTRIDGE CREEK, DOUBLE A, IRISHMAN DAM, AND DEVIL DOG GRAZING ALLOTMENTS—WILLIAMS RANGER DISTRICT

Order for the Removal of Trespassing Horses, Mules, and Burros

Whereas a number of horses, mules, and burros are trespassing and grazing on land in the Partridge Creek, Double A, Irishman Dam, and Devil Dog Grazing Allotments, Williams Ranger District, Kaibab National Forest, in the State of Arizona; and

Whereas these horses, mules, and burros are consuming forage needed for domestic livestock, are causing extra expense to established permittees, and are injuring national forest lands; and

Whereas the alternate sections of land lying within the exterior boundaries of some of the above mentioned allotments are privately owned, and the owners of said lands have given the United States exclusive possession of them pursuant to Regulation C-3 (D) [36 CFR 231.3 (d), amended 6 F.R. 1785]; and

Whereas these horses, mules, and burros are trespassing and grazing on said privately owned lands to the injury thereof; and, because the migratory proclivities of said horses, mules, and burros cause them to wander from said privately owned lands to the Federally owned lands, their presence on said privately owned lands imperils the Federally owned lands in the Kaibab National Forest;

Now, therefore, by virtue of the authority vested in the Secretary of Agriculture by the Act of June 4, 1897 (30 Stat. 35; 16 U.S.C. 551), and the Act of February 1, 1905 (33 Stat. 628; 16 U.S.C. 472), the following order for the occupancy, use, protection, and administration of land in the Partridge Creek, Double A, Irishman Dam, and Devil Dog Grazing Allotments, Williams Ranger District, Kaibab National Forest, is issued:

§ 261.50 *Temporary closure from livestock grazing.* (a) The Partridge Creek, Double A, Irishman Dam, and Devil Dog Allotments, Williams Ranger District, Kaibab National Forest, and all privately owned lands lying within the exterior boundaries of these allotments over which the United States has obtained exclusive possession as provided in Regulation G-3 (D) [36 CFR 231.3 (d)[1]], are hereby closed from the date of this order to December 31, 1941, to the grazing of horses, mules, and burros, except those horses, mules, and burros that are lawfully grazing on or crossing land in such allotments pursuant to the regulations of the Secretary of Agriculture, or that are used in connection with operations authorized by regulations, or that are used as riding, pack, or draft animals by persons traveling over such lands.

(b) Officers of the United States Forest Service are hereby authorized to dispose of, in the most humane manner, all horses, mules, and burros found trespassing or grazing in violation of this order.

(c) Public notice of intention to dispose of such horses, mules, and burros shall be given by posting notices in public places or advertising in a newspaper of general circulation in the locality in which the Kaibab National Forest is located.

§ 176.18 *Application, Form 122.* Rectifiers shall prepare a separate application on Form 122, "Rectifier's Description of Spirits, Wines, or Other Liquors to be Dumped for Rectification, and Return of Gauge," in triplicate, for each lot of distilled spirits or wines to be rectified before being bottled for exportation with benefit of drawback. The rectifier shall insert in each copy of the form, after the description of the packages to be dumped for rectification, a notice of intention as follows:

The above described spirits or wines will, after rectification, be bottled pursuant to

§ 176.19 *Approval of Form 122*—(a) *By storekeeper-gauger.* Except as provided by § 176.20, all copies of Form 122 will be submitted for approval to the storekeeper-gauger assigned to supervise rectifying operations. The storekeeper-gauger will examine the packages described in the application and the scalped portions of tax-paid stamps or the affidavit or statements in lieu thereof, attached to the original of the form, and if he finds that the spirits or wines to be dumped for rectification and bottling especially for export are as described, and have been lawfully tax-paid, and the forms are properly prepared, he will execute his certificate and authorize the rectifier to dump the packages described in the application and return all copies of the form to the proprietor. Immediately after dumping the spirits or wines, the rectifier shall forward two copies of the Form 122 (one, the original, with the cut-out portions of the tax-paid stamps, or other prescribed evidence of tax-payment attached) to the district supervisor, and retain the remaining copy of such form on file at the rectifying plant.

§ 176.20 *Mixing of distilled spirits or wines tax-paid at different rates.* When a rectifier manufactures distilled spirits to be bottled especially for export with benefit of drawback by a process of rectification involving the mixing of distilled spirits or distilled spirits and wines upon which basic taxes were paid at different rates (i. e. alcohol and wine, alcohol, brandy, and wine, or brandy and rum, etc.), he shall note on Form 122 the number of proof gallons of each kind of spirits and the number of wine gallons and percentage of alcohol of the wine mixed together in the processing receptacle, and no further mixing of such spirits or wines with spirits or wines contained in any other receptacle shall be made, unless a similar notation is made on Form 122.

A notice of intention shall be inserted by the rectifier in each copy of Form 237 after the description of the spirits or wines as follows:

The above described spirits (or wines), rectified pursuant to Form 122, Serial No. ------, dated ----------, 19------, are to be bottled especially for export with benefit of drawback.

When the process of manufacturing spirits or wines, in accordance with § 176.20, has been completed, the rectifier shall note on Form 237 the quantity of each kind of distilled spirits or wines, or both (calculated on a proof gallon basis as to spirits and a wine gallon basis as to wines), used in manufacturing the spirits or wines. The storekeeper-gauger or designated officer will, after approval, return all copies of Form 237 to the rectifier, who shall, if the spirits are subject to the rectification tax, forward all copies of the form to the collector of internal revenue, with remittance of the tax, in accordance with the procedure prescribed by Regulations 15. Upon receipt of the copies of Form 237 from the collector, or, in the case of spirits or wines exempted from the rectification tax, upon receipt of the copies of such form from the storekeeper-gauger or designated officer, the rectifier shall proceed to bottle the spirits or wines, or, if the spirits or wines are to be packaged, to fill, mark and stamp the packages. Upon completion of the bottling and casing or packaging of the spirits or wines, and the execution of Form 237, the rectifier shall retain one copy of the form and forward the original and one copy to the district supervisor. The storekeeper-gauger or designated officer will, upon completion of the bottling or packaging operations, supervise the deposit of the spirits or wines in the export storage room, except as provided by § 176.22.

(b) *Tax-paid certificate.* Upon receipt of the Form 122, as provided in § 176.19 and the Form 237, as herein provided, the district supervisor will prepare Form 1600, using as a basis therefor the dumping and bottling records Forms 122 and 237. He will then forward Form 1600 to the Commissioner with a copy each of Forms 122 and 237, and Form 1583, if any. Forms 1583, 1600, 122 and 237 will be retained by the Commissioner for use in connection with the examination and certification of the claim for drawback on such spirits or wines.

(c) *Transfer and storage pending exportation.* Spirits and wines bottled especially for export under this section may be transferred from the export storage room of the bottler, pursuant to Form 1656, to another export storage room at the port of exportation for storage pending release for direct exportation or use as supplies on vessels or aircraft, in accordance with the procedure prescribed by § 176.16 (f). Such export storage room at the port of exportation may be established by the proprietor of a tax-paid bottling house or rectifier, under the provisions of Regulations 11 or 15, whether or not the proprietor of the tax-paid bottling house or rectifier intends to bottle distilled spirits or wines especially for export.

(Sec. 3179 (b), I. R. C., sec. 309 (a), (b), (c), (d), Tariff Act of 1930, as amended; 19 U. S. C., Sup. 1309 (a), (b), (c), (d).)

§ 176.22 *Rectification by person other than the bottler.* Where distilled spirits or wines intended to be bottled especially for export with benefit of drawback are to be rectified by a person other than the bottler, the rectifier shall insert in each copy of Form 122, after the description of the packages to be dumped, a notice of intention as follows:

The above described spirits (or wines) will, after rectification, be packaged and shipped to ----------, for bottling especially for export.
(name and address of bottler)

When the spirits have been rectified and packaged, the rectifier shall insert in each copy of Form 237, before forwarding the same to the district supervisor, a notice of intention as follows:

The above described spirits (or wines), rectified pursuant to Form 122, Serial No. ----, dated ------ 19--, are to be shipped to ---------- for bottling especially for export.
(name and address of bottler)

After the packages have been properly stamped, the rectifier shall stencil or marks thereon, in addition to the other required marks or brands, the words "for bottling especially for export." Such packages shall then be deposited in the export storage room pending release by the Government officer for shipment to the bottling plant, unless they are to be shipped immediately. The rectifier and the storekeeper-gauger, or designated officer, will proceed otherwise in accordance with the provisions of §§ 176.18 to 176.21, inclusive, and in addition the rectifier will furnish the bottler with a copy of the Form 237. Upon receipt of the Forms 122 and 237, the district supervisor will prepare and forward to the Commissioner Form 1600 and a copy each of Forms 122, 237 and Form 1583, if any, in accordance with the procedure indicated by § 176.21 (b). If the spirits or wines so rectified are to be transferred by pipe line to a contiguous tax-paid bottling house, the rectifier shall proceed in accordance with the provisions of this section, except that he shall insert in each copy of Form 237, before forwarding one copy to the bottler and two copies to the district supervisor, in lieu of the notice of intention above required, a notice of intention as follows:

The above described spirits (or wines rectified pursuant to Form 122, Serial No. --------, dated ---------- 19----, are to be transferred by pipe line to----------

§ 176.23 *Bottling by person other than rectifier*—(a) *Application, Form 230.* Where packages of distilled spirits or wines rectified by a person other than the bottler, especially for export with benefit of drawback, are received for bottling, the bottler shall, unless such spirits or wines are to be bottled immediately, place them in the export storage room pending removal for bottling. Such spirits or wines will be reported on Form 45 or 52–D, as the case may be, as having been deposited in the export storage room prior to bottling. The bottler (rectifier or proprietor of a tax-paid bottling house) shall prepare a separate application on Form 230, in triplicate, for each lot of such spirits or wines to be dumped and bottled. The bottler shall insert in each copy of Form 230, after the description of the packages, or of spirits of wines transferred by pipe line, a notice of intention as follows:

The above described spirits (or wines) are to be bottled especially for export with benefit of drawback.

Spirits or wines which have been stored in the export storage room in packages may be released by the storekeeper-gauger for bottling, pursuant to request for that purpose by the bottler.

§ 176.27 *Fiberboard cases*—(a) *Requirements.*

All applicable information indicated by the headings of the columns and lines and the instructions printed on the form will be entered thereon. The receipt, bottling and disposition of distilled spirits or wines bottled especially for export with benefit of drawback, by proprietors of tax-paid bottling houses shall be entered on Form 52–D, "Monthly Record and Report of Tax-Paid Bottling House Operations". § 176.35 *Claim and entry* (a) *Form 1582 or Form 1582–A.* Claims for allowance of drawback of internal revenue taxes on distilled spirits or wines manufactured or produced in the United States and bottled especially for export, and entry for the exportation of such spirits or wines with benefit of drawback, shall be prepared by the exporter on Form 1582, "Claim for Internal Revenue Drawback on Bottled Distilled Spirits Exported, and Entry for Exportation Thereof," in quadruplicate, for distilled spirits, and Form 1582–A, "Claim for Internal Revenue Drawback on Bottled Wines Exported, and Entry for Exportation Thereof," in quadruplicate, for wines. All copies of Form 1582 or Form 1582–A, with Part 1 and Part 2 executed, shall be filed by the exporter with the district supervisor of the district wherein is located the export storage room in which the bottled spirits or wines are stored at the time of exportation. All of the information called for, as indicated by the headings of the columns, and the lines of the form, and the instructions printed on the form, shall be furnished.

§ 176.39 *Certificate, Form 1583.* Where spirits or wines manufactured (rectified) in the United States from imported spirits or wines are bottled especially for export with benefit of drawback, the collector of customs at the port where the entry or withdrawal for consumption was made will, upon application in writing by the rectifier, execute a certificate on Form 1583, in triplicate, showing that internal revenue tax has been collected on the imported spirits or wines described in the application. Two copies of the certificate will be forwarded by the collector of customs to the district supervisor of the Alcohol Tax Unit district in which the spirits were rectified. The remaining copy will be retained by the collector of customs. Such certificates shall be serially numbered, beginning with number 1 for each customs district.

§ 176.41 *Certificate required before approval of claim.* The Commissioner will not approve a claim for drawback on spirits or wines manufactured from imported spirits or wines and bottled especially for export prior to the receipt of the certificate, Form 1583, from the collector of customs, showing that internal revenue tax has been collected on such imported spirits or wines.

(Sec. 3179 (b), I.R.C., sec. 309 (a), (b), (c), (d), Tariff Act of 1930, as amended; 19 U.S.C., Sup., 1309 (a), (b), (c), (d).)

§ 176.49 *Direct delivery for customs inspection.* (a) If the export storage room where the bottled spirits or wines are stored is located at the port of exportation, the exporter shall deliver the shipment directly for customs inspection and supervision of lading. The drawback entry must be filed with the collector of customs at least six hours prior to the lading of the spirits in order to allow opportunity for customs inspection. The exporter must file one copy of the export bill of lading with the collector of customs and one copy with the district supervisor. The bill of lading must show the exporter as the shipper, the serial numbers of the cases, and the quantity shipped in wine gallons.

§ 176.50 *Shipment to port of export.* In the event the export storage room where the spirits or wines are stored is located elsewhere than at the port of exportation, the exporter shall deliver the shipment either directly for customs inspection and supervision of lading, as in the case where spirits or wines are stored at the port of exportation, or to a common carrier for transportation to the port of exportation. If the spirits or wines are delivered to a common carrier for transportation, the exporter shall procure two copies of the bill of lading covering such transportation. In case of exportation through a border port to contiguous foreign territory, the bill of lading shall cover transportation to destination and must show the routing, particularly the carrier which will deliver the shipment for customs inspection at the border. The bill of lading shall also show that the shipment was sent in care of the collector or deputy collector of customs at the border port. The exporter shall immediately forward one copy of the bill of lading direct to the collector of customs at the port of export, and transmit the other copy to the district supervisor of the district from which the spirits or wines were released for exportation. The district supervisor will attach his copy of the bill of lading to the copy of the claim and entry, Form 1582 or Form 1582–A, returned by the Government officer at the export storage room.

(Sec. 3179 (b), I.R.C., sec. 309 (a), (b), (c), (d), Tariff Act of 1930, as amended; 19 U.S.C., Sup., 1309 (a), (b), (c), (d).)

§ 176.55 *District supervisor's approval.* The district supervisor will examine the two copies of drawback claim, Form 1582 or 1582–A, received from the collector of customs, and compare them with the copy received from the storekeeper-gauger or designated officer who supervised the release of the liquor from the export storage room. If the district supervisor is satisfied that the claimant has complied in every respect with the law and regulations, and the claim is valid, and if a good and sufficient bond has been furnished, he will execute his certificate of approval on each copy of the claim and forward the original to the Commissioner, except as provided by § 176.45.

(Sec. 3179 (b), I.R.C., sec. 309 (a), (b), (c), (d), Tariff Act of 1930, as amended; 19 U.S.C., Sup., 1309 (a), (b), (c), (d).)

§ 176.57 *Action on claim.* The Commissioner will, upon receipt of the claim from the district supervisor, examine the claim and the records of his office, Forms 230, 122, 237, 1583, and 1600, previously furnished him, as provided by §§ 176.16 to 176.23, inclusive, to determine whether the spirits or wines described in the claim have been tax-paid. If the Commissioner finds that such spirits or wines have been tax-paid, he will execute a certificate to that effect on Form 646–A, "Certificate of Commissioner of Internal Revenue of Tax-Paid Spirits," or Form 646–B, "Certificate of Commissioner of Internal Revenue of Tax-Paid Wines." If the claim is allowed in whole, or in part, the Commissioner will forward it, together with his certificate, Form 646–A or Form 646–B, scheduled on Form 1550–A, "Schedule of Claims for Allowance of Drawback on Distilled Spirits or Wines Bottled Especially for Export and Exported," to the Comptroller General of the United States for certification of the amount allowed. If the claim is disallowed, the Commissioner will so notify the claimant and state the reasons therefor.

There is no authority of law for the shipment of distilled spirits in distillers' original packages, with benefit of drawback, to Alaska, Hawaii, Kingman's Reef, the Midway Islands, or Wake Island. (Sections 2887, as amended, 3176, 3341 (c), as amended, 3351 (c), and 3361 (c), as amended, I.R.C.)

Regulations 44 (1939 Edition) Amended

In order to conform Regulations 44[2] [Part 314, Title 26, Code of Federal Regulations, 1939 Sup.], as amended by Treasury Decision 4990,[3] approved July 19, 1940, relating to taxes on gasoline, lubricating oils, and matches under the Internal Revenue Code, as amended, to sections 501, 521 (a) (20) and (21) and (b), 547, 549, 550 and 553 of the Revenue Act of 1941 (Public Law 250, 77th Cong.), approved September 20, 1941, such regulations are further amended as follows:

PARAGRAPH 1. There is inserted immediately preceding § 314.1 the following:

SEC. 553. ADMINISTRATIVE CHANGES IN MANUFACTURERS' EXCISE TAX TITLE OF CODE. (Revenue Act of 1941.)

(a) *Leases.* Section 3440 of the Internal Revenue Code is amended to read as follows:

SEC. 3440. DEFINITION OF SALE.

For the purpose of this chapter the lease of an article (including any renewal or any extension of a lease or any subsequent lease of such article) by the manufacturer, producer, or importer shall be considered a taxable sale of such article.

* * * * *

PAR. 2. There is inserted immediately preceding § 314.2 the following:

SEC. 501. 1932 EXCISE TAXES MADE PERMANENT. (Revenue Act of 1941.)

Section 3452 of the Internal Revenue Code (relating to expiration of 1932 excise taxes) is repealed.

SEC. 521. DEFENSE EXCISE TAX RATES MADE PERMANENT WHICH ARE NOT INCREASED BY THIS ACT. (Revenue Act of 1941.)

* * * * *

(b) The rates specified in subsection (a) shall be applicable only with respect to the period after the date of the enactment of this Act, and the rates specified in section 1650 (a) * * * of the Internal Revenue Code shall not apply with respect to such period.

SEC. 550. EFFECTIVE DATE OF PART IV. (Revenue Act of 1941, Title V.)

(a) The amendments made by this Part shall be applicable only with respect to the period beginning with the effective date of this Part, and the rates specified in section 1650 (a) * * * shall not apply with respect to such period. This Part shall take effect on October 1, 1941.

* * * * *

PAR. 3. Section 314.2 as amended by Treasury Decision 4990 is further amended to read as follows:

§ 314.2 *Effective period.* Taxes on the sale of gasoline, lubricating oils, and matches became effective under Title IV of the Revenue Act of 1932, on June 21, 1932. The applicable provisions of the Revenue Act of 1932, as amended, were superseded as of March 1, 1939, by provisions of the Internal Revenue Code. The Code provisions were amended by subsequent acts, including the Revenue Act of 1941.

Section 521 (b) of the Revenue Act of 1941 is applicable to gasoline and lubricating oils, and section 550 (a) to matches. Section 501 is applicable to all three. With respect to gasoline and lubricating oils, the effect is to continue indefinitely the increases of tax rates imposed by section 1650 (a) of the Internal Revenue Code, added by section 210 of the Revenue Act of 1940. Under section 1650 (a) the tax increases were effective after June 30, 1940, and before July 1, 1945.

Prior to enactment of the Revenue Act of 1940, there was a tax, imposed by section 3409 of the Internal Revenue Code, on fancy wooden matches and wooden matches having a stained, dyed, or colored stick or stem. Section 1650 (a) of the Internal Revenue Code increased the tax on these matches also. The increased tax rate on these matches is continued indefinitely. However, section 547 of the Revenue Act of 1941 also imposes a tax on other matches at a lower rate. This latter tax, by virtue of section 550 (a) of the Revenue Act of 1941, takes effect on October 1, 1941. The result then is that the tax rates on gasoline, lubricating oils, and fancy wooden matches and wooden matches having a stained, dyed, or colored stock or stem which have been in effect since July 1, 1940, continue in effect indefinitely, and a new tax on other matches is applicable for an indefinite period beginning October 1, 1941.

The tax attaches upon sale or use by the manufacturer irrespective of when the article was manufactured, produced, or imported.

PAR. 4. There is inserted immediately following the subtitle "Liability for Tax", which follows § 314.2, the following:

SEC. 553. ADMINISTRATIVE CHANGES IN MANUFACTURERS' EXCISE TAX TITLE OF CODE. (Revenue Act of 1941.)

* * * * *

(b) *Existing contracts.* Chapter 29 of the Internal Revenue Code is amended by adding at the end thereof the following new section:

SEC. 3453. EXISTING CONTRACTS.

(a) *Tax payable by vendee.* If (1) any person has, prior to the effective date of Part V of Title V of the Revenue Act of 1941, made a bona fide contract for the sale on or after such date, of any article with respect to the sale of which a tax is imposed by that Act or an existing rate of tax is increased by that Act, and (2) such contract does not permit the adding to the amount to be paid under such contract of the whole of such tax or increased rate of tax, then (unless the contract prohibits such addition) the vendee shall, in lieu of the vendor, pay so much of the tax as is not so permitted to be added to the contract price.

(b) *Tax paid to vendor.* Taxes payable by the vendee shall be paid to the vendor at the time the sale is consummated, and shall be collected and paid to the United States by the vendor in the same manner as provided in section 3467. In case of failure or refusal by the vendee to pay such taxes to the vendor, the vendor shall report the facts to the Commissioner who shall cause collection of such taxes to be made from the vendee.

PAR. 5. There is inserted immediately preceding § 314.3 the following:

SEC. 549. INSTALLMENT, ETC., PAYMENTS. (Revenue Act of 1941.)

Section 3441 (c) of the Internal Revenue Code is amended to read as follows:

(c) (1) In the case of (A) a lease, (B) a contract for the sale of an article wherein it is provided that the price shall be paid by installments and title to the article sold does not pass until a future date notwithstanding partial payment by insallments, or (C) a conditional sale, there shall be paid upon each payment with respect to the article that portion of the total tax which is proportionate to the portion of the total amount to be paid represented by such payment.

(2) In the application of paragraph (1) to the articles with respect to which the rate of tax is increased by the Revenue Act

[2] 4 F.R. 4641.
[3] 5 F.R. 2647.

of 1941 or by the Revenue Act of 1940, where the lease, contract of sale, or conditional sale, and delivery thereunder—

(A) was made before July 1, 1940, the total tax referred to in paragraph (1) shall be the tax at the rate in force on June 30, 1940, and not at any greater rate; or

(B) was made after June 30, 1940, and before October 1, 1941, the total tax referred to in paragraph (1) shall be the tax at the rate in force on September 30, 1941, and not at any greater rate.

(3) Despite the provisions of paragraph (1), no tax shall be imposed with respect to any article not taxable under the law in existence on the day before the date of the enactment of the Revenue Act of 1941, if with respect to such article the lease, contract for sale, or conditional sale, and delivery thereunder, was made before October 1, 1941.

PAR. 6. Section 314.3 is amended by adding thereto the following paragraph:

§ 314.3 *Liability for a tax.* • • •

The amendment of section 3440 of the Internal Revenue Code by section 553 of the Revenue Act of 1941 clarifies existing language. The term "lease" includes any renewal or extension of a lease or any subsequent lease of an article.

PAR. 7. Section 314.4 as amended by Treasury Decision 4990 is further amended by substituting the following for paragraph 5:

§ 314.4 *When tax attaches.* • • •

Where an article is leased by the manufacturer, or sold under an installment-payment contract, or under a conditional-sale contract with payments to be made in installments, a proportionate part of the total tax shall be paid upon each payment received with respect to the article. The tax must be returned and paid to the collector during the month following that in which such payment is received.

In the case of articles with respect to which the rate of tax is increased by the Revenue Act of 1940 or by the Revenue Act of 1941:

(a) If the lease, contract for sale, or conditional sale, and delivery thereunder, were made before July 1, 1940, the tax on all payments made after September 30, 1941, is at the rate in force on June 30, 1940;

(b) If the lease, contract for sale, or conditional sale, and delivery thereunder, were made after June 30, 1940, and before October 1, 1941, the tax on all payments after September 30, 1941, is at the rate in force on September 30, 1941.

In the case of articles not subject to tax on September 30, 1941, if the lease, contract for sale, or conditional sale, and delivery thereunder, were made on or before that date, no tax is due on payments made on or after October 1, 1941.

PAR. 8. There is inserted immediately preceding § 314.30 the following:

SEC. 521. DEFENSE EXCISE TAX RATES MADE PERMANENT WHICH ARE NOT INCREASED BY THIS ACT. (REVENUE ACT OF 1941)

(a) The following sections of the Internal Revenue Code are amended as follows:

• • • • •

(20) *Gasoline.* Section 3412 (a) is amended by striking out "1 cent" and inserting in lieu thereof "1½ cents".

• • • • •

PAR. 9. Section 314.35 as amended by Treasury Decision 4990 is further amended to read as follows:

§ 314.35 *Rate of tax.* The tax payable by the importer or producer thereof, or by any producer of gasoline with respect to the period after June 30, 1940, is at the rate of 1½ cents a gallon.

PAR. 10. There is inserted immediately preceding § 314.40 the following:

SEC. 521. DEFENSE EXCISE TAX RATES MADE PERMANENT WHICH ARE NOT INCREASED BY THIS ACT. (REVENUE ACT OF 1941)

(a) The following sections of the Internal Revenue Code are amended as follows:

• • • • •

(21) *Lubricating oils.* Section 3413 is amended by striking out "4 cents" and inserting in lieu thereof "4½ cents".

• • • • •

PAR. 11. The first sentence of § 314.44 as amended by Treasury Decision 4990 is further amended to read as follows:

§ 314.44 *Rate of tax.* The tax payable by the manufacturer with respect to the period after June 30, 1940, is at the rate of 4½ cents a gallon.

PAR. 12. There is inserted immediately preceding § 314.50 the following:

SEC. 547. MATCHES. (REVENUE ACT OF 1941, TITLE V, PART IV)

Section 3409 of the Internal Revenue Code is amended to read as follows:

SEC. 3409. TAX ON MATCHES.

(a) *Manufacturers' tax.* There shall be imposed upon matches sold by the manufacturer, producer, or importer, a tax of 2 cents per 1,000 matches, except that in the case of fancy wooden matches and wooden matches having a stained, dyed, or colored stick or stem, packed in boxes or in bulk, the tax shall be 5½ cents per 1,000 matches.

• • • • •

PAR. 13. § 314.50 is amended to read as follows:

§ 314.50 *Scope of tax.* The tax imposed by section 3409 of the Internal Revenue Code, as amended by section 547 of the Revenue Act of 1941, applies to all types of matches, including waxed matches, parlor matches, safety matches, book matches, vestas, etc., regardless of whether sold in bulk, boxes, books, or in any other manner.

In the case of all other matches the tax payable by the manufacturer with respect to the period on and after October 1, 1941, is at the rate of 2 cents per thousand.

[Docket No. A-348]

PART 338—MINIMUM PRICE SCHEDULE, DISTRICT NO. 18

FINDINGS OF FACT, CONCLUSIONS OF LAW, MEMORANDUM OPINION AND ORDER IN THE MATTER OF THE PETITION OF BITUMINOUS COAL PRODUCERS BOARD FOR DISTRICT NO. 18 FOR CHANGES IN THE CLASSIFICATIONS AND MINIMUM PRICES FOR COALS PRODUCED AND SOLD IN DISTRICT NO. 18

This proceeding was instituted upon a petition filed with the Bituminous Coal Division by District Board 18, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937. The petitioner seeks reductions in the effective minimum prices for Subdistricts 6 and 7 of District 18.

Pursuant to the petitioner's request for temporary relief, pending final disposition of the petition, and Order of the Director, temporary relief was granted.

Pursuant to Orders of the Director, and after due notice to all interested persons, a hearing in this matter was held before Thurlow G. Lewis, a duly designated Examiner of the Division, at a hearing room of the Division in Denver, Colorado. All interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. The petitioner and the Consumers' Counsel Division appeared. At the close of the hearing the parties waived the preparation and filing of a report by the Examiner, and the record was thereupon submitted to the undersigned. The Consumers' Counsel Division filed a brief.

The petition requests that the following changes be made in the effective minimum prices applicable to Subdistricts 6 and 7 of District 18:

(a) That minimum prices for Subdistrict 6 to all market areas be changed to read as follows: Size Group 2, 2" Lump, 400; Size Group 6, 3" x 1½", 350; Size Group 8, 1½" square x 1", 300; Size Group 9, 1" x ⅜", 215; Size Group 12, 1" x 0", 170; Size Group 13, ⅜" x 0", 150; Size Group 15, Straight Mine Run, 350; and that the price under Size Group 10 be eliminated from Subdistrict 6.

(b) That minimum prices for Subdistrict 7 be changed to read as follows: Size Group 2, 2" Lump, 400; Size Group 8, 1½" Square x 1", 300; Size Group 9, 1" x ⅜", 215; Size Group 12, 1" x 0", 170; and that all other prices should re-

main the same as shown in the District 18 price schedule.

The evidence shows that subsequent to the establishment of effective minimum prices for District 18, a controversy arose among certain producers in Subdistrict 6 and Subdistrict 7. District Board 18 called a meeting with reference to these matters, which was attended by all interested producers in Subdistricts 6 and 7 and competing subdistricts. At this meeting the subject was exhaustively discussed and the conclusions reached that, due to changed conditions, the effective prices applicable to Subdistricts 6 and 7 should be changed. Thereupon the District Board worked out the changes requested in this proceeding. The witness for the District Board testified that the requested prices would be just and equitable to the producers in Subdistricts 6 and 7 as among themselves and also to producers of competing coals. All the producers in District 18 were given notice of the meeting and of the proposed changes and it appears from the evidence that no objection or opposition was interposed by anyone. It further appears that the proposed changes will result in the saving of several thousand dollars annually by consumers.

Witness Litts testified for the District Board that the changes requested comply with all the standards of the Act and should be established as the effective minimum prices applicable to the coals in question.

There was no opposition expressed to the relief requested.

I find, upon all the evidence, that the amendment of the Schedule of Effective Minimum Prices for District No. 18 For All Shipments, as requested by the petitioner, is required in order to effectuate the purposes of Section 4 II (a) and 4 II (b) of the Act and to comply in all respects with the standards thereof.

Now, therefore, it is ordered, That § 338.5 (*General prices; minimum prices for shipment via rail transportation*), and § 338.21 (*General prices in cents per net ton for shipment into all market areas*) in the Schedule of Effective Minimum Prices for District No. 18 for All Shipments be and they hereby are amended as follows:

1. In § 338.5 and § 338.21 the prices listed for *Subdistrict 6* shall be deleted and the following prices inserted in lieu thereof:

Size groups:						
2	6	8	9	12	13	15
400	350	300	215	170	150	350

2. In § 338.5 and § 338.21 the prices listed for *Subdistrict 7* shall be deleted and the following prices inserted in lieu thereof:

Size groups:					
2	8	9	11	12	13
400	300	215	190	170	125

Dated: October 4, 1941.

Pursuant to orders of the Director, a hearing having been held in this matter before a duly designated examiner of the Division at a hearing room thereof in Salt Lake City, Utah, at which all interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses and otherwise to be heard;

The preparation and filing of a report by the Examiner having been waived by the parties and the matter thereupon having been submitted to the undersigned;

The undersigned having made and entered Findings of Fact, Conclusions of Law and having rendered an Opinion in this matter, which are filed herewith,[1] in which it is concluded that the requested relief should be granted.

Now therefore it is ordered, That § 339.5 (*General prices; minimum prices for shipment via rail transportation*) in the Schedule of Effective Minimum Prices for District No. 19 for All Shipments be and it hereby is amended as follows: Commencing fifteen (15) days from the date of this order the effective minimum price for coal in Size Group 11 produced in Subdistrict 2 for shipment by rail to Market Areas 237-240 and 247-254 shall be $2.35 per net ton.

TITLE 41—PUBLIC CONTRACTS

CHAPTER II—DIVISION OF PUBLIC CONTRACTS

PART 202—MINIMUM WAGE DETERMINATIONS

IN THE MATTER OF THE DETERMINATION OF THE PREVAILING MINIMUM WAGES IN THE PAINT AND VARNISH INDUSTRY

This matter is before me pursuant to section 1 (b) of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35) entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes", otherwise known as the Walsh-Healey Public Contracts Act and hereinafter referred to as the Act.

Notice of the hearing in this matter was published in the FEDERAL REGISTER (5 F.R. 3757) and was sent to interested parties, to trade unions, to trade publications, and to trade associations in the field. Publication was also sought in the national press. Hearing was had before the Public Contracts Board in Washington, D. C., on October 3, 1940.

Appearances were made and testimony was given at the hearing by members of the industry, by the American Federation of Labor, and by the National Paint, Varnish, and Lacquer Association.

A wage survey tabulated by the Research Section of the Division of Public Contracts on information voluntarily submitted by members of the industry through the National Paint, Varnish, and Lacquer Association was introduced in evidence. The survey as supplemented covered 14,464 employees in 392 plants as of June 1940. The plants were located in 33 states. A comparison between the survey and the Census of Manufactures for 1937 shows that the tabulation covers about 40 percent of the employees in the industry and is representative both as to size of establishments and number of employees and that it covers all states which are significant producers of paint and varnish.

Upon consideration of all the evidence in the case the Public Contracts Board recommended that the prevailing minimum wage for the Paint and Varnish Industry be found to be 30 cents an hour for the states of Virginia, North Carolina, South Carolina, Tennessee, Georgia, Florida, Alabama, Mississippi, Louisiana, and Arkansas, and 50 cents an hour for all the other states of the United States and the District of Columbia.

On August 22, 1941 when the entire record was presented formally for consideration I issued notice to the effect that I intended to follow the Board's recommendation except as to the minimum of 30 cents an hour for the states of Virginia, North Carolina, South Carolina, Tennessee, Georgia, Florida, Alabama, Mississippi, Louisiana, and Arkansas. My proposal was predicated on facts appearing of record that the manufacturers in these states were not producing for the government any significant amount of paint. The proposal has met with certain objections by way of briefs, particularly to the effect that southern manufacturers are in a position to contribute to the national needs for paint. I am satisfied that this is the situation and that therefore the wages for the southern states enumerated must be determined in accordance with the prevailing standards in the localities.

The evidence indicates that the low wage occupation in this industry is that of unskilled laborers such as handymen, loaders, unloaders, laborers, and the like. With the exception of the wage variations between the southern states enumerated and the other states of the United States, existing variations in wages are greater within limited political entities than in broad geographic areas. As the Board has pointed out, the most conspicuous single minimum that is paid in the plants in the states other than the southern states enumerated is 50 cents an hour. Evidence of this prevalence is found in the fact that 686 employees out of a total of 14,164 in the states other than the southern states enumerated are concentrated in the bracket from 50 to 51 cents an hour. The survey shows that 4½ percent of the employees are concentrated in this single one-cent interval. At no point below 50 cents is there any concentration approachig this percentage. I find that the Board's recommendation of 50 cents an hour is proper.

The wage tabulation introduced in evidence indicates that in the group of southern states enumerated there is a pronounced concentration of employees in the bracket from 30 to and including 40 cents; in fact, approximately 55 percent of all employees are found in this bracket. This concentration doubtlessly represents the concentration of unskilled workers in the industry. The fact that in these states at exactly 40 cents 16.7 percent of all the productive employees are concentrated indicates that the wage most commonly paid in these states to unskilled workers is 40 cents. For this reason I have rejected the Board's recommendation of 30 cents an hour and have found the prevailing minimum in the southern states enumerated to be 40 cents an hour.

I hereby determine:

§ 202.41 *Paint and varnish industry.* The Paint and Varnish Industry, as that term is used in this decision, shall be understood to be that industry which manufactures pigments or colors, either in dry or paste form; paints mixed ready for use or in dry or paste form; varnishes, lacquers, enamels; fillers, putty, top dressings; paint and varnish removers; furniture and floor wax; and lacquer thinners.

The prevailing minimum wages for persons employed in the performance of contracts with agencies of the United States Government, subject to the provisions of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. Sup. III 35) for the manufacture and furnishing of the products of the Paint and Varnish Industry, shall be 40 cents an hour or $16.00 per week of forty hours, arrived at either upon a time or piece work basis, for the states of Virginia, North Carolina, South Carolina, Tennessee, Georgia, Florida, Alabama, Mississippi, Louisiana, and Arkansas; and 50 cents an hour or $20.00 per week of forty hours, arrived at either upon a time or piece work basis, for all other states of the United States and the District of Columbia. (Sec. 1 (b), 49 Stat. 2036; 41 U.S.C., Sup., 35 (b))

This determination shall be effective and the minimum wages hereby established shall apply to all contracts subject to the aforesaid Act of June 30, 1936, bids for which are solicited or negotiations otherwise commenced on and after November 6, 1941.

Nothing in this determination shall effect such obligations for the payment of minimum wages as an employer may have under the Fair Labor Standards Act of 1938 or any wage order thereunder, or under any other law, or agreement, more favorable to employees than the requirements of this determination.

Dated: October 6, 1941.

FRANCES PERKINS,
Secretary.

PETITION OF CONSUMERS' COUNSEL DIVISION FOR MODIFICATION OF THE SCHEDULE OF EFFECTIVE MINIMUM PRICES FOR DISTRICT NO. 8 TO PERMIT THE SALE OF COAL TO THE KEY CITY GAS COMPANY FOR USE IN ITS DUBUQUE, IOWA, PLANT AT THE MINIMUM F. O. B. MINE PRICE ESTABLISHED FOR FREE ALONGSIDE DELIVERY

ORDER OF CONSOLIDATION AND NOTICE OF AND ORDER FOR HEARING

Original petitions in the above-entitled matters, were duly filed with this Division by the Consumers' Counsel Division, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

Pursuant to an Order of the Director dated February 6, 1941, a hearing was commenced in Docket No. A-586 on March 10, 1941, but no evidence was offered and the hearing was continued until April 22, 1941. Subsequent Orders of the Director further continued the hearing from time to time and by an Order dated May 13, 1941, it was continued until further Order.

No hearing has been previously scheduled in Docket No. A-885.

It appears that the matters concerned in the above-designated dockets present related issues of fact;

Now, therefore, it is ordered, That Dockets Nos. A-586 and A-885 be consolidated for the purpose of hearing and for such other purposes as the Director may deem advisable.

It is further ordered, That a hearing in the above-entitled matters under the applicable provisions of said Act and the rules of the Division be held on November 12, 1941, at 10 o'clock in the forenoon of that day, at a hearing room of the Bituminous Coal Division, 734 Fifteenth Street NW., Washington, D. C. On such day the Chief of the Records Section in Room 502 will advise as to the room where such hearing will be held.

It is further ordered, That Travis Williams or any other officer or officers of the Division duly designated for that purpose shall preside at the hearing in such matters. The officers so designated to preside at such hearing are hereby authorized to conduct said hearing, to administer oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, to continue said hearing from time to time, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to all parties herein and to persons or entities having an interest in these proceedings and eligible to become a party herein. Any person desiring to be admitted as a party to this proceeding may file a petition of intervention in accordance with the rules and regulations of the Bituminous Coal Division for proceedings instituted pursuant to section 4 II (d) of the Act, setting forth the facts on the basis of which the relief in the original petition is supported or opposed or on the basis of which other relief is sought. Such petitions of intervention shall be filed with the Bituminous Coal Division on or before November 7, 1941.

All persons are hereby notified that the hearing in the above-entitled matters and any orders entered therein may concern, in addition to the matters specifically alleged in the petition, other matters necessarily incidental and related thereto, which may be raised by amendment to the petition, petitions of interveners or otherwise, or which may be necessary corollaries to the relief, if any, granted on the basis of this petition.

The matter concerned herewith is in regard to Docket No. A-586, the petition of Consumers' Counsel Division for reduction in minimum prices or for a change in the size grouping of 2" x 0 slack coal produced in District No. 8 for retort gas use from Size Group 27 to Size Group 20 when for shipment to Key City Gas Company at Dubuque, Iowa, and for such changes in the effective minimum prices or size groups for shipment of 2" x 0 slack coal from District No. 8 into Market Area 50 whether or not it is shipped for retort gas use.

The matter concerned herewith is in regard to Docket No. A-885, the petition of Consumers' Counsel Division for modification of the Schedule of Effective Minimum Prices for District No. 8 to permit the sale of coal produced by code members in said district to the Key City Gas Company for use in the plant of the said company in Dubuque, Iowa, in Market Area 50 at the minimum f. o. b. mine prices established for free alongside delivery.

PETITION OF BITUMINOUS COAL PRODUCERS BOARD FOR DISTRICT NO. 8 FOR PRELIMINARY, OR TEMPORARY AND PERMANENT ORDER ESTABLISHING MINIMUM ON-LINE RAILWAY LOCOMOTIVE FUEL PRICES FOR COAL PRODUCED IN DISTRICT NO. 8 BY ISLAND CREEK COAL COMPANY MINES NOS. 15 AND 16

ORDER GRANTING MOTION TO AMEND AND GRANTING TEMPORARY RELIEF

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, has been filed with this Division by the above-named party requesting a preliminary or temporary and permanent order establishing minimum prices for the coals produced by Island Creek Coal Company Mines Nos. 15 and 16, for on-line railway locomotive fuel. A Notice of and Order for Hearing in the above-entitled docket for October 7, 1941, has been issued and a reasonable showing of the necessity, pending final disposition of the petition in the above-entitled matter, having been made, the Director issued an order granting temporary relief for these coals. The original petitioner has now filed a motion to amend its original petition so as to include a prayer for a preliminary or temporary and permanent order for the establishment of minimum off-line railway locomotive fuel prices for coals produced in District 8 by Island Creek Coal Company Mines Nos. 15 and 16; and

The Director deeming the motion proper, and finding that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with this Division in the above-entitled matter; and

The Director deeming his action necessary in order to effectuate the purposes of this Act:

Now, therefore, it is ordered, That District Board 8's motion be granted, and that, pending final disposition of the above-entitled matter, temporary relief be, and it hereby is, granted as follows: Commencing forthwith, and supplementing the Schedule of Effective Minimum Prices for District No. 8 for All Shipments Except Truck, the coals referred to in the schedule marked "Temporary Supplement," annexed hereto and hereby made a part hereof, shall be subject to minimum prices as provided in said schedule: *Provided, however,* that the temporary prices established for on-line railway locomotive fuel in the Acting Director's Order of July 15, 1941 and the temporary prices established herein for off-line railway locomotive fuel shall apply to shipments from Island Creek No. 15 Mine from Verdune, West Virginia, only, and to shipments from Island Creek No. 16 Mine from Manus, West Virginia, only.

Notice is hereby given that applications to stay, terminate or modify the temporary relief herein granted may be filed pursuant to the Rules and Regulations Governing Practice and Procedure Before

the Bituminous Coal Division in Proceedings Instituted Pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

PETITION OF DISTRICT BOARD NO. 9 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF CERTAIN MINES IN DISTRICT NO. 9, FOR RAIL SHIPMENTS

[Docket No. A-1031 Part II]

PETITION OF DISTRICT BOARD NO. 9 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF THE GREEN RIVER COAL MINE (MINE INDEX NO. 230) IN DISTRICT NO. 9 FOR RAIL SHIPMENTS ORIGINATING AT BEAVER DAM, KENTUCKY

MEMORANDUM OPINION AND ORDER SEVERING DOCKET NO. A-1031 PART II FROM DOCKET NO. A-1031 AND NOTICE OF AND ORDER FOR HEARING IN DOCKET NO. A-1031 PART II

The original petition in the above-entitled matter filed with this Division on August 28, 1941, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, requests the issuance of orders establishing temporary and permanent price classifications and minimum prices for the coals of certain mines in District No. 9.

As the Director found in a separate Order issued in Docket No. A-1031, a reasonable showing of necessity has been made for the granting of the relief prayed for by petitioner except in so far as the establishment of price classifications and minimum prices for the coals of the Green River Coal Mine (Mine Index No. 230) for rail shipments originating at Beaver Dam, Kentucky, is concerned.

The Director is of the opinion that the original petition in this matter does not contain facts sufficient to warrant the establishment of price classifications and minimum prices for the coals of the Green River Coal Mine (Mine Index No. 230) for rail shipments originating at Beaver Dam, Kentucky, without a hearing, due to the fact that price classifications and minimum prices have heretofore been established for such coals for rail shipments originating at both Drakesboro and Bowling Green, Kentucky, and the necessity for the establishment of price classifications and minimum prices applying from the additional shipping point has not been clearly shown.

Now, therefore, it is ordered, That the portion of Docket No. A-1031 relating to the Green River Coal Mine (Mine Index No. 230) be and the same hereby is severed from the remainder of Docket No. A-1031 and designated as Docket No. A-1031 Part II.

It is further ordered, That a hearing in Docket No. A-1031 Part II under the applicable provisions of said Act and the rules of the Division be held on November 12, 1941, at 10 o'clock in the forenoon of that day, at a hearing room of the Bituminous Coal Division, 734 Fifteenth Street NW., Washington, D. C. On such day the Chief of the Records Section in Room 502 will advise as to the room where such hearing will be held.

It is further ordered, That D. C. McCurtain or any other officer or officers of the Division duly designated for that purpose shall preside at the hearing in such matter. The officers so designated to preside at such hearing are hereby authorized to conduct said hearing, to adminster oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, to continue said hearing from time to time, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to all parties herein and to persons or entities having an interest in these proceedings and eligible to become a party herein. Any person desiring to be admitted as a party to this proceeding may file a petition of intervention in accordance with the rules and regulations of the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Act, setting forth the facts on the basis of which the relief in the original petition is supported or opposed or on the basis of which other relief is sought. Such petitions of intervention shall be filed with the Bituminous Coal Division on or before November 7, 1941.

All persons are hereby notified that the hearing in the above-entitled matter and any orders entered therein may concern, in addition to the matters specifically alleged in the petition, other matters necessarily incidental and related thereto, which may be raised by amendment to the petition, petitions of interveners or otherwise, or which may be necessary corollaries to the relief, if any, granted on the basis of this petition.

The matter concerned herewith is in regard to the petition of District Board No. 9 for the establishment of price classifications and minimum prices for the coals of the Green River Coal Mine (Mine Index No. 230) in District No. 9 for rail shipments originating at Beaver Dam, Kentucky.

Dated: October 3, 1941.

[Docket No. A-983]

PETITION OF THE BITUMINOUS COAL CONSUMERS' COUNSEL FOR THE ESTABLISHMENT OF MAXIMUM PRICES FOR EACH OF THE PRODUCING DISTRICTS

MEMORANDUM OPINION AND ORDER

This is a matter instituted upon an original petition filed with the Bituminous Coal Division on July 23, 1941, pursuant to Section 15 of the Bituminous Coal Act of 1937 (the "Act"), by the Bituminous Coal Consumers' Counsel ("Consumers' Counsel") seeking the expeditious establishment, under section 4 II (c), of maximum prices f. o. b. transportation facilities at the mines for all coals produced in each of the producing districts. The petition, as amended on September 5, 1941, charged that excessive prices, approaching the proportions of profiteering, were being charged for bituminous coal in many markets and requested that maximum prices be established for each of the districts at a specified uniform increase over the minimum prices presently effective.

On September 24, 1941, in the course of the hearing, Consumers' Counsel moved to amend further the original petition.[1]

Intervening petitions were filed by each of the District Boards and by numerous interested persons such as code members, distributors, marketing agencies, and consumers.

Pursuant to an order of the Director dated August 13, 1941, and after due notice to all interested persons, a hearing in this matter was initiated on September 9 before C. R. Larrabee, an Examiner of the Division duly designated by the Director to conduct said hearing. At the hearing the original petitioner, District Boards 1-20, inclusive, 22 and 23, and numerous other interveners appeared and participated. Consumers' Counsel introduced evidence, both oral and documentary, through 19 witnesses, and requested that judicial notice be taken of the several Minimum Price Schedules and of proclamations of the President in the Fall of 1939 and in May 1941, proclaiming national emergencies. On September 25, 1941, petitioner rested its case.

Thereupon counsel for several district boards and code members either moved that the petition of the Consumers' Counsel be dismissed or that the petition be dismissed and that the Director retain jurisdiction of the present proceeding.

The motions to dismiss the petition of Consumers' Counsel in this matter were ordered reduced to writing and referred to the Director. Pending a ruling upon the motions to dismiss, the hearing was suspended and on September 30 the Director heard oral argument on the motions.

The extreme importance to the bituminous coal industry of the issue posed for resolution is evidenced both by the varying positions taken by the respective district boards and the earnestness with which each position, in turn, has been argued. District Boards 7 and 8 and Carter Coal Company, a code member producer in District 7, were in favor of an outright dismissal of the proceeding. Counsel for District Boards 2 and 18 stated that those district boards concurred in this position.[2] District Board 1, while not supporting the position of Consumers' Counsel, opposed the motion to dismiss on the grounds that in the light of the emergency it was essential to the industry and the public alike that the proceeding be continued and the record heretofore made be utilized for whatever value it had. District Boards 3, 4, 6, 10, and 11 took the position that the record did not sustain the charges of excessive and oppressive prices made by Consumers' Counsel but urged that the Director retain jurisdiction and continue the proceeding in an endeavor to determine whether maximum prices were necessary, and, if so, what maximum prices were proper. American Coal Distributors stated its agreement with this position. The position taken by the National Association of Hothouse Vegetable Growers, Inc., was substantially in accord with the position taken by District Board 1 but in addition the Association urged that in order to clarify the proceeding the Director order Consumers' Counsel to elect whether it wants this matter to proceed as one under section 15 of the Act or under section 4 II (c). Consumers' Counsel opposed all motions for dismissal, contending that the record demonstrated that excessive prices, oppressive to consumers, do presently exist in certain markets and that the trend of prices for bituminous coal in many grades and sizes has been steadily upward in many markets.

The memoranda and arguments submitted in support of these several contentions have been extremely helpful particularly when considered against the background of the record, to which the Director has given careful attention.

However different the position of the parties, there appears to be agreement upon certain basic matters. No one contends that the Act does not authorize the establishment of maximum prices for bituminous coal. Although the legislative history of the Coal Act discloses that the primary purpose for its enactment was the desire of Congress to establish a "floor" for bituminous coal prices in an endeavor to stabilize the industry, the establishment of maximum prices and the attendent protection of the public against unreasonably high prices is one of the pervasive objectives of the Act. True, maximum prices are not to be established unless a need therefor is shown. To this end, active participation by all those having a responsibility for or apt to be affected by the operation of the Act is essential if the Director is to be in a position to make proper maximum prices effective if the need therefor is demonstrated.

There was agreement too on the proposition that the Director, apart from any petition or complaint that may be filed with him, has a statutory obligation to establish maximum prices whenever it is necessary in the public interest to protect consumers against unreasonably high prices.

It was similarly agreed that it would be inadvisable to delay an inquiry as to whether there exists a need for the establishment of maximum prices until prices had already reached unreasonable levels. It is clear that any inquiry conducted before any immediate need arises can be conducted with more care and caution. To the extent that the proceeding is now permitted to continue and proceed in an orderly manner the risk of the need for precipitate action in the future is lessened. And in this same connection, it is clear that the Director cannot be insensitive to the rising costs and inflationary trends which are now the concern of both the executive and legislative branches of the government. In ruling on the motions those facts must be kept in mind.

It has been earnestly argued by counsel for District Boards 7 and 8 that the record is hopelessly inadequate to support the claims of Consumers' Counsel and that the motion to dismiss must "as a matter of law" be granted. The argument is that this proceeding was brought under section 15 of the Act and, the record failing to support the charges made in the petition, the petition must be dismissed. Although the petition was, as is stated above, filed by the Bituminous Coal Consumers' Counsel pursuant to Section 15 of the Act, it nevertheless requested the Director to establish maximum prices under section 4 II (c) of the Act.

In setting down the case for hearing, the Director ordered that the proceeding concern itself with the issues posed by the following allegations of the Consumers' Counsel's petition:

(1) That prices being charged for bituminous coal in many markets are excessive and oppressive of consumers, such prices in many instances approaching the proportions of profiteering, and that such prices for present and future delivery are far in excess of reasonable prices, and consumers are being seriously injured by the current market quotations and by the fear of still higher prices;

(2) That the abuses that have already occurred and the graver abuses which threaten can only be rectified and prevented by the immediate imposition of a schedule of maximum prices for each of the producing districts under the provisions of section 4 II (c) of the Act;

(3) That such maximum prices should be established at specified increases above the minimum prices in effect within each of the districts, such increase being approximately 10% of the estimated realization for all the coal produced in each such district under the present effective minimum prices; and

(4) That an expeditious procedure should be formulated for hearing the bona fide and legitimate claims of code members who seek special higher maximum prices for themselves, alleging that the general maximum prices would not yield them a fair return on the value of their property.

It was clear from the Notice of and Order for Hearing that the proceeding was concerned with the establishment of maximum prices for bituminous coal.[3] And it is equally clear from the order that the Director did not set the case for hearing for the sole purpose of determining whether "abuses" within the meaning of section 15 existed. It follows, therefore, that even if the existence of abuses has not been established there is no absence of "jurisdiction" to continue this proceeding.

Several of the district boards have asked for a determination of my views of the record thus far and I think that the industry is, in light of the charges initially made, entitled to such a determination. It is clear from the record that Consumers' Counsel has failed to establish either (1) that "abuses" exist or (2) that prices being charged for bituminous coal are "excessive and oppressive of consumers." Although the record does show that in many instances

---

[1] The amendments made were as follows:

(1) By amending paragraph 2 which originally read:

Your petitioner is informed by many letters from consumers throughout the country and from other sources, and believes, that prices being charged for bituminous coal in many markets are excessive and oppressive of consumers, such prices in many instances approaching the proportions of profiteering.

to read:

Your petitioner is informed and believes that prices being charged for bituminous coal in certain markets are excessive and oppressive of consumers.

(2) By amending Paragraph 4 of the original petition by striking out the following sentence which appears on page 2 of the petition:

In the face of overwhelmingly favorable popular response to this appeal by millions of patriotic citizens, many bituminous coal producers have taken advantage of the stimulated demand for coal by increasing their prices to unwarranted figures.

(2) By striking out the word "such" which is the first word of the last complete sentence in Paragraph IV and substituting therefor the word "unwarranted."

(4) By striking Paragraph V of the petition in its entirety.

[2] In the written motions which were filed for District Boards 2 and 18, it was stated that if the Director dismissed this proceeding he could thereupon issue an order for a hearing in a general docket for the purpose of establishing maximum prices pursuant to section 4 II (c) of the Act.

[3] Indeed, the opening sentence of the Notice of and Order for Hearing stated that the petition was filed for "the expeditious establishment of maximum prices."

the prices of bituminous coal have increased both before and after April 1, 1941, it fails to demonstrate that these increases are not justified in light of the many attendant circumstances.

None the less, the record does contain evidence tending to show that the trend of prices has been upward, that there may be a shortage[4] of transportation facilities for the movement of bituminous coal in some localities[4] and that there may be a shortage of certain kinds and sizes of bituminous coal due to the sudden expansion of demand. Even though the particular charges of the petition have not been sustained, a showing has been made sufficient to render it advisable at this time to continue the proceeding in order that the objective of the Act be realized.

As several of the parties have claimed, the record is almost completely barren of any testimony supporting Consumers' Counsel proposed schedule of maximum prices as conforming to the standards of the Act or as being fair and equitable. That, however, is no reason for dismissing the proceeding at this time. On the contrary, it supplies a reason for going ahead and obtaining data from which an intelligent conclusion can be drawn as to what would be a proper schedule of prices to establish if such is to be done.

Of course, in the proceeding to follow it is expected that the parties will introduce evidence with respect to the need for the establishment of maximum prices and the prices which it would be proper to establish, so that after completion of the hearing, I will be in a position to establish maximum prices when and if the need therefor arises. It is to be emphasized that the Director does not regard this as an adversary proceeding. All relevant facts should be before the Director when he is called upon to determine (1) whether maximum prices are necessary, and (2) if so, what those prices should be. And it is for the purpose of developing these facts that the hearing is being continued.

It has been suggested that these proceedings should be dismissed and that there should be instituted by the Director a new proceeding looking to the establishment of maximum prices. To dismiss this proceeding and institute at the same time a new proceeding would be to invite unnecessary delay and to erase from the record data which I have already found establishes a sufficient reason for going ahead with the present proceeding to determine whether there is a need for the establishment of a schedule of maximum prices.

[4] Consumers' Counsel introduced evidence in support of the claim that the spiralling of prices during the First World War was due to transportation shortages. At the oral argument, it was not contested that transportation shortages was a major reason for the spiralling of prices during the First World War, but it was also stated that many other factors contributed to the increases, such as labor shortages, concentration of war industries in certain regions, etc.

In determining that the proceeding should go forward, the Director recognizes that the matter of the establishment of maximum prices is one of great concern to the entire industry. By cooperative and objective endeavor much can be done toward solving the many complex and difficult problems which are encountered in the establishment of a sound schedule of maximum prices. There is every reason to believe that with such cooperative effort there will evolve a proper schedule which will be available if and when it is found that maximum prices are necessary. The district boards particularly have a heavy responsibility in this connection. For it is upon them that the Director relies, as he has relied in the past, for valuable and helpful aid in the solving of difficult problems arising in connection with the successful administration of the Act.

It is encouraging to find that many of the district boards have urged me to take the position which I am here taking. All the district boards have given indication that they would cooperate fully in an endeavor to determine (1) whether maximum prices are necessary and (2) if so, what those prices should be. The recognition by the industry of its broad responsibility to the consuming public, which the offer of cooperation betokens, is commendable indeed. I am fully confident that the hearing in this mater will proceed expeditiously and a workable solution and a safeguard against runaway prices evolved in the event such solution and safeguard are found necessary.

Counsel for District Board 7 indicated at the oral argument that if the Director was to continue the proceeding, the District Board for which he spoke would require an adjournment of the hearing in order to have time in which to prepare its case. Although a similar request was not made by representatives for other district boards, and although it is some six weeks since the Notice of and Order for Hearing in this matter was issued, I have, nevertheless, determined that the hearing ought not to reconvene until October 13, 1941. I have concluded to allow this interval because of my firm conviction that a comprehensive presentation by the district boards will be of great aid in formulating a basis for a sound determination of this matter. I feel that whatever loss there may be in time will be more than compensated by the more orderly and full presentation that the district boards and other interested parties will be enabled to make if they are given such an interval during which further to prepare their cases.

To the extent that the motions of the several district boards seek dismissal of this proceeding, they are denied. Those motions seeking a determination of the record thus far are granted to the extent set forth above. To the extent that several of the pending motions seek continuance of the proceeding, they are granted. The motion of the National Association of Hothouse Vegetable Growers, Inc., except as it seeks continuance of the proceeding, is also denied.

And it is so ordered.

Dated: October 3, 1941.

Director.

[Docket No. 1565-FD]

IN THE MATTER OF THE CARDINAL FUEL AND SUPPLY COMPANY, REGISTERED DISTRIBUTOR, REGISTRATION NO. 1404, DEFENDANT

MEMORANDUM OPINION AND ORDER DENYING APPLICATION FOR RECONSIDERATION

This proceeding was instituted by the Bituminous Coal Division, pursuant to the provisions of the Bituminous Coal Act of 1937, in order to investigate and determine whether the Cardinal Fuel and Supply Company, a registered distributor, Registration No. 1404, Columbus, Ohio, had violated certain provisions of the Rules and Regulations for the Registration of Distributors promulgated pursuant to section 4 II (h) of the Act.

A hearing in this matter was held on March 5, 1941, before Edward J. Hayes, a duly designated Examiner of the Division, at a hearing room thereof in Columbus, Ohio. All interested parties were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. The defendant appeared.

On July 2, 1941, the Examiner filed his Report, Proposed Findings of Fact, Proposed Conclusions of Law, and Recommendations in this matter, in which it was recommended that the registration of the defendant as a registered distributor be suspended for a period of ninety days.

Thereafter, the defendant filed exceptions to the Examiner's report, a brief in support thereof, and, pursuant to leave granted by the Director, presented oral argument before the Director in support of its exceptions on August 19, 1941.

On September 16, 1941, the Director issued his Findings of Fact, Conclusions of Law and Opinion concerning Exceptions to the Proposed Findings of Fact, Proposed Conclusions of Law and Recommendations of the Examiner and his Order Adopting with Modification the Proposed Findings of Fact, Propcsed Conclusions of Law and Recommendations of the Examiner and suspending the registration of the defendant as a registered distributor for sixty days from the date thereof.

On September 24, 1941, the defendant filed with the Division an application for reconsideration of the Director's Order of September 16, 1941, contending (1) that in the absence of evidence that any of the shipments involved herein were made outside of the State of Ohio, they were strictly intrastate shipments and not subject to the Act or to the power of the Congress, and (2) that the Rules and Regulations of the Division which were violated by the defendant are invalid as improper delegations to the Division of the legislative power of the Congress.

The contentions of the defendant are without merit and its application for reconsideration should be denied for the following reasons:

(1) In Docket No. 18-FD, a proceeding brought pursuant to Section 4-A of the Act, it was decided that transactions in bituminous coal in intrastate commerce in all localities in the State of Ohio directly affect interstate commerce in such coal and that there will be an undue or unreasonable advantage, preference or prejudice as between transactions in intrastate commerce in Ohio on the one hand and interstate commerce in bituminous coal on the other hand, and an undue, unreasonable, or unjust discrimination against interstate commerce in such coal if such transactions in intrastate commerce or any substantial part thereof are not regulated and subjected to the provisions of the Act. These findings are applicable to the transactions in question of the defendant.

The Order entered in Docket No. 18-FD and section 4-A of the Act provide that any producer believing that any particular intrastate transactions in coal are not subject to the Act may apply to the Division for exemption. The defendant does not claim that any of the coal involved in this proceeding was ever the subject matter of such an exemption proceeding. The defendant now, for the first time, raises the contention concerning the intrastate character of its transactions. It is significant that the contention was not mentioned in the answer filed herein by the defendant on March 4, 1941, in the exceptions of the defendant to the Proposed Findings of Fact, Proposed Conclusions of Law, and Recommendations of the Examiner, in the brief filed by the defendant in support of said exceptions, or in the oral argument presented before the Director in support of the exceptions on August 19, 1941[1]

The producers whose coal was here involved are code members. By accepting membership in the Bituminous Coal Code, they subjected all coal sold by them to the provisions of section 4 of the Act. Furthermore, the defendant is a registered distributor. By applying for and accepting registration as a distributor, the defendant voluntarily subjected itself to the Rules and Regulations for the Registration of Distributors, agreed not to accept or receive any distributor's discount in excess of that prescribed by the Division, and agreed to abide by the effective minimum price schedules and by the Marketing Rules and Regulations. Under the foregoing circumstances, the defendant can ill afford to claim that the transactions in question were not subject to regulation under the Act.

The power of the Congress to regulate transactions in intrastate commerce where they directly affect interstate commerce is, at this date, beyond question.

(2) The Supreme Court of the United States has decided adversely to the contention of the defendant regarding delegation of Congressional power to the Division. See *Sunshine Anthracite Coal Co.* v. *Adkins*, 310 U. S. 381, 397-400. No further discussion of this contention is warranted.

In view of the foregoing, I find that no sufficient cause has been shown warranting a reconsideration of the Order of the Director of September 16, 1941, herein.

It is therefore ordered, That the application for reconsideration filed by the Cardinal Fuel & Supply Company be and it hereby is denied.

Dated: October 4, 1941.

Director.

[Docket No. 1673-FD]

IN THE MATTER OF THE PITTSBURG & SHAWMUT COAL COMPANY, REGISTERED DISTRIBUTOR, REGISTRATION NO. 7349, DEFENDANT

ORDER OF SUSPENSION OF REGISTRATION

The Notice of and Order for Hearing in the above-entitled matter having been duly made by the Director on May 15, 1941, pursuant to the provisions of § 304.14 of the Rules and Regulations for the Registration of Distributors promulgated by the Bituminous Coal Division (the "Division") pursuant to section 4 Part II (h) of the Bituminous Coal Act of 1937 (the "Act"), to determine whether the Pittsburg & Shawmut Coal Company, Registered Distributor, Registration No. 7349, the defendant herein, has violated the provisions of the Act, the Bituminous Coal Code (the "Code"), the Rules and Regulations for Registration of Distributors, the agreement (Distributor's Agreement) executed September 9, 1940 by Pittsburg & Shawmut Coal Company pursuant to an order of the National Bituminous Coal Commission dated March 24, 1939 in General Docket No. 12 and adopted July 1, 1939 as an order of the Division, and orders of the Director; and

Whether or not the registration of the Pittsburg & Shawmut Coal Company as a registered distributor should be revoked or suspended or other appropriate penalties should be imposed; and

Said Notice of and Order for Hearing having been duly served upon the defendant on May 26, 1941, and the defendant, on August 7, 1941, having consented to the entry of an "Order Amending and Supplementing Notice of and Order for Hearing," and said order having been duly served on the Defendant on August 8, 1941, in accordance with the above-mentioned consent; and

The defendant by a "Statement of Admissions Agreement and Consent To Entry of Order of Suspension of Registration," made September 23, 1941, the original of which is on file with the Division, having consented to the entry of an order suspending its registration as a distributor for a period of six months from the date of service of said order on the defendant and in furtherance thereof having expressly agreed to waive (1) a hearing pursuant to the Order Amending and Supplementing the Notice of and Order for Hearing herein; (2) oral argument and filing of briefs before the Director or other presiding officer; (3) the preparation and submission of any report, findings of fact, or recommendation by the Director or other presiding officer; (4) the presentation of all argument before the Director or other presiding officer; and (5) the preparation and submission of tentative findings of fact or proposed order of the Director; and

The defendant, in said "Statement of Admissions Agreement and Consent to Entry of Order of Suspension of Registration," having admitted violations of the provisions of the Act, the Code, the Marketing Rules and Regulations, the Rules and Regulations for Registration of Distributors, the Distributor's Agreement, and Orders of the Division, and agreed therein, as follows:

I

A. The defendant, Pittsburg & Shawmut Coal Company ("P and S Company"), is a corporation duly organized and existing under and by virtue of the laws of the Commonwealth of Pennsylvania, with its principal office located at 132 N. McKean Street, Kittanning, Pennsylvania, and has been during the time herein mentioned, and is now engaged under the powers granted to it by its corporate charter in the business of buying and selling coal.

B. A majority of the outstanding shares of capital stock of the defendant is owned by the Allegheny River Mining Company ("Allegheny"), a corporation, duly organized and existing under and by virtue of the laws of the Commonwealth of Pennsylvania. Allegheny has been during the time herein mentioned and is now a code member engaged under the powers granted to it by its corporate charter in the business of producing bituminous coal. Its principal office is located at 132 N. McKean Street, Kittanning, Pennsylvania.

[1] On September 22, 1941, almost one month after said argument, and six days after the Director issued his Findings of Fact, Conclusions of Law, Opinion, and Order herein, the defendant lodged with the Division a document entitled "Additional Exceptions of the Cardinal Fuel & Supply Company to the Proposed Findings of Fact, Proposed Conclusions of Law and Recommendations of the Examiner." In this document for the first time the defendant mentioned the contentions now raised by it. This document, however, because of its tardiness, cannot be considered to have been validly filed with the Division.

C. A majority of the outstanding shares of capital stock of Allegheny is owned by the Pittsburg & Shawmut Railroad ("P & S Railroad"), a corporation duly organized and existing under and by virtue of the laws of the Commonwealth of Pennsylvania which, since the year 1902, has been engaged under the powers granted to it by its corporate charter in the business of operating a steam railroad. Its principal office is located at 132 N. McKean Street, Kittanning, Pennsylvania.

D. The Freebrook Corporation ("Freebrook") is a corporation duly organized and existing under and by virtue of the laws of the Commonwealth of Pennsylvania, and has been during the time herein mentioned and is now engaged under the powers granted to it by its corporate charter in the business of mining bituminous coal as a code member producer with its principal office located at 293 Main Street, Brookville, Pennsylvania. Charles M. Shoffner owns 60% of its outstanding shares of stock and 40% of its outstanding shares of stock is owned by his brother, John R. Shoffner.

E. The Ringgold Corporation ("Ringgold") is a corporation duly organized and existing under and by virtue of the laws of the Commonwealth of Pennsylvania and has been during the time herein mentioned and is now engaged under the powers granted to it by its corporate charter in the business of mining bituminous coal as a code member producer. Its principal office is located at Timblin, Pennsylvania. Charles M. Shoffner owns 40% of its outstanding shares of stock and 60% of its outstanding shares of stock is owned by his brother, John R. Shoffner and other members of their family.

F. Officers and directors of Allegheny, P & S Company, Freebrook and Ringgold have been at all times since October 1, 1940, and now are as follows:

	Allegheny	P & S Company	Freebrook	Ringgold
Chas. M. Shoffner	President	Chairman of Board	President	President.
E. J. Halberg	Secretary and General Counsel.	Secretary and General Counsel.		
E. H. Allendorfer		Vice Pres. and General Sales Mgr.		
Roy M. Gidel	Purchasing Agent			
W. M. Dippold	Treasurer	Treasurer		
John R. Shoffner	Gen. Supt. Ch. Engineer	Director	Vice Pres. Director.	Director.
M. A. Crawford	Assistant Secretary	Assistant Secretary		
A. J. Griffith	Assistant Auditor and Assistant Treasurer.	Assistant Auditor and Assistant Treasurer.		

G. On September 17, 1940, pursuant to the Order of the National Bituminous Coal Commission dated March 24, 1939, entered in General Docket No. 12, the defendant filed with the Division its application dated September 9, 1940, for registration as a distributor which was accompanied by its agreement executed September 9, 1940, (the "Distributor's Agreement") as a condition to the approval of said application; said application was approved by the Division on September 17, 1940, and Certificate No. 7349 was issued to the defendant authorizing it to act as a registered distributor; the defendant has ever since this date and is now acting as a registered distributor.

II

A. (1) Rule 2 of section XII of the Marketing Rules and Regulations by the sale of approximately 13,567 tons of bituminous coal for railroad shipment which were produced by the code member producers in District 1, set forth in Paragraph A (2) hereof and for which no effective minimum prices, temporary or final, for railroad shipment had been established by the Division at the time the railroad shipments were made; Rule 3 of section XII of the Marketing Rules and Regulations by filing false information, wilfully made, with Statistical Bureau for District 1, concerning the abovementioned transactions; by representing that said coal was produced at Allegheny's Cadogan Mine, Mine Index No. 76, located at Cadogan, Pennsylvania, in District No. 1; Rule 8 of section XIII of the Marketing Rules and Regulations by intentionally making false invoices concerning the origin of the above-mentioned coal by representing that said coal was produced at the Cadogan Mine; and Paragraph (e) of its Distributor's Agreement by committing the above-named violations of the Marketing Rules and Regulations. The defendant, however, asserts that there was no intention on its part to mislead the purchasers of such coal and that such purchasers generally knew that it was produced at numerous mines other than the Cadogan Mine. The defendant further asserts that the practice of billing and invoicing said coal as produced at the Cadogan Mine had been followed for many years before October 1, 1940.

The coal was trucked by said Code member producers to a railway loading dock, namely Colwell Dock, a loading ramp operated by Freebrook, purchased by P & S Company f. o. b. the Colwell Dock at a price of $1.50 per net ton, and there loaded and shipped in railroad cars over the P & S Railroad at the lawfully published and established tariff rate to the Cadogan cleaning and preparation plant owned by Allegheny (the "Cadogan Plant") located at the Cadogan Mine for washing, preparation, resale and reshipment to various purchasers. The effective minimum price f. o. b. the mine for truck shipments for this coal was $2.20 per net ton. The P & S Company sold and invoiced the coal at a price of $2.05 or more per net ton f. o. b. the Cadogan Plant as coal produced at the Cadogan Mine, and reported the transactions to the Statistical Bureau for District No. 1 as sales of coal produced at the Cadogan Mine made f. o. b. the Cadogan Plant. The P & S Company collected the resale price of the coal, paid 25 cents per net ton to Freebrook for loading over the Colwell Dock, the tariff rate of $2.00 per car to the P & S Railroad for hauling the coal from the Colwell Dock to the Cadogan Plant, and 10 cents per net ton for cleaning to Allegheny. The defendant represents that it made no deduction for reject coal in the payment of the producer of $1.50 per net ton but absorbed the loss of approximately 10¢ per net ton resulting from such reject coal.

(2) The code member producers, the index numbers of their mines and the tonnages of coal produced by them respectively and sold by the P & S Company as described in (1) hereof are as follows:

Mine index No.	Code member producers in District No. 1	Total tons
1001	F. J. Adams, New Bethlehem, Pa.	2,057

B. Rule 2 of section XII of the Marketing Rules and Regulations, by selling for railroad shipment f. o. b. the Cadogan Plant, during the period from October 1, 1940, to and including February 28, 1941, approximately 6,992.75 net tons of coal produced by the James Coal Mining Company at its Orpha Mine (Mine Index No. 353) located in Armstrong County, Pa., and approximately 5,674 tons of coal produced by the Mohawk Mining Company at its Mohawk Mine (Mine Index No. 556) located in Armstrong County, Pa., for which no effective minimum prices for railroad shipment f. o. b. the Cadogan Plant, temporary or final, were established by the Division at the time the railroad shipments were made; Paragraph (d) of its Distributor's Agreement by purchasing the above-mentioned coal, physically handling it at the Cadogan plant and accepting and retaining distributor's discounts from the purchase price thereof; Rule 3 of section XII of the Marketing Rules and Regulations by filing false information, wilfully made, with the Statistical Bureau for District 1 concerning the above-mentioned transactions; Rule 8 of section XIII of the

Marketing Rules and Regulations by intentionally making false invoices concerning the origin of the above-mentioned coal; and Paragraph (e) of its Distributor's Agreement by committing the above-named violations of the Marketing Rules and Regulations. The defendant, however, asserts that there was no intention on its part to mislead the purchasers of such coal and that such purchasers generally knew that it was produced at numerous mines other than the Cadogan Mine. The defendant further asserts that the practice of billing and invoicing said coal as produced at the Cadogan Mine had been followed for many years before October 1, 1940.

This coal was purchased by the P & S Company and shipped in railroad cars over the P & S Railroad at the lawfully published and established tariff rate from the mines of the code member producers to the Cadogan Plant and there screened and otherwise physically handled under the direction of the P & S Company. The P & S Company resold and invoiced the screened sizes f. o. b. the Cadogan Plant as coal produced at the Cadogan Mine and reported the transactions to the Statistical Bureau for District No. 1 as sales of coal produced at the Cadogan Mine made f. o. b. the Cadogan Plant. During said period no effective minimum prices temporary or final had been established f. o. b. the Cadogan Plant for the sale of coal produced at the mines of the James Coal Company or the Mohawk Mining Company or at said mines for the sizes of coal sold by the P & S Company.

C. Rule 2 of section XII of the Marketing Rules and Regulations by selling for railroad shipment f. o. b. the Ringgold cleaning and preparation plant owned by Ringgold (the "Ringgold Plan") located at the Ringgold Mine, Ringgold, Pennsylvania, 537.45 tons of coal produced by E. S. Geer at his Geer Mine (Mine Index No. 684) located near Timblin, Pa., and 335 tons of coal produced by G. C. Blose at his Blose Mine (Mine Index No. 729) located near Timblin, Pa., for which no effective minimum prices, temporary or final, for railroad shipment had been established by the Division at the Ringgold Plant at the time the railroad shipments were made; Rule 3 of section XII of the Marketing Rules and Regulations by filing false information wilfully made with the Statistical Bureau for District No. 1 concerning the above-mentioned transactions; Rule 8 of section XIII of the Marketing Rules and Regulations by intentionally making false invoices concerning the origin of the above-mentioned coal; and paragraph (e) of its Distributor's Agreement by committing the above-named violations of the Marketing Rules and Regulations. The defendant, however, asserts that there was no intention on its part to mislead the purchasers of such coal and that such purchasers generally knew that it was produced at numerous mines other than the Ringgold Mine. The defendant further asserts that the practice of billing and invoicing said coal as produced at the Ringgold Mine had been followed for many years before October 1, 1940.

The coal was transported by the Code member producers by truck to the railroad siding located at Markles, Pennsylvania and there loaded into railroad cars by them. The coal was purchased f. o. b. said cars by the P & S Company and shipped to the Ringgold Plant where it was cleaned and otherwise physically handled under the direction of the P & S Company for resale and reshipment to various purchasers. The P & S Company resold and invoiced the coal f. o. b. the Ringgold Plant as coal produced at the Ringgold Mine and reported the transactions to the Statistical Bureau for District No. 1, as sales of coal produced at the Ringgold Mine made f. o. b. the Ringgold Plant.

D. Rule 2 of section XII of the Marketing Rules and Regulations by selling approximately 5,182.50 tons of coal for railroad shipment f. o. b. the Ringgold Plant during the period from October 1, 1940 to February 28, 1941, produced by the Lost Hill Company (H. C. Elkin) at its Lost Hill Mine, Mine Index No. 607, located at Dora, Pennsylvania, and approximately 5,563.45 tons of coal for railroad shipment f. o. b. the Ringgold Plant during the period from October 1, 1940 to March 31, 1941, produced by Frank W. Milliron (Milliron Coal Company) at his Milliron Mine, Mine Index No. 655, located at Ringgold, Pennsylvania, for which no effective minimum prices temporary or final had been established by the Division for railroad shipment f. o. b. the Ringgold Plant at the time the railroad shipments were made; paragraph (d) of its Distributor's Agreement by purchasing the above-mentioned coal at the effective minimum price therefor, physically handling it at the Ringgold Plant and accepting and retaining distributor's discount thereon; Rule 3 of section XII of the Marketing Rules and Regulations by filing false information, wilfully made, with the Statistical Bureau for District 1 concerning the above-mentioned transactions; Rule 8 of section XIII of the Marketing Rules and Regulations by intentionally making false invoices concerning the origin of the above-mentioned coal; paragraph (e) of its Distributor's Agreement by committing the above-named violations of the Marketing Rules and Regulations.

The coal produced at the Lost Hill Coal Company was delivered by the Code member producer into railroad cars at Dora, Pennsylvania, and there purchased by the P & S Company. The coal produced at the Milliron Mine was delivered by the Code member producer into railroad cars at Markles, Pennsylvania, and there purchased by the P & S Company. The coal was shipped from these points by the P & S Company to the Ringgold Plant at Ringgold, Pennsylvania, where it was screened and otherwise physically handled under the direction of the P & S Company. The P & S Company sold and invoiced the coal f. o. b. the Ringgold plant as coal produced at the Ringgold Mine and reported the transactions to the Statistical Bureau for District No. 1 as sales of coal produced at the Ringgold Mine made at the Ringgold Plant.

E. Paragraph (d) of its Distributor's Agreement by accepting and retaining unauthorized distributor's discounts on coal purchased from Freebook Corporation and physically handled by it during the period from October 1, 1940 to on or about August 1, 1941. This coal was purchased by the P & S Company f. o. b. mines of the Freebrook Corporation, shipped therefrom to the Ringgold Plant, cleaned and otherwise physically handled and resold by the P & S Company therefrom to various purchasers.

F. Rules 1 and 2 of section VIII of the Marketing Rules and Regulations and Paragraph (e) of its Distributor's Agreement by utilizing analyses in the sale and offer for sale of coal produced by Allegheny, a Code member, which was sold to the Erie Railroad Company, the Delaware, Lackawanna and Western Railroad Company, the City of Buffalo, New York, the Empire Builders Supply Company, Inc., Niagara Falls, New York, Fred E. Shardon, Lockport, New York, the Diamond Match Company, Oswego, New York, Dawson-Gruman Company, Inc., Syracuse, New York, and numerous other consumers; by failing to file with the Statistical Bureau for District No. 1 or the Bituminous Coal Producers Board for District No. 1 reports of the analyses used; and by failing to accompany said analyses with statements to the effect that such analyses were properly filed with the Statistical Bureau for District No. 1, and the Bituminous Coal Producers Board for District No. 1.

G. Rule 5 of section VIII of the Marketing Rules and Regulations and paragraphs (e) and (f) of its Distributor's Agreement by making agreements with or accepting orders from the purchasers named in F hereof for the sales of said coal upon a penalty or a premium and penalty basis and failing to file the analyses upon which the premium and penalty clauses of such agreements and orders were based, as required by Rule 1 of section VIII of the Marketing Rules and Regulations, and, except in respect to a contract with the City of Buffalo, failing to file statements setting forth in full the terms of the premium and penalty provisions of the agreements and orders.

H. Order No. 14 of the Commission dated July 15, 1937, adopted as an order of the Division by the Secretary of the Interior on July 1, 1939, and paragraph (f) of its Distributor's Agreement, by failing to file with the Statistical Bureau for District No. 1 copies of the agreements and orders referred to in G hereof.

I. Rule 1 section X of the Marketing Rules and Regulations and Paragraph (e) of its Distributor's agreement, by granting allowances for coal claimed to be substandard in quality to the Canadian National Railway, Arkport Dairies, Inc., David Maypol Tool Company, and Philadelphia Milk Producers Co-operative Association and failing to file with Statistical Bureau for District No. 1 the information required by Rule 1, section X of the Marketing Rules and Regulations.

J. Section 4 Part II (d) of the Bituminous Coal Act of 1937, Part II (e) of the Code and paragraph (b) of its Distributor's Agreement, by selling and shipping during the period from October 1, 1940 through January 31, 1941 to the Canadian National Railway of Canada run of mine coal for railroad fuel, produced by Allegheny at its Cadogan Mine, Mine Index No. 76, located in Armstrong County, Pennsylvania, via Lake Ontario car ferry and charging therefor less than the applicable effective minimum prices for such coal for shipment via Lake Ontario car ferry.

K. Section 4 Part II (e) of the Act, Part II (e) of the Code and paragraph (b) of its Distributor's Agreement by granting discounts not authorized by the Rules and Regulations for the Registration of Distributors on coal produced by Allegheny at its Cadogan Mine, Mine Index No. 76 and by Ringgold at its Ringgold Mine, Mine Index No. 433, located in Armstrong County, Pennsylvania, and sold by P & S Company during the period from October 1, 1940 through March 31, 1941 to Ardean R. Miller, Rochester, New York for resale by Ardean R. Miller through his retail yard to the Taylor Instrument Company, of Rochester, New York.

Now, therefore, based upon the above admissions of the defendant, upon the defendant's consent to the making and entry of this order of suspension of registration and the agreements of the defendant, (a) that neither it nor any of its officers, representatives, agents, servants, employees, attorneys or affiliates will act as a registered distributor or accept or receive any discounts from the effective minimum prices either directly or indirectly on coal purchased by it or them or any of them from code members during said period of suspension; (b) that neither it nor any of its officers, representatives, agents, servants, employees, attorneys or affiliates will receive or accept any commissions as sales agent of coal sold during said period of suspension under any sales agency contract entered into subsequent to August 18, 1941, unless such contract shall have been approved by the Director under and for the purposes of this order; (c) that during said period of suspension it and they will at all times observe and faithfully abide by all the provisions of the Act, the Marketing Rules and Regulations, the Rules and Regulations for the Registration of Distributors, the Distributor's Agreement and all applicable orders of the Division; and (d) that, upon the basis of the foregoing admitted violations, within 15 days after service upon it of this order of suspension, it will pay to the following Code member producers, sums aggregating Five Thousand Eight Hundred Thirty-four Dollars and Eighty Cents ($5,834.80) as follows:

It is ordered, That the registration of the Pittsburg & Shawmut Company as a distributor be and it hereby is suspended for a period of one hundred and eighty (180) days from the date of service hereof upon the defendant, and that the defendant, its officers, representatives, agents, servants, employees, attorneys and all affiliates of the defendant shall be and they hereby are prohibited from acting as a registered distributor and from receiving or accepting any discounts from the effective minimum prices, either directly or indirectly, on coal purchased by it, them or any of them during said period of suspension: *Provided, however*, That if the defendant shall not have complied with the provisions of Section 304.15 of the Rules and Regulations for the Registration of Distributors at least five (5) days prior to the expiration of said period of suspension, said suspension shall continue in full force and effect until five (5) days after the affidavit required by said § 304.15 shall have been filed with the Division.

TITLE 30—MINERAL RESOURCES

CHAPTER III—BITUMINOUS COAL DIVISION

[Docket No. A-688]

PART 327—MINIMUM PRICE SCHEDULE, DISTRICT NO. 7

MEMORANDUM OPINION AND ORDER AMENDING, IN PART, ORDER OF THE DIRECTOR DENYING PERMANENT RELIEF AND DENYING REQUEST FOR ORAL ARGUMENT ON PETITION FOR RECONSIDERATION IN THE MATTER OF THE PETITION OF KOPPERS COAL COMPANY, A CODE MEMBER IN DISTRICT 7, FOR A CHANGE IN THE EFFECTIVE CLASSIFICATIONS AND MINIMUM PRICES OF COAL IN SIZE GROUPS 18-21 AND FOR THE ESTABLISHMENT OF THE EFFECTIVE CLASSIFICATIONS AND MINIMUM PRICES FOR ITS COAL IN SIZE GROUP 22 FOR SHIPMENT INTO ALL MARKET AREAS

This proceeding was instituted upon a petition filed with the Bituminous Coal Division by Koppers Coal Company, a code member producer in District 7, pursuant to the provisions of section 4 II (d) of the Bituminous Coal Act of 1937, requesting that the price classifications established for the coals produced at its

Long Branch Mine (Mine Index No. 106) be reduced from "A" to "D" in Size Groups 18–21 and that the classification of "E" be established for the coals of said mine in Size Group 22.

On August 6, 1941, the Director issued his Findings of Fact in this matter and on the basis of the conclusions drawn therefrom, denied the requested relief.

In a petition filed on September 11, 1941, the petitioner requested that the Order of the Director entered in this proceeding on August 6, 1941, 6 F. R. 3993, denying relief be reconsidered; that the petitioner be granted an opportunity orally to argue the grounds of the petition for reconsideration; and that upon reconsideration the Director enter an order granting the relief prayed for in the original petition. The principal reasons assigned by the petitioner in support of its petition for reconsideration are that certain specified Findings of Fact and Conclusions of Law made by the Director are not supported by sufficient evidence, and that in making said findings and conclusion, the Director failed to give due consideration to certain evidence of record.

After a reconsideration of this matter, the Director is of the opinion that the Findings of Fact and Conclusions of Law and the Order heretofore entered with respect to petitioner's request for a reclassification of its coals in Size Groups 18–21 are proper; and said findings and conclusions are adequately supported by the evidence, and that all evidence of material value was given proper consideration.

The petitioner contends that the Director erred in denying its request for the establishment of an "E" classification for the Long Branch Mine coals in Size Group 22. Attention is called to the fact that the Director has established a classification of "E" for the coal in this Size Group produced at a competing mine which has the same classifications in all other Size Groups as petitioner's mine. The petitioner also refers to the testimony of its witness that an "E" classification for the coals in Size Group 22 is the highest classification for any coal in that Size Group with which petitioner's coal is in competition.

After reconsidering the record in this matter, the Director is of the opinion that petitioner's request with respect to the Long Branch Mine coals in Size Group 22 should be granted.[1] While the evidence of record does not establish that petitioner has sustained injury because of the classification presently established, it does show that that classification is not in proper relation to the classifications established for the coals of other producers in the district, and that other producers cannot be prejudiced by the establishment of an "E" classification for the Long Branch Mine coals in Size Group 22.

I, therefore, conclude that the Order Denying Relief, entered herein on August 6, 1941, should be amended by the establishment of an "E" classification for the coals of the Long Branch Mine in Size Group 22; that in all other respects petitioner's request for relief should be denied. The request of petitioner for permission to present oral argument in support of its petition for reconsideration, will be denied.

Now, therefore, it is ordered, That the Order of the Director dated August 6, 1941, denying relief herein, be and it hereby is amended to provide an "E" classification for the coals of the Long Branch Mine (Mine Index No. 106) in Size Group 22, and § 327.21 (*High volatile coals: Alphabetical list of code members*) in the Schedule of Effective Minimum Prices for District No. 7 For All Shipments Except Truck be amended accordingly; and

It is further ordered, That in all other respects the Order herein dated August 6, 1941, remain unchanged; and

It is further ordered, That the request of petitioner for permission to present oral argument on its petition for reconsideration is hereby denied.

Dated: October 6, 1941.

[1] On August 21, 1941, 6 F. R. 4343, the Director entered an Order in Docket No. A–416, establishing an "E" classification for the coals in Size Group 22 produced at the Willis Branch Mine (Mine Index No. 204) of Hill-Anderson Coal Company and the Ingram Branch Mine (Mine Index No. 87) of Mary Francis Coal Company. The coals of these mines also have classifications in other size groups similar to those established for petitioner's coals.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

CHAPTER II—CORPS OF ENGINEERS, WAR DEPARTMENT

PART 204—DANGER ZONE REGULATIONS[1]

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1), the following regulations are hereby prescribed to govern the use and navigation of the waters of the Atlantic Ocean in an area extending between Jupiter Inlet and Fort Pierce, Florida, comprising an aerial gunnery target range for Army aircraft.

§ 204.83 *Waters of the Atlantic Ocean; U. S. Army Air Corps, Aerial Gunnery Target Range between Jupiter Inlet and Fort Pierce, Fla.*

THE DANGER ZONE

(a) The target range forms roughly a rectangle about 10 miles wide extending 40 miles along the east coast of Florida between Jupiter Inlet and Fort Pierce, Florida, the western boundary of which is approximately 8 miles offshore. The geographic positions locating the corners of the range are as follows:

	Latitude N.	Longitude W.
N. E. corner	27°35′	80°02′
N. W. corner	27°32′	80°11′
S. E. corner	27°04′	79°46′
S. W. corner	27°00′	79°55′

THE REGULATIONS

(b) (1) The fact that aerial target practice is to take place over the designated area shall be advertised to the public through the usual media for the dissemination of information. Inasmuch as such practice is likely to be engaged in throughout the year without regard to season, such advertising of firing shall be repeated at frequent intervals which shall not exceed three months and which shall be more frequent when, in the opinion of the Commanding Officer, responsible for the use of the range, such frequent repetition is necessary in the interests of public safety.

(2) Prior to the conducting of each target practice the area shall be patrolled by Army aircraft to insure that no watercraft are within the dangerous area and any such watercraft seen in the vicinity shall be warned by means of signals that target practice is about to take place. The patrol aircraft shall employ the method of warning known as "buzzing" which consists of low flight by the airplane and repeated opening and closing of the throttle.

(3) Any such watercraft shall, upon being so warned, immediately vacate the area designated and shall, until the conclusion of the practice, remain at such a distance that it will be safe from falling projectiles.

(4) The foregoing regulations shall not deny access to or egress from harbors contiguous to the danger area in the case of regular cargo-carrying vessels proceeding to and from such harbors, nor shall it deny traverse of portions of the danger area in the case of such regular cargo-carrying vessels proceeding on established steamer lines. In case of the presence of any such vessel in the danger area the officer in charge of gunnery operations shall cause the cessation or postponement of fire until the vessel shall have cleared the part of the area in which it might be endangered by falling projectiles. The vessel shall proceed on its normal course and shall not delay its progress.

(5) No marking of the area is proposed, and all aircraft and watercraft shall be presumed to know their whereabouts by distances and directions from landmarks or other topographical features along the shore.

(6) These regulations shall be enforced by the U. S. Coast Guard and the Commanding Officer, West Palm Beach Air Base, West Palm Beach, Florida. (Sec. 7, River and Harbor Act. Aug. 8, 1917, 40 Stat. 266; 33 U.S.C. 1) [Regs. Sept. 29, 1941 (E.D. 7195 (Atlantic Ocean—Florida)—1/6)]

[Docket No. A–283–a]

PETITION OF DISTRICT BOARD 8 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF CERTAIN MINES NOT HERETOFORE CLASSIFIED AND PRICED

MEMORANDUM OPINION AND ORDER OF DISMISSAL

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, was filed with the Bituminous Coal Division by District Board 8, proposing price classifications and minimum prices for the coals of certain mines in District 8 not theretofore classified and priced, including the coals of the Solon Mine (Mine Index No. 432) of the Meadow Creek Coal Company, a code member in District 8. By Order dated November 6, 1940, temporary price classifications and minimum prices were established for the coals of said mine. Thereafter, the Meadow Creek Coal Company intervened, protesting the price classifications and minimum prices temporarily established for the coals of

[1] Not filed as part of the original document.

the Solon Mine, and requesting additional temporary and permanent relief.

After appropriate public notice, a hearing was held in this matter on December 2, 9, and 10, 1940, before a duly designated Examiner of the Division, and all persons were given an opportunity to participate fully in the hearing. At the hearing witnesses testified on behalf of District Board No. 8 and the Meadow Creek Coal Company.

District Board No. 8 recommended the granting of certain additional relief to Meadow Creek Coal Company by establishing lower classifications and minimum prices for coals of the Solon Mine for shipment into Market Area No. 114 only. The intervener renewed its request for temporary relief on the basis of its intervening petition. On January 31, 1941, an Order was issued by the Director granting additional and further temporary relief in connection with the coals of the Solon Mine, subject to conditions therein set forth.

On February 10, 1941, District Board No. 9 moved to stay or modify the temporary relief granted by the Order of January 31, 1941, and requested the reopening of the hearing with reference to the price classifications and minimum prices established for the coals of the Solon Mine.

Thereupon, pursuant to an Order of the Director of March 10, 1941, the proceedings with respect to the Solon Mine of the Meadow Creek Coal Company were severed from the remainder of the proceedings in Docket No. A-283, and designated as Docket No. A-283-a. By the same Order, after due notice, a hearing was scheduled for March 24, 1941, before a duly designated Examiner of the Division at a hearing room in Washington, D. C., for the limited purpose of considering the evidence of District Boards Nos. 9 and 13, and any other interested parties, with respect to the establishment of price classifications and minimum prices for the coals of the Solon Mine.

At the hearing, through agreement of District Boards Nos. 8 and 9, the Examiner continued the matter until April 24, 1941. On that date, by the Director's Order, the hearing was postponed to May 15, 1941. However, on May 15, 1941, due to the unavoidable absence of a principal witness for District Board No. 8, the Examiner sustained a motion to continue the hearing until June 26, 1941. By a later motion of continuance and consequent Order of the Director, the hearing was moved up to July 15, 1941.

Finally, after another motion for continuance and Order of the Director, a hearing was held in this matter on September 16, 1941, before a duly designated Examiner of the Division, Charles O. Fowler, at a hearing room of the Division, in Washington, D. C. District Board No. 9 and the petitioner, District Board No. 8, appeared. Counsel for District Board No. 9 stated that he had no witnesses to present and offered no evidence in support of its requested relief. Under the circumstances, it is appropriate to dismiss its motion to modify the temporary relief heretofore granted to the Meadow Creek Coal Company, and further it seems appropriate that the prices heretofore temporarily established should be made permanent.

Now, therefore, it is ordered, That the intervening petition of District Board No. 9 herein seeking relief in the form of a modification of the price classifications and minimum prices temporarily established for the coals of the Solon Mine (Mine Index No. 432) of the Meadow Creek Coal Company, set by Order of the Director on January 31, 1941, be and hereby is dismissed.

And it is further ordered, That the Schedule of Effective Minimum Prices for District No. 8 for All Shipments Except Truck be and it hereby is amended by establishing the following classifications (and corresponding minimum prices) for the coals of the Solon Mine (Mine Index No. 432) of the Meadow Creek Coal Company:

Notice of such hearing is hereby given to said defendant and to all other parties herein and to all persons and entities having an interest in such proceeding. Any person or entity eligible under § 301.123 of the Rules and Regulations Governing Practice and Procedure Before the Bituminous Coal Division in Proceedings Instituted Pursuant to sections 4 II (j) and 5 (b) of the Bituminous Coal Act of 1937, may file a petition for intervention not later than five (5) days before the date herein set for hearing on the complaint.

Notice is hereby given, That answer to the complaint must be filed with the Bituminous Coal Division at its Washington office or with any one of the statistical bureaus of the Division, within twenty (20) days after date of service thereof on the defendant; and that any defendant failing to file an answer within such period, unless the Director or the presiding officer shall otherwise order, shall be deemed to have admitted the allegations of the complaint herein and to have consented to the entry of an appropriate order on the basis of the facts alleged.

That said defendant, whose post office address is 219 Greensburg Avenue, Turtle Creek, Pennsylvania, during the period January 1 to June 1, 1941, inclusive, sold through his sales agent, Coal Sales, Inc., Cleveland, Ohio, and delivered via truck to Ohio Boxboard Company, at its plant located in Rittman, Ohio, approximately 4938.243 tons of nut and slack coal, and approximately 997.175 tons of slack coal, produced at his Kohr Coal Co. Mine (Mine Index No. 1759), at $2.30 per net ton f. o. b. destination, whereas these coals are classified as Size Groups 7 and 8, respectively, and priced at $1.90 and $1.80, respectively, f. o. b. the mine in the Schedule of Effective Minimum Prices for District No. 4 for Truck Shipments.

That said coal was hauled a distance of approximately 40 miles from said mine to the purchaser at Rittman, Ohio. That said delivery price constituted an absorption of a part of the trucking charge made by an independent contractor, or the defendant's own cost, for hauling the aforementioned coal from the mine of the defendant to the Rittman plant of the Ohio Boxboard Company, all in violation of section 4 II (g) of the Bituminous Coal Act of 1937 and Price Instruction No. 6 as set forth in supplement No. 1 to Appendix A–4–T, being the effective minimum prices for truck shipments for District No. 4.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 31-31]

IN THE MATTER OF PUBLIC SERVICE CORPORATION OF NEW JERSEY

ORDER CORRECTING FINDINGS AND DENYING PETITION FOR REHEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 7th day of October, 1941 A. D.

The Commission, on September 15, 1941, issued its Findings, Opinion, and Order denying the application of Public Service Corporation of New Jersey, under section 2 (a) (8) of the Public Utility Holding Company Act of 1935, for an order declaring it not to be a subsidiary company of The United Gas Improvement Company and The United Corporation, registered holding companies. On September 19, 1941, Public Service Corporation of New Jersey filed a Petition for Rehearing by the Commission of matters covered by said Order.

The Commission has carefully considered said Petition for Rehearing in which Petitioner avers, among other things, that the Petition is presented to accomplish all steps which may be required to render effective the filing of a Petition for Review under the provisions of section 24 (a) of the Public Utility Holding Company Act of 1935.

It appears that the only ground presented in support of the Petition which was not disposed of in our Findings and Opinion of September 15, 1941 relates to the denial of Petitioner's motion for the making and filing of a report by the Trial Examiner. Our Findings and Opinion omitted discussion on this point because it was not raised in Petitioner's Brief or in oral argument when we consider the issues raised by the application. However, the denial of the motion furnishes no basis for a rehearing as Petitioner's own application and our original Notice of and Order for Hearing thereon framed the issues involved and gave Petitioner adequate notice thereof. Moreover, pursuant to the Commission's Order, the Requested Findings of Fact and Brief of Counsel to the Public Utilities Division were filed and submitted to Petitioner thirty days and fifteen days, respectively, in advance of the filing of Petitioner's Requested Findings of Fact and Brief. Nor does the Petitioner point out any respect in which the Original Notice of and Order for Hearing, and the Requested Findings of Fact and Brief of Counsel to the Public Utilities Division, failed to apprise them of the issues, nor any respect in which they were surprised as to the conception of those issues revealed in our Findings and Opinion. The Petitioner also stresses an alleged requirement of due process that a report be made by the individual who presided over the taking of the testimony. Without conceding that any such requirement exists, even in a case where there are issues as to the credibility of witnesses, it should be pointed out that no such issues arose in this case, and that our own Findings and Opinion were based upon a careful review of the evidence, substantially all of which came from witnesses produced by Petitioner or from documents in the files of Petitioner or of affiliated interests. Under the circumstances, we saw no reason to grant such a motion, which would have resulted only in delaying the proceedings.

The Petition for Rehearing does not set forth any additional grounds not disposed of by our Findings and Opinion of September 15, 1941, or any matters not previously considered prior to the entry of the Order denying the application, on the basis of which the Commission should grant a rehearing.

It further appears that the date "1903" on Page 17, Line 13 of said Findings and Opinion of the Commission is erroneous and should read "1929".

It is therefore ordered, That the date "1903" on Page 17, Line 13, of the Findings and Opinion of the Commission, be stricken out and the date "1929" be substituted therefor;

It is further ordered, That said Petition for Rehearing, be, and the same hereby is, denied.

By the Commission.

[1941, Department Circular No. 670]

OFFERING OF 2½ PERCENT TREASURY BONDS OF 1967-72

OCTOBER 9, 1941.

I. OFFERING OF BONDS

1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites subscriptions, at par and accrued interest, from the people of the United States for 2½ percent bonds of the United States, designated Treasury Bonds of 1967-72. The amount of the public offering is $1,200,000,000, or thereabouts, with the right reserved to the Secretary of the Treasury to increase the offering by an amount sufficient to accept all subscriptions for which Treasury Notes of Series C-1941, maturing December 15, 1941, are tendered in payment and accepted. In addition to the amount offered for public subscription, $100,000,000, or thereabouts, of these bonds may be allotted to Government investment accounts against cash payment.

II. DESCRIPTION OF BONDS

1. The bonds will be dated October 20, 1941, and will bear interest from that date at the rate of 2½ percent per annum, payable on a semiannual basis on March 15 and September 15 in each year until the principal amount becomes payable. They will mature September 15, 1972, but may be redeemed at the option of the United States on and after September 15, 1967, in whole or in part, at par and accrued interest, on any interest day or days, on 4 months' notice of redemption given in such manner as the Secretary of the Treasury shall prescribe. In case of partial redemption the bonds to be redeemed will be determined by such method as may be prescribed by the Secretary of the Treasury. From the date of redemption designated in any such notice, interest on the bonds called for redemption shall cease.

2. The income derived from the bonds shall be subject to all Federal taxes, now or hereafter imposed. The bonds shall be subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but shall be exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The bonds will be acceptable to secure deposits of public moneys, but will not bear the circulation privilege and will not be entitled to any privilege of conversion.

4. Bearer bonds with interest coupons attached, and bonds registered as to principal and interest, will be issued in denominations of $50, $100, $500, $1,000, $5,000, $10,000 and $100,000. Provision will be made for the interchange of bonds of different denominations and of coupon and registered bonds, and for the transfer of registered bonds, under rules and regulations prescribed by the Secretary of the Treasury.

5. The bonds will be subject to the general regulations of the Treasury Department, now or hereafter prescribed, governing United States bonds.

III. SUBSCRIPTION AND ALLOTMENT

1. Subscriptions will be received at the Federal Reserve Banks and Branches and at the Treasury Department, Washington. Subscribers must agree not to sell or otherwise dispose of their subscriptions, or of the securities which may be allotted thereon, prior to the closing of the subscription books. Banking institutions generally may submit subscriptions for account of customers, but only the Federal Reserve Banks and the Treasury Department are authorized to act as official agencies. Others than banking institutions will not be permitted to enter subscriptions except for their own account. Cash subscriptions from banks and trust companies for their own account will be received without deposit but will be restricted in each case to an amount not exceeding one-half of the combined capital and surplus of the subscribing bank or trust company. Cash subscriptions from all others must be accompanied by payment of 10 percent of the amount of bonds applied for.

2. The Secretary of the Treasury reserves the right to reject any subscription, in whole or in part, to allot less than the amount of bonds applied for, and to close the books as to any or all subscriptions at any time without notice; and any action he may take in these respects shall be final. Subject to these reservations, subscriptions in payment of which Treasury Notes of Series C-1941 are tendered will be allotted in full. Allotment notices will be sent out promptly upon allotment, and the basis of the allotment will be publicly announced.

IV. PAYMENT

1. Payment at par and accrued interest, if any, for bonds allotted on cash subscriptions hereunder must be made or completed on or before October 20, 1941, or on later allotment. In every case where payment is not so completed, the payment with application up to 10 percent of the amount of bonds applied for shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States. Any qualified depositary will be permitted to make payment by credit for bonds allotted to it for itself and its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district. Treasury Notes of Series C-1941, maturing December 15, 1941, with coupon dated December 15, 1941, attached, will be accepted at par in payment for any bonds subscribed for and allotted, and should accompany the subscription. Accrued interest from June 15, 1941 to October 20, 1941 (4.33743 per $1,000), will be paid following acceptance of the notes.

V. GENERAL PROVISIONS

1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive subscriptions, to make allotments on the basis and up to the amounts indicated by the Secretary of the Treasury to the Federal Reserve Banks of the respective districts, to issue allotment notices, to receive payment for bonds allotted, to make delivery of bonds on full-paid subscriptions allotted, and they may issue interim receipts pending delivery of the definitive bonds.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

PETITIONS OF DISTRICT BOARD NO. 8 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF CERTAIN MINES IN DISTRICT NO. 8; AND FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF THE NUMBER 9 MINE OF THE CARBON FUEL COMPANY (MINE INDEX NO. 3661) IN DISTRICT NO. 8

MEMORANDUM OPINION AND ORDER SEVERING DOCKET NO. A-1054 PART II FROM DOCKET NO. A-1054, ORDER GRANTING TEMPORARY RELIEF IN DOCKET NO. A-1054 PART II AND NOTICE OF AND ORDER FOR HEARING IN DOCKET NO. A-1054 PART II

The original petition in the above-entitled matter filed with this Division on September 8, 1941, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, requests the issuance of orders establishing temporary and permanent price classifications and minimum prices for the coals of certain mines in District No. 8.

As the Director found in a separate Order issued in Docket No. A-1054, a reasonable showing of necessity has been made for the granting of the relief prayed for by petitioner except in so far as the establishment of permanent price classifications and minimum prices for the coals of the Number 9 Mine of the Carbon Fuel Company (Mine Index No. 3661) is concerned. With respect to permanent price classifications and minimum prices, the Director is of the opinion that a hearing should be held in view of the circumstances involved. Price classifications and minimum prices have already been established for the mine in General Docket No. 15; a change in prices is now being sought because a different section of the mine is now being worked and an inferior grade of coal is alleged to be therein found.

It is ordered, That the portion of Docket No. A-1054 relating to the Number 9 Mine of the Carbon Fuel Company (Mine Index No. 3661) be and the same hereby is severed from the remainder of Docket No. A-1054 and designated as Docket No. A-1054 Part II.

It is further ordered, That a hearing in Docket No. A-1054 Part II under the applicable provisions of said Act and the rules of the Division be held on November 14, 1941, at 10 o'clock in the forenoon of that day, at a hearing room of the Bituminous Coal Division, 734 Fifteenth Street, NW., Washington, D. C. On such day the Chief of the Records Section in Room 502 will advise as to the room where such hearing will be held.

It is further ordered, That Edward J. Hayes or any other officer or officers of the Division duly designated for that purpose shall preside at the hearing in such matter. The officers so designated to preside at such hearing are hereby authorized to conduct said hearing, to administer oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, to continue said hearing from time to time, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to all parties herein and to persons or entities having an interest in these proceedings and eligible to become a party herein. Any person desiring to be admitted as a party to this proceeding may file a petition of intervention in accordance with the rules and regulations of the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Act, setting forth the facts on the basis of which the relief in the original petition is supported or opposed or on the basis of which other relief is sought. Such petitions of intervention shall be filed with the Bituminous Coal Division on or before November 9, 1941.

All persons are hereby notified that the hearing in the above-entitled matter and any orders entered therein may concern, in addition to the matters specifically alleged in the petition, other matters necessarily incidental and related thereto, which may be raised by amendment to the petition, petitions of interveners or otherwise, or which may be necessary corollaries to the relief, if any, granted on the basis of this petition.

The matter concerned herewith is in regard to the petition of District Board No. 8 for the establishment of price classifications and minimum prices for the coals of the Number 9 Mine of the Carbon Fuel Company (Mine Index No. 3661) in District No. 8.

It is further ordered, That, pending further Order of the Director, temporary relief be and it is forthwith granted as follows:

thereto where required by law. Notes executed by an administrator, executor, or trustee will be acceptable only where valid in law.*

*§§ 223.1 to 223.16, inclusive, issued under authority contained in Sec. 302 (a) 52 Stat. 43; 7 U.S.C. Sup., 1302.

§ 223.2 *Forms.* Loans will be made on the following forms:

(a) Producer's Note (1941 C.C.C. Grain Form A).

(b) Chattel Mortgage (1941 C.C.C. Grain Form AA).

(c) Producer's Note and Loan Agreement (Converted 1941 C.C.C. Wheat Form B).

(d) Warehouse receipts complying with the provisions of § 223.9 hereof and which are issued by approved country warehouses.*

§ 223.3 *Areas in which loans will be made.* Loans will be made on eligible grain sorghums when stored in (1) approved warehouses located at country points or (2) in private bins or granaries approved by county agricultural conservation committee.*

§ 223.4 *Amount of loans.* Loan values on grain sorghums will be based on the numerical grade, irrespective of subclass, except mixed grain sorghums (Class V) in accordance with the following schedule:

Grain sorghums stored on farms	*Grain sorghums stored in public warehouses (cents per bushel)*
No. 1 grain sorghums 40¢ per bushel	33
No. 2 grain sorghums 38¢ per bushel	31
No. 3 grain sorghums 35¢ per bushel	28
No. 4 grain sorghums 30¢ per bushel	23

The above loan values are subject to a discount of two cents per bushel for mixed grain sorghums.*

§ 223.5 *Maturity and interest rate.* All 1941 grain sorghums loans will mature on demand or June 30, 1942, and will bear interest at the rate of 3 percent per annum. Notes evidencing such loans must be dated on or before January 31, 1942.*

§ 223.6 *Determination of quantity of grain sorghums.* Loans shall be made at values expressed in cents per bushel, a bushel being determined to be 56 pounds of clean grain sorghums free of dockage, when determined by weight, or 1.25 cubic feet of grain sorghums testing 56 pounds per bushel when determined by measurement. In determining the quantity of grain sorghums in farm storage by measurement, fractional pounds of the bushel test weight for grain sorghums testing less than 56 pounds will be disregarded, and the quantity determined by measurement shall be adjusted by the following respective percentages:

	Percent
For grain sorghums testing 56 pounds or over	100
For grain sorghums testing 55 pounds or over but less than 56 pounds	98
For grain sorghums testing 54 pounds or over but less than 55 pounds	96
For grain sorghums testing 53 pounds or over but less than 54 pounds	95
For grain sorghums testing 52 pounds or over but less than 53 pounds	93
For grain sorghums testing 51 pounds or over but less than 52 pounds	91
For grain sorghums testing 50 pounds or over but less than 51 pounds	89
For grain sorghums testing 49 pounds or over but less than 50 pounds	87

§ 223.7 *Farm storage.* Grain sorghums stored on the farm must have been stored in the granary at least thirty (30) days prior to its inspection for measurement, sampling, and sealing. In accordance with regulations issued by the Secretary of Agriculture, the State and county agricultural conservation committees will inspect and approve storage facilities and will arrange for measuring, sampling, grading, and sealing the grain sorghums collateral in approved structures. Chattel mortgages covering farm-stored grain sorghums

must be executed and filed in accordance with the applicable State law. Producers should obtain information and assistance from the county agricultural conservation committees in regard to the execution and filing of such chattel mortgages. Where the borrower is a tenant farmer and the grain sorghums collateral is stored on the farm, the expiration date of the lease must be indicated in section 1 (d) of the chattel mortgage. If the expiration date of the lease is prior to August 30, 1942, the landlord must execute the consent for storage in section 5 of the chattel mortgage. The consent agreement must also be executed by any other party or parties entitled to possession prior to August 30, 1942. Each producer must designate in section 1 (b) of the chattel mortgage a shipping point reasonably convenient for the delivery of the grain sorghums as determined by the county committee. Mortgages will not be acceptable which provide a shipping point other than the shipping point customarily used by producers in the locality in which the grain sorghums is stored. A separate note and chattel mortgage must be submitted for grain sorghums stored on each quarter section of land.*

§ 223.8 *Public warehouses.* Commodity Credit Corporation will accept only negotiable warehouse receipts, representing grain sorghums pledged as collateral to notes on converted 1941 C.C.C. Wheat Forms B, issued by an approved country warehouse. Warehousemen desiring approval should communicate with the Regional Director of Commodity Credit Corporation at Kansas City, Missouri. A list of approved warehouses may be obtained from the State or county agricultural conservation offices. All grain sorghums pledged as security to a note must be stored in the same warehouse.*

§ 223.9 *Warehouse receipts.* Warehouse receipts must be dated on or prior to the date of the related note and must be properly assigned by an endorsement in blank, so as to vest title in the holder, or issued to bearer, and must be issued by approved warehouses. Unless the warehouse receipts are stamped or printed "insured" or "fully insured" there must be attached thereto or included in a certificate of the warehouseman a statement that the grain sorghums are insured for not less than the market value, against the hazards of fire, lightning, inherent explosion, windstorm, cyclone, and tornado. Commodity Credit Corporation will not accept warehouse receipts indicating any lien for charges prior to unloading in or delivery to the warehouse issuing such receipts. Lien for storage charges will be recognized by Commodity Credit Corporation only from August 1, 1941, or the date of the warehouse receipts, whichever is later. Receipts must set out in their written or printed terms the gross weight or bushels, the class and grade, the percentage of sound grain sorghums, test weight, and all other facts and statements required to be stated in the written or printed terms of a negotiable warehouse receipt under the provisions of section 2 of the Uniform Warehouse Receipts Act, or are to be accompanied by a certificate of the warehouseman identified to such warehouse receipt, including such information. Warehouse receipts must have a notation thereon, or a certificate attached signed by the warehouseman, stating that the grain sorghums represented thereby do not contain moisture content in excess of 14 percent. A warehouse receipt representing No. 1 grain sorghums need not show moisture content since this grade permits a maximum of 14 percent moisture.*

§ 223.10 *Liens.* The grain sorghums collateral must be free and clear of all liens except those in favor of the lienholders listed in the space provided therefor in the chattel mortgage or note and loan agreement. The names of the holders of all existing liens on the pledged or mortgaged grain sorghums, such as landlord, laborers, threshers, or mortgagees, must be listed in the space provided therefor in the mortgage or loan agreement. The waiver and consent to pledge or mortgage of the grain sorghums and the payment of the proceeds of the loan, and the proceeds of the sale of the grain sorghums solely to the producer, as contained in the mortgage or loan agreement, must be signed personally by all lienholders listed or by their duly authorized agents; or, if a corporation, by a designated officer thereof customarily authorized to execute such instruments. (In lieu of signing the section entitled "List of Lienholders and Their Waivers and Consent to Mortgage," lienholders may sign C.C.C. Form AB or 1940 C.C.C. Wheat Form AB, properly corrected, which must completely identify the related note). The producer may direct on the note that the proceeds of the loan be made payable to him and/or any other person or concern. Producers should read carefully all real estate or other mortgages previously given by them in order to determine if crops are covered thereby. Any fraudulent representation of fact made in the execution of the note and loan agreement or mortgage and related forms shall render the producer personally liable for the amount of the loan, plus interest and charges, and subject to the provisions of the United States Criminal Code.*

§ 223.11 *Insurance*—(a) *Grain sorghums stored on farms.* The producer must obtain primary insurance on grain sorghums stored on the farm for not less than the amount of the loan, plus accrued interest to maturity for a period ending not earlier than August 31, 1942. Such insurance shall be evidenced by a certificate in the form approved by Commodity Credit Corporation issued by a company or association licensed to do business in the State in which the grain sorghums are stored. The insurance coverage may be obtained through the customary channels and the form of certificate required shall be furnished by the agent writing same.

(b) *Grain sorghums stored in approved country warehouses.* With respect to such grain sorghums, the warehousemen shall provide insurance against the perils of fire, lightning, inherent explosion and windstorm, cyclone, and tornado, for the full market value thereof, so long as receipts are outstanding.

In addition to the foregoing, Commodity Credit Corporation has obtained a blanket insurance policy to protect it against errors and omissions in the primary insurance coverage, and certain other risks not covered by the primary insurance. This secondary insurance will be secured by Commodity Credit Corporation for all loans and the cost of the insurance will be paid from the service fees collected from producers.*

§ 223.12 *County agricultural conservation committee.* Loan forms should be obtained from county agricultural conservation committees or from the Kansas City, Missouri, office of Commodity Credit Corporation. Each producer's note must be approved in the space provided therefor, by the county agricultural conservation committee, which approval must not bear a date prior to the date of the note or loan agreement. Each approval must be signed by a member of the county agricultural conservation committee for the county in which the grain sorghums were produced in the case of warehouse-stored grain sorghums, and the county in which the grain sorghums are stored for farm-stored grain sorghums. Pursuant to instructions issued by the Secretary of Agriculture, the State and county committees will determine or cause to be determined, the quantity and grade of the grain sorghums collateral and the amount of the loan. All loan documents will be completed and approved by the county committee. The county agricultural conservation association will collect a service fee for each loan approved.*

§ 223.13 *Source of loans.* Loans may be obtained through banks and other local lending agencies, which may sell the notes evidencing such loans to Commodity Credit Corporation. Producers may also obtain loans direct from the Corporation on notes made payable to the Corporation. Such notes should be forwarded to the Commodity Credit Corporation, Kansas City, Missouri, and must be received or postmarked on or before January 31, 1942. Upon approval of the loan by the Regional Director, payment will be made as directed on the note.*

§ 223.14 *Purchase of loans.* Commodity Credit Corporation will purchase, without recourse, eligible paper, as defined in § 223.1 above, only form lending agencies which have executed and delivered to a regional office of Commodity Credit Corporation, a Contract to Purchase, 1940 C.C.C. Form E, obtainable only from such offices.

Paper held by lending agencies must be tendered at least 10 days prior to maturity to the Regional Director of Commodity Credit Corporation at Kansas City, Missouri. The purchase price to be paid by Commodity Credit Corporation for notes accepted will be the face amount of such notes, plus accrued interest from disbursement dates to the date of payment of the purchase price at the rate of 1½ percent per annum. Under the terms of the Contract to Purchase, lending agencies are required to report weekly on 1940-C.C.C. Form F all repayments or collections on producers' notes held by them, and to remit with such report to the Regional Director of Commodity Credit Corporation at Kansas City, an amount equivalent to 1½ percent interest per annum on the principal amount collected from the date of disbursement of the note to the date of repayment.*

§ 223.15 *Office of the Regional Director of Commodity Credit Corporation.* The address of the Regional Director previously referred to herein is 1108 Federal Reserve Bank Building, Kansas City, Missouri.*

§ 223.16 *Release of collateral.* The producer may obtain the return of notes secured by grain sorghums at any time prior to maturity, upon the payment of the principal amount due thereon, plus accrued interest and charges. No allowance will be made for storage by Commodity Credit Corporation. The loan paper may be sent to an approved bank for collection or the producer may ascertain the amount due and remit directly to the office of the Regional Director of Commodity Credit Corporation holding the paper. Partial releases of collateral will be made as follows:

(a) In the case of farm-stored grain sorghums, the producer must identify to Commodity Credit Corporation or the lending agency the seal number of the bin to be released. Such release will be made upon payment of the amount loaned on the particular number of bushels of grain sorghums, plus interest.

(b) In the case of elevator-stored grain sorghums, producers desiring to obtain partial release should notify Commodity Credit Corporation or the lending agency describing the grain sorghums to be released, by warehouse receipt numbers. Each partial release must cover all the grain sorghums under one warehouse receipt. The warehouse receipt representing such grain sorghums will be released upon payment of the amount loaned, plus interest on such amount and any charges applicable thereto.*

TITLE 10—ARMY: WAR DEPARTMENT

CHAPTER III—CLAIMS AND ACCOUNTS

PART 37—CLAIMS ON BEHALF OF THE UNITED STATES[1]

§ 37.2 *Recovery of property unlawfully detained by civilians.* Whenever information is received that animals or other property belonging to the military service of the United States are unlawfully in the possession of any person not in the military service, the property officer or other proper officer will promptly cause proceedings to be instituted and diligently prosecuted before the civil authorities for the recovery of the property and, if the same has been stolen, for the arrest, trial, conviction, and due punishment of the offender and his accomplices.

Upon satisfactory information that such United States property unlawfully in the possession of any party or parties is likely to be removed beyond the jurisdiction, concealed, or otherwise disposed of before the necessary proceedings can be had in the proper civil tribunal for its recovery, the post or detachment commander will, as hereinafter provided, accomplish its immediate recovery. In the event the property consists of clothes, arms, military outfits, or accouterments furnished by the United States to any enlisted man, the Federal statutes (R.S. 3748; 10 U.S.C. 1316; M. L. 1939, sec. 2018) authorize such property to be seized and taken from any person, not an enlisted man or officer of the United States, by any officer, civil or military, of the United States. Other Government property may be seized under the authority of a search warrant, and in these cases this procedure will be followed wherever practicable. The Federal statutes act of June 15, 1917 (40 Stat. 228; 18 U.S.C. 611), provide that a search warrant may be issued by a judge of a United States district court or by a judge of a State or Territorial court of record, or by a United States Commissioner for the district wherein the property sought is located. This search warrant is issued upon probable cause and is supported by an affidavit naming or describing the person and particularly describing the property and place to be searched. If a search warrant is not immediately available or the particular circumstances require immediate action, the post or detachment commander will at once cause the property to be seized, provided that such seizure can be accomplished without committing a breach of the peace or a trespass on private property, tendering to the party, if any, in possession or custody of the property in dispute a receipt or certificate showing that the property in question has been seized as belonging to the United States, and will hold the property seized subject to any legal proceedings that may be instituted by other parties.

Persons caught in the act of stealing public property will be summarily arrested by the troops and turned over to the civil authorities for trial.

When public property has been lost or stolen and the officer responsible therefor has failed to regain possession of it by the ordinary means, the post commander may authorize the property officer to offer a reward for its recovery.

Such a reward will not exceed one fifth of the value of the property lost or stolen, and in no case will it exceed $50.

If the property has been stolen, the reward will include payment for such information as the claimant possesses in regard to the larceny and recovery of the property as may lead to a conviction of the guilty party. (a) Former enlisted men of any component of the Army of the United States within the age limits for selective training and service registration, who have had more than 11 months' continuous active Federal service and who have been honorably discharged, may be enlisted or reenlisted in the Enlisted Reserve Corps if they are otherwise qualified for enlistment under the provisions of this section.

TITLE 29—LABOR

CHAPTER V—WAGE AND HOUR DIVISION

PART 536—DEFINING THE TERM "AREA OF PRODUCTION"

The following amendment to Regulations—Part 536[1] (Regulations defining the term "area of production" as used in section 7 (c) and in section 13 (a) (10) of the Fair Labor Standards Act) is hereby issued. This amendment amends § 536.2 (c), defining the term "area of production," as used in section 13 (a) (10) of the Fair Labor Standards Act, with respect to Puerto Rican leaf tobacco. Said amendment shall become effective on January 5, 1942, and shall be in force and effect until repealed by regulations hereafter made and published.

PART 327—MINIMUM PRICE SCHEDULE, DISTRICT NO. 7

FINDINGS OF FACT, CONCLUSIONS OF LAW, MEMORANDUM OPINION, AND ORDER OF THE DIRECTOR IN THE MATTER OF THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR COALS PRODUCED IN DISTRICT NO. 7 FOR WHICH PRICE CLASSIFICATIONS AND MINIMUM PRICES HAVE NOT HERETOFORE BEEN ESTABLISHED

This proceeding was instituted upon a petition filed with the Bituminous Coal Division, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, by District Board 7. The petition proposes the establishment of certain minimum prices for coals produced in District 7 for truck shipment, as shown in Exhibit A annexed to the petition. Pursuant to Order of the Director temporary relief was granted herein, in accordance with the petitioner's request therefor, pending the final determination of this matter.

Pursuant to Order of the Director, and after due notice to all interested persons, a hearing in this matter was held before Charles O. Fowler, a duly designated Examiner of the Division, at a hearing room thereof in Washington, D. C. All interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. The petitioner appeared. The preparation and filing of a report by the Examiner was waived by stipulation of the interested parties and the record was thereupon submitted to the undersigned.

In support of the request for the establishment of the minimum prices proposed in the petition, the Executive Secretary and Assistant Treasurer of District Board 7 testified that the classifications requested were approved by District Board 7 at its meeting on December 17, 1940, and that it has received no protests with respect to such classifications. In the opinion of this witness, the classifications requested comply with the standards and provisions of section 4 II (a) and 4 II (b) of the Act, will not disturb the coordination of minimum prices of the coals produced in District 7 with the coals produced in other districts, and will have no appreciable effect upon the realization of either District 7 or Minimum Price Area No. 1.

Upon the basis of the uncontroverted evidence, I find and conclude that the classifications and prices shown in the schedule hereto attached are proper and should be established; and that the establishment of such classifications and minimum prices is required in order to effectuate the purposes of section 4 II (a) and 4 II (b) of the Act and to comply in all respects with the standards thereof.

Now, therefore, it is ordered, That commencing forthwith § 327.34 (*General prices in cents per net ton for shipment into any market area*) is amended by adding thereto Supplement T, which supplement is hereinafter set forth and hereby made a part hereof.

Dated: August 25, 1941.

MEMORANDUM OPINION AND ORDER SEVERING DOCKET NO. A-1022 PART II FROM DOCKET NO. A-1022, GRANTING TEMPORARY RELIEF IN DOCKET NO. A-1022 PART II AND NOTICE OF AND ORDER FOR HEARING IN DOCKET NO. A-1022 PART II

The original petition in the above-entitled matter filed with this Division on August 21, 1941, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, requests the issuance of orders establishing temporary and permanent price classifications and minimum prices for the coals of certain mines in District No. 3.

As indicated in a separate order issued in Docket No. A-1022, a reasonable showing of necessity has been made for the granting of the relief prayed for by petitioner except with respect to the establishment of permanent price classifications and minimum prices for the coals of the Scotch Hill Mines Nos. 76 to 80, inclusive (Mine Index Nos. 296 to 300, inclusive), Scotch Hill Mines Nos. 85 to 92, inclusive (Mine Index Nos. 301 to 308, inclusive), of the Henry Clay Coal Mining Company and the Austen Mines Nos. 1 to 9, inclusive (Mine Index Nos. 311 to 319, inclusive), Austen Mines Nos. 15 to 20, inclusive (Mine Index Nos. 320 to 325, inclusive), and Austen Mines Nos. 25 to 28, inclusive (Mine Index Nos. 326 to 329, inclusive), of the Upper Elk and Potomac Coal Corporation.

While it appears that temporary relief for the Scotch Hill and Austen Mines should be granted, as prayed for by the petitioner, the Director is of the opinion that the original petitioner has not set forth sufficient facts to warrant the establishment of permanent price classifications and minimum prices for these coals.

Now, therefore, it is ordered, That the portion of Docket No. A-1022 relating to the Scotch Hill Mines Nos. 76 to 80, inclusive (Mine Index Nos. 296 to 300, inclusive), Scotch Hill Mines Nos. 85 to 92, inclusive (Mine Index Nos. 301 to 308, inclusive), Austen Mines Nos. 1 to 9, inclusive (Mine Index Nos. 311 to 319, inclusive), Austen Mines Nos. 15 to 20, inclusive (Mine Index Nos. 320 to 325, inclusive), and Austen Mines Nos. 25 to 28, inclusive (Mine Index Nos. 326 to 329, inclusive, be and the same hereby is severed from the remainder of Docket No. A-1022 and designated as Docket No. A-1022 Part II.

It is further ordered, That, pending final disposition of the above-entitled matter, temporary relief is granted as follows: Commencing forthwith, the Schedules of Effective Minimum Prices for District No. 3, For All Shipments Except Truck, and For Truck Shipments, are supplemented to include the price classifications and minimum prices set forth in the schedules marked "Supplement R" and "Supplement T," annexed hereto and hereby made a part hereof.

It is further ordered, That a hearing in Docket No. A-1022 Part II under the applicable provisions of said Act and the rules of the Division be held on October 27, 1941, at 10 o'clock in the forenoon of that day, at a hearing room of the Bituminous Coal Division, 734 Fifteenth Street, NW., Washington, D. C. On such day the Chief of the Records Section in Room 502 will advise as to the room where such hearing will be held.

It is further ordered, That Scott A. Dahlquist or any other officer or officers of the Division duly designated for that purpose shall preside at the hearing in such matter. The officers so designated to preside at such hearing are hereby authorized to conduct said hearing, to administer oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda, or other records deemed relevant or material to the inquiry, to continue said hearing from time to time, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to all parties herein and to persons or entities having an interest in these proceedings and eligible to become a party herein. Any person desiring to be admitted as a party to this proceeding may file a petition of intervention in accordance with the rules and regulations of the Bituminous Coal Division in proceedings instituted pursuant to section 4 II (d) of the Act, setting forth the facts on the basis of which the relief in the original petition is supported or opposed or on the basis of which other relief is sought. Such petitions of intervention shall be filed with the Bituminous Coal Division on or before October 22, 1941.

All persons are hereby notified that the hearing in the above-entitled matter and any orders entered therein may concern, in addition to the matters specifically alleged in the petition, other matters necessarily incidental and related thereto, which may be raised by amendment to the petition, petitions of interveners or otherwise, or which may be necessary corollaries to the relief, if any, granted on the basis of this petition.

The matter concerned herewith is in regard to the petition of District Board No. 3 for the establishment of price classifications and minimum prices for the coals of the Scotch Hill Mines Nos. 76 to 80, inclusive (Mine Index Nos. 296 to 300, inclusive), Scotch Hill Mines Nos. 85 to 92, inclusive (Mine Index Nos. 301 to 308, inclusive) of the Henry Clay Coal Mining Co., and the Austen Mines Nos. 1 to 9, inclusive (Mine Index Nos. 311 to 319, inclusive), Austen Mines Nos. 15 to 20, inclusive (Mine Index Nos. 320 to 325, inclusive) and Austen Mines Nos. 25 to 28, inclusive (Mine Index Nos. 326 to 329, inclusive) of the Upper Elk and Potomac Coal Corporation.

Dated: September 19, 1941.

Director.

[Docket No. A–150]

PETITION OF BEAR CANON COAL COMPANY, A CODE MEMBER IN DISTRICT NO. 17, FOR MODIFICATION OF THE EFFECTIVE MINIMUM PRICES ESTABLISHED FOR PETITIONER'S COALS IN SIZE GROUPS 2, 3, 5, 7, 9, 17, AND 19, FOR SHIPMENT INTO MARKET AREAS 215, 217–223, 244–246

MEMORANDUM OPINION AND ORDER APPROVING AND ADOPTING THE PROPOSED FINDINGS OF FACT AND CONCLUSIONS OF LAW OF THE EXAMINER AND DENYING RELIEF

This proceeding was instituted by a petition filed with the Bituminous Coal Division, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, by Bear Canon Coal Company, a code member in District 17, operating the Bear Canon No. 6 Mine (Mine Index No. 9). The petition seeks temporary and final orders which would (1) modify the effective minimum prices of the coals of the Bear Canon No. 6 Mine in Size Groups 1, 2, 3, 4, 5, 6, 7, 9, 13, and 14; (2) permit the petitioner to absorb freight transportation charges to the same extent as code members in Subdistricts 4, 5, 11, 12, 15, 16, and 18; (3) permit the petitioner to absorb not to exceed 25 cents per ton of the freight transportation charges on all shipments north and east of the petitioner's mine; (4) reclassify the petitioner's mine to transfer it from Subdistrict 7 to Subdistrict 8; and (5) protect from reductions or changes at points of delivery the "quality differentials" between the petitioner's coals and those of its competitors. On October 25, 1940, the petitioner filed a motion for temporary relief and further moved that the hearing be held at Trinidad, Colorado. On October 28, 1940, the petitioner filed an affidavit of its treasurer in support of its request for temporary relief.

District Board 17 filed an answer to the petition, opposing the relief therein sought and pointing out that in Docket No. A–174, by Order dated October 29, 1940, the petitioner had been temporarily reclassified in Subdistrict 8. Vickers Coal Company, a code member in District 17, also filed a petition for leave to intervene and, by amendment thereto, requested that the existing relationship between the petitioner's and its coals be maintained. District Boards 16 and 19 also filed petitions for leave to intervene.

Pursuant to notice to interested parties, an informal conference concerning the request for temporary relief was held and the petitioner, the Consumers' Counsel Division, and District Board 17 appeared. Thereafter, on December 26, 1940, the Director ordered the following Price Instruction and Exception temporarily added to the Schedule of Effective Minimum Prices for District No. 17:

18. When coals in Size Group No. 13 from the Bear Canon Coal Company, Bear Canon No. 6 Mine (Mine Index No. 9) are sold for shipment into Market Area 220, to the city of Pueblo, Colorado, for consumption in its Water Works plant, or the Standard Fire Brick Company, the minimum price listed herein for such coal shall be reduced 20 cents per net ton.

After due notice to all interested persons and pursuant to Orders of the Director and continuances of the hearing by the Examiner, a hearing in this matter was held before Thurlow G. Lewis, an Examiner of the Division, at a hearing room thereof in Denver, Colorado. All interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. The petitioner, District Boards 16, 17, 18, and 19, Vickers Coal Company, and the Consumers' Counsel Division appeared.

Thereafter, District Board 17 filed a motion to terminate the temporary relief theretofore granted the petitioner. The petitioner filed an answer to the motion of District Board 17 and a motion for additional temporary relief. The Vickers Coal Company filed an answer to the petitioner's motion for additional temporary relief, requesting the granting of District Board 17's motion for termination of the temporary relief and denial of the petitioner's motion for additional temporary relief.

Thereafter, the Consumers' Counsel Division and the petitioner filed briefs.

On May 1, 1941, the petitioner filed an application to amend its petition, requesting, in view of its temporary reclassification in Subdistrict 8, (1) reductions in minimum price of 40 cents per ton on Size Groups 1 to 7 and 9, 20 cents per ton on Size Group 13, and 15 cents per ton on Size Group 14, for all shipments except to Market Area 218; (2) the establishment of the following exception: "Mine prices shown for Bear Canon No. 6 Mine for all size groups for shipment into all market areas may be reduced by the exact amount of the differential in the freight rate applying from Walsenburg or Canon City, whichever is lower;" (3) in the event that the freight charge absorptions requested were denied, reductions of 65 cents on Size Groups 1 to 7 and 9, 30 cents on Size Group 13, and 25 cents on Size Group 14; and (4) the establishment of minimum prices for the Bear Canon coals in Size Group 11 (1½'' x ⅜'') identical with the prices established for Size Group 11 in Subdistrict 9.

Thereafter, the Director issued a Memorandum Opinion and Order, finding that the temporary relief theretofore granted had proved unnecessary, that the temporary relief granted to the petitioner an undue advantage over other producers, that termination of such relief would not unduly prejudice the petitioner, and that the petitioner had not made a showing of the necessity for continuance of temporary relief, and ordering (1) the temporary relief theretofore granted vacated; (2) Price Instruction and Exception 18 added to the Schedule of Effective Minimum Prices for District No. 17 for All Shipments by the Order of the Director dated December 26, 1940, deleted; and (3) the motion of the petitioner for additional temporary relief denied.

Thereafter, the Director issued an Order designating C. Rollin Larrabee, Examiner, to propose and submit to the Director Proposed Findings of Fact, Conclusions of Law, and the recommendation of an appropriate Order in the

premises, and to perform all other duties delegated to Thurlow G. Lewis in connection with the proceedings.

On August 2, 1941, Examiner Larrabee submitted Proposed Findings of Fact and Conclusions of Law in this matter, recommending that an order be entered denying the petitioner's prayer for relief, reserving, however, for disposition in Docket No. A–174, the question of reclassification of the Bear Canon No. 6 Mine to Subdistrict 8, and an opportunity was afforded to all parties to file exceptions to the Report of the Examiner and supporting briefs.

The petitioner filed Exceptions on September 10, 1941, and requested that it be granted the right to make oral argument herein and further moved that, in the event the Director should disagree with the petitioner's contentions and position, the record be reopened for the introduction of further evidence. In its Exceptions, the petitioner incorporated by reference its previously filed brief.

Many of the petitioner's exceptions, which are directed to the sufficiency of the evidence to support the Proposed Findings of Fact and Conclusions of Law, are vague and general in nature. In its exceptions the petitioner, seeking to show that it has over a period of time regularly shipped substantial quantities of coal to market areas where it now seeks minimum price reduction, has relied heavily upon a tabulation submitted by it on July 19, 1941, referred to by the Examiner in his Proposed Findings of Fact. The petitioner states "that throughout the record and from the figures submitted by the petitioner on July 19, 1941, it appears that petitioner during the last five years produced and sold over 30,000 tons of coal annually, which moved into the markets referred to in the said statement * * *" I find that the figures submitted on July 19, 1941, show that during the last five years, the following total tonnages, exclusive of railroad fuel, were shipped to the market areas indicated in the tabulation.

Year:	*Tonnage*
1936	10,777
1937	15,820
1938	18,147
1939	20,703
1940	20,396

Nothing to the contrary appears in the record. The petitioner has made no specific claim with reference to railroad fuel.

It also appears from the said tabulation submitted by the petitioner that during the past five years no coal was shipped by the petitioner to Market Areas 222, 244 or 246; that in only one of those years, 1936, did the petitioner ship coal into Market Areas 205 and 206, which shipments amounted to a total tonnage of 372 and 117, respectively; that in only two of those years, 1936 and 1937, did the petitioner ship coal into Market Area 208, a total of 180 tons; and that in only one of those years, 1936, did the petitioner ship coal into Market Area 210, a total of 76 tons, all said market areas being claimed by the petitioner to be its natural outlet for coals.

While the Examiner's statement that "the petitioner has, however, shipped no coals to many such destinations in recent years" may be more general than the record requires; nevertheless, the record does disclose, both from the testimony of the witness Plested, the general manager, secretary and treasurer of the petitioner, and from the figures submitted by the petitioner on July 19, 1941, that the petitioner has continued to lose its markets over a period of the past 10 or 12 years.

The petitioner's witness, Plested, testified that "ten or twelve years ago" the petitioner delivered coal into seven of the western states; that the petitioner's present markets are limited to the State of Colorado; and that "even in that we have delivered no coal in the last year to our normal customers in Market Area 217." He testified that the petitioner was losing markets when the N.R.A. came into being and continued to lose markets under the N.R.A. and thereafter prior to the establishment of the effective minimum prices by the Division.

As stated by the Examiner in the Proposed Findings of Fact:

> The effective minimum prices intended to preserve, as nearly as may be, existing fair competitive opportunities, were not designed to revivify a producer's markets long since dead or to restore to a producer long lost customers. Nor were the effective minimum prices designed to permit any given producer to compete actively with other producers in all consuming market areas. A producer is not as of right entitled to a minimum price on his coal so low as to enable him to compete in a given market area with a producer more favorably situated with respect thereto in so far as transportation charges are concerned, where, as here, the less favorably situated producer did not compete in any substantial degree in the market area in question for some time prior to the establishment of the effective minimum prices.

After consideration of all the evidence, the Proposed Findings of Fact and Conclusions of Law, the Exceptions thereto, and the brief in support thereof, I find that the Exceptions are not well taken and that the evidence supports the Proposed Findings of Fact and Conclusions of Law of the Examiner.

The petitioner has had a full hearing in this matter extending over a period of three days, during which over 400 pages of testimony were taken; it has introduced numerous exhibits, and has filed a voluminous brief as well as full Exceptions to the Examiner's Proposed Findings of Fact and Conclusions of Law. All these have been considered. No good purpose will be served by an oral argument on the issues here involved and the request for oral argument is therefore denied.

The motion to reopen the record made by the petitioner in connection with the Exceptions is also denied. The petitioner did not specifically state what further evidence it desired to introduce.

On September 11, 1941, the petitioner moved that judicial notice be taken of certain portions of the record in General Docket No. 15. I have considered those portions of the record in General Docket No. 15 specified in the petitioner's motion. It is, therefore, unnecessary for me to rule on the petitioner's alternative motion that the record herein be reopened for the limited purpose of making said portions of General Docket No. 15 part of the record in the present proceeding.

Upon the basis of the above Opinion and for the reasons stated therein, I conclude that the Proposed Findings of Fact and the Conclusions of Law based thereon submitted by the Examiner on August 2, 1941, should be approved and adopted as the Findings of Fact and Conclusions of Law of the Director.

It is, therefore, ordered, That the said Proposed Findings of Fact and Conclusions of Law of the Examiner be and the same hereby are approved and adopted as the Findings of Fact and Conclusions of Law of the Director; and

It is further ordered, That the prayers for relief contained in the several petitions filed herein by Bear Canon Coal Company be and they hereby are denied, reserving, however, the question of reclassification of the Bear Canon No. 6 Mine to Subdistrict 8 for disposition in Docket No. A–174.

IN THE MATTER OF J. D. HAWKINS, DEFENDANT

MEMORANDUM OPINION AND ORDER OF DISMISSAL

This proceeding was instituted upon a complaint filed with the Bituminous Coal Division on March 10, 1941, by District Board 15, pursuant to the provisions of sections 4 II (j) and 5 (b) of the Bituminous Coal Act of 1937. The complaint alleged that J. D. Hawkins, a code member in District 15, operating the J. D. Hawkins Mine (Mine Index No. 672) in Putnam County, Missouri, sold, during October and November 1940, substantial quantities of lump coal at prices ranging from 20 cents to 55 cents below the effective minimum price;[2] that this constituted a wilful violation of the provisions of the Bituminous Coal Code and regulations thereunder, and prayed that the Division either cancel and revoke the defendant's code membership, or, in its discretion, direct the defendant to cease and desist from violations of the Code and Regulations thereunder.

Pursuant to Order of the Director, a hearing in this matter was held on May 23–24, 1941 before W. A. Shipman, a duly designated Examiner of the Division at a hearing room thereof in Unionville, Missouri. All interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard. Appearances were entered on behalf of the complainant and the defendant. At the conclusion of the hearing, all parties waived the preparation and filing of a report by the Examiner, and the record was thereupon submitted to the undersigned.

J. D. Hawkins, the defendant, was a code member and operated a mine (Mine Index No. 672) in Putnam County, Missouri, until March 1941.[1]

The record fails to show wilful violation by J. D. Hawkins of the provisions of 4 II (e) of the Act, the Bituminous Coal Code, the Schedule of Effective Minimum Prices for District No. 15 for Truck Shipments, and the Marketing Rules and Regulations in connection with the sale of coal during October and November 1940.

Now, therefore, it is ordered, That the complaint of District Board 15 herein be and it hereby is dismissed.

Dated: October 7, 1941.

[Docket No. A–39]

PETITION OF DISTRICT BOARD 2 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR COALS OF CERTAIN MINES NOT HERETOFORE CLASSIFIED AND PRICED

MEMORANDUM OPINION AND ORDER DENYING PETITION FOR RECONSIDERATION

This proceeding was instituted upon petition filed, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937 and Order 303 of the Division, with the Bituminous Coal Division by District Board 2, proposing and seeking the establishment of price classifications and minimum prices for coals not theretofore classified and priced. Temporary relief was granted October 8, 1940, establishing certain minimum prices and price classifications as set forth therein. In the temporary order, railroad fuel prices, among others, were established for the coals produced at the Maust No. 7 Mine (Mine Index No. 311) of Loyalhanna Fuel Company ("Loyalhanna"), a code member in District 2.

On October 9, 1940, Loyalhanna intervened herein and an informal conference, pursuant to the 4 II (d) Rules, was held on October 15, 1940, at which railroad fuel produced at this mine was under discussion. No change was made in Loyalhanna's railroad fuel prices as a result of the informal conference.

A hearing was duly held and the Examiner, Charles S. Mitchell, submitted Proposed Findings of Fact and Conclusions of Law, recommending that Mine Index No. 311 be placed in Price Group 21 with a note providing that Mine Index 311 may reduce the f. o. b. mine price of Size Group 6 (mine run railroad fuel) by 5 cents per ton.

[1] Not filed as part of the original document.

[2] The price established for such coals in the Schedule of Effective Minimum Prices for District No. 15 for Truck Shipments, effective October 1, 1940, was $2.55 per ton. On October 29, 1940, an Order of the Director reduced the minimum price f. o. b. the mine to $2.40. On December 7, 1940, an Order of the Director further reduced the minimum price f. o. b. the mine to $2.30 per ton.

[1] It appears that Hawkins sold the mine in March 1941, to the son of one Noah Richmond.

Loyalhanna filed exceptions to the Examiner's Report, contending, among other things, that Mine Index 311 should be placed in Price Group 4 instead of Price Group 21.

On June 27, 1941, the Director entered a Final Order overruling the exception and classifying Mine Index 311 in Price Group 21 for railroad fuel with the provision that Size Group 6 may be reduced 5 cents per ton.

On September 11, 1941, Loyalhanna filed a petition herein seeking a reconsideration of that part of the Final Order dated June 27, 1941, establishing a price classification and minimum f. o. b. mine prices for coal produced at the Maust No. 7 Mine for sale as railroad fuel.

The matter of railroad fuel prices for this mine has been under consideration by the Director upon the informal conference, by the Examiner upon the evidence, and by the Director upon the record and Loyalhanna's Exceptions to the Examiner's Report.

The Examiner's Report indicates that full consideration was given to the evidence relating to railroad fuel prices for this mine. The Exceptions filed by Loyalhanna were accompanied by an elaborate discussion and brief of that evidence. Upon consideration of the Examiner's Report and the Exceptions thereto and supporting brief, the Director again reviewed all of the evidence.

Nevertheless, upon the petition to reconsider, I have again reviewed the record and have concluded that no useful purpose is to be served by further detailed discussion of the evidence. It was stated in the Final Order "that the Examiner's findings of fact in regard to railroad locomotive fuel are completely supported by the substantial weight of the evidence; indeed, that the evidence compels those findings." I adhere to that conclusion.

The petition to reconsider the railroad fuel classification states that its primary basis is the market experience of the Loyalhanna coals since the hearing. It is contended that Pennsylvania Railroad has made no purchases of railroad fuel from the Maust No. 7 Mine under the temporary and final price classification, notwithstanding the sales agents of Loyalhanna have made special effort to effect such sales. The record reveals that the Maust No. 7 Mine began production in May 1940 and made no sales of railroad fuel to the Pennsylvania under open competition. The hearing was held November 13–18, 1940, and no sales had been made to that railroad up to the date of the hearing. The petition, supported by an affidavit, avers that no sales have been made to the Pennsylvania Railroad since the hearing and that the railroad will not pay over $1.80 for strip mine coal. It is urged that this recent and comparatively more extended market history entitles Loyalhanna to a reconsideration of the Final Order and to a reclassification in Price Group 4 with a minimum price of $1.80 for railroad fuel.

It is further charged in the petition and supported by affidavit that since the hearing was held, other strip mines in District 2 have received reclassification in Group 4 on the basis of the alleged attitude of the Pennsylvania Railroad not to pay more than $1.80 per ton for strip mined coal in District 2. It is urged that for this reason, also, Loyalhanna is entitled to a reconsideration of the Final Order and to a reclassification of its coals for sale as railroad fuel.

These are matters not properly to be considered on the petition for a reconsideration of the Final Order. Though supported by an *ex parte* affidavit, they are not a part of the record on which the Final Order was entered. Before these allegations could be considered, an opportunity must be afforded interested persons to be heard upon them. The showing made by Loyalhanna would seem to be amply sufficient to warrant and require a reopening of the hearing as to railroad fuel or the institution of a new proceeding. However, this petition does not seek to reopen the hearing and the circumstances do not present a situation authorizing the Director to treat it as such a motion. It is a motion to reconsider and as such, on the basis of the record, must be denied.

It is therefore ordered, That the petition of Loyalhanna Fuel Company for a reconsideration of the Final Order herein entered July 27, 1941, be and the same hereby is denied.

Dated: October 8, 1941.

1. The hearings shall be stenographically reported and a transcript made which will be available to any person at prescribed rates upon request addressed to the Administrator, Wage and Hour Division, Department of Labor, Washington, D. C.

2. In order to maintain orderly and expeditious procedure, each person filing a Notice to Appear shall be notified, if practicable, of the approximate day and the place at which he may offer evidence at the hearing. If such person does not appear at the time set in the notice he will not be permitted to offer evidence at any other time except by special permission of the presiding officer.

3. At the discretion of the presiding officer the hearing may be continued from day to day, or adjourned to a later date, or to a different place, by announcement thereof at the hearing by the presiding officer, or by other appropriate notice.

4. At any stage of the hearing, the presiding officer may call for further evidence upon any matter. After the pre-

siding officer has closed the hearing before him, no further evidence shall be taken, except at the request of the Administrator, unless provision has been made at the hearing for the later receipt of such evidence. In the event that the Administrator shall cause the hearing to be reopened for the purpose of receiving further evidence, due and reasonable notice of the time and place fixed for such taking of testimony shall be given to all persons who have filed a notice of intention to appear at the hearing.

5. All evidence must be presented under oath or affirmation.

6. Written documents or exhibits, except as otherwise permitted by the presiding officer, must be offered in evidence by a person who is prepared to testify as to the authenticity and trustworthiness thereof, and who shall, at the time of offering the documentary exhibit, make a brief statement as to the contents and manner of preparation thereof.

7. Written documents and exhibits shall be tendered in duplicate and the persons preparing the same shall be prepared to supply additional copies if such are ordered by the presiding officer. 9. Witnesses summoned by the Administrator shall be paid the same fees and mileage as are paid witnesses in the courts of the United States. Witness fees and mileage shall be paid by the party at whose instance witnesses appear, and the Administrator before issuing subpoena may require a deposit of an amount adequate to cover the fees and mileage involved.

Requests for permission to cross-examine a witness offered by another person and objections to the admission or exclusion of evidence shall be stated briefly with the reasons for such request or the ground of objection relied on. Such requests or objections shall become a part of the record, but this record shall not include argument thereon except as ordered by the presiding officer. Objections to the approval of the Committee's recommendation and to the promulgation of a wage order based upon such approval must be made at the hearing before the presiding officer.

12. Before the close of the hearing, the presiding officer shall receive written requests from persons appearing in the proceeding for permission to make oral arguments before the Administrator upon the matter in issue. These requests will be forwarded to the Administrator by the presiding officer with the record of the proceedings. If the Administrator, in his discretion, allows the request, he shall give such notice thereof as he deems suitable to all persons appearing in the proceedings, and shall designate the time and place at which the oral arguments shall be heard. If such requests are allowed, all persons appearing at the hearing will be given opportunity to present oral argument.

FEDERAL POWER COMMISSION.

[Docket No. IT-6737]

IN THE MATTER OF KANSAS CITY POWER & LIGHT COMPANY

ORDER TO SHOW CAUSE AND FIXING DATE OF HEARING

OCTOBER 7, 1941.

It appearing to the Commission that:

(a) On January 3, 1939, Kansas City Power & Light Company, hereinafter referred to as "Company," submitted proposed reclassification and original cost studies required by Electric Plant Accounts Instruction 2-D of the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees, effective January 1, 1937, and the Commission's order of May 11, 1937;

(b) The Commission's staff has made a field study of the Company's proposed reclassification and original cost studies and has submitted to the Commission a report entitled "Kansas City Power & Light Company, Kansas City, Missouri, Report on the Reclassification and Original Cost Studies of Electric Plant as at January 1, 1937";

(c) The Commission's staff report was transmitted to the Company on September 9, 1940, with a request that the accounting adjustments indicated in the report be made, copies of the adjusting journal entries be submitted, and a plan be submitted for disposing of the amounts, in such report, included in Account 100.5, Electric Plant Acquisition Adjustments, and, with a further request to the Company to advise whether it agreed to the recommended disposition of the amounts, in such report, included in Account 107, Electric Plant Adjustments;

(d) As a result of subsequent correspondence, conference and the submission of additional data certain modifications of the Commission's staff report were made;

(e) Agreement has not been reached between the Company and the Commission's staff with respect to the accounting adjustments indicated in the Commission's staff report as modified;

The Commission *finds* that:

(1) Kansas City Power & Light Company's proposed reclassification and original cost studies and the information submitted subsequently do not justify or explain the Company's failure to adjust its accounts in accordance with the adjustments recommended in the Commission's staff report referred to in paragraph (b) hereof as subsequently modified;

(2) The Company's proposed treatment of the amounts established in Account 100.5, Electric Plant Acquisition Adjustments, and Account 107, Electric Plant Adjustments, in the Commission's staff report referred to in paragraph (b) hereof as subsequently modified, does not appear to constitute a complete and proper plan for the disposition of the amounts established in the above-mentioned accounts;

(3) It is advisable, necessary, and proper in the public interest that a public hearing be held for the purpose of requiring Kansas City Power & Light Company to show cause, under oath, why this Commission should not order (a) adjustment of the Company's accounts in conformity with the recommendations made in the report referred to in paragraph (b) hereof as subsequetly modified, and (b) disposition of the amounts established in Account 100.5, Electric Plant Acquisition Adjustments, and Account 107, Electric Plant Adjustments, in accordance with the evidence adduced at said public hearing;

The Commission *orders* that:

A public hearing be held on December 1, 1941, at 9:45 a. m., at Kansas City, Missouri, in Jury Room 527 U. S. Court House, and at said hearing Kansas City Power & Light Company show cause, under oath, why the Commission should not determine by order that:

(A) Adjusting entries be made to bring the Company's accounts in conformity with the recommendations made by the Commission's staff in the report referred to in paragraph (b) hereof as subsequently modified;

(B) Disposition be made of the amounts established in Account 100.5, Electric Plant Acquisition Adjustments, and Account 107, Electric Plant Adjustments, in accordance with the evidence adduced at said hearing;

(C) The Public Service Commission of the State of Missouri and the State Corporation Commission of Kansas may participate in the hearing as provided in Part 39, § 39.4, of this Commission's Rules of Practice and Regulations prescribed pursuant to the provisions of the Federal Power Act.

CONDITION OF THE APPORTIONMENT AT CLOSE OF BUSINESS TUESDAY, SEPTEMBER 30, 1941

IMPORTANT.—Although the apportioned classified Civil Service is by law located only in Washington, D. C., it nevertheless includes only about half of the Federal Civilian positions in the District of Columbia. Positions in local post offices, customs districts and other field services outside of the District of Columbia which are subject to the Civil Service Act are filled almost wholly by persons who are local residents of the general community in which the vacancies exist. It should be noted and understood that so long as a person occupies, by original appointment, a position in the apportioned service, the charge for his appointment continues to run against his State of original residence. Certifications of eligibles are first made from states which are in arrears.

TITLE 14—CIVIL AVIATION

CHAPTER I—CIVIL AERONAUTICS BOARD

[Amend. No. 135, Civil Air Regulations]

PART 60—AIR TRAFFIC RULES

PILOT AND AIRCRAFT CERTIFICATES REQUIRED

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 10th day of October 1941.

Having had under consideration the matter of the operation of uncertificated aircraft in the air space overlying the United States and the operation of aircraft in such air space by uncertificated pilots, and having held a public hearing after due notice at its office in Washington, D. C., on the 24th day of September, 1941, and

The Board finds that:

(1) As of September 1, 1941, the total number of civilian pilots certificated by the Administrator of Civil Aeronautics was 181,281, including student pilots, representing an increase in the number of civilian pilots certificated of more than 200 percent since July 1, 1938, and in addition thereto there were an undetermined number of uncertificated pilots;

(2) As of September 1, 1941, the total number of civil aircraft certificated by the Administrator of Civil Aeronautics was 22,885, representing an increase in the number of aircraft certificated of more than 130 percent since July 1, 1938, and in addition thereto there were 549 uncertificated aircraft recorded;

(3) In 1940 over 264,000,000 miles were flown in non-scheduled flying operations, representing an increase of more than 100 percent over the number of miles flown in such operations during 1938;

(4) In 1940 more than 34,000,000 miles were flown in commercial charter operations, representing an increase of more than 80 percent over the number of miles flown in similar operations during 1938;

(5) In 1940 more than 108,000,000 revenue miles were flown in domestic scheduled air carrier operations, representing an increase of more than 50 percent over the number of revenue miles flown in similar operations during 1938;

(6) During the year 1941 the aeronautical activity of the armed forces of the United States has increased tremendously and will increase in accordance with projected national defense plans;

(7) At present the civil airways cover more than 600,000 square miles or 20 percent of the territory of the continental United States;

(8) As of September 1, 1941, a total of 2,658 landing areas were reported, of which more than 40 percent were located off the civil airways;

(9) Scheduled air carrier operation which was formerly conducted only on the civil airways is no longer restricted to such airways;

(10) A great percentage of the operation of non-scheduled air carriers is conducted off the civil airways;

(11) The development of radio navigational aids will increase the operations conducted in air commerce off the civil airways;

(12) The aeronautical activity of the armed forces of the United States is not confined to the civil airways but may be conducted anywhere in the air space overlying the United States;

(13) The operation of uncertificated aircraft and the pilotage of aircraft by uncertificated airmen anywhere in the navigable air space overlying the United States constitute a hazard to interstate, overseas, and foreign air commerce;

(14) The Civil Aeronautics Act of 1938, as amended, imposes upon the Board the responsibility of anticipating possible hazards to interstate, overseas, or foreign air commerce and of taking necessary action to protect such air commerce;

The Board further finds that:

(1) Any operation of any aircraft in the air space overlying the United States either directly affects, or may endanger safety in, interstate, overseas, or foreign air commerce;

(2) In order to protect interstate, overseas, and foreign air commerce, it is necessary that all pilots and aircraft operating in the air space overlying the United States be certificated;

(3) The Board's action herein is desirable in the public interest and for the protection of safety in air commerce, and is necessary to carry out the provisions of, and to exercise and perform its duties under, the Civil Aeronautics Act of 1938;

Now, therefore, the Civil Aeronautics Board, acting pursuant to the authority vested in it by the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a) and 601 (a) of said Act, amends the Civil Air Regulations as follows:

Effective December 1, 1941, §§ 60.30 and 60.31 of the Civil Air Regulations are amended to read as follows:

§ 60.30 *Pilot certificates.* No person shall pilot a civil aircraft in the United States unless such person holds a valid pilot certificate or in violation of any term, condition, or limitation of such certificate: *Provided,* That an alien may pilot a civil aircraft in the United States in accordance with a pilot certificate issued or validated pursuant to a reciprocal arrangement entered into between the United States and the foreign government from which such alien holds a valid pilot certificate.

§ 60.31 *Aircraft certificate.* No flight of civil aircraft, other than of a foreign aircraft whose navigation in the United States has been authorized according to law, shall be made or authorized to be made in the United States unless there is outstanding for such aircraft a valid aircraft airworthiness certificate, or in violation of any term, condition, or limitation of such certificate.

By the Civil Aeronautics Board.

Secretary.

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 9. Section 19.13–1 is amended by striking out the parenthetical expression at the end of the first sentence in the first paragraph.

PAR. 10. Section 19.13–5, as amended by Treasury Decision 5038,[1] approved February 8, 1941, is further amended as follows:

(A) By inserting immediately after the second sentence of the fourth paragraph the following:

For surtax on corporations generally with respect to taxable years beginning after December 31, 1940, see section 15, as amended by section 104 of the Revenue Act of 1941, and § 19.15–2.

[1] 6 F.R. 917.

(B) By striking out "$38,565.89" in the last paragraph and inserting in lieu thereof "$38,461.54 ($38,565.89 for taxable years beginning before January 1, 1941)".

(C) By striking out the last sentence in the last paragraph and inserting in lieu thereof the following:

For the defense tax imposed for taxable years beginning after December 31, 1939, and before January 1, 1941, see § 19.15–1.

PAR. 11. Section 19.13–6, as amended by Treasury Decision 5038, is further amended as follows:

(A) By striking out "22½0 percent" in the first paragraph and inserting in lieu thereof "24 percent (22½0 percent for any such taxable year beginning before January 1, 1941)".

(B) By striking out "$38,565.89" in the first paragraph and inserting in lieu thereof "$38,461.54 ($38,565.89 for any such taxable year beginning before January 1, 1941)".

(C) By striking out the example and inserting in lieu thereof the following:

Example. The A Corporation, a domestic corporation, which is not a bank affiliate referred to in section 26 (d), has for the calendar year 1941 a net income of $110,000, including interest on United States obligations (allowable as a credit under section 26 (a)) in the amount of $10,000 and dividends received (of a class allowable as a credit under section 26 (b)) in the amount of $10,000. The corporation's tax under section 13 for the calendar year 1941 is $21,960, computed as follows:

Net income	$110,000.00
Less credit for interest on United States obligations	10,000.00
Adjusted net income	100,000.00
Less credit for dividends received (85 percent of $10,000)	8,500.00
Normal-tax net income	91,500.00
Tax under section 13 (b) (1) (24 percent of $91,500)	21,960.00

PAR. 12. Section 19.13–7, as amended by Treasury Decision 5038, is further amended to read as follows:

Alternative tax (corporations with normal-tax net incomes slightly more than $25,000); taxable years beginning after December 31, 1939. For any taxable year beginning after December 31, 1939, section 13 (b) (2), as amended, provides for an alternative tax in the case of corporations having normal-tax net incomes of slightly more than $25,000. With respect to such a taxable year beginning before January 1, 1941, the alternative tax is $3,775 plus 35 percent of the amount of the normal-tax net income in excess of $25,000, such tax being applicable in the case of corporations having normal-tax net incomes of less than $38,565.89. With respect to such a taxable year beginning after December 31, 1940, the alternative tax is $4,250 plus 37 percent of the amount of

the normal-tax net income in excess of $25,000, such tax being applicable in the case of corporations having normal-tax net incomes of less than $38,461.54. This provision may be illustrated by the following example:

Example. The A Corporation, a domestic corporation (not a bank affiliate), has for the calendar year 1941 a net income of $30,000, including interest on United States obligations (allowable as a credit under section 26 (a)) in the amount of $3,000 and dividends received of a class allowable as a credit under section 26 (b) in the amount of $1,000. Since the alternative tax is less than the tax computed under the general rule, the correct tax is the alternative tax, that is, $4,675.50. The tax is computed as follows:

ALTERNATIVE TAX

Net income	$30,000.00
Less interest on United States obligations	3,000.00
Adjusted net income	27,000.00
Less credit for dividends received (85 percent of $1,000)	850.00
Normal-tax net income	26,150.00
Amount of normal-tax net income in excess of $25,000	1,150.00
Tax under section 13 (b) (2) ($4,250 plus 37 percent of $1,150)	4,675.50

TAX UNDER GENERAL RULE

Normal-tax net income (computed as above)	$26,150.00
Tax under section 13 (b) (1) (24 percent of $26,150)	6,276.00

PAR. 13. There is inserted immediately preceding § 19.14–1 the following:

SEC. 103. CORPORATION DEFENSE TAX RATES INCORPORATED IN RATE SCHEDULES. (Revenue Act of 1941, Title I.)

* * * * *

(b) *Tax on special classes of corporations.* Section 14 (b) of the Internal Revenue Code is amended to read as follows:

(b) *Corporations with normal-tax net incomes of not more than $25,000.* If the normal-tax net income of the corporation is not more than $25,000, and if the corporation does not come within one of the classes specified in subsection (c), (d), or (e) of section, the tax shall be as follows:

Upon normal-tax net incomes not in excess of $5,000, 15 per centum.

$750 upon normal-tax net incomes of $5,000, and upon normal-tax net incomes in excess of $5,000 and not in excess of $20,000, 17 per centum in addition of such excess.

$3,300 upon normal-tax net incomes of $20,000, and upon normal-tax net incomes in excess of $20,000, 19 per centum in addition of such excess.

(c) *Foreign corporations.* Section 14 (c) of the Internal Revenue Code (relating to tax on resident foreign corporations) is amended by striking out "22½0 per centum" and inserting "24 per centum."

PAR. 14. SECTION 19.14–1 is amended by striking out the portion of the first sentence in the first paragraph following "January 1, 1940."

PAR. 15. Section 19.14–2, as amended by Treasury Decision 5038, is further amended as follows:

(A) By inserting immediately after the third sentence of the third paragraph the following:

For surtax on corporations generally with respect to taxable years beginning after December 31, 1940, see section 15, as amended by section 104 of the Revenue Act of 1941, and section 19.15–2.

(B) By changing the first sentence of the fifth paragraph to read as follows:

The following tables show the income tax imposed by section 14, as amended, (1) for any taxable year beginning after December 31, 1939, and before January 1, 1941, and (2) for any taxable year beginning after December 31, 1940, from corporations coming within the terms of section 14 (b), as amended, upon certain specified amounts of normal-tax net income.

(C) By changing the heading of the table which follows the fifth paragraph to read as follows:

TABLE I. *Corporation income tax under section 14 (b), as amended, for taxable years beginning after December 31, 1939, and before January 1, 1941.*

(D) By inserting immediately after the table which follows the fifth paragraph the following:

TABLE II. *Corporation income tax under section 14 (b), as amended, for taxable years beginning after December 31, 1940.*

Normal-tax net income	Percent	Total tax
$0 to $5,000	15	$750
$5,000 to $20,000	17	3,300
$20,000 to $25,000	19	4,250

(E) By striking from the example "1940", "$1,537.50", "13½ percent", "15 percent", "675", "862.50", and "1,537.50", wherever they appear, and inserting in lieu thereof "1941", "$1,727.50", "15 percent", "17 percent", "750", "977.50", and "1,727.50", respectively.

(F) By striking out "22½0 percent" in the last paragraph and inserting in lieu thereof "24 percent (22½0 percent for taxable years beginning before January 1, 1941)".

PAR. 16. There is inserted immediately preceding § 19.15–1 the following:

SEC. 104. SURTAX ON CORPORATIONS AND TERMINATION OF DEFENSE TAX. (Revenue Act of 1941, Title I.)

(a) General rule. Section 15 of the Internal Revenue Code (relating to defense tax) is amended to read as follows:

SEC. 15. SURTAX ON CORPORATIONS.

(a) Corporation surtax net income. For the purposes of this chapter the term "corporation surtax net income" means the net income minus the credit for dividends received provided in section 26 (b), computed by limiting such credit to 85 per centum of the net income in lieu of 85 per centum of the adjusted net income.

(b) Imposition of tax. There shall be levied, collected, and paid for each taxable year upon the corporation surtax net income of every corporation (except a corporation subject to the tax imposed by section 231 (a) or Supplement Q) a surtax as follows:

Upon corporation surtax net incomes not in excess of $25,000, 6 per centum of the amount thereof;

Upon corporation surtax net incomes in excess of $25,000, $1,500, plus 7 per centum of the excess over $25,000.

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 17. Section 19.15–1, as amended by Treasury Decision 5038, is further amended by striking out "January 1, 1945" in the first sentence and inserting in lieu thereof "January 1, 1941".

PAR. 18. There is inserted immediately after § 19.15–1 the following new section:

§ 19.15–2 *Surtax on corporations.* For taxable years beginning after December 31, 1940, section 15, as amended by section 104 (a) of the Revenue Act of 1941, imposes a surtax upon the corporation surtax net income of every corporation, except a nonresident foreign corporation taxable under section 231 (a) or a mutual investment company taxable under Supplement Q. The corporation surtax net income of a corporation is its net income minus the credit for dividends received provided in section 26 (b). Section 15, as amended by section 104 (a) of the Revenue Act of 1941, provides that the credit for dividends received shall be limited to 85 percent of a corporation's net income, rather than to 85 percent of its adjusted net income. The credit provided in section 26 (a) for interest received upon obligations of the United States or its instrumentalities is not allowable in computing corporation surtax net income.

PAR. 19. There is inserted immediately preceding § 19.23 (c)–1 the following:

SEC. 202. DEDUCTION OF EXCESS-PROFITS TAX. (Revenue Act of 1941, Title II.)

(c) *Taxes Generally.*

(1) *Allowance in general.* Taxes paid or accrued within the taxable year, except—

(A) Federal income taxes;

(B) war-profits and excess-profits taxes imposed by Title II of the Revenue Act of 1917, Title III of the Revenue Act of 1918, Title III of the Revenue Act of 1921, section 216 of the National Industrial Recovery Act, or section 702 of the Revenue Act of 1934, or by any such provisions as amended or supplemented;

(C) income, war-profits, and excess-profits taxes imposed by the authority of any foreign country or possession of the United States; but this deduction shall be allowed in the case of a taxpayer who does not signify in his return his desire to have to any extent the benefits of section 131 (relating to credit for taxes of foreign countries and possessions of the United States);

(D) estate, inheritance, legacy, succession, and gift taxes; and

(E) taxes assessed against local benefits of a kind tending to increase the value of the property assessed; but this paragraph shall not exclude the allowance as a deduction of so much of such taxes as is properly allocable to maintenance or interest charges.

(2) *Excess-profits tax under chapter 2E—Special rules.*—For the purposes of this subsection, in the case of the excess-profits tax imposed by Subchapter E of Chapter 2—

(A) The deduction shall be limited to the tax imposed for the taxable year, but any portion of such tax paid after the taxable year shall be considered as having been paid within the taxable year;

(B) No reduction in such tax shall be made by reason of the credit for income, war-profits, or excess-profits taxes paid to any foreign country or possession of the United States;

(C) Such tax shall be computed without regard to the adjustments provided in section 734; and

(D) Such tax, in the case of a consolidated return under section 730, shall be allocated to the members of the affiliated group under regulations prescribed by the Commissioner, with the approval of the Secretary.

SEC. 205. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title II.)

The amendments made by this title shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 20. Section 19.23 (c)–1 is amended by striking out the second sentence and inserting in lieu thereof the following:

Estate, inheritance, legacy, succession, and gift taxes and Federal income taxes are not deductible from gross income. The Federal war-profits and excess-profits taxes imposed by Title II of the Revenue Act of 1917, Title III of the Revenue Act of 1918, Title III of the Revenue Act of 1921, section 216 of the National Industrial Recovery Act, and section 702 of the Revenue Act of 1934 are not deductible from gross income. The excess-profits tax imposed by Subchapter E of Chapter 2 is deductible only for taxable years beginning after December 31, 1940, and its deductibility for such years is subject to the rules set forth in § 19.23 (c)–4.

PAR. 21. There is inserted immediately after § 19.23 (c)–3 the following:

§ 19.23 (c)–4 *Excess-profits tax under Subchapter E of Chapter 2 of the Internal Revenue Code.* The deductibility of the excess-profits tax imposed by Subchapter E of Chapter 2 of the Internal Revenue Code is subject to the following special rules:

(a) The deduction is limited to the excess-profits tax imposed for the taxable year. A taxpayer which computes its net income on the cash receipts and disbursements basis may deduct its excess-profits tax for any taxable year in its income tax return for such taxable year, despite the fact that such tax is not actually paid until after such taxable year. The deduction in the case of such a taxpayer, however, will be disallowed upon examination of the return to the extent that the excess-profits tax is not actually paid after such taxable year.

(b) The excess-profits tax, for the purposes of this deduction, shall be computed without reduction by reason of the credit for income, war-profits or excess-profits taxes paid to any foreign country or possession of the United States.

(c) For the purposes of this deduction, the excess-profits tax shall not be increased or decreased on account of any adjustment made under section 734, relating to adjustments in case of inconsistent position.

(d) The deduction allowable to a taxpayer which is a member of an affiliated group filing a consolidated excess-profits tax return is an amount which bears the same ratio to the excess-profits tax of the group as the normal-tax net income of the taxpayer, computed without a deduction for excess-profits tax, bears to the sum of the normal-tax net incomes of the several members of the group, computed without a deduction for excess-profits tax.

PAR. 22. Section 19.23 (e)–1 is amended by changing the last paragraph to read as follows:

Losses from the sale or other disposition of Treasury bills issued after June 17, 1930, and before March 1, 1941, are not deductible.

PAR. 23. Section 19.23 (o)–1, as amended by Treasury Decision 5057,[1] approved July 2, 1941, is further amended by striking "January 1, 1939" from the first paragraph and inserting in lieu thereof "January 1, 1938".

PAR. 24. There is inserted immediately preceding § 19.25–1 the following:

SEC. 111. PERSONAL EXEMPTION. (Revenue Act of 1941, Title I.)

(a) Section 25 (b) (1) of the Internal Revenue Code is amended to read as follows:

(1) *Personal exemption.* In the case of a single person or a married person not living with husband or wife, a personal exemption of $750; or in the case of the head of a family or a married person living with husband or wife, a personal exemption of $1,500. A husband and wife living together shall receive but one personal exemption. The amount of such personal exemption shall be $1,500. If such husband and wife make separate returns, the personal exemption may be taken by either or divided between them, except that if one spouse makes a return under Supplement T, the personal exemption of the other spouse shall be $750.

* * * * *

SEC. 113. CREDIT FOR DEPENDENTS. (Revenue Act of 1941, Title I.)

Section 25 (b) (2) of the Internal Revenue Code (relating to credit for dependents) is amended to read as follows:

(2) *Credit for dependents.*

(A) *Allowance in general.* $400 for each person (other than husband or wife) dependent upon and receiving his chief support from the taxpayer if such dependent person is under eighteen years of age or is incapable of self-support because mentally or physically defective.

(B) *Exception for certain heads of families.* If the taxpayer would not occupy the status of head of a family except by reason of there being one or more dependent for whom he would be entitled to credit under subparagraph (A), the credit under such subparagraph shall be disallowed with respect to one of such dependents.

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 25. Section 19.25–3, as amended by Treasury Decision 5011, is further amended to read as follows:

Amount of personal exemption allowable. A single person or a married person not living with husband or wife is entitled to a personal exemption of $750 ($800 for a taxable year beginning after December 31, 1939, and before January 1, 1941, and $1,000 for a taxable year beginning before January 1, 1940), and the head of a family or a married person living with husband or wife, to $1,500 ($2,000 for a taxable year beginning after December 31, 1939, and before January 1, 1941, and $2,500 for a taxable year beginning before January 1, 1940). A husband and wife living together have but one personal exemption, which is $1,500 ($2,000 for a taxable year beginning after December 31, 1939, and before January 1, 1941, and $2,500 for a taxable year beginning before January 1, 1940). If they make separate returns, each may claim one-half of the personal exemption, or such exemption may, in accordance with an agreement entered into by them, be taken by either or divided between them in any proportion. If, however, one spouse elects to make a return under Supplement T, the personal exemption of the other spouse shall be $750.

PAR. 26. Section 19.25–6 is amended by inserting at the end thereof a new paragraph to read as follows:

If, for any taxable year beginning after December 31, 1940, a taxpayer occupies the status of the head of a family solely by reason of the existence of one or more dependents for whom he would be entitled to credit under section 25 (b) (2) (A) were it not for section 25 (b) (2) (B) the credit in respect of one of such dependents is disallowed. For example, a widower who occupies the status of the head of a family solely by reason of the fact that he is maintaining a home for two dependent children under 18 years of age is entitled to the credit of $400 allowed for one such dependent, and the credit for the other dependent is disallowed. If, however, in addition to the two dependent children under 18 years of age, the widower also supports and maintains in the home a child who is over 18 years of age and who is not mentally or physically defective, he is entitled to a credit of $400 for each of the two children under 18 years of age, since his support and maintenance of the child over 18 years of age is in itself sufficient to give him the status of head of a family, and therefore he does not occupy such status solely by reason of the existence of dependent children under 18 years of age.

[1] 6 F.R. 3274.

PAR. 27. Section 19.25–7, as amended by Treasury Decision 5011, is further amended to read as follows:

Personal exemption and credit for dependents where status changes. If the status of the taxpayer changes during the taxable year, the personal exemption allowed by section 25 (b) (1) to a single person, a married person not living with husband or wife, a head of a family, or a married person living with husband or wife, and the credit for dependents allowed by section 25 (b) (2) will be apportioned according to the number of months during which the taxpayer occupied each status. A taxpayer not having the status of a head of a family or the status of a married person living with husband or wife shall be considered as having the status of a single person. For the purpose of the apportionment of the personal exemption and credit for dependents a fractional part of a month shall be disregarded unless it amounts to more than half a month, in which case it shall be considered as a month. In the event one spouse elects to be taxed under Supplement T, the other spouse, not so electing, will be allowed for that portion of the taxable year during which there existed the status of a married person living with husband or wife one-half of the personal exemption allowed a married person for such portion of the taxable year. In general, the personal exemption and credit for dependents allowable to any taxpayer wil be the sum of the amounts apportioned to the several periods of the taxable year during which each status was occupied.

Example (1). A and B, who were heads of families during the first six months of 1941, were married on July 1, 1941, and lived together during the remainder of the year. If a joint return is made by A and B on the calendar year basis for 1941, the personal exemption will be $2,250; that is, ½ of $1,500 for A while the head of a family, plus ½ of $1,500 for B while the head of a family, plus ½ of $1,500 for the period during which they were married and living together. If separate returns are made by A and B on the calendar year basis for 1941 and neither elects to be taxed under Supplement T, each may claim a personal exemption of $1,125; that is, ½ of $1,500, plus ½ of ½ of $1,500. In the latter case, however, the joint exemption of ½ of $1,500 may by agreement be taken either by A or B or divided between them in any proportion.

Example (2). A and B were married and living together until November 30, 1941, when B, the wife, died. They had no dependents. The executor or administrator in making a return for B may claim a personal exemption of $750; that is, ½ of 11/12 of $1,500, or $687.50, for the period from the beginning of the taxable year to the date of the decedent's death, plus 1/12 of $750, or $62.50, for the period from the date of decedent's death to the close of the taxable year. If A, the surviving spouse, makes a return for 1941 on the calendar year basis, he may claim a personal exemption of $750; that is, ½ of 11/12 of $1,500, or $687.50, plus 1/12 of $750, or $62.50. However, if neither elects to be taxed under Supplement T, the combined personal exemption of A and B for the period during which they were married and living together, that is, 11/12 of $1,500, or $1,375, may by agreement be taken either by A, or by B's executor or administrator in behalf of B, or divided between them in any proportion.

Example (3). A and B were married and living together until June 30, 1941, when A, the husband, died. Prior to the date of death, A was the chief support of a child 10 years of age. B, the surviving spouse, supported and maintained the child in her household during the remainder of the year. The executor or administrator in making a return for A (not under Supplement T) is entitled, in addition to a personal exemption, to a credit for dependents in the amount of $200; that is, 6/12 of $400. However, since B qualifies as head of a family for the last six months solely by reason of the fact that she maintained a home for such dependent child, the credit for such dependent is disallowed.

Example (4). A, a widower having two dependent children under 18 years of age, married B on July 1, 1941. For the calendar year 1941, they file separate returns and B elects to be taxed under Supplement T. B is taxed as a single person and, since she receives the benefit of a $750 exemption, she, in effect, receives the benefit of half the marital exemption of $750 for the second half of the year by reason of her status on the last day of the taxable year. A, who is taxed under sections 11 and 12, is subject to the provisions of section 25 (b) (3) requiring an apportionment of the personal exemption and credit for dependents by reason of a change of status during the taxable year. A qualifies as the head of a family for the first six months of the taxable year and as a married person living with husband or wife for the last six months. Accordingly, his personal exemption is 6/12 of $1,500 for the first half of the year plus 6/12 of $750 for the second half, or $1,125. Inasmuch as his status as the head of a family arises from the fact that he maintained a home for two dependent children, the credit for one of such dependents for the first six months of the taxable year is disallowed. He is, therefore, entitled to a credit for dependents in the amount of $600; that is, 6/12 of $400, plus 6/12 of $800.

If the change of status shown by the preceding examples occurs in any taxable year beginning before January 1, 1941, the apportionment of the personal exemptions will be based upon an allowance of:

(a) For a taxable year beginning after December 31, 1939, and before January 1, 1941, $800 to a single person or a married person not living with husband or wife, and $2,000 to the head of a family or a married person living with husband or wife; and

(b) For a taxable year beginning before January 1, 1940, $1,000 to a single person or a married person not living with husband or wife, and $2,500 to the head of a family or a married person living with husband or wife.

The provisions of section 25 (b) (2) (B) requiring the disallowance of the credit for one dependent where the taxpayer's status as the head of a family results solely from the existence of one or more of such dependents are applicable only for taxable years beginning after December 31, 1940. Accordingly, in the application of the preceding examples to taxable years beginning prior to January 1, 1941, the disallowance in such cases of the credit for one dependent should be disregarded.

PAR. 28. Section 19.26–2 is amended by changing the example to read as follows:

Example. For 1939 the X Corporation, which makes its income tax returns on the calendar year basis, has a net income of $50,000, included in which is $10,000 of interest on United States obligations allowed as a credit under section 26 (a). For 1938 its gross income was $25,000 and its allowable deductions were $50,000. Included in such deductions was $15,000 for depletion based on discovery value. If depletion had been computed without reference to discovery value or to percentage depletion the amount of such deduction would have been $5,000. For 1938 the corporation had $15,000 of wholly tax-exempt interest, and paid $10,000 in interest on indebtedness incurred to carry the obligations from which such tax-exempt interest was derived. The net operating loss credit available to such corporation for 1939 is $10,000, computed as follows:

Deductions for 1938		$50,000
Less excess of depletion deduction computed on basis of discovery value over amount allowable for depletion without reference to discovery value or percentage depletion ($15,000–$5,000)		10,000
Deductions as limited by section 26 (c) (2) (A)		40,000
Gross income for 1938	$25,000	
Plus tax-exempt interest minus interest paid ($15,000–$10,000)	5,000	
Gross income contemplated by section 26 (c) (2) (B)		30,000
Excess of deductions over gross income for 1938		10,000
Net income for 1939		50,000
Less credit under section 26 (a) for interest received		10,000
Adjusted net income for 1939		40,000

The net operating loss credit is $10,000, that amount not being in excess of the adjusted net income for 1939.

PAR. 29. There is inserted immediately preceding § 19.42–1 the following:

SEC. 114. NONINTEREST-BEARING OBLIGATIONS ISSUED AT DISCOUNT. (Revenue Act of 1941.)

Section 42 of the Internal Revenue Code (relating to period in which items of gross income are included) is amended by inserting before the first sentence thereof "(a) General Rule.—", and by inserting at the end of such section a new subsection to read as follows:

(b) *Noninterest-bearing obligations issued at discount.*—If, in the case of a taxpayer owning any noninterest-bearing obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals, the increase in the redemption price of such obligation occurring in the taxable year does not (under the method of accounting used in computing his net income) constitute income to him in such year, such taxpayer may, at his election made in his return for any taxable year beginning after December 31, 1940, treat such increase as income received in such taxable year. If any such election is made with respect to any such obligation, it shall apply also to all such obligations owned by the taxpayer at the beginning of the first taxable year to which it applies and to all such obligations thereafter acquired by him and shall be binding for all subsequent taxable years, unless upon application by the taxpayer the Commissioner permits him, subject to such conditions as the Commissioner deems necessary, to change to a different method. In the case of any such obligations owned by the taxpayer at the beginning of the first taxable year to which his election applies, the increase in the redemption price of such obligations occurring between the date of acquisition and the first day of such taxable year shall also be treated as income received in such taxable year.

PAR. 30. Section 19.42–1 is amended by striking out the first three sentences (including the sentence in parentheses) and inserting in lieu thereof the following:

Except as otherwise provided in section 42, gains, profits, and income are to be included in the gross income for the taxable year in which they are received by the taxpayer, unless they are included as of a different period in accordance with the approved method of accounting followed by him. (See §§ 19.41–1 to 19.41–3, inclusive.) In the case of the death of a taxpayer, there shall also be included in computing net income for the taxable period in which he died amounts accrued up to the date of his death if not otherwise properly includible in respect of such period or a prior period, regardless of the fact that the decedent may have kept his books and made his returns on the basis of cash receipts and disbursements. (As to income from noninterest-bearing obligations issued at discount, see § 19.42–6, and as to income from short-term obligations issued on a discount basis, see § 19.42–7.)

PAR. 31. There is inserted immediately after § 19.42–5 the following:

§ 19.42–6 *Noninterest-bearing obligations issued at discount.* If a taxpayer owns any noninterest-bearing obligation issued at a discount and redeemable for fixed amounts increasing at stated intervals, and if the increase in redemption price of such obligation occurring in the taxable year does not constitute income for such year under the method of accounting used in computing his net income, the taxpayer may, at his election, treat such increase as constituting income for the year in which it occurs rather than in the year in which the obligation is disposed of, redeemed, or paid at maturity. The election must be made in the taxpayer's return, and may be made for any taxable year beginning after December 31, 1940. The election shall apply also to all other obligations of the type described in this section owned by the taxpayer at the beginning of the first taxable year to which the election applies and to those thereafter acquired by him. It shall apply to the taxable year for which such return is filed, and shall be binding for all subsequent taxable years unless upon application by the taxpayer the Commissioner permits the taxpayer, subject to such conditions as the Commissioner deems necessary, to change to a different method of reporting income from such obligations. Although the election, once made, is binding upon the taxpayer, it does not apply to a transferee of such taxpayer.

In any case in which an election is made under this section, the amount considered to accrue in any taxable year to which the election applies is measured by the actual increases in the redemption price occurring in that year. Such amount shall not be considered to accrue ratably between the dates on which the redemption price changes. Thus, if two dates on which the redemption price increases fall within a taxable year and if the redemption price increases in the amount of 50 cents on each such date, the amount deemed to accrue in that year would be $1. If at the beginning of the first taxable year to which the election applies the taxpayer owns noninterest-bearing bonds of the prescribed character acquired prior thereto, he is required to report in such year, in addition to the increases in the redemption price actually falling within that year, the total of the increases in such price occurring between the date of his acquisition and the beginning of such year.

Example. Throughout the calendar year 1945, a taxpayer who makes his income tax returns on the calendar year basis and computes his net income on the cash receipts and disbursements basis holds the following United States bonds:

(a) United States savings bonds having a maturity value of $10,000, which he purchased on January 1, 1938, for $7,500. The entire increase in the redemption price of these bonds is exempt from normal tax but only such part of the increase as is attributable to $5,000 in principal amount (purchase price) of such bonds is exempt from the surtax.

(b) United States Defense Savings Bonds, Series E, having a maturity value of $5,000, which he purchased on January 1, 1942, for $3,750. The increase in the redemption price of these bonds is subject to both the normal tax and the surtax.

(c) United States Savings Bonds, Defense Series F, having a maturity value of $10,000, which he purchased on January 1, 1944, for $7,400. The increase in the redemption price of these bonds is subject to both the normal tax and the surtax.

The taxpayer holds no other obligations of the type described in this section. In his return for 1945 the taxpayer elects to treat the increases in the redemption prices of such bonds occurring in such year as income to him for such year. Under this section he is required in such return to report with respect to such bonds $250 as subject to normal tax and $750 as subject to surtax, determined as follows:

	Subject to normal tax		Subject to surtax	
	Increases prior to 1945	Increases in 1945	Increases prior to 1945	Increases in 1945
Bonds acquired Jan. 1, 1938	None	None	$400	$100
Bonds acquired Jan. 1, 1942	$100	$100	100	100
Bonds acquired Jan. 1, 1944	None	50	None	50
Total	$250		$750	

In the case of the United States savings bonds acquired on January 1, 1938, the increases of $400 and $100 in the redemption price are attributable to the principal amount (purchase price) in excess of $5,000.

PAR. 32. There is inserted immediately before § 19.42–1 and immediately after section 114 of the Revenue Act of 1941 the following:

SEC. 115. SHORT-TERM OBLIGATIONS ISSUED ON A DISCOUNT BASIS. (Revenue Act of 1941.)

(a) *Discount accrued at maturity.* Section 42 of the Internal Revenue Code (relating to period in which items of gross income are included) is amended by inserting at the end thereof the following new subsection:

(c) *Short-term obligations issued on discount basis.* In the case of any obligation of the United States or any of its possessions, or of a State or Territory, or any political subdivision thereof, or of the District of Columbia, issued on or after March 1, 1941, on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, the amount of discount at which such obligation is originally sold shall not be considered to accrue until the date on which such obligation is paid at maturity, sold, or otherwise disposed of.

* * * * *

(c) *Effective date of amendments.* The amendments made by this section shall be applicable with respect to taxable years ending after February 28, 1941.

PAR. 33. There is inserted immediately after § 19.42–6 (added by paragraph 30 of this Treasury decision) the following:

§ 19.42–7 *Short-term obligations issued on discount basis.* In the case of any obligation of the United States or

any of its possessions, or of a State or Territory, or any political subdivision thereof, or of the District of Columbia, issued on or after March 1, 1941, on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, the amount of discount at which such obligation is originally sold shall not be considered to accrue until the date on which such obligation is paid at maturity, sold, or otherwise disposed of. Accordingly, if a taxpayer who computes his net income on the accrual basis purchases upon issuance a United States Treasury bill issued on or after March 1, 1941, and holds it until maturity, the entire amount of the discount at which the bill was originally sold accrues on the date of maturity; and if such a taxpayer holds a United States Treasury bill issued on or after March 1, 1941, for a period less than its life, the portion of the original discount attributable to such period accrues only on the date on which he sells or otherwise disposes of the bill or receives payment at maturity. The original discount or the portion of such discount, as the case may be, is includible only in the gross income for the taxable year in which the taxpayer sells or otherwise disposes of the bill or receives payment at maturity. For examples illustrating rules for computation of income from sale or other disposition of obligations of the type described in this section, see § 19.117–1.

PAR. 34. There is inserted immediately preceding § 19.51–1 the following:

SEC. 112. RETURNS OF INCOME TAX. (Revenue Act of 1941, Title I.)

(2) Every individual who is married and living with husband or wife, if no joint return is made under subsection (b) and if—

(A) Such individual has for the taxable year a gross income of $1,500 or over, and the other spouse has no gross income; or

(B) Such individual and his spouse each has for the taxable year a gross income and the aggregate gross income is $1,500 or over.

PAR. 36. Section 19.51–2, as amended by Treasury Decision 5011, is further amended as follows:

(A) By inserting immediately after the heading the following:

(B) By striking out the first two sentences of the section before its amendment by (A) and inserting in lieu thereof the following paragraph:

For taxable years beginning before January 1, 1941, the return shall be on Form 1040 except that it shall be on short Form 1040A if (1) the net income does not exceed $5,000, or for taxable years beginning in 1940, if the gross income does not exceed $5,000, and is derived from interest, dividends, annuities, income from fiduciaries, and salaries, wages, commissions, bonuses, and other compensation for personal services, and (2) the taxpayer does not own a business or practice a profession on his own account and renders a return on the cash receipts and disbursements basis for the calendar year. The return shall be made on Form 1040 in all cases in which the taxpayer claims any deductions for losses from the renting of, or sale or exchange of, property.

PAR. 47. There is inserted immediately preceding § 19.117–1 the following:

SEC. 115. SHORT-TERM OBLIGATIONS ISSUED ON A DISCOUNT BASIS. (Revenue Act of 1941.)

* * * * *

(b) *Capital gain rule not applicable.* Section 117 (a) (1) of the Internal Revenue Code (relating to definition of capital assets) is amended by striking out the semicolon at the end thereof and inserting in lieu thereof the following: ", or an obligation of the United States or any of its possessions, or of a State or Territory, or any political subdivision thereof, or of the District of Columbia, issued on or after March 1, 1941, on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue;".

(c) *Effective date of amendments.* The amendments made by this section shall be applicable with respect to taxable years ending after February 28, 1941.

PAR. 48. Section 19.117–1 is amended by inserting after the second paragraph thereof the following paragraph:

Obligations of the United States or any of its possessions, or of a State or Territory, or any political subdivision thereof, or of the District of Columbia, issued on or after March 1, 1941, on a discount basis and payable without interest at a fixed maturity date not exceeding one year from the date of issue, are excluded from the term "capital assets". An obligation may be issued on a discount basis even though the price paid exceeds the face amount. Thus, although the Second Liberty Bond Act provides that United States Treasury bills shall be issued on a discount basis, the issuing price paid for a particular bill may, by reason of competitive bidding, actually exceed the face amount of the bill. Since the obligations of the type described in this section are excluded from the term "capital assets", gains or losses from the sale or exchange of such obligations are not subject to the percentage provisions of section 117 (b) and losses from such transactions are not subject to the limitation on losses provided in section 117 (d). It is, therefore, not necessary for a taxpayer, other than a life insurance company subject to taxation only on interest, dividends, and rents, to segregate the original discount accrued (see § 19.42–7) and the gain or loss realized upon the sale or other disposition of any such obligation.

Example (1). A (not a life insurance company) buys a $100,000 ninety-day Treasury bill upon issuance for $99,998. As of the close of the 45th day of the life of such bill, he sells it to B (not a life insurance company) for $99,999.50. The entire net gain to A of $1.50 may be taken into account as a single item of income, without allocating $1 to interest and $0.50 to gain. If B holds the bill until maturity his net gain of $0.50 may similarly be taken into account as a single item of income, without allocating $1 to interest and $0.50 to loss.

Example (2). The facts in this example are the same as in example (1) except that the selling price to B is $99,998.50. The net gain to A of $0.50 may be taken into account without allocating $1 to interest and $0.50 to loss, and, similarly, if B holds the bill until maturity his entire net gain of $1.50 may be taken into account as a single item of income, without allocating $1 to interest and $0.50 to gain.

PAR. 49. Section 19.122–4, as amended by Treasury Decision 5057, is further amended as follows:

(A) By striking out the fifth paragraph in the second example in subsection (b), and inserting in lieu thereof the following:

PAR. 77. Section 19.261–1 is amended by inserting at the end of the second paragraph the following:

For a taxable year beginning after December 31, 1940, a China Trade Act corporation is liable to the surtax imposed by section 15 as amended by section 104 of the Revenue Act of 1941. PAR. 78. There is inserted immediately preceding § 19.262–1 the following:

SEC. 104. SURTAX ON CORPORATIONS AND TERMINATION OF DEFENSE TAX. (Revenue Act of 1941, Title I.)

* * * * *

(f) *Surtax on China Trade Act Corporations.*

(2) *Credit of China Trade Act Corporations.* Section 262 (a) of the Internal Revenue Code (relating to credit against net income of China Trade Act corporations) is amended by striking out "sections 13, 14, and 600" and inserting in lieu thereof "sections 13, 14, 15, and 600"; and by striking out "section 13 or 14" wherever occurring therein and inserting in lieu thereof "section 13, 14, or 15".

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 79. Section 19.262–2, as amended by Treasury Decision 5011, is further amended as follows:

(A) By striking out the latter part of the first sentence of the first paragraph beginning with "and (2)" and inserting in lieu thereof the following:

(2) for the taxable year 1940, by section 13 or 14, as amended, and by section 600, and (3) for the taxable year 1941 and subsequent years, by section 13 or 14, as amended, by section 15, as amended, and by section 600.

(B) By striking out the third and fourth sentences of the first paragraph and inserting in lieu thereof the following:

The decrease in the tax imposed for 1939 by section 14 (d), prior to its amendment, for 1940 by section 13 or 14, as amended, or for 1941 and subsequent years by section 13 or 14, as amended, and by section 15, as amended, by reason of such credit must not, however, exceed the amount of the special dividend referred to in section 262 (b), and is not allowable unless the special dividend has been certified to the Commissioner by the Secretary of Commerce. The decrease in the tax imposed by section 600 by reason of such credit must not exceed the amount by which such special dividend exceeds the decrease permitted by section 262 in the tax imposed for 1939 by section 14 (d), prior to its amendment, for 1940 by section 13 or 14, as amended, and for 1941 and subsequent years by section 13 or 14, as amended, and section 15, as amended.

(C) By striking out example (2) and inserting in lieu thereof the following:

Example (2). Assume that for the calendar year 1941 the adjusted declared value of the capital stock is the same as for 1939 and that the other facts are the same as in example 1), except that a special dividend of $66,000 is distributed on February 15, 1942. Since, under section 13, as amended, the rate of income tax for 1941 is 24 percent, and, under section 15, as amended, the rate of surtax is 6 percent on the first $25,000 of corporation surtax net income and 7 percent on the remainder, the total income tax for such year consists of a normal income tax of $48,000 plus a surtax of $13,750, or $61,750. Since the special dividend ($66,000) exceeds the diminution of the income tax ($61,750) on account of the allowance of the special credit against net income, the entire amount of special credit is allowable and the corporation has no income tax liability for 1941. Since the special dividend exceeds the amount of the income tax by the sum of $4,250, which sum exceeds the amount of the diminution of the declared value excess-profits tax (6$\frac{6}{10}$ percent of $50,000, or $3,300) on account of the allowance of the special credit against net income, the entire amount of the special credit ($200,000) is allowable for declared value excess-profits tax purposes for 1941 and hence the corporation has no declared value excess-profits tax liability for that year.

PAR. 80. There is inserted immediately preceding § 19.362–1 the following:

SEC. 103. CORPORATION DEFENSE TAX RATES INCORPORATED IN RATE SCHEDULES. (Revenue Act of 1941, Title I.)

* * * * *

(e) *Mutual investment companies.* Section 362 (b) of the Internal Revenue Code (relating to tax on mutual investment companies) is amended by striking out "22$\frac{1}{10}$ per centum" and inserting "24 per centum".

SEC 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 81. Section 19.362–1, as amended by Treasury Decision 5038, is further amended by striking out the first two sentences and by inserting in lieu the following:

If a corporation, as defined in section 3797 (a) (3), shows to the satisfaction of the Commissioner that it is entitled to the status of a mutual investment company, as defined in section 361, it is taxable upon its Supplement Q net income, as defined in section 362 (a), (1) at the rate of 16½ percent for any taxable year beginning after December 31, 1938, and before January 1, 1940, (2) at the rate of 22$\frac{1}{10}$ percent for any taxable year beginning after December 31, 1939, and before January 1, 1941, and (3) at the rate of 24 percent for any taxable year beginning after December 31, 1940. (For the defense tax imposed for taxable years beginning after December 31, 1939, and before January 1, 1941, see § 19.15–1.)

PAR. 82. There is inserted immediately after § 19.362–1 the following:

SEC. 104. SURTAX ON CORPORATIONS AND TERMINATION OF DEFENSE TAX. (Revenue Act of 1941, Title I.)

* * * * *

(b) *Surtax on mutual investment companies.* Supplement Q of the Internal Revenue Code (relating to mutual investment companies) is amended by inserting at the end thereof a new section to read as follows:

"SEC. 363. SURTAX ON MUTUAL INVESTMENT COMPANIES.

"(a) *Supplement Q surtax net income.* For the purposes of this chapter the term 'Supplement Q surtax net income' means the net income, computed without the net operating loss deduction provided in section 23 (s), minus the dividends paid during the taxable year increased by the consent dividends credit provided in section 28. For the purposes of this subsection the amount of dividends paid shall be computed in the same manner as provided in subsections (d), (e), (f), (g), (h), and (i) of section 27 for the purpose of the basic surtax credit provided in section 27.

"(b) *Imposition of tax.* There shall be levied, collected, and paid for each taxable year upon the Supplement Q surtax net income of every mutual investment company a surtax as follows:

"Upon Supplement Q surtax net incomes not in excess of $25,000, 6 per centum of the amount thereof;

"Upon Supplement Q surtax net incomes in excess of $25,000, $1,500, plus 7 per centum of the excess over $25,000."

* * * * *

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

§ 19.363–1 *Surtax on mutual investment companies.* For taxable years beginning after December 31, 1940, section 363 imposes a surtax upon the Supplement Q surtax net income of every corporation taxable as a mutual investment company. A mutual investment company's Supplement Q surtax net income is its net income (computed without the net operating loss deduction provided in section 23 (s)), less the amount of dividends paid during the taxable year increased by the consent dividends credit provided in section 28. For the purpose of computing a mutual investment company's Supplement Q surtax net income, the amount of dividends paid during the taxable year is determined in the same manner as provided in section 27 (d), (e), (f), (g), (h), and (i) for the purpose of the basic surtax credit provided in section 27.

PAR. 83. There is inserted immediately preceding § 19.373–1 the following:

SEC. 117. EXTENSION OF TIME OF ORDERS OF SECURITIES AND EXCHANGE COMMISSION. (Revenue Act of 1941.)

(a) *Extension.* Section 373 (a) of the Internal Revenue Code (relating to the definition of orders of the Securities and Exchange Commission with respect to which Supplement R applies) is amended to read as follows:

(a) The term "order of the Securities and Exchange Commission" means an order (1) issued after May 28, 1938, and prior to January 1, 1943, by the Securities and Exchange Commission to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935 (49 Stat. 820; U.S.C., Supp. V, title 15, section 79k (b)), or (2) issued by the Commission subsequent to December 31, 1942, in which it is expressly stated that an order of the character specified in clause (1) is amended or supplemented, and (3) which has become final in accordance with law.

(b) *Effective date of amendment.* The amendment made by this section shall be applicable only with respect to taxable years beginning after December 31, 1939.

PAR. 84. There is inserted immediately preceding § 19.500–1 the following:

(a) *Personal holding companies.* Section 500 of the Internal Revenue Code (relating to tax on personal holding companies) is amended as follows:

(1) By striking out the heading "(a) General Rule.—";

(2) By amending the rate schedule to read as follows:

"(1) 71½ per centum of the amount thereof not in excess of $2,000; plus

"(2) 82½ per centum of the amount thereof in excess of $2,000."; and

(3) By repealing subsection (b) (relating to defense tax for five years).

* * * * *

SEC. 118. TAXABLE YEARS TO WHICH AMENDMENTS APPLICABLE. (Revenue Act of 1941, Title I.)

The amendments made by this title (except sections 107, 115, 116, and 117) shall be applicable only with respect to taxable years beginning after December 31, 1940.

PAR. 85. Section 19.500–1, as amended by Treasury Decision 5011, is further amended by striking out the last sentence of the first paragraph and by inserting in lieu thereof the following:

For taxable years beginning before January 1, 1941, the surtax imposed by section 500 is 65 percent of the amount of the undistributed subchapter A net income not in excess of $2,000, and 75 percent of the amount of the undistributed subchapter A net income in excess of $2,000, except that for such a taxable year beginning after December 31, 1939, such surtax is increased 10 percent on account of the defense tax. For taxable years beginning after December 31, 1940, the rate of tax is 71½ percent of the undistributed subchapter A net income not in excess of $2,000, and 82½ percent of the undistributed subchapter A net income in excess of $2,000.

PAR. 86. Section 19.3801 (b)–0 is amended by striking out "and D" in the last paragraph and by inserting in lieu thereof "D, and E".

SUBCHAPTER C—MISCELLANEOUS EXCISE TAXES

[T. D. 5085]

PART 183—PRODUCTION OF DISTILLED SPIRITS

By virtue of and pursuant to section 3176 of the Internal Revenue Code, Regulations 4, "Production of Distilled Spirits," (1940),[1] is hereby amended by inserting a new section in Articles VIII and XXX, designated § 183.47a and § 183.377a, respectively, and amending §§ 183.155 (a) (4), 183.214, 183.362, 183.376, 183.378, 183.381, and 183.383, to read as follows:

ARTICLE VIII—*Equipment*

§ 183.47a *Unfinished spirits tanks.* Whenever a distillery established or operated under the regulations in this part is to be operated alternately as such and as an industrial alcohol plant or fruit distillery in accordance with §§ 183.153–183.157, and the distiller desires to retain unfinished spirits where the change in type of plant is to be temporary only, he must provide for the purpose one or more tanks, each of which must be constructed and equipped in accordance with the provisions of § 183.46 and have painted thereon the words "Unfinished Spirits Tank," followed by its serial number and capacity in wine gallons. The tanks must be so arranged that the unfinished spirits to be collected therein will pass from the still into the tank through continuous and securely closed, fixed pipes and vessels. The pipe lines connecting the tanks with stills or other apparatus must be constructed in accordance with § 183.54. Valves must be provided in the pipe lines and so arranged as to control completely the flow of unfinished spirits both into and out of each tank. The construction of the valves must be such that they can be secured with Government locks. (Secs. 2823, 2829, 3176, I.R.C.)

ARTICLE XV—*Requirements Governing Alternate Operations as Fruit Distillery or Industrial Alcohol Plant*

§183.155 *Where no bonded warehouse on premises—(a) Suspension.*

* * * * *

(4) *Materials, heads and tails, and unfinished spirits.* If distilling materials are transferred to the successor or if heads and tails or unfinished spirits are to be retained on the premises pending the resumption of operations as a registered distillery, comply with the requirements of §§ 183.375–183.384.

* * * * *

[1] 5 F.R. 827

ARTICLE XX—*Manufacture of Distilled Spirits*

§ 183.214 *Gauging of unfinished spirits.* At distilleries where spirits, in the course of distillation, are run from the beer still into tanks in the distillery building for temporary deposit preparatory to completing the distillation thereof, storekeeper-gaugers shall promptly gauge (measure and proof) the unfinished spirits in such tanks and make proper entry on Form 1592. Except as provided in §§ 183.375–183.384, unfinished spirits may not be stored in such tanks but may be deposited therein only temporarily in the course of distillation. Distillates containing one-half of 1 percent or more of aldehydes or 1 percent or more of fusel oil, collected in locked tanks for removal for denaturation or destruction, as provided in §§ 183.225–183.255, will be carried on Form 1592 as unfinished spirits until gauged and destroyed or removed for denaturation. (Sec. 3176, I.R.C.)

ARTICLE XXVII—*Suspension and Resumption of Operations*

§ 183.362 *Date of suspension.* The distiller will fix in the notice the time when all the beer on the distillery premises will be distilled and all spirits in the distillery run into the receiving cisterns in the cistern room, except unfinished spirits or distillates containing one-half of 1 percent or more of aldehydes or 1 percent or more of fusel oil which are to be retained on the premises during a temporary change in the type of distillery, as provided in §§ 183.375–183.384. (Secs. 2850, 3176, I.R.C.)

ARTICLE XXX—*Alternate Operation as Industrial Alcohol Plant or Fruit Distillery*

§ 183.376 *Completion of operation required.* When a registered distillery is to be operated as an industrial alcohol plant or as a fruit distillery, the business of producing spirits, except as hereinafter provided, must be completely finished by the person or persons first carrying on the business, and the distillery duly suspended before it can be operated as an industrial alcohol plant or a fruit distillery. Except as provided in §§ 183.377 and 183.377a, all unfinished spirits, including high wines and low wines, and distillates containing one-half of 1 percent or more of aldehydes or 1 percent or more of fusel oil collected in accordance with the provisions of §§ 183.225–183.255, must be redistilled and run into the cistern room and warehoused by the outgoing distiller. Except as provided in the following sections, all such distillates or unfinished spirits must be disposed of before the distillery can be operated as an industrial alcohol plant or fruit distillery. (Secs. 2850, 3176, I.R.C.)

§ 183.377a *Retention of unfinished spirits.* Where the change in type of plant is to be temporary only, the outgoing distiller may retain unfinished spirits under Government lock in unfinished spirits tanks provided in accordance with § 183.47a in the distillery until the plant is again operated by him as a registered distillery under these regulations: *Provided*, That such distiller furnishes a duly executed consent of surety, Form 1533, in triplicate, continuing liability on the distiller's bond, Form 30, for the tax on such unfinished spirits retained on the premises, notwithstanding the change in the type of plant. (Sec. 3176, I.R.C.)

§ 183.378 *Transfer of materials, etc.* The outgoing distiller may transfer to his successor materials on hand, including mash and beer in process, at the time the change in type of plant takes place, but no spirits may be so transferred, except the residue of spirits in the stills which it is not practicable to completely boil out: *Provided*, That materials not usable and residue of spirits in stills not producible under the law at the succeeding type of plant may not be transferred to the successor. Where such materials and residue of spirits are not transferable, all mash and beer must be distilled, all basic materials must be removed from the premises, and the stills and other vessels must be completely cleared of spirits, and such spirits, if other than distillates or unfinished spirits intended for retention in accordance with the provisions of §§ 183.377 and 183.377a, removed to the receiving cisterns in accordance with law before the change in type of plant becomes effective. When it is again desired to resume operations as a distiller under the regulations in this part the business of producing alcohol or brandy, as the case may be, must be similarly finished and the industrial alcohol plant or fruit distillery suspended in accordance with governing regulations. (Sec. 3176, I.R.C.)

§ 183.381 *Completion of records.* The outgoing distiller will complete his record, Form 1598, and the storekeeper-gauger his record, Form 1592, as to the removal of basic materials from the premises, or the transfer of basic materials and mash and beer in process to the successor, as the case may be, and as to production and removal from the cistern room of all spirits produced by the outgoing distiller. The actual date of the entry of the deposit of the finished spirits in the cistern room and the actual date the spirits are removed from the cistern room will be given in the respective columns of both forms. If distillates collected in accordance with §§ 183.225–183.255, or unfinished spirits are retained on the premises in locked tanks as provided in §§ 183.377 and 183.377a, a notation will be made on Form 1598 under "Special Operations or Conditions," showing that such distillates or unfinished spirits are temporarily retained on the premises pending resumption of operations as a registered distillery. The storekeeper-gauger will make a similar notation on his Form 1592 for such distiller. The distiller and storekeeper-gauger will continue to file monthly reports on Forms 1598 and 1592, respectively, during the period such distillates or unfinished spirits are retained on the distillery premises. Where the plant is operated as a registered distillery in two or more periods during the same month by the same proprietor, the operations of such proprietor will be recorded on the same Form 1598 and the same Form 1592, but appropriate notations will be made on the separating lines on each form to show the dates the distillery was operated as a fruit distillery or an industrial alcohol plant and the names under which it was so operated. (Secs. 2841 (a), 3176, I.R.C.)

§ 183.383 *Disposition of spirits.* Where a change in the type of plant takes place, the storekeeper-gauger in charge of the distillery will see that all distillates collected in accordance with §§ 183.225–183.255 are disposed of, and that all other unfinished spirits, except the residue of spirits in stills where the same is to be transferred to the successor as provided in § 183.378, are distilled and transferred to the cistern room, unless retained in locked tanks in accordance with §§ 183.377 and 183.377a, respectively, before the plant is operated as another type of distillery. Upon disposition or retention in locked tanks of such distillates or unfinished spirits, and transfer of all other spirits to the cistern room, the distillery may be operated as another type of plant, but all spirits transferred to the cistern room must be branded and removed in accordance with law by the outgoing distiller in the name under which they were produced, before any spirits are deposited in the cistern room or withdrawn from the distillery by the successor, and in any event within three days of their deposit in the cistern room. (Sec. 3176, I.R.C.)

CHAPTER XI—OFFICE OF PRICE ADMINISTRATION

PART 1309—COPPER AND COPPER ALLOYS

PRICE SCHEDULE NO. 20—COPPER SCRAP[1]

The Office of Price Administration is charged with the maintenance of price stability and the prevention of undue price rises and price dislocation. Copper scrap is a basic material for the production of electrolytic copper, copper ingot and copper alloy ingot, all of which are important in the manufacture of many defense products. Requirements of the defense program have increased the demand for copper scrap causing its price to rise above levels which are in proper relation to the price level of primary materials. Price instability and dislocations injurious to the national defense and civilian economy have resulted. As a consequence, it has become difficult and in some cases impossible for the trade to cooperate with the Government in preventing inflationary price movements. On the basis of information secured by independent investigation by this Office, and after consultation with the trade, I find that the maximum prices set forth below constitute reasonable limitations on the price of copper scrap.

Therefore, under the authority vested in me by Executive Order 8734, it is hereby directed that §§ 1309.61 to 1309.70, inclusive, are hereby amended to read as follows:

§ 1309.61. *Maximum prices for copper scrap.* On and after October 17, 1941, regardless of the terms of any contract of sale or purchase or other commitment, except as provided in §§ 1309.64 and 1309.69 hereof, no person shall sell, offer to sell, deliver, or transfer copper scrap, and no person shall buy, offer to buy, or accept delivery of copper scrap at prices higher than the maximum prices set forth in Appendix A hereof incorporated herein as §1309.70.*

* §§ 1309.61 to 1309.70, inclusive, issued pursuant to the authority contained in Executive Orders No. 8734, 8875, 6 F.R. 1917, 4483.

§1309.62 *Less than maximum prices.* Lower prices than those set forth in Appendix A may be charged, demanded, paid or offered.*

§ 1309.63 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery or transfer of copper scrap, alone or in conjunction with any other material, or by way of any commission, service, transportation or other charge or discount, premium, or other privilege, or by tying agreement or other trade understanding, or otherwise.*

§ 1309.64 *Permission to carry out contracts entered into prior to August 19, 1941.* Any person who, prior to August 19, 1941, has entered into a contract of sale or other firm commitment calling for the delivery or transfer after that date, of copper scrap at prices higher than the maximum prices established by this Schedule prior to October 17, 1941, may make application to the Office of Price Administration on forms which will be furnished upon request, for permission to carry out such contract or commitment at the contract price. Such permission will be granted only when necessary to protect the applicant against loss in the disposition of inventory acquired prior to August 19, 1941 at prices higher than the maximum prices heretofore established by this Schedule and held on that date by (a) the applicant, or (b) any other person for delivery to the applicant under a firm commitment entered into with the applicant prior to August 19, 1941. Such application shall be filed with the Office of Price Administration on or before October 19, 1941.*

§ 1309.65 *Records and reports.* Every person making purchases or sales of copper scrap after August 19, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year, complete and accurate records of (a) each such purchase or sale showing the date thereof, the name and address of the buyer or the seller, the price paid or received, and the quantity in pounds or tons of each kind or grade purchased or sold; and (b) the quantity in pounds or tons of copper scrap (1) on hand, and (2) on order, as of the close of each calendar month.

Persons affected by this Schedule shall submit such reports to the Office of Price Administration as it may, from time to time, require.*

§ 1309.66 *Enforcement.* In the event of refusal or failure to abide by the price limitations, record requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of Government, both state and federal, are fully exerted in order to protect the public interest and the interests of those persons who comply with this Schedule, (c) that full advantage will be taken of the cooperation of the various political subdivisions of state, county, and local governments by calling to the attention of the proper authorities, failures to comply with this Schedule which may be regarded as grounds for the revocation of licenses and permits; and (d) that the procurement services of the Government are requested to refrain from selling to or purchasing from those persons who fail to comply with this Schedule. Persons who have evidence of the offer, receipt, demand or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation, or manipulation of prices of copper scrap, or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

§ 1309.67 *Modification of the Schedule.* Persons complaining of hardship or inequity in the operation of this Schedule may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom.*

§ 1309.68 *Definitions.* When used in this Schedule, the term:

(a) "Person" means an individual, partnership, association, corporation, or other business entity.

(b) "Copper scrap" means the kinds and grades of scrap materials set forth in Appendix A of this Schedule.*

§ 1309.69 *Effective date of the schedule.* (a) This Schedule shall become effective on August 19, 1941.

(b) Contracts of sale or other firm commitments calling for the delivery or transfer of copper scrap entered into between August 19, 1941 and October 17, 1941 at prices in excess of the maximum prices established by the amendments to this Schedule effective October 17, 1941 may be completed at contract prices provided that (1) such prices are not in excess of the maximum prices established by this Schedule prior to October 17, 1941, (2) the copper scrap so delivered or transferred was on hand at the seller's plant or warehouse prior to October 17, 1941, and (3) provided further that a report as to the pertinent terms of all such contracts is furnished to this Office on Form 120:6 prior to November 1, 1941.*

§ 1309.70 *Appendix A; maximum prices.* For the purpose of this Schedule each grade of scrap listed below shall include all kinds and qualities of scrap falling within the broad catagory listed. However, the maximum prices herein set forth are applicable only to copper scrap which meets maximum standards for such grades generally accepted in the trade, as for instance the standards set forth in the Standard Classification for Old Metals, Circular O of the National Association of Waste Material Dealers, Inc., effective as of June 1, 1940. Scrap which fails to meet such standards shall be sold at a price less than the applicable maximum price. This Schedule does not include copper scrap which is a by-product of the fabrication of copper sheet, tube, rod or other brass mill products, the maximum prices for which are established by Price Schedule No. 12—Brass Mill Scrap.

(a) *Kind or grade of scrap.*

	Maximum prices per pound of material, f. o. b. point of shipment
No. 1 copper wire	10¢
No. 1 heavy copper	10¢
No. 2 copper wire (containing 96% copper)	9¢
Mixed heavy copper (containing 96% copper)	9¢
Light copper (containing 92% copper)	8¢

If the copper content of No. 2 copper wire or mixed heavy copper scrap is more or less than 96% or if the copper content of light copper scrap is more or less than 92%, the maximum price per pound of material set forth above shall be increased or decreased at the rate of 0.11775 cents for each 1% variation in the copper content with proportionate adjustments for variations of less than 1%.

Prices may be quoted or material invoiced on a delivered price basis. However, if prices are so quoted or material is so invoiced, and the total delivered price exceeds the maximum price fixed by this Schedule, (1) the delivery charge shall be shown as a separate item, (2) the price f. o. b. point of shipment (calculated by subtracting the delivery charge from the total delivered price) shall not exceed the maximum price set forth in this Schedule, and (3) the delivery charge shall not exceed the lowest commercial rate for the most nearly comparable service.

(b) *Premiums.* To the maximum prices set forth above either but not both of the following premiums may be added if the conditions set forth below are fulfilled:

(1) Premium for copper scrap in crucible shape—1¼¢ per pound.

Copper scrap in crucible shape shall include only:

(i) Briquetted No. 1 copper wire. A briquette shall include any compressed, self-adhering bundle whose measurements do not exceed 16 x 10 x 12 inches and which contains nothing but clean, untinned No. 1 copper wire of 16 B & S wire gauge or larger, free from burnt, brittle copper wire and from all foreign substances.

(ii) No. 1 heavy copper scrap, trolley wire, or other copper wire of 16 B & S wire gauge or larger which is (*a*) clean, free from tin, solder, brazing and all other foreign substances, (*b*) cut or bundled in lengths not exceeding 16 inches, and (*c*) in a shape suitable for charging into a crucible or electric furnace.

[1] 6 F.R. 4213.

(2) Premium on shipments of 40,000 pounds or more at one time—½¢ per pound. (This premium shall not apply to copper scrap in crucible shape.)

For the purposes of this premium a shipment of copper scrap may be made up of any kind or kinds of copper scrap listed in this Schedule. If delivery is made by truck, a shipment made "at one time" may include all deliveries made to the buyer within a period of 48 consecutive hours.

(c) *Special-purpose copper scrap.* Copper wire especially selected and prepaired for the use of producers of copper sulphate or of other chemicals, copper segments used by makers of copper powder, or any copper scrap prepared for the special use of steel mills, iron foundries, aluminum smelters or any other special user except producers of copper, brass or bronze castings may upon application to the Office of Price Administration be granted a special premium above the maximum prices fixed by this Schedule. This premium shall be granted only (1) if the specified material has normally commanded such a premium because of its special uniformity, purity, or preparation, (2) if the material is sold to the type of user for whom it has been especially prepared, and (3) if the sale to the specific user has been approved by the Office of Price Administration.*

These amendments shall become effective October 17, 1941.

Issued this 10 day of October, 1941.

LEON HENDERSON,
Administrator.

PART 6—ANCHORAGE REGULATIONS

REGULATIONS FOR THE CONTROL OF VESSELS IN THE TERRITORIAL WATERS OF THE UNITED STATES

Pursuant to the authority contained in section 1, Title II of the Espionage Act, approved June 15, 1917, 40 Stat. 220 (U.S.C. title 50, sec. 191), and by virtue of a Proclamation issued on the twenty-seventh day of June, 1940 (5 F.R. 2419), the Regulations relating to the control of vessels in the territorial waters of the United States (5 F.R. 2442), issued by the Secretary of the Treasury and approved by the President on June 27, 1940, are hereby amended as follows:

Section 4 is amended to read as follows:

§ 6.4 *Inspection and search.* (a) "The captain of the port or other officer designated by the Secretary of the Treasury pursuant to § 6.2 hereof is hereby authorized to cause to be inspected and searched at any time any vessel, foreign or domestic, or any person or package thereon, within the territorial waters of the United States, and to remove therefrom any or all persons not specially authorized by him to go or to remain on board thereof.

(b) Every person on board any vessel, foreign or domestic, within the territorial waters of the United States shall carry personal identification papers satisfactory to the captain of the port consisting of a card to which is affixed the photograph of the bearer and containing such identifying data as name, signature, fingerprint, date and place of birth, nationality, alien registration number (in the case of resident aliens), height, weight, color of hair and eyes, such card to be furnished by the captain of the port or the identification data shown thereon to be in a form acceptable to him. In lieu of such card, the captain of the port may, in his discretion, accept any other satisfactory means of identification, such as a continuous discharge book, or a certificate of identification issued under authority of section 4551 of the Revised Statutes, as amended (U.S.C. title 46, sec. 643), or a passport. The captain of the port is further authorized, in his discretion, to exempt any or all persons on board of any such vessel, or any or all persons on board any class of vessels, from the requirement of personal identification. He may also, upon notification to the owners, agents, masters, or operators thereof, exclude individual vessels from a class of vessels to which is granted a general exemption from the requirement of personal identification. For the purposes of this paragraph, the Commandant, with the approval of the Secretary of the Treasury, may classify vessels as provided in § 6.6 (d). The issuance of identification cards and the exercise of discretion by captains of ports with respect to the identification requirements contained in this paragraph shall be subject to the supervision of the Secretary of the Treasury, acting through the Commandant of the Coast Guard, and the Commandant may, subject to approval by the Secretary of the Treasury, issue such instructions to captains of the port as he may deem necessary to provide general uniformity.

Section 6, to be effective fifteen days after the date of publication in the FEDERAL REGISTER, is amended to read as follows:

§ 6.6 *Special authorization for licenses, etc.* (a) Except with respect to the departure of a vessel for which a departure permit is required by § 6.7 of the regulations in this part, no vessel shall depart from any port or place in the United States, or from any port or place subject to the jurisdiction of the United States, for a point outside the territorial waters of the United States unless the owner, agent, or master of such vessel shall first obtain from the captain of the port in whose jurisdiction the vessel is to depart a license authorizing such departure.

(b) Except with respect to the departure of a vessel for which a departure permit is required by § 6.7 of the regulations in this part, or for which a departure license is required by paragraph (a) of this section, no vessel shall move in territorial waters of the United States unless the owner, agent, or master of such vessel shall first obtain from the captain of the port in whose jurisdiction the vessel is to move a license authorizing such movement. The captain of the port may, in his discretion, issue one license covering the requirements of this paragraph and paragraph (a) of this section.

(c) Every application for license under the provisions of this section shall be filed with the captain of the port in duplicate and shall include a statement by the owner, agent, or master of such vessel describing the purpose for which the vessel is to be operated and its destination or the area in which it will operate. If the capain of the port finds that the granting of a license under the circumstances would not be inimical to the interests of national defense and of the safety and protection of vessels or the territorial waters, he shall approve the application by endorsing it accordingly and shall return to the owner, agent, or master one copy thereof so endorsed. An application when so approved shall constitute a license to depart or move for the purpose and to the destination or in the area specified in the application. Such license shall be carried on the vessel for which it is issued while the vessel is operated, shall be exhibited for inspection upon the request of any officer charged with the enforcement of the regulations in this part, and shall be valid for repeated departures or movements of the subject vessel for the same purpose and to the same destination or area until revoked by the issuing officer or until the expiration of the time limit, if any, fixed in the license. The captain of the port who issued the license, or any captain of the port in whose jurisdiction the vessel may be, may revoke a license by notice to the holder thereof if he shall find that (1) there has been any violation of the terms thereof, or (2) any person on board of the subject vessel has failed to comply with the identification requirements of § 6.4 (b) of the regulations in this part, or (3) further exercise of the li-

cense would be inimical to the interests of national defense or of the safety and protection of vessels or the territorial waters. The issuance and revocation of licenses by captains of the port shall be subject to the supervision of the Secretary of the Treasury, acting through the Commandant of the Coast Guard, and the Commandant may, subject to approval by the Secretary of the Treasury, issue such instructions to the captain of the port as he may deem necessary to provide general uniformity.

(d) The Commandant of the Coast Guard, with the approval of the Secretary of the Treasury, may issue a general license for any class or classes of vessels for which a departure or movement license is required by this section if he finds that the granting of such a general license would not be inimical to the interests of national defense and of the safety and protection of vessels or the territorial waters; he may exclude individual vessels from a general license at the time of issuance or subsequently upon notification to the owners, agents, masters, or operators thereof: *Provided*, That any vessel so excluded may nevertheless be granted a license under the provisions of paragraphs (a), (b) and (c) of this section; and he may revoke any general license if he finds that continuance of the license in force would be inimical to such interests. For the purposes of this section, the Commandant, with the approval of the Secretary of the Treasury, may classify vessels upon any reasonable basis, including, but not limited to, control, ownership, use, area of operation, type, length, beam, draft, or tonnage.

Section 7 is amended to read as follows:

§ 6.7 *Clearance required for departure.* No vessel shall depart from any port or place in the United States, or from any port or place subject to the jurisdiction of the United States, on a voyage for which clearance by a customs officer of the United States is required or for which no such clearance is required because the vessel is exempted from making entry by section 441 (4) of the Tariff Act of 1930, 46 Stat. 712, as amended (U.S.C., Sup. V, title 19, sec. 1441 (4)), unless the principal customs officer in charge of the port of departure shall have been authorized by the Secretary of the Treasury to permit departure.

PART 7—ANCHORAGE AND MOVEMENTS OF VESSELS AND THE LADING AND DISCHARGING OF EXPLOSIVE OR INFLAMMABLE MATERIAL, OR OTHER DANGEROUS CARGO

Pursuant to the authority contained in section 1, Title II of the Act of June 15, 1917, 40 Stat. 220 (U.S.C. title 50, sec. 191), and a Proclamation issued June 27, 1940, the Rules and Regulations Governing the Anchorage and Movements of Vessels and the Lading and Discharging of Explosives or Inflammable Material, or Other Dangerous Cargo, approved October 29, 1940 (5 F.R. 4401), are hereby amended by the addition of a new paragraph to the regulations for anchorages in general under the General Rules and Regulations which is designated § 7.5 (b) (13) (designation is to numbering as it will appear in Code of Federal Regulations, title 33, chapter I, part 7; the new paragraph is added following paragraph 11 of part I under subdivision A of the aforementioned regulations as they appear in 5 F.R. 4401 and paragraph 12 added by the amendment approved June 17, 1941, 6 F.R. 2992), and which shall read as follows:

§ 7.5 *General rules and regulations.*

* * * * *

(b) (13) Whenever the captain of the port finds that the mooring of any vessel to a wharf, dock, pier, or other water front structure would endanger such vessel, or any other vessel, or the harbor, or would be inimical to the maritime interests of the United States, or the national defense, by reason of conditions existing on or about such wharf, dock, pier, or other water front structure, including, but not limited to, inadequate guard service, insufficient lighting, fire hazards, inadequate fire protection, unsafe machinery, internal disturbance, or unsatisfactory operation, the captain of the port may prevent the mooring of any vessel to such wharf, dock, pier, or other water front structure until the unsatisfactory condition or conditions so found are corrected, and he may, in the case of a like finding after any vessel has been moored, compel the shifting of such vessel from any such wharf, dock, pier, or other water front structure.

DEPARTMENT OF THE INTERIOR.

Bituminous Coal Division.

[Docket No. B-15]

IN THE MATTER OF THE OAKLAND COAL COMPANY, REGISTERED DISTRIBUTOR, REGISTRATION NO. 6934, RESPONDENT

NOTICE OF AND ORDER FOR HEARING

(1) The Bituminous Coal Division finds it necessary, in the proper administration of the Bituminous Coal Act of 1937 (the "Act"), to determine

(a) whether or not the Oakland Coal Company, Registered Distributor, Registration No. 6934, the respondent in the above-entitled matter, whose address is Security Bank Building, Toledo, Ohio, has violated any provisions of the Act, the Code, the Marketing Rules and Regulations, Rules and Regulations for Registration of Distributors, and the Distributor's Agreement (the "Agreement"), dated June 20, 1939, executed by the respondent pursuant to Order of the National Bituminous Coal Commission dated March 24, 1939, in General Docket No. 12, which was adopted as an Order of the Bituminous Coal Division on July 1, 1939, or any orders or regulations of the Division; and

(b) whether or not the registration of said distributor should be revoked or suspended or other appropriate penalties should be imposed; and for said purposes gives notice that it has information to the effect that:

(2) The respondent, during the period October 1, 1940 to March 11, 1941, both dates inclusive, purchased approximately 3252 tons of various sizes of coal from code members and secured, accepted and retained distributor's discounts from the effective minimum prices of said coal. This coal was resold by the respondent to the Gallant Lumber and Coal Company, of Toledo, Ohio, a retailer.

(3) The respondent, during the period referred to in (2) hereof, (a) owned 32 percent of the outstanding shares of capital stock of said retailer, (b) had interlocking officers with said retailer, and (c) its officers were also shareholders of said retailer.

(4) In securing, accepting and retaining the distributor's discounts referred to in paragraph 2 hereof, the respondent was in violation of paragraph (d) of the Agreement, since said transactions were not purchases of coal for bona fide resale.

(5) In securing, accepting and retaining the distributor's discounts referred to in paragraph (2) hereof, the respondent was in violation of paragraph (g) of the Agreement, since said transactions were entered into between the distributor and his vendee primarily for the purpose of unjustly enriching the respondent and no service of value was rendered by the respondent to the code member vendors.

It is therefore ordered, That a hearing pursuant to § 304.14 of the Rules and Regulations for the Registration of Distributors, to determine whether the registration of said distributor should be revoked or suspended, or other appropriate penalties be imposed, be held on November 17, 1941, 10 a. m. at a hearing room of the Bituminous Coal Division at the Commodore Perry Hotel, Toledo, Ohio.

It is further ordered, That W. A. Cuff or any other officer or officers of the Bituminous Coal Division designated by the Director thereof for that purpose shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to conduct said hearing, to administer oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda or other records deemed relevant or material to the inquiry, to continue said hearing from time to time, and to such places as he may direct by announcement at said hearing or any adjourned hearing or by subsequent notice, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to said respondent and to all other parties herein and to all persons and entities having an interest in such proceeding.

Notice is hereby given that answer to charges contained herein must be filed with the Bituminous Coal Division at its Washington Office or with any one of the field offices of the Division, within twenty (20) days after date of service thereof on the respondent; and that any respondent failing to file an answer within such period, unless the Director or the presiding officer shall otherwise order, shall be deemed to have admitted said charges and to have consented to the entry of an appropriate order on the basis of the facts alleged.

All persons are hereby notified that the hearing in the above-entitled matter and orders entered therein may concern, in addition to the matters specifically alleged herein, other matters incidental and related thereto, whether raised by amendment, petition for intervention, or otherwise, and all persons are cautioned to be guided accordingly.

Dated: October 9, 1941.

1. The Bituminous Coal Division finds it necessary in the proper administration of the Bituminous Coal Act of 1937 (the "Act"), to determine

(a) whether or not The Clyde H. Hoyt Company, Registered Distributor, Registration No. 4566, the respondent in the above-entitled matter, whose address is Nicholas Building, Toledo, Ohio, has violated any provisions of the Act, the Code, the Marketing Rules and Regulations, Rules and Regulations for the Registration of Distributors and the Distributors' Agreement (the "Agreement") dated April 29, 1939, executed by respondent pursuant to Order of the National Bituminous Coal Commission dated March 24, 1939, in General Docket No. 12, which was adopted as an Order of the Bituminous Coal Division on July 1, 1939, or any orders or regulations of the Division; and

(b) whether or not the registration of said distributor should be revoked or suspended or other appropriate penalties should be imposed;

2. The respondent, during the period October 1, 1940 to March 20, 1941, both dates inclusive, purchased approximately 10,738 tons of various sizes of coal from code members and secured, accepted and retained distributor's discounts from the effective minimum prices of said coal. This coal was resold by the respondent to the Blue Line Fuel Company of Toledo, Ohio, a retailer.

3. The respondent, during the period referred to in paragraph 2 hereof (a) owned 50 percent of the outstanding shares of capital stock, (b) had interlocking officers with said retailer and

(c) its officers were also shareholders of said retailer.

4. In securing, accepting and retaining the distributor's discounts referred to in paragraph 2 hereof, the respondent was in violation of paragraph (d) of the Agreement, since said transactions were not purchases of coal for bona fide resale.

5. In accepting and retaining the distributor's discounts referred to in paragraph 2 hereof, the respondent violated paragraph (g) of the Agreement, since such transactions were entered into between the distributor and his vendee primarily for the purpose of unjustly enriching the respondent, and no service of value was rendered the code member vendors by the respondent.

It is therefore ordered, That a hearing pursuant to § 304.14 of the Rules and Regulations for the Registration of Distributors, to determine whether the registration of said distributor should be revoked or suspended, or other appropriate penalties be imposed, be held on November 22, 1941, at 10 a. m. at a hearing room of the Bituminous Coal Division at the Commodore Perry Hotel, Toledo, Ohio.

It is further ordered, That W. A. Cuff or any other officer or officers of the Bituminous Coal Division designated by the Director thereof for that purpose shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to conduct said hearing, to administer oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda or other records deemed relevant or material to the inquiry, to continue said hearing from time to time, and to such places as he may direct by announcement at said hearing or any adjourned hearing or by subsequent notice, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to said respondent and to all other parties herein and to all persons and entities having an interest in such proceeding.

All persons are hereby notified that the hearing in the above-entitled matter and orders entered therein may concern, in addition to the matters specifically alleged herein, other matters incidental and related thereto, whether raised by amendment, petition for intervention or otherwise, and all persons are cautioned to be guided accordingly.

(a) Whether or not the Elfgen Coal Co. (Bert F. 1. The Bituminous Coal Division finds it necessary, in the proper administration of the Bituminous Coal Act of 1937 (the "Act") to determine

(a) Whether or not C. E. Werner, Registered Distributor, Registration No. 9584, the respondent in the above-entitled matter, whose address is 3130 Dayton Building, Chattanooga, Tennessee, has violated any provisions of the Act, the Code, the Marketing Rules and Regulations, Rules and Regulations for Registration of Distributors, and the Distributor's Agreement (the "Agreement"), dated November 19, 1940, executed by the respondent, pursuant to Order of the Bituminous Coal Division dated June 19, 1940, in General Docket No. 12; and

S. Court House, Nashville, Tennessee.

Notice of such hearing is hereby given to said respondent and to all other parties herein and to all persons and entities having an interest in such proceeding.

Notice is hereby given that answer to the charges contained herein must be filed with the Bituminous Coal Division at its Washington Office or with any one of the field offices of the Division, within twenty (20) days after date of service thereof on the respondent; and that any respondent failing to file an answer within such period, unless the Director or the presiding officer shall otherwise order, shall be deemed to have admitted the said charges and to have consented to the entry of an appropriate order on the basis of the facts alleged.

All persons are hereby notified that the hearing in the above-entitled matter and orders entered therein may concern, in addition to the matters specifically alleged herein, other matters incidental and related thereto, whether raised by amendment, petition for intervention, or otherwise, and all persons are cautioned to be guided accordingly.

[Docket No. 1731-FD]

IN THE MATTER OF W. C. THOMAS AND L. PAYNE, DEFENDANTS

ORDER CANCELING AND REVOKING CODE MEMBERSHIP

A complaint dated May 17, 1941, pursuant to the provisions of sections 4 II (j) and 5 (b) of the Bituminous Coal Act of 1937 (the "Act"), having been duly filed on May 17, 1941, by the Bituminous Coal Producers Board for District No. 8, a District Board complainant with the Bituminous Coal Division (the Division) alleging that the defendants, W. C. Thomas and L. Payne, code members doing business as Thomas and Payne, a partnership, wilfully violated the provisions of the Bituminous Coal Code and the effective minimum prices established thereunder by selling bituminous coal produced by the defendants at their mine, known as the Thomas & Payne Mine, designated as Mine Index No. 2368, located at or near Banner, Virginia, at prices below the effective minimum prices therefor, as more specifically set forth in said complaint; and

The defendants by stipulation made August 23, 1941, a true copy of which is annexed hereto, having admitted the allegations of the complaint and the facts set out in the stipulation, and having consented to the making and entry of this order; and

The defendants having agreed that upon the entry of this order, they will immediately pay to the United States Government the amount of the tax, namely $7.18, stipulated by them to be the amount required to be paid by section 5 (c) of the Act as a condition to

reinstatement of their membership in the code, and that they will make such application as will be necessary for their reinstatement as code members.

It is hereby found that the defendants, a partnership consisting of W. C. Thomas and L. Payne, filed with the National Bituminous Coal Commission (the Commission) on June 1, 1938, their acceptance, dated May 31, 1938, of the code and that said acceptance was approved by the Commission to take effect as of June 1, 1938, and that the defendants have been, since the last mentioned date, and are now code members in District No. 8.

It is hereby further found that the defendants wilfully violated the provisions of the code and the effective minimum prices established thereunder as alleged in the complaint herein by selling, offering for sale, and delivering bituminous coal produced by the defendants at their mine known as the Thomas & Payne Mine, designated of Mine Index No. 2368, located at or near Banner, Virginia, in District No. 8, in the following manner and to the following extent:

A. That the defendants sold, offered for sale, and delivered, on February 11, 1941, 12,435 pounds of nut and slack coal to one, J. W. Greene, at the price of approximately $1.00 per net ton f. o. b. the mine, whereas the effective minimum price for said coal was $1.55 per net ton f. o. b. the mine.

B. That the defendants sold, offered for sale, and delivered, on February 12, 1941, 11,950 pounds of nut and slack coal to one, J. W. Green, at the price of approximately $1.04 per net ton f. o. b. the mine, whereas the effective minimum price for such coal was $1.55 per net ton f. o. b. the mine.

It is hereby further found that the amount of the tax, established by sections 5 (b) and (c) of the Act, required to be paid by the defendants as a condition to reinstatement of their membership in the Code, is $7.18, which amount is 39% of the effective minimum price of $18.44 for said coal.

Now, therefore, based upon the above findings and upon the defendants' stipulation and agreement that they will immediately upon the entry of this order pay to the United States Government the amount of the tax, namely, $7.18, found to be the amount required to be paid by the defendants pursuant to sections 5 (b) and (c) of the Act as a condition to reinstatement of their membership in the Code;

It is ordered, That the membership of the above-named defendants in the Code be and the same is hereby cancelled and revoked, said cancellation and revocation to become effective ten (10) days after service of copy of this order upon the defendants.

Dated: October 9, 1941.

[Docket No. AO 160]

NOTICE OF HEARING WITH RESPECT TO A PROPOSED MARKETING AGREEMENT AND A PROPOSED ORDER REGULATING THE HANDLING OF MILK IN THE PHILADELPHIA, PENNSYLVANIA, MARKETING AREA

Notice is hereby given of a hearing to be held in the Roof Garden, Adelphia Hotel, Philadelphia, Pennsylvania, beginning at 10:00 a. m., e. s. t., October 23, 1941, on a proposed marketing agreement and order prepared and proposed by the Interstate Milk Producers Cooperative, Inc., and designed to regulate such handling of milk in the city and county of Philadelphia; in the county of Delaware; in the townships of Westtown, Thornbury, West Goshen, East Goshen, Willistown, and Easttown in Chester County; in the townships of Upper Merion, Lower Merion, Radnor, Haverford, Whitemarsh, Plymouth, Springfield, Abington, Moreland, Upper Dublin, Horsham, Gwynedd, Montgomery, Whitpain, Worcester, Norristown, Lower Providence, Upper Providence, Limerick, Towanencin, Lower Salford, Upper Salford, Hatfield, and Franconia in Montgomery County; and in the townships of Warminster, Southampton, Northampton, Bensalem, Bristol, Falls, Middletown, Newtown, and Lower Makefield in Bucks County, all in the Commonwealth of Pennsylvania (which area is hereinafter referred to as the "Philadelphia, Pennsylvania, marketing area") as is in

the current of interstate commerce, or which directly burdens, obstructs, or affects interstate commerce.

This notice is given pursuant to the provisions of Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, and of the General Regulations, Series A, No. 1, as amended, of the Agricultural Adjustment Administration, United States Department of Agriculture.

This public hearing is for the purpose of receiving evidence (1) as to whether marketing conditions for such handling of milk in the Philadelphia, Pennsylvania, marketing area as is in the current of interstate commerce or which directly burdens, obstructs, or affects interstate commerce are such as to necessitate regulation, jointly with the Commonwealth of Pennsylvania or otherwise, of the handling of such milk in order that the declared policy of the act may be effectuated, and (2) as to the specific provisions which a marketing agreement and order should contain.

The proposed marketing agreement and order provide in detail for: (a) delineating the scope of the regulation by means of defining the terms "marketing area", "producer", and "handler"; (b) selection of a market administrator; (c) classification of milk; (d) minimum prices; (e) reports of handlers; (f) payments to producers through the use of individual handler pools; (g) expenses of administration, and (h) other formal provisions usually included in marketing agreements and orders.

It is hereby determined that an emergency exists in the Philadelphia, Pennsylvania, marketing area which requires a shorter period of notice than fifteen (15) days, and it is hereby determined that the period of notice given is reasonable under the circumstances.

Copies of the proposed marketing agreement and order may be obtained from the Hearing Clerk, Office of the Solicitor, United States Department of Agriculture, Washington, D. C., in Room 0310 South Building, or may be there inspected.

Dated: October 10, 1941.

DEPARTMENT OF LABOR.

Wage and Hour Division.

NOTICE OF OPPORTUNITY TO PETITION FOR REVIEW OF THE DETERMINATION IN THE MATTER OF THE APPLICATION FOR THE EXEMPTION OF THE FLAT WAREHOUSING OF GRAIN AND THE STORAGE OF OTHER AGRICULTURAL COMMODITIES FROM THE MAXIMUM HOURS PROVISIONS OF THE FAIR LABOR STANDARDS ACT OF 1938 AS AN INDUSTRY OF A SEASONAL NATURE

Whereas the California Warehousemen's Association filed an application, dated August 12, 1940, for the exemption of the flat warehousing of grain and the storage of other agricultural commodities as an industry of a seasonal nature, pursuant to section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder; and

Whereas at the time that the said application was filed there was pending before the Wage and Hour Division the application of the National Grain Trade Council and sundry other parties for the exemption of the receiving of grain, soy beans, flaxseed, and buckwheat into grain elevators as industries of a seasonal nature, pursuant to section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder; and

Whereas the said application of the California Warehousemen's Association was made part of the record of, and was considered in connection with, the hearing held in Chicago, Illinois, on December 9, 1940, before Mr. Burton D. Seeley, Presiding Officer, in the matter of the said application of the National Grain Trade Council and sundry other parties; and

Whereas in his findings and determination in regard to the exemption of the receiving of grain, soy beans, flaxseed, and buckwheat into grain elevators from the maximum hours provisions of the Fair Labor Standards Act of 1938 as industries of a seasonal nature, signed April 11, 1941, the said Burton D. Seeley found that there was insufficient evidence in the record upon which to base a determination with respect to the exemption of the flat warehousing of grain in sacks; and

Whereas upon receiving a petition from the said California Warehousemen's Association for a rehearing, the Administrator of the Wage and Hour Division remanded the matter of the flat warehousing of grain in California and in other western states to the Director of the Hearings Branch of the Wage and Hour Division for the purpose of holding such rehearing; and

Whereas the Administrator gave notice of a public hearing to be held at the Humboldt Bank Building, San Francisco, California, on June 2, 1941, before Mr. Harold Stein, an authorized representative of the Administrator, who was authorized to take testimony, hear argument, and determine:

Whether the flat warehousing of grain and the storage of other agricultural commodities in California and other western states is a branch or branches of an industry and of a seasonal nature within the meaning of section 7 (b) (3) of the Act and Part 526, as amended, of the regulations issued thereunder, and if so, the appropriate limits of said branch or branches of the industry.

Whereas following such hearing, the said Harold Stein duly made his findings of fact and determined as follows:

1. A large proportion of the grain stored in the States of Washington, Oregon, Idaho, and California, including rough or "paddy" rice in California, is stored in sacks in "flat" warehouses.

2. The flat warehousing of grain is distinguishable from the storing of grain in bulk by its geographical concentration and by differences in physical facilities and operating techniques and may be considered as a separable branch of the grain storing industry.

3. Such flat warehouses receive for storing 50 percent or more of their annual volume of grain in a period or periods aggregating 14 workweeks.

4. The flat warehousing of grain including rice in the States of California, Washington, Oregon, and Idaho is of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act and of Part 526 of the regulations issued thereunder.

Whereas said findings and determination were duly filed with the Administrator on September 23, 1941, and are now on file in Room 5418, Department of Labor Building, Washington, D. C., and are available for examination by all interested parties.

Now, therefore, pursuant to the provisions of § 526.7 of the aforesaid regulations, notice is hereby given that any person aggrieved by the said determination may, within fifteen days after the date that this notice appears in the FEDERAL REGISTER, file a petition with the Administrator requesting that he review the action of the said representative upon the record of hearing held before the said representative.

Signed at Washington, D. C., this 6th day of October 1941.

Administrator.

to be in force and effect until rescinded, amended, or superseded by regulations hereafter made by the Secretary of Agriculture under said Act.

Section 329 (b) of said Act provides that:

> The acreage allotment to the county for corn shall be apportioned by the Secretary of Agriculture, through the local committees, among the farms within the county on the basis of tillable acreage crop-rotation practices, type of soil, and topography.

Section 301 (b) (13) (E) of said Act provides that:

> "Normal yield" for any farm, in the case of corn * * * shall be the average yield per acre of corn * * * for the farm, adjusted for abnormal weather conditions and * * * for trends in yields, during the ten calendar years * * * immediately preceding the year in which such normal yield is determined. If for any such year the data are not available or there is no actual yield, then the normal yield for the farm shall be appraised in accordance with regulations of the Secretary, taking into consideration abnormal weather conditions, the normal yield for the county, and the yield in years for which data are available.

§ 721.411 *Determination of farm corn acreage allotments for 1942.* The county committee, with the assistance of other local committees in the county, and subject to the approval of the State committee, shall determine farm corn acreage allotments for farms in the commercial corn-producing area for the calendar year 1942 on the basis of tillable acreage, crop-rotation practices, type of soil, and topography of the cropland as follows:

(a) *Determination with respect to tillable acreage, crop-rotation practices, type of soil, and topography.* For those farms for which 1941 farm corn allotments reflect these factors in accordance with the conditions as applicable for 1942, the 1941 allotments may be used in determining the 1942 allotments. The county and community committees shall review the 1941 allotments for the several farms and determine whether any allotment is not representative for the farm. In making this determination the committees should consider factors such as a change in type of farming operations, change in farm land, change in cropland acreage, drought, flood, and any other unusual conditions which may apply to the farm at the time the determination is made. Consideration may also be given to the acreage of corn planted on the farm in 1941. For those farms for which consideration is given to the 1941 planted acreage of corn, the county committee may determine a revised 1941 allotment for purposes of establishing the 1942 allotment by weighting the 1941 allotment with the 1941 planted acreage.

If it is determined that the 1941 corn allotment or the 1941 revised allotment, as the case may be, is not representative for the farm, the committees shall appraise a 1942 recommended allotment which is more representative for the farm. This appraisal shall be based on the corn acreage allotments for a group of one or more similar farms in the county and shall be subject to the limitations described in the following sentences:

A group of one or more farms having similar crop-rotation practices, type of soil, and topography shall be selected, and the ratio of corn allotment to cropland for the group of similar farms shall be computed. This ratio shall be applied to the cropland on the farm for which an appraisal is to be made. In those cases in which the 1941 allotment or 1941 revised allotment is to be increased, it shall not be in excess of the figure computed, and in those cases in which the 1941 allotment or 1941 revised allotment is to be decreased, it shall not be less than the figure computed.

(b) *Adjustment to county acreage allotment.* The 1942 recommended acreage allotments determined under paragraph (a), adjusted pro rata to equal the county corn acreage allotment, shall be the farm acreage allotments.*

*§§ 721.411–721.414, inclusive, issued under the authority contained in secs. 329 (b), 375 (b), 301 (b)13(E), 52 Stat. 52, 66, 202, 54 Stat. 1211; 7 U.S.C. Sup., 1329, 1375, 1301.

§ 721.412 *Determination of individual farm corn yields.* Individual farm yields for corn shall be determined on the basis of the historical record for the farm for the period 1931–1940, inclusive, adjusted for abnormal weather conditions and for trends in yields, or, where accurate corn yield records are not available, the farm

yield will be determined by appraisal, taking into consideration abnormal weather conditions, the normal yield for the county and other similar farms, the yields in years for which data are available, and the normal yield established for the farm for 1941. Individual farm corn yields shall be weighted by the individual farm corn acreage allotments and shall be adjusted, except for farms for which yields are determined on the basis of actual records, so that the average of all farm yields in the county does not exceed the county normal corn yield.*

§ 721.413 *Miscellaneous provisions applicable to farm corn acreage allotments and yields*—(a) *Opportunity to furnish data.* Any person owning or operating a farm in a commercial corn-producing county may submit to the county committee any information or data which is relevant to the factors to be taken into consideration by the county committee in determining the farm corn acreage allotment and yield.

(b) *Appeals.* Any person who is dissatisfied with the determination of the county committee with respect to the corn acreage allotment and/or yield for any farm in which he has an interest may, within 15 days after notice of such allotment is forwarded to or made available to him, appeal from such determination by following the procedure governing appeals under the 1942 Agricultural Conservation Program.

(c) *Instructions and forms.* The Administrator of the Agricultural Adjustment Administration shall cause to be prepared and issued with his approval such instructions and forms as may be required to carry out these regulations.*

§ 721.414 *Definitions.* As used in these regulations and in all forms and documents in connection therewith, unless the content or subject matter otherwise requires, the following terms shall have the meaning ascribed:

CHAPTER II—CORPS OF ENGINEERS, WAR DEPARTMENT

PART 204—DANGER ZONE REGULATIONS[1]

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U.S.C. 1), the following rules and regulations are prescribed to govern the use, administration, and navigation of the waters of the Gulf of Mexico between Southwest Pass and Caminada Pass, comprising an aerial gunnery range, New Orleans Air Base.

§ 204.91a *Waters of the Gulf of Mexico between Southwest Pass and Caminada Pass; Aerial Gunnery Range, New Orleans Air Base.*

THE DANGER ZONE

(a) That area in the Gulf of Mexico lying south of Bastian Bay and north of the course from Southwest Pass Whistling Buoy and Ship Shoal Whistling Buoy, and between Southwest Pass and Caminada Pass, bounded as follows:

	Longitude (west)	*Latitude (north)*
Northeast corner	89°29'45"	29°08'15"
Northwest corner	89°58'00"	29°11'00"
Southeast corner	89°32'00"	28°53'30"
Southwest corner	90°03'00"	28°48'00"

The corners of the area will be marked as soon as practicable by the United States Coast Guard.

THE RULES AND REGULATIONS

(b) (1) Firing over the area will consist of attack by airplanes using 30 to 50-caliber guns on towed targets at altitudes of 5,000 to 30,000 feet. Firing over the area will take place during both day-

[1] § 204.91a is added.

light and night time hours at irregular periods throughout the year.

(2) When firing is in progress, the area will be closed to all vessels and no vessel shall enter, pass through, or lie in the area without written permission of the Base Operations Officer, New Orleans Air Base, or his duly authorized representative.

(3) Prior to the commencement of each period of firing, the area will be carefully patrolled by vessels and airplanes to insure that no vessels are within the area. All vessels seen approaching dangerously close to the area or attempting to enter the area or which are lying in or passing through the area shall be warned by means of signals that firing is about to begin. The patrolling air craft will employ the warning known as "buzzing." Buzzing consists of low flight by the airplane and repeated opening and closing of the throttle of the engine on the plane. The patrol vessels will display a red flag during the day time. At night these vessels will display a flashing red light where it can readily be seen from all directions. At night patrol planes will display a flashing red light on the left wing, synchronized so as to approximately coincide with the opening and closing of the throttle of the engine.

(4) The Air Base at New Orleans, Louisiana, will broadcast by radio or broadcast will be by plane at intervals during the days or nights on which firing is in progress to inform fishermen and other vessels of the aerial gunnery and other activities in the area (danger zone).

(5) The United States Coast Guard, Custom House, New Orleans, Louisiana, will be fully informed at all times concerning activities and contemplated activities in the area, so that they may communicate such information to other United States Coast Guard Stations, navigation interests and fishermen, and to the United States Hydrographic offices at New Orleans which will broadcast it for the benefit of vessels offshore at 10:40 a. m. and 10:40 p. m. of each day when firing is contemplated or is in progress.

(6) The District Engineer, U. S. Engineer Office, New Orleans District, Foot of Prytania Street, New Orleans, Louisiana, shall also be kept informed at all times concerning activities and contemplated activities in the area.

(7) When firing is in progress, visual signals consisting of a red flag by day and a quick flashing red light at night will be displayed at Oyster Bayou Light Station, Point au fer Light Station, Barataria Bay Light Station, and Southwest Pass East Jetty Fog Signal Station.

(8) Use of the area shall be with due regard to the needs of vessels and fishermen and the Base Operations Officer, New Orleans Air Base, shall, when practicable, establish a definite schedule of operations. As soon as such definite schedule has been established, he will advise the District Engineer, U. S. Engineer Office, New Orleans District, New Orleans, Louisiana, and the U. S. Coast Guard and navigation interests, and others known to be interested, accordingly. He will also notify these parties of the suspension of activities over the area for an extended period, or of discontinuance of the use of the area.

(9) The fact that aerial gunnery or other activities are to take place over the area designated shall be advertised to the public through the usual media for dissemination of information.

(10) Inasmuch as the activities are likely to be engaged in throughout the year without regard to season, such advertising shall be repeated at frequent intervals which shall not exceed three months and which shall be more frequent when in the opinion of the Base Operations Officer, New Orleans Air Base, responsible for use of the range, such repetition is necessary in the public interest.

(11) The rules and regulations in this section will be enforced by the U. S. Coast Guard and the Base Operations Officer, New Orleans Air Base. (Sec. 7, River and Harbor Act, Aug. 8, 1917, 40 Stat. 266; 33 U.S.C. 1) [Regs. Sept. 5, 1941 (E.D. 7195 (Mexico, Gulf of)—18/6)]

It is ordered, That the Commission's order of May 2, 1941, entered in Docket No. 5060, be, and same is hereby, amended in the following particulars:

§ 3.102. *Territorial exclusivity.* No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's pro-

grams not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary service area upon the programs of the network organization.

§ 3.103 *Term of affiliation.* No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years: *Provided*, That a contract, arrangement, or understanding for a period up to two years, may be entered into within 120 days prior to the commencement of such period.

§ 3.104 *Option time.* No license shall be granted to a standard broadcast station which options [1] for network programs any time subject to call on less than 56 days' notice, or more time than a total of three hours [2] within each of four segments of the broadcast day, as herein described. The broadcast day is divided into 4 segments, as follows: 8 a. m. to 1 p. m.; 1 p. m. to 6 p. m.; 6 p. m. to 11 p. m.; 11 p. m. to 8 a. m.[3] Such options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

The last paragraph of said order is hereby amended to read as follows:

It is further ordered, That these regulations shall become effective immediately: *Provided*, That with respect to existing contracts, arrangements or understandings, or network organization station licenses, the effective date shall be deferred until November 15, 1941: *Provided further*, That the effective date of § 3.106 with respect to any station may be extended from time to time in order to permit the orderly disposition of properties: *And provided further*, That the effective date of § 3.107 shall be suspended indefinitely and any further order of the Commission placing said § 3.107 in effect shall provide for not less than six months' notice and for further extension of the effective date from time to time in order to permit the orderly disposition of properties. By the Commission.

[SEAL] T. J. SLOWIE, *Secretary.*

[F. R. Doc. 41-7735; Filed, October 14, 1941; 11:53 a. m.]

[1] As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

[2] All time options permitted under this section must be for specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

[3] These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.

[Docket No. B-51]

IN THE MATTER OF EASTERN COAL & COKE COMPANY, REGISTERED DISTRIBUTOR, REGISTRATION NO. 2615, RESPONDENT

NOTICE OF AND ORDER FOR HEARING

1. The Bituminous Coal Division finds it necessary in the proper administration of the Bituminous Coal Act of 1937 (the "Act") to determine—

(a) Whether or not the Eastern Coal & Coke Company, Registered Distributor, Registration No. 2615, whose address is Philadelphia, Pennsylvania, the respondent in the above-entitled matter, has violated any provisions of the Act, the Marketing Rules and Regulations, the Rules and Regulations for the Registration of Distributors and the Distributor's Agreement (the "Agreement") dated May 25, 1939, executed by respondent, pursuant to Order of the National Bituminous Coal Commission, dated March 24, 1939, in General Docket No. 12, which was adopted as an Order of the Bituminous Coal Division on July 1, 1939; and

(b) Whether or not the registration of said distributor should be revoked or suspended or other appropriate penalties should be imposed;

and for said purposes gives notice that the Division has information to the effect that;

2. Respondent acting as sales agent for the Beccaria Coal Mining Co., a code member, operating the Leland No. 8 Mine, Mine Index No. 273, located in Clearfield County, Pennsylvania, in District No. 1, accepted and retained a commission from said code member of 26 cents per net ton on approximately 474.95 net tons of mine run coal, Size Group No. 3, produced at the aforesaid mine, sold by it on behalf of said code member, and shipped between January 23, 1941, and May 29, 1941, both dates inclusive, and accepted and retained a commission of

27 cents per net ton from said code member on approximately 55.30 net tons of mine run coal, Size Group No. 3, produced at the aforesaid mine, sold by respondent on behalf of said code member, and shipped on or about May 14, 1941. Said commissions were and are in excess of the maximum discounts allowable to a registered distributor on such transactions as established by Order of the Director, dated June 19, 1940, in General Docket No. 12, and were paid by said code member pursuant to a sales agency agreement between respondent and said code member entered into subsequent to August 8, 1940, to wit, October 28, 1940, although at the time of said transactions, said code member had not filed an application for permission to pay commissions in excess of the maximum discounts allowable to a registered distributor, as required by Rule 13 of Section II of the Marketing Rules and Regulations. Respondent accordingly participated in a transaction in violation of Rule 13 of Section II of the Marketing Rules and Regulations, and thereby violated paragraph (e) of the agreement referred to in paragraph 1 (a) hereof.

It is, therefore, ordered, That a hearing pursuant to § 304.14 of the Rules and Regulations for the Registration of Distributors, to determine whether the registration of said distributor should be revoked or suspended, or other appropriate penalties be imposed, be held on November 12, 1941, at 10 a. m. in a hearing room of the Bituminous Coal Division at Room 323, Post Office Building, Altoona, Pennsylvania.

It is further ordered, That W. A. Cuff, or any other officer or officers of the Bituminous Coal Division designated by the Director thereof for that purpose shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to conduct said hearing, administer oaths and affirmations, examine witnesses, subpoena witnesses, compel their attendance, take evidence, require the production of any books, papers, correspondence, memoranda or other records deemed revelant or material to the inquiry, to continue said hearing from time to time, and to such places as he may direct by announcement at said hearing or any adjourned hearing or by subsequent notice, and to prepare and submit to the Director proposed findings of fact and conclusions and the recommendation of an appropriate order in the premises, and to perform all other duties in connection therewith authorized by law.

Notice of such hearing is hereby given to said respondent, and to all other parties herein and to all persons and entities having an interest in such proceeding.

Notice is hereby given that answer to the charges contained herein must be filed with the Bituminous Coal Division at its Washington Office or with any one of the statstical bureaus of the Division, within twenty (20) days after date of service thereof on the respondent; and that any respondent failing to file an answer within such period, unless the Director or the presiding officer shall otherwise order, shall be deemed to have admitted said charges and to have consented to the entry of an appropriate order on the basis of the facts alleged.

All persons are hereby notified that the hearing in the above-entitled matter and orders entered therein may concern, in addition to the matters specifically alleged herein, other matters incidental and related thereto, whether raised by amendment, petition for intervention, or otherwise, and all persons are cautioned to be guided accordingly.

[Docket No. A-1093]

PETITION OF DISTRICT BOARD 11, REQUESTING REVISION OF THE EFFECTIVE MINIMUM PRICES ESTABLISHED FOR DISTRICT 11 COALS PRODUCED FOR RAIL SHIPMENT TO KELLOGG AIRPORT, BATTLE CREEK, MICHIGAN, MARKET AREA NO. 21

MEMORANDUM OPINION AND ORDER GRANTING TEMPORARY RELIEF

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, has been duly filed with this Division by the above named party requesting a revision of the effective minimum prices for District No. 11 by providing for deductions in mine prices based upon difference in freight rates between mines in District No. 11 on shipments to Kellogg Airport, (Battle Creek) Michigan, in Market Area No. 21.

The relief sought in this petition is identical to that requested in Docket No. A-735 by District Board 11 with respect to shipments to Fort Custer (Battle Creek), Michigan, which relief was granted, pending final disposition, by the Director's Order in that docket dated June 16, 1941. Petitions of intervention in Docket No. A-735 were filed by District Boards 8 and 10 and the Consumers' Counsel, but only the original petitioner appeared at the hearing. The Kellogg Airport is served by the Grand Trunk Railway System, which also serves Fort Custer, the boundary lines of the Kellogg Airport and Fort Custer are approximately one mile apart and the coal dumps at the Kellogg Airport and Fort Custer are located approximately two and one-half miles apart.

In view of these foregoing circumstances it appears to the Director that a reasonable showing of necessity has been made for the granting of temporary relief, pending the final disposition of this proceeding, in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The Director deeming that this action is necessary in order to effectuate the purposes of the Act;

Now, therefore, it is ordered, That pending final disposition of the above-entitled matter temporary relief be, and the same hereby is, granted as follows: Commencing forthwith the Schedule of Minimum Prices for District No. 11 for All Shipments Except Truck is supplemented to include the following table of deductions for differences in freight rates:

TITLE 14—CIVIL AVIATION

CHAPTER I—CIVIL AERONAUTICS BOARD

PART 40—AIR CARRIER OPERATING CERTIFICATION

PART 61—SCHEDULED AIR CARRIER RULES

SPECIAL REGULATION

At a session of the Civil Aeronautics Board held at its office in Washington, D. C., on the 14th day of October 1941.

It appearing that: (a) The War Department proposes extensive operations of Service aircraft in connection with army maneuvers to be held within a large area covering portions of Virginia, Tennessee, North Carolina, South Carolina, and Georgia from approximately November 14 to 30, 1941, which will jeopardize the safety of air carrier aircraft operating within that area other than in accordance with day contact flight rules;

(b) The air carriers which are authorized to operate over this area may safely conduct scheduled operations along suitable temporary alternate routes;

(c) Parts 40 and 61 of the Civil Air Regulations prohibit air carriers from operating over such temporary alternate routes unless route test flights have been made, certain air navigation facilities are available, and pilots and aircraft dispatchers used have demonstrated route competency;

The Board finds that:

Its action is in the public interest and in the interest of safety of air transportation;

Now, therefore, The Civil Aeronautics Board, acting pursuant to the authority vested in it by the Civil Aeronautics Act of 1938, as amended, particularly sections 205 (a), 601, and 604 of said Act, makes and promulgates the following special regulation:

Notwithstanding the provisions of Parts 40 and 61 of the Civil Air Regulations which deal with airway route requirements, intermediate field requirements, radio route facilities requirements, weather route reporting, pilot and aircraft dispatcher route competency, and the amending of air carrier operating certificates and competency letters, scheduled air carriers which have been issued air carrier operating certificates authorizing operations over the area in which the War Department is to conduct army maneuvers from November 14 to 30, 1941, in certain portions of Virginia, Tennessee, North Carolina, South Carolina, and Georgia, may conduct, from October 14 to December 1, 1941, scheduled day and night contact and instrument operations over such temporary routes, with such facilities and personnel and in accordance with such procedings and practices as the Administrator may deem necessary to protect the safety of air transporttion.

By the Civil Aeronautics Board.

[Docket No. A-383]

PETITION OF DISTRICT BOARD NO. 11, FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF THE CHINOOK MINE OF THE AYRSHIRE PATOKA COLLIERIES CORPORATION

MEMORANDUM OPINION AND ORDER DENYING TEMPORARY RELIEF

Bituminous Coal Producers Board for District 11 filed with the Bituminous Coal Division a petition in the above-entitled matter on November 19, 1940, pursuant to the provisions of section 4 II (d) of the Bituminous Coal Act of 1937, in which it requested the Division to establish certain temporary and permanent price classifications and minimum f. o. b. mine prices for theretofore unpriced and unclassified coals to be produced at the Chinook Mine (Mine Index No. 121) of the Ayrshire Patoka Collieries Corporation, a code member of District No. 11.

Ayrshire Patoka Collieries Corporation filed a petition on November 20, 1940, with the Division praying that leave to intervene be granted, that the Director order an immediate informal conference to fix proper price classifications and temporary minimum prices, and that the price classifications and minimum prices proposed by the original petitioner for coals in Size Groups 13 to 16 and 26 to 29, both inclusive, and f. o. b. mine prices for shipments to railroads be granted, but the remaining price classifications and minimum prices proposed by the original petitioner be denied and that in lieu thereof there be established certain price classifications and minimum prices proposed by the intervener.

An informal conference in this matter was held on November 25, 1940, at which all interested parties were afforded an opportunity to appear and be heard.

On December 12, 1940, the Director entered an Order which granted, pend-

ing final disposition of the petitions, the temporary relief prayed for by the original petitioner and denied the temporary relief prayed for by the intervener.

The intervener, pursuant to an Order of the Director dated August 27, 1941, was granted leave to amend its petition of intervention and amended its original petition to request a minimum price of $1.55, $1.45 and $1.15 for its coals in Size Groups 23, 24 and 25, respectively, and requested the granting of immediate temporary relief upon the close of the hearing for Size Groups 23, 24 and 25.

A hearing in this matter was held on August 28, 1941, pursuant to an Order of the Director dated August 21, 1941, before Charles O. Fowler, a duly designated Examiner of the Division, at which all interested persons were afforded an opportunity to be present, adduce evidence, cross-examine witnesses, and otherwise be heard.

At the close of the hearing the intervener filed with the Examiner a motion for transmittal to the Director requesting immediate temporary relief by the establishment of effective minimum prices of $1.55, $1.45 and $1.15, respectively, for coals in Size Groups 23, 24 and 25 for shipment by rail to all market areas.

The Examiner granted interested parties until October 2, 1941, to file briefs in connection with this motion for temporary relief and a memorandum in support of the motion for temporary relief was filed on October 2, 1941, by Ayrshire Patoka Collieries Corporation, and one in opposition thereto was tardily filed on October 9, 1941, by District Board 11.

The Director has examined the record in this matter and has determined that the resolution of the issues raised herein would have a considerable effect upon the interest of other producers who sell coal in competition with those produced at the Chinook Mine. The issues involved herein are very complex and controversial. To grant the temporary relief prayed for by the intervener before a more detailed consideration of the issues might seriously jeopardize the interest of interested parties. It seems desirable to delay any further action in this proceeding until a more detailed consideration of the record may be made and until the Examiner's Report may be considered. Moreover, no clear showing has been made that substantial irreparable injury would result if temporary relief were not granted.

Now, therefore, it is ordered, That the motion for temporary relief filed at the conclusion of the hearing and that part of the amended petition to intervene praying for immediate temporary relief at the conclusion of the hearing by the establishment for the coals of the Chinook Mine, minimum prices of $1.55, $1.45, and $1.15 in Size Groups 23, 24, and 25, respectively, for shipment by rail to all market areas should each be and each hereby is denied.

Nothing herein shall be construed as a ruling or expression of the Director's opinion concerning the final disposition of this proceeding.

Dated: October 14, 1941.

At the hearing, the original complaint was amended so as to charge such violations from November 1, 1940, to the date of the hearing by both the partnership of Beeler and Rowland and by J. B. PART 963—SILK

Amendment to General Preference Order No. M-22[1] *to Conserve the Supply and Direct the Distribution of Silk*

Whereas, the uncertainty of future shipments of raw silk from abroad and national defense requirements for silk have created a shortage thereof and it is necessary in the public interest and to promote the defense of the United States to conserve the supply and to allocate the said supply in the manner and to the extent in this Order provided;

Now, therefore, it is hereby ordered, That: General Preference Order No. M-22 is hereby amended to read as follows:

and definitions of Priorities Regulation No. 1, issued by the Director of Priorities on August 27, 1941, shall be deemed a part of this Order, except in so far as they are inconsistent herewith.

(b) *Required and permitted deliveries.* (1) The following orders are hereby assigned a preference rating of A-10, and acceptance thereof is required:

(i) Any contract or order for silk cloth, shroud lines, tape or thread for either life, matériel, or flare parachutes placed by the War Department, the Navy Department, or the Department of Commerce for such parachutes to be delivered to or for the account of the Army, Navy or Weather Bureau of the United States.

(ii) Any contract or order for silk in any form required by the person placing the same to fulfill his contracts or orders on hand, provided such silk is to be physically incorporated in material to be delivered under contracts or orders included under (i) above.

(iii) Any contract or order for raw silk placed by the Defense Supplies Corporation.

(2) Deliveries of imported raw silk may be made to any person importing the same, either directly or through an agent.

(c) *Restrictions on deliveries.* Notwithstanding anything in Priorities Regulation No. 1 to the contrary, no person shall hereafter sell or otherwise transfer title to, or make any deliveries, and no person shall purchase or accept delivery of Raw Silk except as provided in paragraph (b) hereof, unless specifically authorized by the Director of Priorities.

(d) *Restrictions on throwing, weaving and other processing.* (1) No person shall, during any week, knit, weave or otherwise process thrown silk in excess of the amount knit, woven or otherwise processed by him during the week ending July 26, 1941, unless specifically authorized by the Director of Priorities.

(e) *Reports.* Each person delivering or accepting delivery of Raw Silk in accordance with paragraph (b) hereof, or as specifically authorized by the Director of Priorities, shall, on or before the close of the next business day following such delivery or acceptance notify the Textile Section Research-Department, Office of Production Management, in writing, of the amount, the bale numbers, origin, denier size and color of any bales of Raw Silk so delivered or accepted, the names and addresses of the persons delivering and accepting delivery, and the identifying number or numbers of the War, Navy, or Commerce Department contracts in material delivered under which such Raw Silk is to be physically incorporated.

PART 991—SPERM OIL

General Preference Order M-40 To Conserve the Supply and Direct the Distribution of Sperm Oil

Whereas due to the present emergency, it has become necessary to use vessels heretofore engaged in the production of sperm oil for other purposes, thereby decreasing the imports of such oil into the United States; and

Whereas demands upon suppliers of said oil in the first six months of 1941 have exceeded total consumption for the year 1940; and

Whereas future imports of such oil depend upon the successful completion of lengthy ocean voyages subject to the perils of the sea, and upon the availability of vessels suitable for use in obtaining sperm oil; and

Whereas no adequate substitutes are available for sperm oil for certain types of uses essential to the proper prosecution of the national defense program, and its use for other defense purposes is preferable or customary; and

Whereas it is necessary to create a reserve supply of sperm oil in order to provide for further contingencies and the possibility that there may be no further imports of sperm oil into this country for a considerable period of time; and

Whereas the foregoing facts have operated to create a shortage of sperm oil for national defense, and it is necessary in the public interest and for national defense to allocate the supply of said sperm oil in the manner and to the extent hereinafter in this Order provided;

Now, therefore, it is hereby ordered, That

§ 991.1 *General preference order M-40*—(a) *Applicability of Priorities Division regulation No. 1.* To the extent that they are not inconsistent with the specific provisions hereinafter contained, all of the definitions and provisions of Priorities Regulation No. 1, issued by the Director of Priorities on August 27, 1941, as modified or supplemented by the provisions of this Order, shall be deemed a part of this Order.

(b) *Additional definitions.* For the purposes of this Order:

(1) "Sperm oil" as herein used shall mean oil obtained from the sperm whale, and includes such oil after refining or sulphonating.

(2) "Dealer in sperm oil" as herein used shall mean every person purchasing or holding sperm oil for sale or resale as such, or for resale after refining or sulphonating, but shall not include persons purchasing or holding sperm oil for resale after combination with other materials.

(c) *Assignment of preference rating.* (1) All defense orders for sperm oil which have not been specifically assigned a higher rating are hereby assigned a rating of A-10.

(2) All orders for sperm oil necessary for the production of other defense orders, as defined in the said Regulation No. 1, are hereby assigned a rating of A-10 and shall, themselves, be deemed defense orders as the said term is used hereinafter in this Order.

(d) *Sperm oil for direct allocation.* Each dealer in sperm oil holding on the effective date of this Order stocks of sperm oil in excess of 100,000 pounds, shall set aside and hold for delivery upon orders to be specifically issued under this paragraph by the Director of Priorities, an amount of sperm oil equal to thirty per centum (30%) of all stocks of said sperm oil held by him on the effective date of this Order, and shall thereafter set aside an amount of sperm oil equal to thirty per centum (30%) of each shipment received by him directly from any factory, floating or otherwise.

(e) *Use of sperm oil only for defense orders.* Dealers in sperm oil, after setting aside the amounts of sperm oil required by paragraph (d) hereof, and all other persons having supplies of sperm oil, shall use, sell, or deliver their supplies of the said oil only upon defense orders, subject, however, to the provisions of paragraphs 944.14 and 944.19 of the said Regulation No. 1.

(f) *Effective date.* This order shall take effect immediately upon issuance. (P.D. Reg. 1, August 27, 1941, 6 F.R. 4489; P.D. Reg. 2, September 9, 1941, 6 F.R. 4684; O.P.M. Reg. 3, March 8, 1941, 6 F.R. 1596; E.O. 8629, January 7, 1941, 6 F.R. 191, E.O. 8875, August 28, 1941, 6 F.R. 4483; Sec. 2 (a), Public No. 671, 76th Congress, 3d Sess., as amended by Public No. 89, 77th Congress, 1st Sess.; Sec. 9, Public No. 783, 76th Congress, 3d Sess.)

PART 996—CHLORINATED HYDROCARBON SOLVENTS

General Preference Order No. M–41 to Conserve the Supply and Direct the Distribution of Chlorinated Hydrocarbon Solvents

Whereas the national defense requirements have created a shortage of Chlorinated Hydrocarbon Solvents, as hereinafter defined, for defense, for private account, and for export, and it is necessary, in the public interest and to promote the defense of the United States, to conserve the supply and direct the distribution thereof;

Now, therefore, it is hereby ordered, That:

§ 996.1 *General preference order No. M–41*—(a) *Definitions.* For the purposes of this Order:

(1) "Chlorinated Hydrocarbon Solvents" means:

(i) Carbon tetrachloride.
(ii) Trichlorethylene.
(iii) Perchlorethylene.
(iv) Ethylene dichloride.

and includes mixtures containing the foregoing, provided said mixtures may be used for any of the purposes hereinafter in paragraphs (c) (2) and (3) specified.

(2) "Producer" means any person engaged in the production of Chlorinated Hydrocarbon Solvents and includes any person who has Chlorinated Hydrocarbon Solvents produced for him pursuant to toll agreement, and any person who has purchased or purchases Chlorinated Hydrocarbon Solvents for purposes of resale.

(b) *Preference ratings and directions.* (1) Control of the supply and direction of the distribution of Chlorinated Hydrocarbon Solvents is hereby taken by the Director of Priorities, and all future transactions of any kind in Chlorinated Hydrocarbon Solvents are regulated and governed by the provisions and definitions contained in Regulation No. 1 of the Priorities Division of the Office of Production Management, issued on the 27th day of August, 1941, except as herein otherwise specifically provided.

(2) Deliveries under all Defense Orders which have not been assigned a higher preference rating are hereby assigned a preference rating of A–10.

(c) *Directions with respect to residual supply.* After providing for all deliveries under Defense Orders, giving preference among such deliveries in accordance with any preference ratings specifically assigned thereto, Producers shall make deliveries of Chlorinated Hydrocarbon Solvents in accordance with the following directions:

(1) Each Producer, exclusive of one who has purchased or purchases Chlorinated Hydrocarbon Solvents for purposes of resale, shall each month make available to persons, to be designated by the Director of Priorities of the Office of Production Management, 5% of the amount of each Chlorinated Hydrocarbon Solvent, produced by him during that month, or 20% of the amount of each Chlorinated Hydrocarbon Solvent produced by him during that month which is not required to fill Defense Orders (whichever amount is smaller). *Provided, however,* That when the amount of Chlorinated Hydrocarbon Solvents which any Producer has thus made available, in any month, has cumulated to the percentage specified above of his largest month's production to that date, he shall not be required to make additional quantities available.

(2) Deliveries of Chlorinated Hydrocarbon Solvents, in the quantities stated below, to persons who require the same for the following non-defense uses and who, prior to delivery thereof, shall have furnished the Producer with a duly executed Purchaser's Certificate (in duplicate) on Form PD-127 are hereby assigned preference rating B-2:

(i) Charging and recharging fire extinguishers;
(ii) Grain fumigation;
(iii) Processing and manufacture of food, chemicals, rubber and petroleum, where substitution of other materials is impractical;
(iv) Degreasing machines specially designed to use such solvents in a manufacturing process or in the repair of public carriers. Such machines must use the solvents at or near their boiling points and be equipped with water cooled condensers;
(v) Cleaning of metals in electrical equipment;
(vi) Fire prevention in plywood manufacture;
(vii) Manufacture of chlorinated hydrocarbon refrigerants;
(viii) Dry cleaning establishments.

Persons requiring any Chlorinated Hydrocarbon Solvents for uses enumerated above (except uses ii, vii, and viii) shall be entitled, in any one month, to receive one-sixth of the quantity of Chlorinated Hydrocarbon Solvents consumed by them during the six month period ended June 30, 1941. Persons requiring Chlorinated Hydrocarbon Solvents for use in grain fumigation (use ii) shall not be restricted as to quantity except as hereinafter in paragraph (e) provided. Persons requiring Chlorinated Hydrocarbon Solvents for the manufacture of chlorinated hydrocarbon refrigerants (use vii) shall be entitled to receive, in any month, such quantities of Chlorinated Hydrocarbon Solvents as shall be determined (upon application) from month to month by the Priorities Division of the Office of Production Management. Persons requiring Chlorinated Hydrocarbon Solvents for use in dry cleaning establishments (use viii) shall be entitled, in any one month, to receive one-twelfth of the quantity of Chlorinated Hydrocarbon Solvents consumed by them during the six month period ended June 30, 1941.

(3) To the extent that Chlorinated Hydrocarbon Solvents are available after Defense Orders and the uses (in the amount specified) set forth in subparagraphs (c) (1) and (2), are satisfied, deliveries, in the quantities stated below, to persons who, prior to delivery thereof, shall have furnished the Producer with a duly executed Purchaser's Certificate (in duplicate) on Form PD–127, are hereby assigned preference rating B–8:

(i) Fumigation, other than grain fumigation;
(ii) Packaged spotting and cleaning preparations;
(iii) Manual cleaning of non-absorbent objects other than electrical equipment;
(iv) Dry cleaning establishments;
(v) Manufacture of tetraethyl lead fluid.

Persons requiring Chlorinated Hydrocarbon Solvents for any of the foregoing purposes shall be entitled, in any one month, to receive no more than one-sixth, or in the case of dry cleaning establishments one-twelfth, of the quantity of Chlorinated Hydrocarbon Solvents consumed by them during the six month period ended June 30, 1941.

(4) Except as they may receive Chlorinated Hydrocarbon Solvents under subparagraph (c) (1) hereof, or pursuant to other specific direction of the Director of Priorities, persons not enumerated in subparagraph (c) (2) or (3) hereof shall receive no Chlorinated Hydrocarbon Solvents: *Provided, however,* That nothing in this subparagraph contained shall, within the restrictions contained in paragraph (e) hereof, and after provision has been made for filling Defense Orders, prevent Producers from making deliveries of Chlorinated Hydrocarbon Solvents to and among themselves, for purposes of resale.

(d) *Records and reports.* In addition to the records and reports required by Priorities Division Regulation No. 1, hereinabove referred to, each Producer shall, on or before the tenth day of each month, file with the Chemicals Section, Division of Priorities, Office of Production Management, Washington, D. C., the duplicate of each Purchaser's Certificate (Form PD–127 [1]), submitted to him, in connection with which he has made, or has agreed to make, deliveries of Chlorinated Hydrocarbon Solvents.

(e) *Inventory restrictions.* In addition to the inventory restrictions contained in Priorities Division Regulation No. 1, hereinabove referred to, no person shall accumulate inventories of Chlorinated Hydrocarbon Solvents in excess of a 30 day supply thereof, at the expected rate of use, taking into consideration supplies of Chlorinated Hydrocarbon Solvents on hand and on order.

(f) *Effective date.* This Order shall take effect immediately, and unless sooner revoked, shall expire on the 31st day of March, 1942. (P.D. Reg. 1, Aug. 27, 1941, 6 F.R. 4489; O.P.M. PART 1010—SUSPENSION ORDERS

Suspension Order No. S–1

Central Pattern and Foundry Company of Chicago, Illinois, is a foundry and secondary smelter of aluminum and aluminum scrap and is subject to the provisions of General Preference Orders M–1,[1] M–1–a,[2] and M–1–c.[3] In reports filed with the Division of Priorities by the Company in accordance with these Orders, the company misrepresented its scheduled shipments of aluminum for the month of July. Thereafter, during the month of July, in violation of directions issued by the Director of Priorities pursuant to these Orders, the Company made shipments of aluminum castings in the amount of 41,449 pounds for non-essential uses. The Company also violated the provisions of these Orders in several other respects: it failed to obtain from its customers sworn statements concerning their inventories and orders placed by them with other producers, and it accepted for melting and processing deliveries of aluminum scrap not specifically authorized by the Director of Priorities and bearing no preference ratings. The Company committed these violations despite full knowledge on its part of the requirements of these Orders.

Because of the scarcity and critical importance of aluminum, these wilful violations of General Preference Orders M–1, M–1–a, and M–1–c have resulted in the diversion of aluminum from primary defense needs into nonessential uses and have thus impeded the defense of the United States. In view of the foregoing facts,

It is hereby ordered:

§ 1010.1 *Suspension order No. S–1.* (a) During the period in which this Order shall be in effect, Central Pattern and Foundry Company of Chicago, Illinois, its successors and assigns shall accept no deliveries from any source of primary aluminum, secondary aluminum, aluminum scrap or alloys of which aluminum constitutes the major part.

(b) During the period in which this Order shall be in effect, Central Pattern and Foundry Company of Chicago, Illinois, its successors and assigns shall accept no purchase orders, and enter into no contracts or commitments, for delivery by it of primary aluminum, secondary aluminum, aluminum scrap, alloys of which aluminum constitutes the major part, or aluminum products.

(c) During the period in which this Order shall be in effect, Central Pattern and Foundry Company of Chicago, Illinois, its successors and assigns shall make no deliveries of primary aluminum, secondary aluminum, aluminum scrap, alloys of which aluminum constitutes the major part, or aluminum products: *Provided:* That said Company may make delivery of such materials on the orders and in the amounts set forth in Schedule A, hereto attached and made a part hereof.[4]

(d) During the period in which this Order shall be in effect, no person shall deliver any primary aluminum, secondary aluminum, aluminum scrap or alloy of which aluminum constitutes the major part to Central Pattern and Foundry Company in any case in which the acceptance of such delivery by the Company would be in violation of this Order; nor shall any person accept delivery of any such material or any aluminum product from Central Pattern and Foundry Company in any case in which the delivery of such material or product by the Company would be in violation of this Order.

(e) This Order shall take effect immediately and, unless sooner terminated by further order of the Director of Priorities, shall expire at midnight of March 31, 1942. (P.D. Reg. 1, Aug. 27, 1941, 6 F.R. 4489, O.P.M. Reg. 3 Amended, Sept. 2, 1941, 6 F.R. 4865; E.O. 8629, Jan. 7, 1941, 6 F.R. 191; E.O. 8875, Aug. 28, 1941, 6 F.R. 4483; sec. 2 (a), Public No. 671, 76th Congress, Third Session, as amended by Public No. 89, 77th Congress, First Session)

PART 607—MINIMUM WAGE RATE AND REGULATIONS APPLICABLE TO THE EMPLOYMENT OF HOME WORKERS IN THE JEWELRY MANUFACTURING INDUSTRY

The following Regulations, §§ 607.101–607.112 applicable to the employment of industrial home workers in the Jewelry Manufacturing Industry are hereby issued pursuant to sections 8 (f) and 11 (c) of the Fair Labor Standards Act of 1938, and § 607.3 of the Regulations of the Wage and Hour Division. These regulations shall become effective November 3, 1941, and shall be in force and effect until repealed or modified by regulations hereafter made and published.

Signed at Washington, D. C., this 16th day of October, 1941.

PHILIP B. FLEMING,
Administrator.

Whereas, section 8 (f) of the Fair Labor Standards Act of 1938 provides as follows:

> Orders issued under this section shall * * * contain such terms and conditions as the Administrator finds necessary to carry out the purposes of such orders, to prevent the circumvention or evasion thereof, and to safeguard the minimum wage rates established therein. * * *

And, whereas, § 607.3 of the wage order for the Jewelry Manufacturing Industry issued pursuant to section 8 (f) of the Act provides as follows:

> § 607.3 *Restriction of Home Work.* No work in the Jewelry Manufacturing Industry, as defined herein, shall be done in or about a home, apartment, tenement, or room in a residential establishment, except by such persons as have obtained special home work certificates issued pursuant to applicable regulations of the Wage and Hour Division, authorizing industrial home work by any worker who was engaged in industrial home work in the Jewelry Manufacturing Industry prior to July 1, 1941 and is unable to adjust to factory work because of age or physical or mental disability or is unable to leave home because his presence is required to care for an invalid in the home.

And whereas, section 11 (c) of the Act provides as follows:

> Every employer subject to any provision of this Act or of any order issued under this Act shall make, keep, and preserve such records of the persons employed by him and of the wages, hours, and other conditions and practices of employment maintained by him, and shall preserve such records for such periods of time and shall make such reports therefrom to the Administrator as he shall prescribe by regulation or order as necessary or appropriate for the enforcement of the provisions of this Act or the regulations or orders thereunder.

Now, therefore, the following regulations are hereby issued. The regulations in §§ 607.101–607.112 shall become effective on November 3, 1941, and shall be in force and effect until repealed or modified by regulations hereafter made and published.

§ 607.101 *Definitions.* As used in the regulations in §§ 607.101–607.112, the term "industrial home work" means the production by any person in or about a home, apartment, tenement, or room in a residential establishment, for an employer, of goods from material furnished directly by or indirectly for such employer.

"The Jewelry Manufacturing Industry" as used herein means:

(a) The manufacturing, processing, or assembling, wholly or partially from any material, of jewelry, commonly or commercially so known. Jewelry as used herein *includes,* without limitation, religious, school, college, and fraternal insignia; articles of ornament or adornment designed to be worn on apparel or carried on or about the person, including without limitation, cigar and cigarette cases, holders, and lighters; watch cases; metal mesh bags and metal watch bracelets; and chain, mesh, and parts for use in the manufacture of any of the articles included in this definition. Jewelry as used herein does not include pocket knives, cigar cutters, badges, emblems, military and naval insignia, belt buckles, and handbag and pocketbook frames and clasps, or commercial compacts and vanity cases, except when made from or embellished with precious metals or precious, semiprecious, synthetic, or imitation stones; and the assaying, refining, and smelting of base or precious metals.

The term "parts" as used in the foregoing paragraph does not include parts which are used predominantly for products other than jewelry, such as springs, blades, and nail files. The term "commercial compacts and vanity cases" as used means compacts and vanity cases which bear the trade name or mark of a cosmetic manufacturer and are made for the purpose of distributing or advertising said cosmetics.

(b) The manufacturing, cutting, polishing, encrusting, engraving, and setting of precious, semiprecious, synthetic, and imitation stones.

(c) The manufacturing, drilling, and stringing of pearls, imitation pearls, and beads designed for use in the manufacture of jewelry.

§ 607.102 *Applications on official forms.* Certificates authorizing the employment of industrial home workers in the Jewelry Manufacturing Industry may be issued upon the following terms and conditions upon application therefor on forms provided by the Wage and Hour Division. Such forms shall be signed by both the home worker and the employer.

§ 607.103 *Terms and conditions for the issuance of certificates.* If the application is in proper form and sets forth facts showing that the worker—

(a) Was engaged in industrial home work in the Jewelry Manufacturing Industry prior to July 1, 1941; and

(b) Is unable to adjust to factory work because of age or physical or mental disability; or

(c) Is unable to leave home because the worker's presence is required to care for an invalid in the home,

a certificate may be issued authorizing the applicant employer to employ the worker in industrial home work in the Jewelry Manufacturing Industry.

No home worker shall perform industrial home work for more than one employer in the Jewelry Manufacturing Industry, but home work employment in another industry shall not be a bar to the issuance of a certificate for the Jewelry Manufacturing Industry.

§ 607.104 *Investigation may be ordered to determine whether the facts justify the issuance of a certificate.* An investigation may be ordered in any case to obtain additional data or facts. A medical examination of the worker or invalid may be ordered or a certification of facts concerning eligibility for the certificate by designated officers of the State or Federal Government may be required.

§ 607.105 *Termination of certificates.* Certificates shall be valid under the terms set forth in the certificate for a period of not more than 12 months from

the date of issuance or such shorter period as may be fixed in the certificate. Application for renewal of any certificate shall be filed in the same manner as an original application under §§ 607.101–607.112.

§ 607.106 *Revocation and cancellation.* Any certificate may be revoked for cause at any time. Violation of any provision of the Fair Labor Standards Act shall be sufficient grounds for revocation of all certificates issued to an employer, in which event no certificates shall issue to the offending employer for a period of one year. In any proceeding for the revocation or cancellation of a certificate, interested parties shall be provided an opportunity to be heard.

§ 607.107 *Preservation of certificate.* A copy of the certificate shall be sent to the home worker, who shall keep such certificate on the premises on which the work is performed.

A copy of the certificate shall be sent to the employer, who shall keep this copy on file in the same place at which the worker's employment records are maintained.

§ 607.108 *Records and reports.* The issuance of a certificate shall not relieve the employer of the duty of maintaining the records required by Regulations, Part 516, and failure to keep such records shall be sufficient cause for the cancellation of certificates issued to such an employer.

Each employer of industrial home workers in the Jewelry Manufacturing Industry shall submit to the regional office of the Wage and Hour Division for the region in which his place of business is located on February 1 and August 1 of each year, the home work handbooks of each employee employed by him during the preceding six month period in industrial home work in the Jewelry Manufacturing Industry. This report shall also include a list of the names, addresses, and certificate numbers of home workers for whom home work certificates have been obtained but who were not employed in industrial home work in the Jewelry Manufacturing Industry during such period.

§ 607.109 *Wage rates.* Wages at a rate of not less than 40 cents per hour shall be paid by every employer to each of his home work employees except as subminimum employment of specific handicapped workers has been provided for by special certificates issued by the Wage and Hour Division pursuant to Regulations, Part 524. All hours worked in excess of 40 in any workweek shall be compensated for at one and one-half times the regular rate of pay.

§ 607.110 *Delegation of authority to grant, deny, or cancel a certificate.* The Administrator may from time to time designate and appoint members of his staff or State agencies as his authorized representatives with full power and authority to grant, deny, or cancel home work certificates.

§ 607.111 *Petition for review.* Any person aggrieved by the action of an authorized representative of the Administrator in granting or denying a certificate may, within 15 days thereafter or within such additional time as the Administrator for cause shown may allow, file with the Administrator a petition for review of the action of such representative praying for such relief as is desired. Such petition for review, if duly filed, will be acted upon by the Administrator or an authorized representative of the Administrator who took no part in the proceeding being reviewed. All interested parties will be afforded an opportunity to present their views in support of or in opposition to the matters prayed for in the petition.

§ 607.112 *Petition for amendment of regulations.* Any person wishing a revision of any of the terms of the foregoing regulations may submit in writing to the Administrator a petition setting forth the changes desired and reasons for proposing them. If upon inspection of the petition the Administrator believes that reasonable cause for amendment of the rules and regulations is set forth, the Administrator will either schedule a hearing with due notice to interested persons or will make other provisions to afford interested persons opportunity to present their views in support of or in opposition to the proposed changes. The foregoing sections are issued pursuant to § 607.3 of the Regulations of the Wage and Hour Division and sections 8 (f) and 11 (c) of the Fair Labor Standards Act of 1938.

PART 331—MINIMUM PRICE SCHEDULE, DISTRICT NO. 11

MEMORANDUM OPINION AND ORDER GRANTING TEMPORARY RELIEF AND CONDITIONALLY PROVIDIG FOR FINAL RELIEF IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 11 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF THE LINTON NO. 23 MINE (MINE INDEX NO. 51) AND OF THE SPONSLER NO. 24 MINE (MINE INDEX NO. 78) IN DISTRICT NO. 11, FOR RAIL SHIPMENTS ORIGINATING ON THE PENNSYLVANIA RAILROAD

An original petition, filed with this Division by the above-named party, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, requests the establishment, both temporary and permanent, of price classifications and minimum prices for the coals of the Linton No. 23 Mine (Mine Index No. 51) and of the Sponsler No. 24 Mine (Mine Index No. 78) in District No. 11, for rail shipments originating on the Pennsylvania Railroad.

Mine Index Nos. 51 and 78 have heretofore been served only by the Chicago, Milwaukee, St. Paul and Pacific Railroad, and have been contained in Freight Origin Group No. 61. The Pennsylvania Railroad has recently completed the construction of a rail connection with these mines which enables such mines to originate shipments of coal on the Pennsylvania Railroad tracks.

Since the Linton No. 23 Mine and the Sponsler No. 24 Mine are now served by both the C. M. St. P. & P. Railroad and and the Pennsylvania Railroad, and can originate shipments of coal upon either railroad, such mines should no longer be included in Freight Origin Group No. 61, which freight origin group includes mines whose shipments originate only on the C. M. St. P. & P. Instead, in view of the joint rail service available they should hereafter be included in Freight Origin Group No. 68.

The price classifications and minimum prices currently in effect for the coals of the Linton No. 23 Mine and for the coals of the Sponsler No. 24 Mine for rail shipments originating upon the C. M. St. P. & P. Railroad will remain basically unchanged. However, since no price classifications or minimum prices have heretofore been established for the coals of the Linton No. 23 Mine, nor for the coals of the Sponsler No. 24 Mine for rail shipments originating upon the Pennsylvania R. R., the Director is of the opinion that temporary relief should be extended to such coals by the establishment of price classifications and minimum prices for shipments originating on the Pennsylvania R. R., pending final disposition of this matter.

It appears that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; that no petitions of intervention have been filed with this Division in the above-entitled matter; and that the following action is necessary in order to effectuate the purposes of the Act.

Now, therefore, it is ordered, That, pending final disposition of the above-entitled matter, temporary relief be, and the same hereby is, granted as follows: Commencing forthwith, § 331.5 (*Alphabetical list of code members*) is amended by adding thereto Supplement R–I, § 331.9 (*Adjustments in f. o. b. mine prices*) is amended by adding thereto Supplement R–II, and § 331.10 (*Special prices: Railroad locomotive fuel*) is amended by adding thereto Supplement R–III, which supplements are hereinafter set forth and hereby made a part hereof.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this Order, pursuant to the Rules and Regulations Governing Practice and Procedure before the Bituminous Coal Division in Proceedings Instituted Pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this Order, unless the Director shall otherwise order.

Dated: September 15, 1941.

PART 334—MINIMUM PRICE SCHEDULE, DISTRICT NO. 14

ORDER GRANTING TEMPORARY RELIEF AND CONDITIONALLY PROVIDING FOR FINAL RELIEF IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 14 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF CERTAIN MINES IN DISTRICT NO. 14

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, having been duly filed with this Division by the above-named party, requesting the establishment, both temporary and permanent, of price classifications and minimum prices for the coals of certain mines in District No. 14; and

The Director finding that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with the Division in the above-entitled matter; and

The Director deeming that this action is necessary in order to effectuate the purposes of the Act:

Now, therefore, it is ordered, That, pending final disposition of the above-entitled matter, temporary relief be, and the same hereby is, granted as follows: Commencing forthwith, § 334.5 (*Alphabetical list of code members*) is amended by adding thereto Supplement R, and § 334.24 (*General prices for shipment into all market areas*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

No price classifications and minimum prices have been established herein for the coals of the No. 2 mine of the Independent Coal Company, as it appears that this mine is the same as the Independent mine (Mine Index No. 54) for which price classifications and minimum prices were established, effective October 1, 1940.

The original petition proposed a "J" classification for Size Group 9 coal for all shipments except truck and a minimum price of $3.90 for Size Group 9 coal for truck shipment from the No. 3 mine (Mine Index No. 514) of J. H. Turnipseed. The original petition states that the coals produced at this mine are similar to those of the Quality mine (Mine Index No. 87) of the Quality Coal Company, for which a price classification of "G" in Size Group 9, for all shipments except truck, and a minimum price of $4.05, for truck shipments, have been established. It appears that price classification "G" and minimum price $4.05 are proper and should be established for the Size Group 9 coals of the No. 3 mine (Mine Index No. 514) in lieu of those proposed for such coals.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter and applications to stay, terminate or modify the temporary relief herein granted may be filed with the Division within forty-five (45) days from the date of this Order, pursuant to the Rules and Regulations Governing Practice and Procedure before the Bituminous Coal Division in Proceedings Instituted Pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this Order, unless the Director shall otherwise order.

Dated: October 6, 1941.

PART 335—MINIMUM PRICE SCHEDULE, DISTRICT NO. 15

ORDER GRANTING TEMPORARY RELIEF AND CONDITIONALLY PROVIDING FOR FINAL RELIEF IN THE MATTER OF THE PETITION OF DISTRICT BOARD NO. 15 FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR CERTAIN COALS PRODUCED IN DISTRICT NO. 15

An original petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, having been duly filed with this Division by the above-named party, requesting the establishment, both temporary and permanent, of price classifications and minimum prices for coals produced by certain mines in District No. 15; and

The Director finding that a reasonable showing of necessity has been made for the granting of temporary relief in the manner hereinafter set forth; and

No petitions of intervention having been filed with this Division in the above-entitled matter; and

The Director deeming his action necessary in order to effectuate the purposes of the Act;

It is ordered, That, pending final disposition of the above-entitled matter, temporary relief is granted as follows: Commencing forthwith, § 335.5 (*Alphabetical list of code members*) is amended by adding thereto Supplement R, and § 335.24 (*General prices in cents per net ton for shipment into all market areas*) is amended by adding thereto Supplement T, which supplements are hereinafter set forth and hereby made a part hereof.

The Big 4 Mine of Big Four Coal Co. (Dock Smith) in District No. 15, listed in the original petition is not included in the attached rail supplement, designated as "Supplement R," for the reason that minimum prices have been established in Docket No. A-980 for rail shipment for the coals produced at this mine.

It is further ordered, That pleadings in opposition to the original petition in the above-entitled matter, and applications to stay, terminate, or modify the temporary relief herein granted, may be filed with the Division within forty-five (45) days from the date of this Order, pursuant to the Rules and Regulations Governing Practice and Procedure before the Bituminous Coal Division in Proceedings Instituted Pursuant to section 4 II (d) of the Bituminous Coal Act of 1937.

It is further ordered, That the relief herein granted shall become final sixty (60) days from the date of this Order, unless the Director shall otherwise order.

Dated: September 30, 1941.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 59-37]

IN THE MATTER OF CENTRAL ILLINOIS PUBLIC SERVICE COMPANY

NOTICE OF AND ORDER INSTITUTING PROCEEDINGS

At a regular session of the Securities and Exchange Commission, held at its office in the City of Washington, D. C., on the 16th day of October, A. D. 1941.

The Commission having data in its official files and records establishing or tending to establish the following matters:

1. Central Illinois Public Service Company (hereinafter called Central) is a corporation organized under the laws of the State of Illinois and maintains a principal office in the City of Springfield, State of Illinois. Central is an electric and gas utility company within the meaning of Sections 2 (a) (3) and 2 (a) (4) of the Public Utility Holding Company Act of 1935 and is a subsidiary of The Middle West Corporation, a registered holding company under the Act.

2. As at August 31, 1941, Middle West owned 38,564 shares of $6 Preferred of Central, or 13.8% of the issue and 193,321 shares of the common or 74.26% of the issue. Halsey, Stuart & Co., Inc. owns the remainder of the common stock consisting of 67,022 shares or 25.74%, but has been exempted by the Commission from the duties and obligations of a holding company with respect to said holdings.

3. The capitalization and surplus of Central per balance sheet of August 31, 1941, were as follows:

	Principal amount or stated value	Per-cent
Funded debt	$47,000,000	54.0
Preferred stock	26,614,965	30.6
Common stock	10,413,720	11.9
Earned surplus (since Mar. 31, 1933)	[1] 2,978,548	3.5
Total	$87,007,233	100.0

[1] Subject to preferred dividend arrears aggregating $6,833,256 as at Aug. 31, 1941.

4. The $6 cumulative no par and 6% cumulative $100 par preferred stocks rank equally as to dividends, and in liquidation, each class has a liquidating value of $100 per share plus unpaid cumulative dividends.

5. The $6 issue is entitled on involuntary liquidation to $100 per share, but the stated value is $1,892,335 less than the total involuntary liquidation value of $27,914,300. The 6% issue, having the par value of $100, is stated at this amount on the books of the applicant, or $593,000. The company has prepared a balance sheet as of August 31, 1941, showing the interests of the preferred stockholders at a lesser figure than they would be entitled to in liquidation under the most adverse circumstances.

6. On September 30, 1938, when Central undertook its last refinancing it had preferred dividend arrears of $5,837,000, which was equivalent to $20.50 per share. On the basis of figures as at August 31, 1941 and submitted with an application filed by Central, pursuant to Section 6 (b) of the Public Utility Holding Company Act of 1935 (File No. 70-406), these dividend arrears are now $6,833,256, or $24 per share on each class of preferred stock.

7. The common stock equity as per books is stated to be as follows:

Common stock ($40 par)	$10,413,720
Paid-in surplus	63,146
Earned surplus since March 1, 1933	2,915,402
	13,392,268

8. Each share of common and preferred stock votes share for share on all questions at all times, each share having one vote. As of August 31, 1941, the distribution of voting power among the classes of stockholders and among owners was as follows:

CIPS issues	Total shares outstanding	Percent	Owned by Middle West	
			Number of shares	Percent of total
Common (par. $40)	260,343	47.76	193,321	74.26
$6 Pfd. (no par)	278,789	51.15	38,564	13.83
6% Pfd. (par $100)	5,930	1.09	----------	----------
Total shares having voting rights	545,062	100.0	231,885	42.54

9. Central has at present a plant account (including $1,930,000 intangibles) of $89,282,000
Less contributions for construction of 70,000
Utility plant less contributions 89,212,000
Reserve for depreciation 6,655,000
Percent of reserve to utility plant 7.46

It appears that the policy of Central in the past has resulted in a depreciation reserve which is inadequate to the extent of at least $2,266,000.

10. Central's property account includes at least $5,616,000 representing excess cost to the company over the cost of properties to affiliates.

11. There is presently carried on the books an item of unamortized debt discount and expense of $4,005,388 applicable to refunded issues as well as refunding issues. This amount is being amortized over the shortest of the lives of such issues.

It appearing to the Commission in the light of the foregoing that it is appropriate in the public interest and in the interest of investors and consumers to institute proceedings against Central pursuant to sections 11 (b) (2) and 15 (f) of the Public Utility Holding Company Act of 1935 in order to determine:

1. Whether the facts set forth above are true and accurate.

2. Whether it is necessary or appropriate in the public interest or for the protection of investors or consumers to require that Central restate its plant and investment, surplus, capital, and other accounts, pursuant to Section 15 (f) of the Public Utility Holding Company Act of 1935 and rules thereunder so as to segregate, dispose of, and eliminate writeups and intangibles in the plant investment and other accounts, set up adequate reserves for retirements and depreciation of plant and property, and make other adjustments in conformity with the Uniform System of Accounts of the Federal Power Commission and the standards of the Public Utility Holding Company Act of 1935.

3. Whether for the purpose of fairly and equitably distributing voting power among the security holders of Central pursuant to the provisions of section 11 (b) (2) of the Act, it is necessary or appropriate to require that Central shall revise and simplify its capital structure and take other steps to fairly and equitably redistribute voting power among its security holders.

4. Whether the treatment of debt discount and expense described in paragraph (11) above is proper in the circumstances.

It is ordered, That a hearing on such matters under the applicable provisions of the Act and rules of the Commission thereunder be held on November 24, 1941 at 10:00 a. m. at the offices of the Securities and Exchange Commission, 1778 Pennsylvania Avenue NW., Washington,

D. C. On such day the hearing room clerk in room 1102 will advise as to the room where such hearing will be held.

It is further ordered, That William W. Swift or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearing in such matter. The officer so designated to preside at such hearing is hereby authorized to exert all powers granted to the Commission under section 18 (c) of the Act and to a trial examiner under the Commission's Rules of Practice.

By the Commission.

IN THE MATTER OF CENTRAL ILLINOIS PUBLIC SERVICE COMPANY

ORDER PERMITTING DECLARATION TO BECOME EFFECTIVE

At a regular session of the Securities and Exchange Commission held at its office in the City of Washington, D. C., on the 14th day of October, A. D. 1941.

Central Illinois Public Service Company, a subsidiary of The Middle West Corporation, a registered holding company, having filed an application and amendments thereto pursuant to the Public Utility Holding Company Act of 1935, particularly section 6 (b) thereof and Rules U-23 and U-50 thereunder, regarding the issue and sale of $38,000,000 principal amount of its First Mortgage Bonds, Series A, 3⅜%, due October 1, 1971 and $9,000,000 principal amount of 2%, 2¾% and 3% unsecured notes due serially April 1, 1942–October 1, 1951, and the redemption of $38,000,000 principal amount of outstanding First Mortgage Bonds, Series A, 3¾%, due December 1, 1968 of the company and to the redemption (or payment at maturity) of $9,000,000 principal amount of outstanding Serial Debentures, 3½% and 4%, of the company, due serially December 1, 1941–December 1, 1948, funds for such redemption being provided by the issue and sale of the securities above described, together with other funds of the applicant to the extent required, the applicant to publicly invite proposals for the purchase of the bonds in accordance with the Commission's Rule U-50; and

Said declaration containing copies of the proposed letter to stockholders, notice of special meeting of stockholders, proxy and proxy statement and a full statement of the manner in which the solicitation is proposed to be made;

The applicant having requested that the declaration in respect of the proxy solicitation material be considered and disposed of independently of the principal transaction and that the Commission enter its separate order permitting the within declaration as to all such proxy solicitation material to become effective;

It appearing that the solicitation of authorizations of the preferred stockholders as proposed to be conducted does not make it necessary or appropriate in the public interest or for the protection of investors or consumers or to prevent the circumvention of the provisions of the Act or the Rules and Regulations thereunder that the Commission issue any order with respect thereto other than an order permitting the declaration as to such solicitation to become effective;

It is therefore ordered, That, without passing upon the merits of the application filed pursuant to section 6 (b), the declaration as to solicitation of authorizations be and it is hereby permitted to become effective forthwith.

By the Commission.

Petitions of intervention having been filed by District Boards 2, 3 and 6 and by Harmon Creek Coal Corporation, a code member in District 2;

A hearing having been held before a duly designated Examiner of the Division in Washington, D. C., on February 3, 1941;

The Examiner, Floyd McGown, having made and filed his Report, Proposed Findings of Fact, Proposed Conclusions of Law, and Recommendations in this matter, dated September 4, 1941, recommending that the relief prayed for by the original petitioners be granted;

An opportunity having been afforded to all parties to file exceptions thereto and supporting briefs, and no such exceptions or supporting briefs having been filed;

The Director having determined that the Proposed Findings of Fact and Conclusions of Law of the Examiner in this matter should be approved and adopted as the Findings of Fact and Conclusions of Law of the Director;

It is ordered, That § 322.9 (*Special Prices*—(c) *Railroad fuel*) and § 322.7 (*Alphabetical list of code members*) in the Schedule of Effective Minimum Prices for District No. 2 For All Shipments Except Truck and Supplement 2 thereto be and the same hereby is amended as follows:

The table of mine index numbers by groups as set forth in § 322.9 (c) in said Schedule and in § 322.7 in Supplement 2 thereto is amended by eliminating Mine Index Nos. 304 and 285 from Group 2 and by inserting Mine Index Nos. 304 and 285 in Group 4, so that the railroad fuel prices listed in § 322.9 (c) in said Schedule for Group 4 mines shall apply to the petitioners' Oakdale Mine (Mine Index No. 304) and Bulger Mine (Mine Index No. 295).

PART 328—MINIMUM PRICE SCHEDULE, DISTRICT NO. 8

MEMORANDUM OPINION AND ORDER APPROVING AND ADOPTING THE PROPOSED FINDINGS OF FACT AND CONCLUSIONS OF LAW AND RECOMMENDATIONS OF THE EXAMINER AND GRANTING RELIEF IN THE MATTER OF THE PETITION OF CONSUMERS MINING CORPORATION, A CODE MEMBER IN DISTRICT 8, FOR A RECLASSIFICATION OF ITS COALS FROM LOW VOLATILE TO HIGH VOLATILE

A petition, pursuant to section 4 II (d) of the Bituminous Coal Act of 1937, was duly filed with the Bituminous Coal Division by Consumers Mining Corporation ("Petitioner"), a code member in Subdistrict 9 (Low Volatile) of District 8, seeking a revision of the effective classifications and effective minimum prices established for certain coals (low volatile) in Size Groups 3 and 4 and for on-line railroad fuel, produced at its Premier Mine (Mine Index No. 377) in District 8.

An intervening petition was filed by Raven Red Ash Coal Company, a code member in Subdistrict 9 (Low Volatile) of District 8, requesting that whatever relief be granted to the Consumers Mining Corporation be granted in the same extent to the intervener.

A hearing was held before a duly designated Examiner of the Division in Washington, D. C., on December 17, 1940.

The Examiner made and entered his Report, Proposed Findings of Fact, Conclusions of Law, and Recommendations in this matter, dated August 15, 1941, recommending that the relief prayed for by the original petitioner and by the intervener be granted in part.

An opportunity was afforded to all parties to file exceptions thereto and supporting briefs. The petitioner filed exceptions to the Proposed Findings of Fact and Conclusions of Law of the Examiner but did not file a supporting brief.

Petitioner requested that the minimum f. o. b. mine prices applicable to the coals produced at its Premier Mine be reduced from $2.85 to $2.40 per net ton in Size Group 3 and from $2.50 to $2.25 per net ton in Size Group 4. The Examiner recommended that Size Group 3 be reduced in classification from "C" to "D" with a corresponding reduction from $2.85 to $2.70 per net ton and that Size Group 4 be reduced in classification from "A" to "D" with a corresponding reduction from $2.50 to $2.30 per net ton.

Petitioner excepts to the Findings of Fact by the Examiner with respect to Size Groups 3 and 4 and to the failure to recommend that full relief be granted. No brief is filed in support of this exception and no specific error is alleged. Petitioner merely charges that the Examiner's Findings are contrary to the evidence. On the basis of that allegation, I have reexamined the record and I find that the Proposed Findings of Fact of the Examiner are not alone not contrary to the evidence but are fully sustained by substantial evidence and that the exceptions of the petitioner are not well taken and should be denied.

Upon the basis of the record, I further find that the Proposed Findings of Fact and Conclusions of Law and Recommendations of the Examiner in this matter should be approved and adopted as the Findings of Fact and Conclusions of Law of the Director.

It is therefore ordered, That the exceptions of Consumers Mining Corporation to the Proposed Findings of the Examiner be and the same are hereby denied.

It is further ordered, That the Proposed Findings of Fact, and Proposed Conclusions of Law of the Examiner be and they are hereby approved and adopted as the Findings of Fact and Conclusions of Law of the Director.

It is further ordered, That § 328.21 (*Alphabetical list of code members*), § 328.22 (*General prices for low volatile coals*), and § 328.23 (*Special prices for low volatile coals*—(a) *Railway fuel*—(1) *For on-line railways, all uses*) in the Schedule of Effective Minimum Prices for District No. 8 for All Shipments Except Truck be, and the same hereby are amended as follows:

§ 328.21 *Alphabetical list of code members*—§ 328.22 *General prices for low volatile coals.* The price classifications now effective for the Premier Mine (Mine Index No. 377) of Consumers Mining Corporation, in District 8, Low Volatile, is modified by reducing Size Group 3 from "C" to "D" with a minimum price of $2.70 per net ton, and by reducing Size Group 4 from "A" to "D" with a minimum price of $2.30 per net ton f. o. b. the mine, for shipment to Market Areas 1 to 50, inclusive, 52 to 78, inclusive, 100 to 118, inclusive, 120 to 137, inclusive, 139 to 143, inclusive, 145 to 148, inclusive, 150 to 157, inclusive, and 200 to 254, inclusive.

§ 328.23 *Special prices for low volatile coals*—(a) *Railway fuel*—(1) *For on-line railways, all uses.* The effective minimum prices for the coals of said Premier Mine and for the No. 2 Mine (Mine Index No. 391) of Raven Red Ash Coal Company, in District 8, Low Volatile, is modified as follows: A minimum price of $1.90 per ton f. o. b. the mines shall apply on screenings larger than 1¼" x 0 but not exceeding 2½" x 0, for sale on-line to the Norfolk and Western Railway for use as railway fuel.

PART 335—MINIMUM PRICE SCHEDULE, DISTRICT NO. 15

ORDER CORRECTING TYPOGRAPHICAL ERROR IN ORDER ENTERED ON AUGUST 25, 1941, IN THE MATTER OF THE PETITION OF THE BIG FOUR COAL COMPANY, A CODE MEMBER IN DISTRICT NO. 15, FOR THE ESTABLISHMENT OF PRICE CLASSIFICATIONS AND MINIMUM PRICES FOR THE COALS OF MINE INDEX NO. 1301 IN DISTRICT NO. 15 FOR RAIL SHIPMENT

The Order Granting Temporary Relief and Conditionally Providing for Final Relief entered in the above-entitled matter on August 25, 1941, 6 F.R. 4663, contains the following typographical error:

In "Supplement R" annexed to and made a part thereof, the Big 4 Mine (Mine Index No. 1301) of the Big Four Coal Co. (Dock Smith) is included in Production Group No. 10 in District No. 15 whereas, in fact, this mine is located in Production Group No. 7 in District No. 15;

Now, therefore, it is ordered, That the Order of August 25, 1941, in the above-entitled matter, Granting Temporary Relief and Conditionally Providing For Final Relief, be, and it hereby is, corrected by the substitution of the figure "7" for the figure "10" in the column headed "Production Group No." in "Supplement R", § 335.5 (*Alphabetical list of code members*), of that Order.

In all other respects the aforesaid Order shall remain in full force and effect.

(2) The Producer or Supplier placing any such rated purchase order or contract and the Supplier selling the Material covered thereby must each retain endorsed copies of such purchase orders or contracts, segregated from all other purchase orders or contracts, for a period of two years from the dates thereof for inspection by authorized representatives of the Office of Production Management.

(2) Except as provided in paragraph (g) (5), no Producer shall, at any time, accept deliveries (whether or not rated pursuant to this Order) of any item of Material to be used as Operating Supplies or for Maintenance or Repair until the Producer's inventory and stores of items of Material of the same class, as carried on the Producer's books, have been reduced to a practical working minimum. Such practical minimum shall in no case exceed the aggregate dollar volume of items of Material of the same class, as carried on the Producer's books, in inventory and stores on December 31, 1940, or, at the Producer's option, at the close of the Producer's fiscal year ending during the calendar year 1940.

(3) Except as provided in paragraph (g) (5), no Producer shall, during any Calendar Quarterly Period, make withdrawals from stores or inventory of any items of Material to be used as Operating Supplies or for Maintenance or Repair the aggregate dollar volume of which shall exceed the aggregate dollar volume of the withdrawals of such items of Material of the same class, as carried on the Producer's books, during the corresponding quarter of 1940, or, at the Producer's option, 25% of the aggregate dollar volume of the withdrawals of such items of Material of the same class as carried on the Producer's books during the calendar year 1940.

(4) Notwithstanding the provisions contained in paragraph (g) (1), (2), and (3), a Producer may, upon application to and with the approval of the Director of Priorities, in any Calendar Quarter increase the aggregate dollar volume of deliveries accepted of Material for use for Maintenance and Repair or as Operating Supplies, withdrawals of Material for such use, or inventory of Material for such use over the aggregate dollar volume of deliveries, withdrawals or inventory of Material for such uses during the last preceding corresponding Calendar Quarter proportionately to the increase of the volume of goods or services produced or rendered by him in such quarters.

(5) Restrictions contained in paragraphs (g) (1), (2), and (3) shall not apply to any Producer during any Calendar Quarterly Period in which the total volume of his purchases or withdrawals of Material for Maintenance, Repairs, and Operating Supplies does not exceed $2,500.

(h) *Audits and reports.* (1) Each Producer or Supplier who applies the preference rating hereby assigned, and each person who accepts a purchase order or contract for Material to which the preference rating is applied, shall submit from time to time to an audit and inspection by duly authorized representatives of the Office of Production Management.

(2) Each such Producer or Supplier shall execute and file with the Office of Production Management such reports and questionnaires as said Office shall from time to time request. No such reports shall be filed until such time as the proper forms are prescribed by the Office of Production Management.

(i) *Utilities and mines excepted.* This Order is not applicable to any Utility defined as a Producer in § 978.1 *Preference rating order No. P-46*, nor to any Mine as defined in § 982.1 *Preference rating order No. P-56.* The Director of Priorities may from time to time specifically except further classes of Producers from this Order by specific direction.

In the event of revocation, or upon expiration of this Order, deliveries already rated pursuant to this Order shall be completed in accordance with said rating, but no applications of this rating to any other deliveries shall thereafter be made by the Producer or Supplier affected by said revocation or expiration.

(l) *Effective date.* This Order shall take effect immediately, and unless sooner revoked shall expire on the 1st day of April, 1942. (P.D. CHAPTER XI—OFFICE OF PRICE ADMINISTRATION

PART 1303—ZINC

PRICE SCHEDULE NO. 3—ZINC SCRAP MATERIALS AND SECONDARY SLAB ZINC

The Office of Price Administration is charged with the maintenance of price stability and the prevention of undue price rises and price dislocations.

The supply of both primary and secondary zinc is insufficient to satisfy the total defense and essential civilian demands. An increase in the price of primary slab zinc has been made in order to maintain and expand supply. It is necessary to revise the prices of zinc scrap materials and secondary slab zinc in order to maintain their proper relationship to the prices of primary slab zinc. After investigation and consideration it has been determined that the maximum prices set forth herein are fair and reasonable.

Accordingly, under the authority vested in me by Executive Order No. 8734, it is hereby directed that:

§§ 1303.1 to 1303.12, inclusive, are hereby renumbered and amended to read as follows:

§ 1303.1 *Maximum prices for zinc scrap materials.* On and after October 17, 1941, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer zinc scrap materials, and no person shall buy, offer to buy, or accept delivery of zinc scrap materials, at prices higher than the maximum prices set forth in Appendix A hereof, incorporated herein as § 1303.9.*

*§§ 1303.1 to 1303.10, inclusive, issued under the authority contained in Executive Orders Nos. 8734, 8875, 6 F.R. 1917, 4483.

§ 1303.2 *Maximum prices for secondary slab zinc.* On and after October 17, 1941, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer secondary slab zinc, and no person shall buy, offer to buy, or accept delivery of secondary slab zinc, at prices higher than the maximum prices set forth in Appendix B hereof, incorporated herein as § 1303.10.*

§ 1303.3 *Less than maximum prices.* Lower prices than those set forth in Appendices A and B of this Schedule may be charged, demanded, paid or offered.*

§ 1303.4 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery or transfer of zinc scrap materials, whether or not commingled with any foreign materials, or of secondary slab zinc, or in connection with a purchase, sale, delivery, or transfer of any other materials, or by way of any commission, service, transportation, or other charge, or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or otherwise.*

1303.5 *Records and reports.* Every person making purchases or sales of zinc scrap materials or secondary slab zinc after October 17, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year, complete and accurate records of:

(a) Each purchase or sale or zinc scrap materials, showing the date thereof, the name and address of the buyer or the seller, the price paid or received, the quantity, in pounds or tons, of each grade purchased or sold, and whether the quantity so sold or purchased was shipped, delivered, carried away, or received in a single shipment or shipments, as defined in Appendix A hereof, or otherwise;

(b) Each purchase or sale of secondary slab zinc, showing the date thereof, the name and address of the buyer or the seller, the price paid or received, the quantity, in pounds or tons, of each grade purchased or sold, and whether the quantity so sold or purchased was shipped, delivered, carried away, or received, in carload or less than carload lots; and

(c) The amount in pounds or tons of zinc scrap materials and, separately, the amount in pounds or tons of secondary slab zinc (1) on hand, and (2) on order, as of the close of each month.*

§ 1303.6 *Enforcement.* In the event of refusal or failure to abide by the price limitations, record requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of Government, both state and federal, are fully exerted in order to protect the public interest and the interests of those persons who comply with this Schedule, (c) that full advantage will be taken of the cooperation of the various political subdivisions of state, county, and local governments by calling to the attention of the proper authorities, failures to comply with this Schedule which may be regarded as grounds for the revocation of licenses and permits, and (d) that the procurement services of the Government are requested to refrain from selling to or purchasing from those persons who fail to comply with this Schedule. Persons who have evidence of the offer, receipt, demand or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation, or manipulation of prices of zinc scrap materials and secondary slab zinc, or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

§ 1303.7 *Modification of the price schedule.* Persons complaining of hardship or inequity in the operation of this Schedule may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom.*

§ 1303.8 *Definitions.* When used in this Schedule the term:

(a) "Person" means an individual, partnership, association, corporation, or other business entity;

(b) "Zinc scrap materials" means the kinds and grades of zinc scrap materials set forth in Appendix A of this Schedule; and

(c) "Secondary slab zinc" means the kinds and grades of secondary slab zinc set forth in Appendix B of this Schedule.*

§ 1303.9 *Appendix A, maximum prices for zinc scrap materials*—(a) *Maximum prices.*

Grade of Zinc Scrap Material	*Maximum Price (Per pound, f. o. b. point of shipment)*
New Zinc Clippings and Trimmings	7.25 cents
Engravers' and Lithographers' Plates	7.25 "
Old Zinc Scrap	5.75 "
Unsweated Zinc Dross	5.80 "
Die Cast Slab	5.80 "
New Die Cast Scrap	4.95 "
Radiator Grilles, old and new	4.95 "
Old Die Cast Scrap	4.50 "

The maximum prices established herein are the maximum prices to be paid for the zinc scrap materials enumerated above after the free iron and other foreign materials are removed.

(b) *Quantity premiums.* To the maximum prices set forth above, a premium of one-half (½¢) cent per pound may be added:

(1) On single shipments of 10,000 pounds or more of any one of the following grades, or of combinations thereof:
New Zinc Clippings and Trimmings
Engravers' and Lithographers' Plates
Old Zinc Scrap; and

(2) On single shipments of 20,000 pounds or more of any one of the following grades, or of combinations thereof:

Radiator Grilles, old and new
Old Die Cast Scrap

For the purposes of this Schedule the term "single shipment" means all deliveries made to a buyer within a period of 48 consecutive hours, excluding Sundays and Legal Holidays.

(c) *Terms of sale.* The maximum prices set forth above are f. o. b. point of shipment. Zinc scrap may, however, be sold, offered for sale, delivered or transferred at a price delivered buyer's cus-

tomary receiving point. In such cases, whenever the total delivered price exceeds the maximum f. o. b. point of shipment price fixed by this Schedule, in all price quotations (1) the transportation charge must be shown as a separate item, (2) the price f. o. b. point of shipment obtained by subtracting the transportation charge from the total delivered price must not exceed the maximum f. o. b. point of shipment price set forth in this Schedule, and (3) when delivery is made in the seller's conveyance, the transportation charge shall not exceed the lowest available commercial transportation rate for effecting the delivery.*

§ 1303.10 *Appendix B, maximum prices for secondary slab zinc*—(a) *Sold, or shipped, delivered, or carried away, in carload lots.*

Intermediate and higher grades	8.50 cents plus carload freight from E. St. Louis to buyer's customary rail receiving point.

(b) *Sold and shipped, delivered, or carried away, in less than carload lots.*

Grade	Maximum price (per pound, f. o. b. seller's plant or warehouse)
Prime Western and poorer grades	9.00 cents plus carload freight from E. St. Louis to seller's plant or warehouse.
Brass Special	9.10 cents plus carload freight from E. St. Louis to seller's plant or warehouse.
Intermediate and higher grades	9.25 cents plus carload freight from E. St. Louis to seller's plant or warehouse.

The above grades of secondary slab zinc are to be determined in accordance with the specifications of the American Society for Testing Materials.

The minimum quantity making up a carload lot for the purposes of this Schedule will be the minimum quantity required to obtain railroad carload lot rates from the point of shipment to the point of destination.*

These amendments shall become effective October 17, 1941.

Issued this 17th day of October 1941.

PART 1316—COTTON TEXTILES

PRICE SCHEDULE NO. 35—CARDED GREY AND COLORED-YARN COTTON GOODS

In June 1941, the Office of Price Administration, as a first step toward stabilizing prices for the major types of cotton textiles, issued Price Schedule No. 11, establishing maximum prices for six leading kinds of cotton grey goods. In August that Schedule was supplemented by maximum prices for other classes of grey goods. Now maximum prices are extended to further important types of grey goods, and to the principal types of cotton colored-yarn goods. For convenience, the carded-yarn fabrics already under maximum prices have been withdrawn from Price Schedule No. 11 and are included, along with numerous other textiles made of carded yarn, in this Schedule; grey goods made of combed yarns will continue to be covered by Price Schedule No. 11.

§ 1316.51 *Maximum prices for cotton goods.* On and after the applicable ceiling date (as set forth in Appendix A, incorporated herein as § 1316.61), regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer cotton goods, and no person shall buy, offer to buy, or accept delivery of cotton goods, at prices higher than the maximum prices set forth in Appendix A, except that:

(a) The maximum prices established herein are not applicable to sales or deliveries of cotton goods to any person or persons outside the United States, its territories and possessions;

(b) The maximum prices established herein are not applicable to sales or deliveries of cotton goods made by any wholesaler, jobber, or retailer in the performance of a recognized distributive function: *Provided*, That sales and deliveries of cotton goods (1) to a converter or finisher, or (2) by the manufacturer thereof or by any agent of such manufacturer, shall not be made at prices higher than the established maximum prices.*

*§ 1316.51 to § 1316.61, inclusive, issued pursuant to the authority contained in Executive Orders Nos. 8734, 8875, 6 F.R. 1917, 4483.

§ 1316.52 *Less than maximum prices.* Lower prices than those set forth in Appendix A may be charged, demanded, paid or offered.*

§ 1316.53 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery or transfer of cotton goods, alone or in conjunction with any other material, or by way of any commission, service, transportation, or other charge, or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or otherwise.*

§ 1316.54 *Records and reports.* Every person making purchases or sales of cotton goods after October 20, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year, complete and accurate records of (a) each such purchase or sale, showing the date thereof, the name and address of the buyer or the seller, the price paid or received, and the quantity in yards of each construction purchased or sold; (b) the quantity in yards of cotton goods (1) on hand, and (2) on order, as of the close of each calendar month; and (c) in the case of manufacturers, the quantity in yards or pounds of each construction of cotton goods manufactured during each calendar month.

Persons affected by this Schedule shall submit such reports to the Office of Price Administration as it may, from time to time, require.*

§ 1316.55 *Details required in contract of sale and invoice.* (a) Every seller of cotton goods shall, with respect to each sale thereof, deliver to the purchaser a contract of sale which shall contain, in addition to the terms thereof, (1) the date on which the sale or contract of sale was made; (2) a full description of each construction of cotton goods sold, including (i) the off-loom width; (ii) the off-loom cloth count; (iii) the number of yards per pound; (iv) where necessary to determine the applicable maximum price, the yarn numbers used in the warp and filling, or the average yarn numbers, as the case may be; and (v) where, in conformity with the Schedule, a premium is charged or deduction made, the feature of the goods or of their manufacture for which such premium is allowed or deduction required; and (3) the discount, if any, allowed for prompt payment.

(b) With each delivery of cotton goods the seller shall transmit to the purchaser an invoice or similar document which shall either contain the information required by paragraph (a) above or make reference to the document in which such information is set forth.*

§ 1316.56 *Affirmations of compliance.* On or before November 10, 1941, and on or before the 10th day of each month thereafter, every person, who during the preceding calendar month has purchased or sold cotton goods, whether for immediate or future delivery, shall submit to the Office of Price Administration an affirmation of compliance on Form 135:1, containing a sworn statement that during such month all such purchases or sales were made at prices in compliance with this Schedule or with any exception therefrom or modification thereof. Copies of Form 135:1 can be procured from the Office of Price Administration, or, provided that no change is made in the style and content of the form and that it is reproduced on 8 x 10½" paper, they may be prepared by persons required to submit affirmations of compliance hereunder.*

§ 1316.57 *Enforcement.* In the event of refusal or failure to abide by the price limitations, record requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of the Government, both state and federal, are fully exerted in order to protect the public interest and the interests of those persons who comply with this Schedule, and (c) that the procurement services of the Government are requested to refrain from selling to or purchasing from those persons who fail to comply with this Schedule. Persons who have evidence of the offer, receipt, demand or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation or manipulation of prices of cotton goods or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

§ 1316.58 *Modification of the schedule.* Persons complaining of hardship or inequity in the operation of this Schedule may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom.*

§ 1316.59 *Definitions.* When used in this Schedule, the term:

(a) "Person" means an individual, partnership, association, corporation, or other business entity;

(b) "Cotton goods" means cotton grey goods and cotton colored-yarn goods of the types and specifications for which maximum prices are established in Appendix A;

(c) "Ceiling date" means the date, as specified in Appendix A, on which this Schedule becomes effective with respect to any given fabric.*

§ 1316.60 *Effective date of the schedule.* This Schedule shall become effective October 21, 1941.*

1316.61 *Appendix A, maximum prices for cotton goods.*

The maximum prices set forth in paragraph (a) are applicable to such types of goods only when they are delivered pursuant to a sale or contract of sale entered into prior to the above-mentioned date; otherwise such goods are subject to the prices appearing in paragraph (b).

Paragraph (b) contains maximum prices for all cotton goods subject to this Schedule. As qualified by paragraph (c), these maximum prices are applicable to all transactions except those subject to paragraph (a).

(b) (1) *Determination of maximum price.* Except as provided in paragraph (a) above, and subject to the qualifications contained in paragraph (c), below, the maximum price for any offer to buy or sell, sale or contract of sale, delivery or transfer of cotton goods shall be determined in the following manner:

(i) *Offer to buy or sell.* By the spot cotton price[1] of the business day immediately preceding that on which the offer was made, except that, if the offering price is not otherwise specified, an offer to buy or sell at the maximum price applicable on the day the contract of sale is to be made shall not be a violation of the Schedule:

(ii) *Sale or contract of sale.* By the spot cotton price of the business day immediately preceding the day on which the sale or contract of sale is made, regardless of the maximum price applicable to the offer pursuant to which such sale or contract is made:

(iii) *Delivery or transfer.*[2] By the spot cotton price of the business day immediately preceding that on which the sale or contract of sale is made, regardless of any change in the spot cotton price subsequent thereto.[3]

[1] The term "spot cotton price," when used herein, means the average, published daily by the United States Department of Agriculture, Agricultural Marketing Service, of the price quotations for middling 15/16-inch cotton on ten designated spot markets.

[2] Except as provided in Paragraph (a), this method of determining the maximum price shall be used in connection with deliveries and transfers pursuant to sales or contracts of sale made before, as well as on or after, the applicable ceiling date.

[3] Sales under "open-price" contracts, pursuant to which the price is to be determined as of a date subsequent to that on which the contract is entered into, are permissible hereunder, provided that the contract (1) specifies the quantity of goods to be delivered and (2) fixes the exact date upon which the price is to be settled. In connection with such contracts the date on which the price is settled shall be regarded, for purposes of Paragraph (b), as the day on which the sale or contract of sale is made.

(4) *Maximum price tables.*

[1] The maximum prices set forth herein are for denims 28 or more inches in width. The maximum price for a denim of any lesser width shall be that price which stands in the same relation to the applicable price set forth herein (i. e., for the same cloth of 28-inch width) as does its width to 28 inches.

Maximum prices for denims of weights intermediate between those listed herein shall be determined by interpolation, according to weight, between the maximum prices set forth herein; maximum prices for denims of weights greater or less than any listed herein shall be determined, in proportion to weight, from the maximum price for, respectively, the heaviest or lightest denim listed in this table.

The maximum prices in this table are for denims of the following styles; White back (in all weaves except herringbone); express stripe; hickory stripe; and all other stripes made with white filling yarns.

In addition to the maximum prices appearing herein, a premium of ½ cent per yard may be charged for solid color denims; for striped denims made with 100-percent-colored filling yarns; and for denims of herringbone weave.

For seconds and short lengths of denim, the maximum prices listed in this table must be discounted as follows: Seconds, ½ cent; short lengths, 25 to 40 yards, inclusive, ¾ cent; 10 to 24.99 yards, 1 cent; 2 to 9.99 yards, 15 percent.

The maximum prices set forth herein shall be discounted (1) where payment is made within 10 days of delivery, by 3 percent; and (2) where payment is made within the next 60 days, by 2 percent and by interest at 6 percent per annum for such portion of the 60-day period as the buyer, at his option or pursuant to agreement with the seller, anticipates by earlier payment.

(c) (1) In addition to the maximum prices set forth in paragraph (b) a premium may be demanded, charged, paid, or accepted for cotton goods (other than window-shade cloth) made pursuant to specifications furnished by the buyer establishing special physical requirements which cannot be met by the same goods of commercial quality: *Provided*, That, except in accordance with permission granted under § 1316.61 (c) (3):

(i) The premium shall not exceed the highest differential in price charged (in cents over the then prevailing market price of the same goods of commercial quality) by the seller for goods of the same specifications during the 12 months immediately prior to June, 1941, or, if no such goods have been sold by the seller during that period, 5 per cent of the otherwise applicable maximum price;

(ii) No premium shall be charged hereunder, unless the specifications to which the goods are made were issued by the buyer prior to July 21, 1941.

(2) Every seller making a sale, contract of sale, or delivery of cotton goods at a price including all or part of any

premium permissible under § 1316.61 (c) (1) shall, on or before the 10th day of the succeeding month, file with the Office of Price Administration a sworn statement on Form 135:2 stating, with respect to each sale, contract of sale, or delivery made during the preceding calendar month, the date of the sale or contract of sale; the quantity of goods covered thereby; the date or dates when delivery is to be or has been made; the name of the manufacturer of the goods and of the buyer; the price agreed upon, charged, or paid; the buyer's specifications, in accordance with which the goods are made; the date of issuance thereof by the buyer; the use to which the goods are to be put; and the special physical requirements which are relied upon for the premium charged: *Provided*, That if a report, as required hereunder, is duly made of a sale, or contract of sale, or any delivery pursuant thereto, no report need be made of any subsequent delivery of the same kind of goods pursuant to such sale or contract of sale.

(3) Application may be made by any buyer, or, where goods have been sold but not delivered prior to the applicable ceiling date, by any seller to the Office of Price Administration for permission to pay or accept, in addition to the maximum prices appearing in paragraph (b), a premium for (i) cotton goods made to such buyer's specifications issued on or after July 21, 1941; (ii) specification goods of a kind not manufactured by a seller during the 12 months immediately prior to June 1941, and for which the buyer considers it fair to pay such seller a premium of more than 5 per cent over the otherwise applicable maximum price; (iii) cotton goods of a quality demonstrably superior to that of the same goods of staple commercial grade; or (iv) window-shade cloth. Such application shall state in detail (i) the specifications, if any, to which the goods are made; (ii) the use to which the goods are to be put; (iii) the reasons, if any, why goods of staple commercial quality would not be satisfactory for such use; and (iv) the person or persons, if any, from whom the goods were purchased and the premiums, if any, paid (in cents over the prevailing market prices of the same goods of commercial quality) for such goods during the 3 years preceding the application. Upon receipt of any such application the Office of Price Administration will permit any person affected by such application to file a written statement setting forth facts pertinent to the issue of whether permission to pay a premium should be granted, and if so, in what amount; and will conduct such further investigation as it deems necessary and proper. No permission will be granted hereunder unless it is shown that it is essential to the buyer's business to obtain goods of the type for which he seeks to pay a premium and that the seller is entitled to receive a premium for such goods, and unless the Administrator finds that production of such goods would not be inconsistent with the interests of national defense. Permission granted to any buyer or to any seller hereunder will constitute authority for the other to accept or pay, as the case may be, the premium approved therein. In granting any permission hereunder the Office of Price Administration will require appropriate reports to be filed by the buyer and seller.*

PART 1335—CHEMICALS

PRICE SCHEDULE NO. 36—ACETONE

The demand for acetone has increased sharply in recent months as a direct result of the National Defense Program. Acetone is not only essential in the manufacture of high explosives required by the armed forces but is also essential in the preparation of cellulose acetate rayon and many other products important for civilian use. The Office of Price Administration has ascertained that the tank-car price of acetone has increased from 6¢ at the beginning of this year to 7¢ per pound in the third quarter. Prices in excess of 7¢ per pound have been announced by certain large producers for the fourth quarter of 1941. The average price of acetone during 1940 was approximately 4⅞¢ per pound. After consultation with representatives of the industry, the Office of Price Administration has determined that there are no justifiable reasons for prices of acetone in excess of 7¢ per pound in tank-car quantities. Further increase in prices would, therefore, be inflationary.

Accordingly, under the authority vested in me by Executive Order No. 8734, it is hereby directed that:

§ 1335.301 *Maximum prices for acetone.* On and after October 27, 1941, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer acetone in containers of 50 gallons or more, and no person shall buy, offer to buy, or accept deliveries of acetone in containers of 50 gallons or more, at prices higher than the maximum prices set forth in Appendix A incorporated herein as § 1335.310.*

* §§ 1335.301 to 1335.310, inclusive, issued pursuant to authority contained in Executive Order 8734, 8875, 6 F.R. 1917, 4483.

§ 1335.302 *Less than maximum prices.* Lower prices than those set forth in Appendix A may be charged, demanded, paid or offered.*

§ 1335.303 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery, or transfer of acetone, alone or in conjunction with any other material or by way of any commission, service, transportation, or other charge or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or by alteration of formula or grades of acetone, or otherwise.*

§ 1335.304 *Records and reports.* (a) Every person making purchases or sales of acetone in containers of 50 gallons or more on or after October 27, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year complete and accurate records of each such purchase or sale showing the date thereof, and the name and address of the buyer or the seller, the prices paid or received, and the specifications and quantity, including the size of the containers, of the acetone purchased and sold.

(b) On or before November 10, 1941, and on or before the 10th day of each month thereafter, every producer of acetone, other than those engaged in the production of acetone synthetically, shall submit to the Office of Price Administration a report on Form 136:1 in the detail required by such Form showing the total production of acetone by such producer during the previous calendar month, the respective percentages of such total produced from molasses, corn, or other raw material, the cost of such raw material, and such other information as such Form shall require. Persons affected by this Schedule shall submit such other reports to the Office of Price Administration as it may from time to time require.*

§ 1335.305 *Affirmations of compliance.* On or before November 10, 1941, and on or before the 10th day of each month thereafter, every person, who during the preceding calendar month has sold acetone in containers of 50 gallons or more, whether for immediate or future delivery, shall submit to the Office of Price Administration an affirmation of compliance on Form 136:2, containing a sworn statement that during such month all such sales were made at prices in compliance with this Schedule or with any exception or modification thereof. Copies of Form 136:2 can be procured from the Office of Price Administration, or, provided that no change is made in the style and content of the Form and that it is reproduced on 8 x 10½ paper, they may be prepared by persons required to submit affirmations of compliance hereunder.*

§ 1335.306 *Enforcement.* In the event of refusal or failure to abide by the price limitations, record requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of the Government, both state and federal, are fully exerted in order to protect the public interest and interests of those persons who comply with this Schedule, and (c) that the procurement services of the Government are requested to refrain from selling to or purchasing from those persons who fail to comply with this Schedule. Persons who have evidence of the offer, receipt, demand, or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation, or manipulation of prices of acetone, or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

§ 1335.307 *Modification of the schedule.* Persons complaining of hardship or inequity in the operation of this Schedule may apply to the Office of Price Administration for approval of any modification thereof or exception therefrom.*

§ 1335.308 *Definitions.* When used in this Schedule the term—

(a) "Person" means an individual, partnership, association, corporation, or other business entity.

(b) "Acetone" means chemically pure acetone.*

§ 1335.309 *Effective date of the schedule.* This Schedule shall become effective October 27, 1941.*

§ 1335.310 *Appendix A, maximum prices for acetone.* The following maximum prices are established for acetone:

(a) *Eastern Territory*[1]

Tank cars	7¢ per pound delivered.
Drums, car-load lots	8½¢ per pound delivered, containers included.
Drums, less than car-load lots.	9¢ per pound delivered, containers included.

(b) *Western Territory** [1] The maximum prices established for acetone in Western Territory are the maximum prices established in Paragraph (a) for acetone in Eastern Territory plus ½¢ per pound.*

PART 1335—CHEMICALS

PRICE SCHEDULE NO. 37—NORMAL BUTYL ALCOHOL

As a result of conditions engendered by the National Defense Program, the demand for normal butyl alcohol has increased sharply in recent months. Normal butyl alcohol is an important chemical which is used in the manufacture of butyl acetate, lacquers, plasticizers and many other products. The price of normal butyl alcohol in tank-car quantities has increased from 8¢ per pound at the end of 1940 to 10¢ per pound in the third quarter of 1941. Certain producers have announced an additional increase to 11¢ per pound for the fourth quarter of 1941, and some sales have occurred at even higher prices. Further price advances are threatened.

After investigation and conferences with representatives of the butyl alcohol industry, the Office of Price Administration has found that there is no justifiable reason for a price of normal butyl alcohol in excess of 10¾¢ per pound. Further increases would therefore be inflationary.

Accordingly, under the authority vested in me by Executive Order No. 8734, it is hereby directed that:

§ 1335.351 *Maximum prices for normal butyl alcohol.* On and after October 27, 1941, regardless of the terms of any contract of sale or purchase, or other commitment, no person shall sell, offer to sell, deliver or transfer normal butyl alcohol in containers of 50 gallons or more, and no person shall buy, offer to buy, or accept delivery of normal butyl alcohol in containers of 50 gallons or more, at prices higher than the maximum prices set forth in Appendix A, incorporated herein as § 1335.360.*

* §§ 1335.351 to 1335.360 inclusive, issued pursuant to authority contained in Executive Orders Nos. 8734, 8875, 6 F.R. 4483.

§ 1335.352 *Less than maximum prices.* Lower prices than those set forth in Appendix A may be charged, demanded, paid or offered.*

§ 1335.353 *Evasion.* The price limitations set forth in this Schedule shall not be evaded whether by direct or indirect methods in connection with a purchase, sale, delivery or transfer of normal butyl alcohol, alone or in conjunction with any other material, or by way of any commission, service, transportation or other charge or discount, premium, or other privilege, or by tying-agreement or other trade understanding, or by alteration of formulae or grades of normal butyl alcohol, or otherwise.*

§ 1335.354 *Records and reports.* (a) Every person making purchases or sales of normal butyl alcohol in containers of 50 gallons or more on or after October 27, 1941, shall keep for inspection by the Office of Price Administration for a period of not less than one year, complete and accurate records of each such purchase or sale, showing the date thereof, the name and address of the buyer or the seller, the prices paid or received, and the specifications and quantity, including the size of the containers, of the normal butyl alcohol purchased and sold.

(b) On or before November 10, 1941, and on or before the 10th day of each month thereafter, every producer of normal butyl alcohol, other than those engaged in the production of normal butyl alcohol synthetically, shall submit to the Office of Price Administration a report on Form 137:1 in the detail required by such Form, showing the total production of normal butyl alcohol by such producer during the previous calendar month, the respective percentages of such total produced from molasses, corn, or other raw material, the cost of such raw material, and such other information as such Form shall require. Persons affected by this Schedule shall submit such other reports to the Office of Price Administration as it may, from time to time, require.*

§ 1335.355 *Affirmations of compliance.* On or before November 10, 1941, and on or before the 10th day of each month thereafter, every person, who during the preceding calendar month has sold normal butyl alcohol in containers of 50 gallons or more, whether for immediate or future delivery, shall submit to the Office of Price Administration an affirmation of compliance on Form 137:2, containing a sworn statement that during such month all such sales were made at prices in compliance with this Schedule or with any exception or modification thereof. Copies of Form 137:2 can be procured from the Office of Price Administration, or provided that no change is made in the style and content of the Form and that it is reproduced on 8 x 10½" paper, they may be prepared by persons required to submit affirmations of compliance hereunder.*

§ 1335.356 *Enforcement.* In the event of refusal or failure to abide by the price limitations, report requirements, or other provisions of this Schedule, or in the event of any evasion or attempt to evade the price limitations or other provisions of this Schedule, the Office of Price Administration will make every effort to assure (a) that the Congress and the public are fully informed thereof, (b) that the powers of the Government, both state and federal, are fully exerted in order to protect the public interest and the interests of those persons who comply with this Schedule, and (c) that the procurement services of the Government are requested to refrain from selling to or purchasing from those persons who fail to comply with this Schedule. Persons who have evidence of the offer, receipt, demand or payment of prices higher than the maximum prices, or of any evasion or effort to evade the provisions hereof, or of speculation, or manipulation of prices of normal butyl alcohol, or of the hoarding or accumulating of unnecessary inventories thereof, are urged to communicate with the Office of Price Administration.*

TITLE 41—PUBLIC CONTRACTS

CHAPTER II—DIVISION OF PUBLIC CONTRACTS

PART 202—MINIMUM WAGE DETERMINATIONS

IN THE MATTER OF THE EXTENSION OF THE DETERMINATION OF THE PREVAILING MINIMUM WAGES IN THE MANUFACTURE OF AIRPLANES, AIRCRAFT ENGINES, AND PROPELLERS TO INCLUDE CERTAIN AIRCRAFT PARTS AND ACCESSORIES AS DEFINED

This matter is before me pursuant to section 1 (b) of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C., Sup. III 35) entitled "An Act to provide conditions for the purchase of supplies and the making of contracts by the United States, and for other purposes," (hereinafter called the Act).

On December 14, 1938 by decision in the matter of the determination of the prevailing minimum wages in the manu-

---

[1] When used in this Schedule, the term "Eastern" territory shall mean the States of New Mexico, Colorado, Wyoming, Montana, and all states east thereof, and the term "Western" territory shall mean all other States of the United States.

[2] 6 F.R. 4822.

facture of airplanes, aircraft engines, and propellers (3 F.R. 3044) the prevailing minimum wage for that industry was found to be 50 cents an hour or $20.00 per week of 40 hours, arrived at either upon a time or piece rate basis. Thereafter, the Department received evidence showing that certain parts and accessories for military or large transport airplanes and engines or propellers therefor of the type indicated in the attached list of Class I Aircraft Parts, which parts are usually procured as spares on contracts for complete airplane engines or propellers, were manufactured by manufacturing processes and at wages similar to or identical with those prevailing in the production of completed airplane engines or propellers.

Interested parties were given until November 13, 1940 to show cause (5 F.R. 4377) why the decision for airplanes, aircraft engines, and propellers should not be extended to include the manufacture and finishing or supply of the parts and articles of the type named in the attached list of Class I Aircraft Parts. The time for filing such protests having expired and there having been no protests filed in response to the notice, and in the light of the information in the possession of the Department, as referred to above, I hereby extend the minimum wage determination of December 14, 1938 to include such parts and articles.

On May 1, 1941 notice issued (6 F.R. 2293) advising all interested parties that hearing would be held on May 8, 1941 to give them opportunity to show cause why the Secretary of Labor should not determine the prevailing minimum wage for the manufacture of Class II Aircraft Parts and Accessories of the types named in the attached list of Class II Aircraft Parts and Accessories, to be 50 cents an hour regardless of where manufactured, and why the Secretary of Labor should not determine the minimum wage for the manufacture of airplane ignition equipment to be 45 cents an hour regardless of where manufactured.

On May 8, 1941 a hearing was held in Room 3229, Department of Labor Building, Washington, D. C. Appearances were made and testimony was given at the hearing by the Aeronautical Chamber of Commerce, the Machinery Institute, individual members of the industry, and labor was represented by the International Association of Machinists, the United Auto Workers, the International Brotherhood of Electrical Workers, and the United Electrical and Radio Workers.

The evidence presented at the hearing shows that the bulk of Class II Aircraft Parts and Accessories is being made by the manufacturers of airplanes, aircraft engines, and propellers. The wage tabulations submitted at the hearing covered 30 plants employing 13,241 workers. Such fluctuation in plant minima as existed was within limited localities rather than in broad geographic regions. There was a spread in minima between competing plants in the same city. The evidence presented at the hearing showed that only 10 percent of the employees engaged in the manufacture of Class II Aircraft Parts and Accessories received less than 50 cents an hour, the determined prevailing minimum wage for the manufacture of airplanes, aircraft engines and propellers. Under these circumstances, and particularly because of the close affiliation between the manufacturing of airplanes, aircraft engines, and propellers and Class II Aircraft Parts and Accessories, the inclusion of the latter within the scope of my determination for the former seems justified and I hereby extend the determination of December 14, 1938 to include Class II Aircaft Parts and Accessories of the type named in the attached list.

I feel further that the evidence at the hearing and the briefs submitted subsequent thereto have indicated that there is no reason for the pronouncement of a separate minimum for the manufacture of ignition equipment. The evidence shows that the wage structures in the manufacture of ignition equipment and the manufacture of Class II Aircraft Parts and Accessories are essentially similar. As a matter of fact, all known manufacturers of ignition equipment, except one, either paid at the time of the hearing 50 cents an hour or more as a minimum wage or have indicated that they have no objection to the inclusion of ignition equipment with Class II Aircraft Parts and Accessories. The Aeronautical Chamber of Commerce in its brief filed in this matter stated that "none of the manufacturers of ignition equipment covered by this determination has either requested, suggested, or desired a separate wage determination for this type of product [ignition equipment]." The Aeronautical Chamber of Commerce is shown to represent all known manufacturers of ignition equipment with the exception of two. One of the two pays a minimum in excess of 50 cents an hour. The other has filed a brief in opposition to the proposed determination of a 45 cent minimum for ignition equipment on the ground that the minimum as proposed in the notice is altogether out of line with its wage practices. Its protest against the 45 cent rate proposed in the notice runs with greater force of course against the determination of a higher rate, but in the light of the facts that I have recited and of the further fact that this company is located in the same city with another manufacturer paying higher wages I feel that there is no force in its brief.

I hereby determine:

§ 202.23 *Aeroplanes, aircraft engines, propellers, accessories, and manufacturing and finishing of parts; Class I aircraft parts; Class II aircraft parts and accessories including ignition equipment.* The minimum wage for Class I Aircraft Parts, Class II Aircraft Parts and Accessories including ignition equipment, shall be the same as that heretofore applicable to the manufacture of airplanes, aircraft engines, and propellers; namely, 50 cents an hour or $20.00 per week of 40 hours, arrived at either upon a time or piece rate basis, provided that apprentices may be employed at lower rates if their employment conforms to the standards of the Federal Committee on Apprenticeship.

Nothing in this determination shall be interpreted as abrogating any obligations that may have accrued under the terms of the determination of December 14, 1938 for the manufacture of airplanes, aircraft engines, and propellers.

Nothing in this determination shall affect such obligations for the payment of minimum wages as an employer may have under the Fair Labor Standards Act of 1938 or any wage order thereunder, or under any other law or agreement, more favorable to employees than the requirements of this determination.

This determination shall be effective and the minimum wage hereby established shall apply to all contracts subject to the aforesaid Act of June 30, 1936 for Class I Aircraft Parts and Class II Aircraft Parts and Accessories including ignition equipment, bids for which are solicited or negotations otherwise commenced on and after November 18, 1941.

Dated: October 18, 1941.

Secretary.
